CONSUMPTION AND CHEST DISEASES.

The number of deaths from tuberculosis in the United Kingdom and the rate per 100,000 of the population for each year since 1915 were as follows :—

Year.	Deaths.	Rate per 100,000.
1915	54,295	151·5
1916	53,858	152·9
1917	55,934	162·4
1918	58,073	169·4
1919	46,312	125·8
1920	42,545	112·8

The fall in the rate of 56·6 per 100,000 between 1918 and 1920 is attributable partly to the cessation of the War and consequent better living conditions, and partly to the valuable work done by Local Government Authorities. The increase of facilities for the treatment since 1912 is as follows :—

Year.	No. of beds in public institutions.	Dispensaries.
1912	1,500	8
1918	6,749	375
1921	9,879	470

At the same time the beds in voluntary institutions increased from 2,800 in 1912 to 7,568 in 1921, a total increase of beds from 4,300 in 1912 to 17,447 in 1921.

LIFE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, and of eight Colonial companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked O in this column, and those having an Industrial branch are indicated by letters I. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches.

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 31 December, 1922.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 12½%, of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is less Income Tax except where marked (G)—gross.

VALUATIONS.—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H^m and O^m, and the corresponding Tables $H^{m(5)}$ and $O^{m(5)}$ which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and $O^{m(5)}$ tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

FIRE INSURANCE RATES.

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, *1s. 6d.*

Household goods therein, usually *2s.*

Policies are issued by a number of companies embracing all risks incidental to private houses, in one amount.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from *2s.*

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from *2s.*

Private Dwelling Houses, brick and timber built and tiled or slated, in no hazardous proximity, from *2s. 6d.*

Most fire insurance companies transact accident and miscellaneous business, and if a strong company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. A number of fire offices are prepared to issue policies of an inclusive character for household purposes, combining in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

INCOME TAX ALLOWANCES ON PREMIUMS PAID.

Where an allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax on the "Taxable Income" (i.e., that part of the income on which the tax is actually charged—the first £225 of the taxable income being charged at half the standard rate of tax; the remainder at the standard rate of tax). The allowance is made on the premiums paid, and is calculated at the following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916, irrespective of the claimant's total income; and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000. The *Repayments* of Income Tax on account of Life Insurance Premiums are shown for a series of years on p. 363.

BONUSES.

The following table shows the average annual rate of Bonus declared on Whole Life and Endowment Assurances for £100. In each case the rate given is in respect of a policy effected at age 30 next birthday, and the Endowment Bonus is based on a Policy maturing at age 60. It will be noticed, in the case of the Offices whose Valuations are made quinquennially, that the last Valuation included part of the War period, when conditions were abnormal. Owing to the depreciation in securities, and the strain of War claims, etc., some Offices were only able to grant a low rate of Bonus, whilst others declared no Bonus at all. At the next Valuation, however, these Offices should resume their pre-War rate at least, but intending Assurers would be well advised to ascertain the possibilities of this before effecting a Policy.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses can either be payable with the sum assured, applied to reduce the premium, or surrendered for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—see first page of Life Assurance section.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 with profits at the age of 55 or 60, or at death, if previous.

IMMEDIATE ANNUITIES.

THIS Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to *day of death*. Some Companies pay whole or part of stamp duty. See note as to rates on introductory page.

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

ADVICE REGARDING LIFE ASSURANCE.

Apart from the immediate protection thereby given, a life or endowment assurance policy, if effected in a first-class bonus-paying company, provides exceptional opportunity for the remunerative investment of savings. Policyholders can claim relief from Income Tax in respect of life assurance premiums not exceeding in amount one-sixth of their income, where the death risk is involved.

The selection of the office best suited to requirements and likely to produce the best results should be carefully made, but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies. There are many good offices, and in the most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made.

Medical examinations are sometimes dispensed with in the case of new proposals, but policies in these instances are usually subject to certain restrictive conditions of a temporary character.

INQUIRIES.—On receipt of an inquiry containing particulars of requirements (accompanied by 5s.) addressed to "The Insurance Editor, 12, Warwick-lane, E.C. 4," advice will be given as to the system and policies best adapted to the special requirements. Inquiries should state the age at and date of next birthday. The following are suggested as the policies most likely to be required:—

(*a*) *Whole Life*—With and without profits.
(*b*) ,, ,, —With limited number of payments.
(*c*) ,, ,, —Reduced premium for first 5 years.
(*d*) *Endowment*—With and without profits.
(*e*) ,, —Reduced premium for first 5 years.
(*f*) *Children's Insurances*—Educational, &c.
(*g*) "*Non-Medical*" Insurances.

GENERAL REGULATIONS.

Unpaid Packets (*letters, newspapers, post-cards*) are charged *double postage* on delivery; Underpaid Packets, *double the deficiency.*

Re-direction.—(1) By agent of addressee: *Letters, post-cards, printed papers, and newspapers* may be re-posted free not later than the day after delivery (Sundays and public holidays not being counted), and must not have been opened or tampered with. *Parcels* may be re-directed free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being regarded for this purpose as one Town Delivery Area); otherwise they are charged on delivery at the ordinary prepaid rate. *Registered packets*, which must be taken to a Post Office, are re-*registered* free only up to day after delivery. (2) By the Post Office (not undertaken during temporary absence, unless house be left empty, or from clubs, hotels, &c.). Notice for re-direction of *letters*, &c., must be given on printed forms, to be obtained from the local postmaster or from postmen, and signed by the person to whom the letters are to be addressed. The notice holds good for twelve months, and may be extended by payment of 1s. for second, 1s. third, and 5s. each subsequent year. Separate forms must be filled in for *parcels*, and for the (postal) forwarding of *telegrams.*

Registration.—All kinds of postal packets intended for registration must be marked "Registered" in bottom left-hand corner, and *must be handed to an officer of the Post Office, and a receipt taken.* Parcels (or the string with which they are tied) and letters, must be fastened with wax or other adhesive. The registration fee is 3d. exclusive of postage. With a further 3d. the sender may obtain advice of delivery. The latest time for registering is usually half an hour before the latest time for posting ordinary packets; at Head Offices this may be done later for an additional 6d. late fee. Unregistered packets found to contain coin or jewellery, or any marked "registered" and found in a letter-box, undergo compulsory registration (3d.), carrying no compensation.

Compensation for loss or damage is granted, though not as a legal right even if fee is paid and packing adequate.—The fees for *compensation inclusive of registration* are:—Fee 3d., compensation up to £5; 4d., £20; and 1d. for each additional £20 up to the maximum 1s. 11d. for £400. *Compensation* up to £2 is given on (*a*) *unregistered parcels* (for loss, only if certificate of posting is obtained at the time of posting), (*b*) *unregistered packets* conveyed by Express Delivery Service No. (1). Compensation in respect of *money* of any kind (*coin, notes, orders, cheques, stamps, &c.*) is only given if particulars (for identification) are kept and the money is sent by Registered *Letter* Post in one of the special envelopes sold officially (*see* next page); the maximum compensation for *coin* is £5. Compensation for *jewellery, watches, &c.*, is only given on *registered* packets; for *glass, crockery, greases, colour-powders, fish, meat, fruit, and vegetables* only when sent as *parcels.* Compensation is not given for *damage* to (1) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles, in any case; (2) registered packets other than parcels, unless "*Fragile, with care*" is written above the address.

Certificate of Posting unregistered parcels, free; other unregistered postal packets, ½d.

Express Delivery Service.—There are five services of which (4) and (5) alone are available on Sundays:—(1) By special messenger all the way, from most offices which deliver telegrams. Inclusive charge, *which must be prepaid*, in cash or by stamps, 6d. per mile, or part of a mile, with 1d. on each *separate* packet after the first, up to ten, the maximum; also a special charge of 3d. on each packet over 1 lb. in weight. Live animals, liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram *gratis.* (2) By special messenger after transmission by post: (*a*) from the ordinary delivery office, if it is a telegraph office (maximum charge in London 6d.); or *if so marked*, (*b*) "Express Delivery from Head Office" in large provincial towns, and (*c*) in London "from Head District Office" or "from G.P.O." Charges as before (without weight fee) in addition to postage. (3) In advance of the ordinary deliveries upon previous application by addressee (6d. per mile for one packet, and 1d. for every ten or less additional packets). (4) *see* p. 381. (5) By special messenger, of a message telephoned to an express delivery office (30 words for each express fee, besides telephone charges), (*see* p. 381). For (1), packets must be handed over the counter with "Express" clearly marked in left-hand top corner; for (2), may be handed in or posted, and must be marked "Express," with a broad vertical line back and front. Waiting fees: 10 minutes free; each additional 15 minutes or part thereof, 2d. For Sundays and Holidays, *see* p. 381.

Railway Letters.—On payment of 4d. extra at a Parcel or Booking Office of most railways, during such hours as the station is open, whether on week-days or Sundays, a letter not exceeding 2 oz. will be forwarded, and passed on from one company to another at a junction, by the next available train or steamship. The letter may be called for at the station of address, or posted there in the nearest letter-box, or (except on Sundays) delivered as an Express Letter under Service 2*a* (or from the first Express

Delivery office it reaches), or (by telegraphing for a messenger to meet it) under Service 1.

Disposal of Undelivered Postal Packets.—*Inland packets chargeable with a postage of* 1½*d. or more*, undelivered, are returned unopened if bearing sender's name and address; others are opened by the Returned Letter Office and returned to senders without charge. Packets containing neither sender's address nor any enclosure of importance are destroyed, except parcels which, if not applied for, are generally disposed of after 3 months; or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 1d.* are redelivered to sender on payment of a second postage, if his name and address, with a request for return in case of non-delivery, appear on the outside; those without such request are disposed of. *Foreign letters, &c., undelivered in Britain*, are returned unopened, after a short detention, to the countries whence received; *parcels* are disposed of after a reasonable time for inquiry. If containing sender's address, he is advised, and parcel will be returned on payment of fresh postage. *British packets undelivered abroad* are returned to sender here on payment of charges due; but for *parcels see* p. 375.

Poste Restante (solely for the accommodation of strangers and travellers and for three months only).—Correspondence of any kind may be addressed as a rule to all Post Offices except Town Sub-Offices. It should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, or fictitious names, or Christian name only, it is not taken in, but is at once treated as undelivered. All persons applying for "Poste Restante" letters must furnish sufficient particulars to ensure delivery to the proper owner. Poste Restante letters, parcels, &c., from abroad, or letters at a seaport for an expected ship, are kept two months; others, only one fortnight. After these intervals they are treated as undelivered (*see* above), unless bearing a request for return at end of the interval, or some specified *shorter* period.

Letter Post.

The Normal Post of the Country. Most things may be sent by it (except explosive, offensive or obscene matter, eggs, fish, game, rabbits, meat, fruit, and vegetables) (*see* p. 373).

Post Cards.

Postage, 1*d*. The left-hand half of the address side may be used for correspondence [the same holds for abroad]. Plain cards (maximum size 5½ × 3½, minimum 4 × 2¾ in.), like but not thinner than official cards, may also be used both inland and abroad. Reply postage, 2*d*.

Printed Papers Post (*see* p. 372).

For printed or written matter not in the nature of a letter, and not exceeding 2 lb.

By this post may be sent books, *printed* commercial forms, *e.g.*, invoices, receipts, estimates, share transfer notices, applications for employment; deeds and agreements; circulars; Christmas, &c., cards and "picture post-cards"; MS., proofs and examination papers with corrections, drawings or photographic prints (when not on brittle or fragile substance); together with the legitimate binding or mounting, and anything necessary for safe transmission. The cover, if any, must be capable of easy removal and replacement for purposes of examination, i.e., without breaking, tearing, ungumming, or cutting; and the packet *must contain no communication in the nature of a letter;* any writing must refer solely to subject-matter of the document, or consist of formulas of courtesy or of a conventional character not exceeding five words or initials.

Circulars in imitation typewriting are only admissible by this post under special conditions.

Newspaper Post (*see* p. 372).

For newspapers registered at the G.P.O.

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page. Newspapers not registered at G.P.O., Christmas or special issues of registered newspapers, or supplements apart from their ordinary publications, may be charged at printed paper, letter, or parcel rate.

Parcel Post.

For bulky and heavy matter (*see* p. 373). The parcel should be marked "Parcel Post." and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be inside or (not too prominent) on the outside of every parcel. More than 11 lb. must not be accepted from one person by a rural postman on foot or bicycle, without notice on the previous day, and he may refuse parcels if already loaded; a postman with a cart must accept what he can conveniently carry.

Parcels to Northern Ireland, Irish Free State, Channel Is. or I. of Man are liable to customs duty; the sender must, except in last case, declare contents when posting. 6*d*. customs clearance fee is charged on parcels from I.F.S. or Channel Is. delivered in Britain or N. Ireland.

Literature for the Blind.

Papers, periodicals and books, if printed in special type and subject to certain conditions of posting, marked outside "Blind Literature," with name and address of sender; 1 lb., ½*d*.; 5 lb., 1*d*.; 6¼ lb. (maximum), 2*d*. Maximum size, 2 × 1 × 1 ft., or if a roll 30 × 4 in.

STAMPS, ENVELOPES, POST CARDS, &c.

Postage Stamps (used also for receipts, telegrams, and certain Inland Revenue duties up to 2*s*. 6*d*.—*for list of latter see p.* 387) are sold of the respective values of ½*d*., 1*d*., 1½*d*., 2*d*., 2½*d*., 3*d*., 4*d*., 5*d*., 6*d*., 9*d*., 10*d*., 1*s*., 2*s*. 6*d*., 5*s*., and 10*s*. Books of 18 1½*d*. stamps, with 6 each of 1*d*. and ½*d*., 3*s*. Rolls of ½*d*., 1*d*., and 1½*d*. stamps (480 joined sideways, 500 and 1,000 lengthwise) are also sold at 2*d*. and 4*d*. extra. Stamps may be purchased at most offices between 9 a.m. and 7 p.m., and at any office open for telegraph business. Rural postmen carry ½*d*., 1*d*., and 1½*d*. stamps and registered letter envelopes.

Registered Letter Envelopes for foreign and inland letters, with a 4½*d*. embossed stamp (for registration and postage), are of four sizes: F, 5¼ in. × 3¼ in., 5*d*. each; G, 6 in. × 3¾ in., 5½*d*. each; H, 8 in. × 5 in., 6*d*. each; K, 11½ in. × 6 in., 6½*d*. each.

Letter Cards with 1½*d*. stamp, one 2*d*.; 2, 3¾*d*.; 5, 9*d*.

Cut-out and Spoiled Stamps.

Embossed or impressed postage stamps (except of Queen Victoria's reign) cut out of envelopes, post-cards, letter-cards, newspaper-wrappers, or telegram forms may be used as adhesive stamps in payment of postage provided they are not imperfect, mutilated, or defaced in any way. Stamps are considered defaced when marked on the face with any written, printed, or stamped characters. Stamps may, however, be perforated with initials for identification. Embossed or impressed Inland Revenue stamps cannot be used in payment of postage. and stamps indicating the payment of a registration fee may only be used for registered correspondence.

Applications for the recovery of the value of spoiled or unused stamps, whether postage, revenue, or insurance, can be made to the Postmaster at most large Post Offices.

LONDON POSTAL ARRANGEMENTS.

The Metropolis is divided for postal (not telegraphic) purposes into eight Head Districts, each comprising the number of Delivery Districts indicated below:—

East Central (E.C.)	4	North Western (N.W.)	10
West Central (W.C.)	2	South Eastern (S.E.)	27
Eastern (E.)	17	South Western (S.W.)	19
Northern (N.)	22	Western (W.)	14

To avoid delay in delivery, the initials of the Head District, and the number of the proper delivery office should appear in the address of all *postal* packets. Each Head District has a Head Office (addresses given on pp. 214-5), Branch Offices, and others, the total number of offices in the London Postal Area being about a thousand.

For *Sunday* arrangements, *see* p. 381.

POSTAGE, &c., ABROAD.

N.B.—In certain Dominions and Foreign Countries the rates of postage *to* Great Britain are higher than those *from* Great Britain given below.

Letters.

The letter rate *from* Great Britain to British Dominions generally,* to countries outside the Postal Union,† and to Egypt, Tangiers and Wei-hai-wei, to the United States and Territories (but not Panama zone or island Dependencies), as well as to H.M. Forces on the Rhine, and H.M. Ships in Foreign Waters (address c/o G.P.O., London, E.C. 1) is 1½*d.* the first ounce and 1*d.* for each succeeding ounce or fraction. The charge to *all other destinations* is 2½*d.* the first ounce and 1½*d.* per ounce afterwards. Limits of size: to Foreign Countries in the Postal Union,† except Egypt, **18** in. in any direction; elsewhere, **2** × 1½ × 1½ ft.; but if in form of a roll, limits in all cases **30** in. × **4** in. diameter. Max. weight now **4** lb.

Post Cards.

Postage 1½*d.* single, **3***d.* reply. (*See also p.* 373.)

Reply Post-Cards must have the heading "Carte Postale avec réponse payée," on first half, and on the second half (available only to the country of origin) "Carte Postale—réponse."

Reply Coupons.

For the purpose of prepaying replies to letters, coupons (**3***d.* each) may be bought at any Money Order Office in this country. Two coupons are exchangeable in any country in the Postal Union † for stamps representing a "single rate letter" from that country to another, but must be exchanged within **6** months (**2** months if both countries are in Europe).

Books, Newspapers, Samples, &c.

(*a*) PRINTED PAPERS: Newspapers, Books, Catalogues, Photographs, Engravings, Music, and other wholly printed matter, ½*d.* per **2** oz. For *Literature for the Blind*, in other respects considered as a Printed Paper, the rate abroad is ½*d.* per lb. up to 2½*d.* for **5** lb.; 6½lb. (max.), **3***d.*

(*b*) SPECIAL MAGAZINE POST for magazines, newspapers, and trade journals sent to CANADA *by direct packet*, and thence (or direct) to NEWFOUNDLAND, if properly registered for such post (this is frequently indicated on the outside of the magazine) and packed without a cover, or with cover open at both ends, otherwise complying with conditions for Inland Newspaper Post mentioned on p. 373. These packets cannot be registered. Rate: **2-6** oz., **1***d.*; 1½ lb., 1½*d.*; and ½*d.* per ½ lb. up to **5** lb., **5***d.*

(*c*) COMMERCIAL PAPERS: Legal and mercantile documents, MSS., invoices, etc., partly written, ½*d.* per **2** oz.; minimum charge of 2½*d.*

---

* Including all places in the lists under "Imperial British Parcel Rates" below. This rate applies also to Dubai and Koweit on the Persian Gulf.

† Afghanistan, Bahrein, Friendly Is. (Tonga), Johore, Muscat, Nigeria, Nyasaland, N. Rhodesia, Pitcairn I., Trengganu, are not in the Postal Union

(*d*) PATTERNS (*bonâ fide*), SAMPLES, AND SCIENTIFIC SPECIMENS, keys, fresh-cut flowers, &c., ½*d*. per 2 oz.; minimum charge of 1*d*.

To the British Empire, Egypt and countries not in the Postal Union,† the limits are: Size, (*a*), (*b*) and (*c*) 2 × 1½ × 1½ ft., (*d*) 2 × 1 × 1 ft.; weight, generally 5 lb. To countries in the Union: Size, (*a*) and (*c*) 1½ × 1½ × 1½ ft., (*d*) 12 × 8 × 4 in.; weight, (*a*) and (*c*) 4 lb., (*d*) 1lb. If in the form of a roll, the limits of size in all cases are: (*a*) and (*c*) 30 × 4 in., (*d*) 12 × 6 in. Postage must be prepaid. Wholly unpaid packets are *stopped*. Double the deficit (minimum, 30 centimes gold equivalent) is charged on underpaid packets. Regulations as to packing, writing, &c., are much similar to those for inland packets.

Parcels from abroad.

These are subject to British Customs examination and duties (if any), with a fee of 6*d*., must be paid before delivery to addressee.

Parcels sent abroad.

Enquiries should always be made at a P.O., or the P.O. Guide consulted, before packing. Parcels can be (and if containing coin, jewellery, &c., *must* be) *insured* for many countries, but not registered. They are subject to *Customs*, and contents and value must be declared on special forms; undervaluation or other inaccuracy may lead to confiscation and heavy fines (especially U.S.A.). (Rebate of Customs Duty is allowed on British goods by the chief Colonies.) The Customs charges of Dominions and certain countries (not U.S.A.) can be prepaid by sender, on depositing generally one-fifth to one-half of declared value, otherwise they are collected from addressee. *Packing must be substantial*, and sometimes special kinds of packing are insisted upon. Certain articles are *prohibited*; among them letters nearly everywhere.

Delivery in many countries is only to a post office, station, or customs house, whence addressee, who is notified of its arrival, must arrange conveyance. In Belgium, France, and Spain parcels are delivered by the railway companies. From most British possessions, and many foreign countries (*e.g.*, all listed under Cash on Delivery Service, p. 376, except Falklands, Iceland, Switzerland, Tobago), including also U.S.A. and Dependencies, but not Italy, Spain, or Portugal, an *undeliverable* parcel is returned at once at sender's expense, *unless*, when posting, he instructed *either* its abandonment or its delivery at an alternative address. Warehousing fees and (rarely) the foreign customs duty are sometimes payable, the return postage always.

To most countries the maximum length is 3 feet 6 inches; length and girth combined 6 feet (New Zealand (lower rate), Pitcairn I., Tonga, and Apia, 4 feet). For Paraguay, Portuguese Timor, and St. Pierre and Miquelon the maximum length is 2 feet, length and girth combined 4 feet. For Italy and Argentine, maximum length 2 feet, except where girth does not exceed 2 feet or 8 inches respectively, when length may reach 3 feet 3 inches.

* Rate to Bushire, B. Abbas, Lingah, Mohammerah, Douzdap.

† Casablanca, Fez, Marrakesh, Mazagan, Mogador, Rabat, Safi in French, Larache, Tetuan in Spanish zone.

General Regulations: Foreign and Colonial Post.

DUTIABLE ARTICLES (except in certain cases) must be sent by Parcel or Insured Box Post.

REGISTRATION (except parcels and magazine post) is in force to almost all countries. Fee, 3*d.* Compensation on registered packets up to £2 is paid in the case of entire avoidable loss while in the custody of a country in the Postal Union (*see* † *p.* 375), if claimed within a year.

INSURANCE (including, except for parcels, REGISTRATION) may be effected on packets to many countries (not U.S.A.) at the following rates:—5*d.* for £12; and 2*d.* for every additional £12 up to 5*s.* 11*d.* for £400. COMPENSATION up to £1 is also given on *uninsured* parcels to or from Egypt, Newfoundland, India and the smaller colonies, with many larger foreign countries, except U.S.A. if certificate of posting is produced. Only securities, etc., can be insured by *letter* post; *other* valuable articles should be sent as insured parcels, or as "insured boxes" (*see* below):—

INSURED BOX POST.—Jewellery and similar articles (*not* money, bearer securities, letters, or commercial papers) may be sent in strong boxes by letter mails to Austria, Belgium, Danzig, Denmark, Egypt, France, Germany, Holland, Hungary, Italy, Luxembourg, Palestine, Portugal, Sarre, Sweden, Switzerland. Postage 2*d* per 2 oz. (minimum 6*d*.); maximum weight 2lb., size 12×4×4 in. Customs declarations must be filled in. Insurance rates and limit as above.

CASH ON DELIVERY.—A reciprocal service of "cash on delivery" of parcels has been established between the U.K. and the following: Aden, Algeria, Bahamas (Nassau only), Barbados, Belgium, Bermuda, Brit. Guiana, Brit. Honduras, Brit. Somaliland, Ceylon, Corsica, Cyprus, Denmark, Egypt, Falkland Is. (Port Stanley only) Fiji Is., France, Gambia (£20), Gibraltar, Grenada, Hong Kong, Iceland, India, Jamaica, Kenya and Uganda, Leeward Is., *Fed.* Malay States, Malta, Mauritius, Morocco (Tangier only), New Zealand, Norway, N. Borneo, Nyasaland (£20). Rhodesia, N. (6 places), Rhodesia, S., St. Lucia, St. Vincent, Sarawak (£30), Seychelles, Str. Settlements, Sudan (£20), Sweden, Switzerland Tobago, Trinidad, Zanzibar. Fees for collection: 4½*d.* for Trade Charge (amount to be collected) not exceeding £1, with 2½*d.* extra for each additional £1 of Trade Charge up to the maximum, which is £40 (fee 8*s.* 6*d.*) where not otherwise shown in above list. Addressee has generally also to pay on delivery besides Customs if any, 4*d.* (as in U.K.) to 9*d.* fee (not prepayable). If Trade Charge cannot be collected at first or one alternative address, parcel is returned at sender's expense unless abandonment is definitely requested.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (locally including parcels) to or from certain countries (*e.g.* West and Central Europe (except Spain), and Union of S. Africa), or certain towns in the same, has now been arranged. **6*d*.** is paid by the sender, the rest by addressee.

Air Mail Services change frequently; latest information should therefore always be obtained from the nearest Head Office. Their general scope, however, may be gathered from the following notes, showing services which have been in operation at one time or another during 1923; those marked ° have been already discontinued at time of going to press. The hour of closing of mail at G.P.O., London, is given; and relative time of delivery is shown after each destination. An *unofficial* note of proposed developments at the Croydon Aerodrome, which should, if carried out, extend the facilities for Air Mails and Parcels, will be found at the foot of p. 381.

(1) Every week-day, **11.0** a.m.; London to (*a*) *Paris* (evening), and most of *France* (next morn), also saving up to **24** hours for *Spain, Austria* and *Balkan Peninsula*; — (*b*) ° (later altered to **6.0** a.m.°) *Brussels* and *Antwerp* (aft. or even.); — (*c*)° *Rotterdam* and *Amsterdam* (even.), most of Holland (even. or next morn), also saving up to **24** hours for *Germany* (N. and Central), *Sweden, Norway* (exc. W.), *Czecho-Slovakia, Russia, etc.*; — (*d*)* *Cologne* (aft. or even. for Rhine Army, also for civilians if "express"). (2) Every week-day, **6.0** a.m.; London to (*a*) *Rotterdam* and *Amsterdam* (aft.), most of *Holland* (even.); — (*b*) *Cologne* (aft. or even.); (*c*) (Air Fee **3*d*.** per oz.) *Hamburg* and *Berlin* (next morn.; same even. if "express"), many other places in *Germany* (next morn.), and saving up to **24** hours for *Denmark, Norway, Sweden*, also (saving at present uncertain) for *Czecho-Slovakia, Austria, etc.* (3) Daily, **7.30** a.m.; Toulouse to *Casablanca* (morn. of next day but one), and saving **2–4** days for Morocco (exc. Tangier and Spanish M.). Air Fee: ½ oz., **3*d*.**; 3½ oz., **6*d*.**; and **3*d*.** each further 3½ oz. (4) Alternate Thurs., **6.0** p.m.; Cairo to *Bagdad* (tenth day), saving up to **16** days for *Iraq* and *Persia* (N. and W.—Tehran, Isfahan, etc., as far as Bushire). Air Fee: **6*d*.** per oz.

It should be noted that where ordinary mails are frequent, and the air passage short (*e.g.* to France, Holland and Belgium) time is saved by air mail only if packet reaches G.P.O., London, between the closing of the ordinary mail (*see* p. 374) and that of the next following air mail; "Air Mail" letters which would arrive sooner if forwarded by the ordinary mail are so forwarded unless clearly marked otherwise.

The special Air Fee is **2*d*.** per oz., except where otherwise shown above. Except parcels (*see* below), any kind of packet can be sent by air mail, registered or unregistered, but cannot be insured. "By Air Mail" must be very prominently marked (preferably on special labels obtainable *gratis*), and the Air Fee *prepaid*, as well as (if any) the express fee **6*d*.** (*see* preceding section). Special markings are necessary for services (3) and (4).

Air Parcels are accepted for (1) *Paris only* (not the rest of France), delivery by Handley Page Co. (charge to addressee **1·25** fr. within, **5** fr. without the city walls) Fee (inclusive of everything else): "non-express," **1*s*. 6*d*.** to **4*s*. 3*d*.**; "express," **1*s*. 9*d*.** to **6*s*.**; (2) *Holland* (any part), express only, saving **2–3** days. Fees (all-inclusive): **3**lb., **3*s*. 6*d*.**; **7**lb., **6*s*. 6*d*.**; **11**lb., **9*s*.**

MONEY AND POSTAL ORDERS.

The Chief Money Order Office is at Manor Gardens, Holloway, N. 7.

Advice of Payment: **2*d*.** for inland, **3*d*.** for foreign and colonial orders (to certain countries). Payment may also be stopped: Fee, **4*d*.**

Inland Ordinary Money Orders.

The poundage charged is, for sums not exceeding **£3, 4*d*.**; **£10, 6*d*.**; **£20, 8*d*.**; **£30, 10*d*.**; **£40** (maximum), **1*s*.** No order may contain a fractional part of **1*d*.** The rules and regulations are on the forms issued. *No poundage is charged for M.O. in payment of many Customs, Excise and Inland Revenues (including Income Tax)* if the official "notice to pay" is produced, or of Savings Certificates.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams. Poundage at the same rate as for Ordinary Inland Money Orders, *plus* supplementary fee of **2*d*.**, and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for porterage must be prepaid.

Postal Orders.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week-days. They are also issued and paid in almost all parts of the Empire, in Egypt, and at the British Agencies in Morocco († p. 376 except Rabat) including Tangier. They are *paid* (but not *issued*) at **53** Canadian offices, in Iraq, and (to soldiers only) in Australia. They are issued, with a counterfoil to be retained by the sender, for every **6*d*.** up to **20*s*.**, and for **21*s*.** Poundage: **6*d*.** to **2*s*. 6*d*.**, **1*d*.**; **3*s*.** to **15*s*.**, **1½*d*.**; **15*s*. 6*d*.** upward, **2*d*.** The name of payee must be inserted. They must be presented for payment within **3** months from last day of the month of issue, or a fresh poundage will be charged. Adhesive British Postage Stamps (*not* perforated, and not exceeding **3** in number) may (except for Canada) be affixed to the *face* of an order, to increase its value by **1, 2, 3, 4** or **5** pence. Half-pence are not paid.

Ordinary Money Orders Abroad.

These, which are payable in nearly all countries, should be taken out **1** or **2** days before despatch of mail. Poundage, **£1, 6*d*.**; **£2, 1*s*.**; **£3, 1*s*. 6*d*.**, and thereafter **3*d*.** per **£1** or part thereof. Limits of amount, **£20** or **£40**. Period of validity, **6–12** months.

Telegraph Money Orders Abroad.

Only to certain countries, *e.g.*, to Canada, India and U.S.A., but certain towns only in Australia, New Zealand, South Africa, Egypt and Palestine. Poundage at same rate as for Ordinary Money Orders abroad, *plus* cost of official Telegram of Advice (at deferred rate if desired, in most British Possessions), *plus* supplementary fee of **6*d*.** for Newfoundland and foreign countries, **1*s*.** for British Possessions (for Canada **6*d*.** if the telegram is sent at full rates).

TELEGRAMS.

Inland.

Telegrams may be handed in at a telegraph office, or, if prepaid, posted or handed to a rural postman. Rate throughout British Isles, **12** words or less **1*s*.**, each further word **1*d*.**; the address, which may be telephonic, is charged for (an abbreviated address may be registered for **£2** per annum). Payment in stamps affixed to the form by the sender. Original or redirected telegrams, or replies, handed in on *Sundays*, and (except in Scotland) *Good Friday, or Christmas Day* are charged **6*d*.** extra. Replies may be prepaid up to **48** words; the voucher issued to addressee may be used, or its value refunded to sender, within **12** months. Receipt for charges **1*d*.** Certified copy **6*d*.**, sometimes more. The charge includes delivery within **3** miles (**1** in Irish F.S.) of the nearest telegraph office, or, if this be a head office, within the town postal limits—beyond that limit the charge is **6*d*.** per mile, calculated from the free delivery limit, to be paid by sender (in I.F.S. by addressee). Telegram forms are issued gratis

Usual hours 9 a.m. to 7 p.m.; larger offices 8 a.m. to 7 p.m. (*see* below and p. 381). For Sunday and Holiday telegrams, *see* above, below, and p. 381.

LATE FEES.—A telegram may often be got through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: 1*s.* for the telegraphist, 1*s.* for the messenger, and 6*d.* an hour for the telegraphist if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1*s.* for the postmaster, 1*s.* for the telegraphist, and 1*s.* for a messenger if it be necessary to call the telegraphist.

COUNTING, &c.—Plain language, *i.e.*, Latin or any modern European language, is charged for according to the number of words; all other words or unintelligible combinations of letters are charged one word *per* 5 letters. *The following count one word*:—(1) All names of towns and villages in U.K. (*not* of branch or sub-offices or districts in towns, unless in addition to street name); (2) all names of railway and coastguard stations (*not* in towns) with public telegraph; (3) words *ordinarily* written as one or with hyphen, including "couldn't," etc.; (4) *Names* with prefix "St.," "De," "De la," "O'," "Mac," but not hyphened surnames; (5) each five *figures* (th, &c., in ordinals count as two figures); (6) each initial, *except* London Postal Districts (p. 374)—A.M.—P.M.—H.M.S. (in address), which are one word each group; (7) signs of punctuation, and the symbols a/c, b/l, s/s, c/o (% counts as one word or as three figures); (8) names of telegraph offices abroad if (and written in the form in which) they occur in the International List of Telegraph Offices.

NIGHT TELEGRAPH LETTERS in plain language, for delivery (except on Sundays) by first morning post, may be sent before midnight between towns whose *Head Telegraph Offices* are open always (*see* below), at 1*s.* for 36 words or less, and 1*d.* per 3 words beyond 36.

Abroad.

In the following list the names of countries or places are followed first by the ordinary or FULL RATE per word (minimum charge, 10*d.*) from any part of the United Kingdom, whether transmitted by cable or by radio-telegraphy (wireless). Various OTHER RATES are then given (indicated by signs referred to in footnotes).

Besides the *Imperial Cable* to Canada, W. Indies, Australia, New Zealand, etc., the State maintains several public wireless services to the Continent, as well as that from Oxford to Cairo. (*See* p. 380).

Rules for counting of words are more or less as for inland. *In address*, name of terminal office coming under class (8) p. 378 counts as one word. In plain-language telegrams (which must be in roman characters) 15 letters, in code 10, in cipher 5 is the maximum number counting as one word. *Prepaid Replies* (minimum 10*d.*) are allowed from most places, but not at any Reduced Rate. The indication for this "RP," counting as one word, must be paid for ("RPD" if Urgent *q.v.*).

URGENT TELEGRAMS or replies, at three times Full Rates, are allowed to or from all places or regions in the list *except* those followed by the sign *nu*, and *except* by Marconi or North Atlantic Cable Cos. Minimum charge, 2*s.* 6*d.*; the word "Urgent" must be paid for. Where the Urgent Service is not available, PREFERRED TELEGRAMS are accepted for certain places under which, in the list, the sign *p* occurs, followed by the increase beyond ordinary rate.

REDUCED RATES: (*A*) *Deferred Telegrams*, in plain English (indication LOO, charged one word) French (LCF), or sometimes language of country of destination (LCD), are accepted at (usually) *half* the Full Rate on condition that they may, if necessary, be deferred during transmission in favour of Full-rate Telegrams. This service applies to all regions, places, or rates in the list *except* (i) Europe (ii) those marked thus §. When the deferred rate is other than half the full rate it is given next after the sign *d*. (Deferred rates are not available for radio-telegrams.) (*B*) *Week-end Letter Telegrams* (TWT) normally delivered on Monday mornings, must reach Central Telegraph Office, London, by Saturday night; *Night Letter Telegrams* (TLT) may be handed in at any time of any day, for delivery next morning (unless it be Sunday): *Day Letter Telegrams* (DLT) are for delivery not *less* than 48 hours after acceptance. The "indication" (shown above) must be paid for (one word) according to the kind of letter telegram sent. The signs *twt*, *tlt*, *dlt* in the list below follow the full rates of the countries to which the respective services extend; the two prices following the sign denoting (i) the cost of the first 20 words or less (ii) the rate for each further word.

EUROPE§: *Albania* –/4; *Andorra* –/2½; *Austria* –/3½; *Belgium* –/2½ (c –/4 *m*); *Bulgaria* –/4 (c –/3 *m*); *Czecho-Slovakia* –/3½; *Danzig Free City* –/3 (c –/4 *m*); *Denmark* –/2½ (c –/3 *m*); *Esthonia* –/4½ (c –/3); *Finland* –/4 (c –/3 *m*5); *Fiume* –/2½; *France* –/2½ (c –/4); *Germany* –/3 (c –/4); *Gibraltar* –/3 (c –/6); *Greece*, with Eubœa and Poros –/6 or –/4½ *y* (c –/4 *m*), Corfu, Crete, –/6, –/5 *y*, Chios, Icaria, Imbros, Lemnos, Mytilene, Samos, Tenedos –/6½, –/5½ *y*; other Greek Islands –/6½, –/5 *y*; *Holland* –/2½ (c –/4 *m*); *Hungary* –/4; *Italy* –/2½ (c –/6); *Lettonia* (Latvia) –/4 (c –/2½ *m*8); *Liechtenstein* –/2½; *Lithuania* –/3½; *Luxembourg* –/2½; *Memel Territ.* –/3½; *Norway* –/2½ (c –/3 *m*);

N.B.—For explanations of symbols in table, *see* p. 380.

RADIOTELEGRAPHIC SERVICES.

The principal Radiotelegraphic Services are:—*Trans-Atlantic*. For all parts of America, for Australia and New Zealand; to *Cairo* (for Egypt and beyond); to *Amsterdam, Berlin and Cologne, Berne, Bucarest, Budapest* (including the service *viâ* Yugo-Slavia for Greece and Greek Islands), *Hapsal* (Esthonia), *Madrid, Paris, Posen* (Poland and Danzig), and *Sarajevo* (Yugo-Slavia and Bulgaria). The rates for these are included in the foregoing table of rates for Telegrams Abroad.

Radiotelegrams (i.e. to or from Ships at sea).[§§]

The *Address* of a radiotelegram should contain name of addressee, of ship, and of coast-station to be used. Messages for H.M. Navy must have "Warship" before the ship's name, and the name of coast station *must* be given. (If unknown, it may be obtained from the Secretary, Admiralty, London, by reply-paid telegram or letter stating proposed date of sending of message.) In the case of the Mercantile Marine, "Steamship" should precede the name if confusion with name of some telegraph office is otherwise possible; but if name of nearest coast station is uncertain the message may yet be got through by other means (*see* Notes 1 and 2). *Prepayment of Replies* is admissible except for messages through Athens or St. Pierre and Miquelon. *Counting of words*, etc., is subject to the rules for ordinary Telegrams Abroad; the name of ship and (if written in standard form) name of coast station count as one word each.

The *Cost of Transmission (per word)* from any telegraph office is the sum of three rates: rate for cable or other message to the coast station (denoted by *t* below); coast station charge (*c*); and ship charge (*s*). The charges and services may be classified as follows:—

A. Ordinary Distance: 1. *Through Post Office coast stations*[*] (range about 200 miles): (*t*) + (*c*) = 7*d*. Ship charges (*s*) are as follows:—(i) H.M. Navy, *nil*; (ii) ships of of most nationalities, including British 4*d*.; (iii) Argentine, Belgian, Dutch, Greek, Norwegian, Portuguese and Swedish ships, 4*d*., but with a minimum equal to the charge of 10 words (40*d*.): (iv) Spanish ships, 3*d*., with a minimum equal to 10 words. 2. *Through coast stations abroad*: (*t*) = rate for *full-rate* telegram to the country in which coast station is situated (*see* list under heading Telegrams Abroad, p. 378); (*c*) which varies from 2½*d*. to 9*d*., is given in the same list, at the end of each reference to a country possessing a coast station, after the sign *c* (*see* Note 3); (*s*) is the same as given under *A* 1 (*s*).

B. Long-distance Communication with ships beyond range of ordinary stations: 1. *Viâ P.O. station "Devizesradio"* (range about 1,500) to or from certain ocean liners (at present about 203; rates same as under *A* 1. 2. *Viâ P.O. station "Oxfordradio"* (which must appear in address) at night only (range about 2,500 miles or more) to the above-mentioned 203 liners, as well as 317 others. The ships are unable to reply to this station; rates, (*t*) + (*c*) = 1*s*. 2*d*., (*s*) = same as under *A* 1 (*s*). 3. *Viâ*

† *Viâ* Marconi 3*d*. (def. rate 1½*d*.) less.
‡ *Viâ* Marconi 4*d*. (def. rate -/2*d*.) less.
¶ *Viâ* Brazilian Land Lines, 3*d*. (def. rate 1½*d*.) less.
** *Viâ* Marconi 2*d*. less than full rate (no def. rate).

c, m.—Coast-station charges. *See* "Radiotelegrams" below.

d, p.—*See* "Deferred Telegrams" and "Preferred" do. respectively (p. 378).

nu.—*See* "Urgent Telegrams" p. 378.

tr.—"TR," charged as one word, must appear in address.

twt, tlt, dlt.—Letter Telegrams. *See* "Reduced Rates (*B*)," p. 378.

vm, vi.—Denote "*viâ* Marconi," "*viâ* Indo-European Co.," respectively.

w.—*Viâ* P.O. Wireless -/3 (def. rate, where any, 1½*d*.) less.

y.—Denotes rate *viâ* Yugo-Slavia.

[§§] The term "Radiotelegram," as used in the official Postal Guide, denotes only a message to or from a ship at sea, and includes no other kind of radiotelegraphic message.

[*] Cullercoats, Fishguard, Grimsby, Land's End, Malin Head, Niton, North Foreland, Portpatrick, Seaforth, Valentia, Wick.

Marconi Station "*Clifdenradio*" (which must appear in address), at night only (range 2,000 miles) to ships which are beyond range of ordinary P.O. coast stations, and are not fitted with apparatus capable of receiving from Oxford or Devizes; rates as under *B* 2. 4. *Vid* "*Louisburgnovascotia*" (which must appear in address) to those of the 203 liners mentioned under *B* 1, which are in the N. Atlantic services, when out of range of Devizes; rates (*t*) = 9*d*., (*c*) = 5*d*., (*s*) = same as under *A* 1 (*s*).

C. Reduced rates for cross-Channel and short-voyage Ships: 1. *Through home stations* the *inclusive* (inland, coast and ship) rates per word are as follows, *in each case subject to a minimum charge* equal to that for 10 words: (*a*) to 322 such ships 3½*d*.; (*b*) to 99 ships, 5½*d*.; (c) to *Mecklenburg* PDA, *Oranje Nassau* PDE, *Prins Hendrik*, *Prinses Juliana* PDF, 2½*d*.; (*d*) to *Batavier II, III, IV, V, VI*, 3*d*. 2. *Through foreign coast stations* for the same groups of vessels respectively: (*a*) Charges calculated as under *A*2, but ship charge is reduced to 1*d*., with minimum of 10*d*. [Exceptions in group (*a*) are (i) To the 8 Dover-Ostend Packets, through Antwerp or Ostend, *t* = 2½*d*.; *c* + *s* = 2*s*. 6*d*. for 10 words or less, 2*d*. each further word; (ii) To 17 cross-Channel boats through Boulogne, Cherbourg or Havre, *t* = 2½*d*.; *c* = 1½*d*.; *s* = 4*d*.] (*b*) Charges calculated as under *A* 2, but ship charge is 1½*d*., with a minimum of 1*s*. 3*d*. (*c*) and (*d*) Through Scheveningen Haven the *all-inclusive* charge per word is (*c*) 10 words or less (3*s*. 4*d*.) + (2½*d*. per word); over 10 words, 6½*d*. per word; (*d*) 10 words or less (3*s*. 9*d*.) + (2½*d*. per word); over 10 words, 7*d*. per word.

Note 1.—In the case of services *A* 1 and *B* 1, but *not C* 1, the word "Wireless" may be substituted for name of P.O. coast station.

Note 2.—Messages intended to pass through ordinary-distance coast stations in Newfoundland or *east* coast of Canada (not Louisburg) may have "Montreal" in place of the name of any particular station; similarly those for coast stations on east coast of Canada (except Cape Race) or either coast of U.S.A. may bear "Newyork." The total inclusive charge in both cases is 1*s*. 11*d*. per word.

Note 3.—If *m* follow the coast-station charge shown after *c* in list, and not otherwise, this charge is subject to a minimum equal to the cost of 10 words; but if a number follow the *m*, then the minimum is equal to the cost of that number of words. Thus (*c* –/2 *m* 8) denotes a coast-station charge of 2*d*. per word, with a minimum of 16*d*.

SUNDAY AND HOLIDAY ARRANGEMENTS.

On SUNDAY throughout the U.K. *no Parcel Post, Money and Postal Order*, or *Savings Bank* business is transacted, nor is there any delivery even to callers of letters, etc., except by Express Services (4) and (5) below. *In London* all but 28 post offices are closed. These open in the morning, 26 of them (including those mentioned in the next paragraph, on p. 378, or on pp. 214-5, also in evening (stamps, telegrams). About 63 stations, chiefly S. of the Thames, besides those on p. 378, send telegrams, mostly at train times. There is a general collection for Mon. mails and deliveries between 10 p.m. and midnight. Correspondence for Sun. night mails, if not posted in time for last Sat. collections, must bear an extra ½*d*. stamp and be either (*a*) posted in special boxes at one of 24 among the 28 offices already referred to as open on Sundays, or at one of 5 other offices, up to times ranging from 4.45 p.m. to 6 p.m. [it may be registered at the counter of the same 24 offices not less than 5 minutes before closing of box]; or (*b*) posted in special boxes up to 6 p.m, at Cannon St., St. Pancras, Victoria (S.E.); or (*c*) posted at sorting carriage at the appropriate terminus (among those mentioned under "London Postal Arrangements: Late Fees" p. 374, up to times ranging from 8.25 p.m. to 9.30 p.m.; [registration may be effected at the sorting carriage up to the same times on payment of an additional late fee of 1*s*. 6*d*.]. *Outside London* all Head Offices and most country telegraphic Sub-offices open from 8.30–10 a.m. for stamps, telegrams (Scotland 9–10 a.m.); but all town sub-offices and usually all non-telegraphic offices, are closed. Many railway stations send telegrams at train times. There is a collection and night despatch in most towns.

Express Sunday Delivery (Service 4) is available *only* in and to London and a few Head Offices in the Provinces. The offices marked *x* on p. 378, together with the following in London, complete the list: G.P.O., W. and S.W. District Offices, and among Branch Offices: Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Stratford, and Swiss Cottage. Packets (other than parcels) are accepted up to time of posting for general Saturday night mails; fee 1*s*., besides postage and usual express fees (calculated in London from G.P.O.—6*d*. to 5*s*. 6*d*.). Express Delivery of a telephoned message (Service 5, p. 372), is on Sundays restricted to the London Postal District; but if addressee is a telephone subscriber in the London Telephone Area, a message reaching "Central Telegraph Office, London, E.C. 1," onSunday morning will be telephoned to him, if the envelope be marked conspicuously "For Sunday telephone delivery," with a broad perpendicular line back and front, and if the usual postage be prepaid on the envelope, and 3*d*. per 30 words or part thereof be paid by stamps affixed to the enclosed paper bearing the message.

CHRISTMAS DAY and GOOD FRIDAY.—*In London* there is one morning delivery of letters, parcels, &c., on Christmas Day; none, even to callers, on Good Friday. Offices open on Sundays are usually opened on these days also for the same kind of business, but in some cases for shorter hours. *Outside London*: In Scotland business is as on week-days. In England and Ireland there is one delivery of letters and parcels; no acceptance of parcels, and no Express (Service 1). Offices open as Sundays.

BANK HOLIDAYS.—*London*: One morning delivery of letters and parcels. Collection of letters, evening (from Head District and Branch Offices only) and late (general); parcels are accepted, in the morning, but are not despatched. Head District Offices (pp. 214-5) open for most business except Savings, ordinary M.O., P. Draft and Pensions. *Outside London*: In *Scotland*, business is generally as usual. In *England and Ireland* only one letter and parcel delivery, and generally one despatch (early in rural districts); no Savings Bank, ordinary M.O., P. Draft or Pension business is transacted. Smaller offices are closed; the more important open in morning (Postal orders), some also in evening. Telegraph offices nearly all open 9.30 to 11 a.m. and generally at the same hours, if any, as on Sunday evenings.

PUBLIC HOLIDAYS in *Scotland*: Telegraph as usual (delivery only up to 10.30 a.m. from rural sub-offices under Glasgow), other business as English Bank Holidays. One delivery only on Local Holidays. On New Year's Day one delivery of letters and parcels, no parcel, M.O., P.O., &c., and hours as on Sundays.

World's Largest Air Station.—The largest air station in the world is to be established at Croydon by the Air Ministry, the scheme involving the diversion of the road and the building of a railway station at the aerodrome, with electric trains to run to the terminal stations of the Southern Railway at Victoria and London Bridge. Some hundreds of acres are to be added to the existing aerodrome in order to provide a clear area for several large aeroplanes to alight or take off simultaneously, and steel and concrete hangars, in which the air expresses will be housed, are to be erected, together with additional bonded warehouses and customs sheds. A new hotel for air travellers is also to be provided, and separate platforms will be built for the arrival and departure of passenger air liners from and to different parts of the Continent of Europe. It is anticipated that factories and warehouses will be erected in the vicinity of the air station, so that advantage may be taken of the rapid transport facilities provided. These extensions if carried out as at present indicated, will undoubtedly increase the facilities not only for passengers but for letter and parcel mails.

There is an option to pay in proportion to the annual "compensation value" in certain cases of large public-houses and "seasonal" hotels.

(Hotels and Restaurants): Duty charged according to proportion that receipts from intoxicating liquors bear to total receipts, or, optionally, 25% of the "annual licence value"; subject in either case to a minimum charge.

(Clubs): an Excise Duty of 6*d*. in the £ on their purchases of intoxicating liquors, but no Licence Duty.

Publicans keeping their premises closed the whole of Sunday, or closing one hour sooner than otherwise required on week-days, pay only six-sevenths of the above duty; and keeping closed on Sunday, and also closing one hour earlier each day through the week, only five-sevenths of the above duty.

A reduction of duty is also allowed in certain cases where the hours of sale are curtailed by war restrictions.

Schedule B: In respect of the Occupation of lands used for the purposes of husbandry only, or mainly for those purposes, on an amount equal to the Annual Value; *or*, by special request, if made before 5th June (5th August in Scotland) in the current income-tax year, on *profits* of husbandry, as in case of Trades, under Schedule D. In the case of all other lands on an amount equal to one-third of the annual value.

Schedule C: Dividends or Annuities from public revenue (Government Stocks, &c.) ....

Schedule D: Trades, Professions, Remittances from Abroad, Interest, &c.

Schedule E: Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c. ....

LIFE INSURANCE.—Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income; but the amount allowable in respect of any premium for securing a capital sum on death not to exceed 7 per cent. of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £100 in all.

Residents Abroad.—No exemption or other relief is given to persons not residing in the United Kingdom. *Exceptions:* British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons, previously resident in the United Kingdom, residing abroad for the sake of their health or the health of a member of their family.

Dominion Income Tax.—Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid Dominion Income Tax for the same year in respect of the same part of his income.

Scholarships.—Income from a scholarship held by a person receiving full-time instruction at a university, college, school, or other educational establishment is exempted from Income Tax (including Super-Tax).

Standard Rates of Income Tax.—The Income Tax year is from April 6 to the following April 5. The following were the standard rates for the years mentioned :—

	£	s.	d.
1907–8 and 1908–9	0	1	0
1909–10 to 1913–14	0	1	2

For every £ of the next £1,000 of the excess	0	4	6
For every £ of the next £12,000 of the excess	0	5	0
For every £ of the next £10,000 of the excess	0	5	6
For every £ of the remainder of the excess	0	6	0

Notes on Income Tax.

Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions, abatements, and reliefs were replaced by the various reliefs set out below. In introducing the new system, the Act employs two terms not previously used in connection with the Income Tax, *viz.*, "assessable income" and "taxable income."

"*Assessable Income*" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income as computed for Income Tax purposes.

"*Taxable Income*" means that part of the "assessable income" upon which Income Tax is actually charged, that is, the "assessable income" less the various deductions referred to below.

Deduction in arriving at Assessable Income. Earned Income Allowance.—The differentiation in favour of "earned" income is made, not as heretofore by reducing the rate of tax chargeable upon such income as compared with investment income, but by deducting one-tenth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £200 for any one individual. The "assessable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

Total Exemption.—Exemption from tax may be claimed where the total assessable income does not exceed £135, or, in the case of an individual whose wife is living with him, £225. Where the income is wholly earned, these limits are equivalent to £150 and £250 respectively. *See* above.

Deductions from Assessable Income in order to arrive at Taxable Income.—Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income." *The deductions may be claimed irrespective of the amount of the taxpayer's total income.*

Personal allowance may be claimed of £135, or, in the case of an individual whose wife is living with him, £225.

Wife's Earned Income.—When a taxpayer's total income includes any earned income of his wife, the personal allowance of £225 is increased by a sum equal to nine-tenths of the amount of such earned income, subject to a maximum additional allowance of £45.

Deduction for a Widower's (or Widow's) Housekeeper taking Charge of Children.—A deduction of £45 may be claimed, under certain conditions, by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (*see* below) is given or by a widow who has a female relative resident with her for the like purpose. If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person employed for that purpose.

Deduction in respect of Widowed Mother, &c., taking Charge of Children.—A deduction of £45 may be claimed, under certain conditions, by an *Unmarried Person* who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (*see* below) is given.

Deduction for Children.—A deduction may be claimed in respect of each child, step-child, or adopted child under the age of 16 years, or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. The deduction allowable is £36 in respect of one child, and £27 in respect of each additional child for whom the relief is due. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £40 a year.

Deduction in respect of Dependent Relatives.—A deduction of £25 may be claimed in respect of (*a*) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself, or (*b*) his or his wife's widowed mother, whether incapacitated or not, or (*c*) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity. The deduction under (*a*) or (*b*) is conditional, however, upon the income of the dependent relative not exceeding £50 a year. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Rates of Tax chargeable on the "Taxable Income."—The following provisions as to the rates of tax chargeable on the taxable income (*i.e.*, that part of the income on which tax is actually charged) apply, *whatever the total amount of the income.* The first £225 of the taxable income is chargeable at half the standard rate of tax, *i.e.*, for the year ending April 5, 1924, at 2*s.* 3*d.* in the £. The remainder of the taxable income is chargeable at the standard rate of tax, *i.e.*, at 4*s.* 6*d.* in the £.

Relief in respect of Life Assurance Premiums.—Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916, irrespective of the claimant's total income; and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000.

* Section 15 of the Revenue Act, 1911, provides that in cases where the consideration or any part of the consideration consists of any money, stock, or security (other than rent), the amount or value of which does not exceed £500, and the instrument contains a certificate that the transaction does not form part of a larger transaction or of a series of transactions in respect of which the consideration other than rent exceeds £500, duty shall be charged at half the rates set out under the heading "Conveyance or Transfer on sale of any property," &c.

The Section, however, does not apply in any case where part of the consideration for any lease or tack consists of rent, and that rent exceeds £20 a year.

LEGACY AND SUCCESSION DUTIES:—*Also see "Estate Duty."*

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.—Except in the cases of small estates, *see* note to Estate Duty.

No succession duty is payable where the principal value of all the successions on the same death does not amount to £100 (16 & 17 Vict. c. 51, s. 18).

Rates of duties payable on legacies, annuities, and residues, and of Succession Duties where deceased died before 1st July, 1888, or where Estate Duty, Finance Act, 1894, is payable.

To Husband or Wife or Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (*see* above) £1 per cent

Exceptions.—Estates not exceeding £15,000.—Legacies and successions of less than £1,000 (£2,000 in the case of widow or child under the age of 21 of deceased), whatever may be value of whole estate.

To Brothers and Sisters of the Deceased, or their Descendants ....£5 per cent.

To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants	£10 per cent.
To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants	
To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased	

Where deceased died on or after 1 July, 1888, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1½, 4½, 6½, 7½, and 11½ respectively.

The Husband or Wife is chargeable with Estate Duty and Legacy and Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same; persons not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

BIRTHS.

When a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons :—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened ; 3. A person present at the birth ; or, 4. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees, amounting to ten shillings. In *Scotland*, after the lapse of three months, it can only be registered on the authority of the Sheriff of the County. The regulation which provides that no birth in *England* and *Wales* could be registered after the lapse of seven years was revoked in 1922, but late registration cannot be allowed unless satisfactory evidence is supplied to the Register General. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act, 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father, or person in attendance on the mother, to the district medical officer of health. The notice must be sent by post within 36 hours of the birth, and is to be in addition to, and not in substitution for the notices above mentioned.

Birth Control.

The relative fertility of different occupations in England and Wales is shown by the following table, which gives the number of children per 1,000 married couples, when the age of the occupied husband is below 55 years :—

BRITISH NATIONALITY.

The law as to British Nationality is mainly to be found in the British Nationality and Status of Aliens Act, 1914, as amended by certain Acts passed in 1918 and 1922. It is important to notice, however, that the first section of the act of 1914—which defines a natural-born British Subject does not affect the status on any person born *before* Jan 1, 1915.

The following are deemed to be natural-born British Subjects, namely :

1. Any person born within His Majesty's dominions and allegiance.

2. Every person born out of His Majesty's Dominions, *before Jan.* 1, 1915, whose *father's father* was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject.

3.* Every person to whom a Certificate of Naturalization under the British Nationality and Status of Aliens Act, 1914 or of Re-Admission to British Nationality has been granted, or who has acquired British nationality by special Act of Parliament or by conquest or annexation.

4. The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage.

5. The children of naturalized British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions :—

(*a*) in the case of a child born *before* January 1st, 1915,
  (i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1915, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or
  (ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

(*b*) in the case of a child born *after* January 1, 1915,
  (i) if before his birth a Certificate of Naturalization had been granted to his father or his mother, or
  (ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

6. Any person born out of His Majesty's dominions whose father was, at the date of the birth a British subject, and who fulfils any of the following conditions—*e.g.*, if either
  (i) his father was born within His Majesty's allegiance ; or
  (ii) his father had a certificate of Naturalization ; or

---

* See " Acquisition of British Nationality. p. 395.

- (iii) his father had become a British subject by reason of any annexation of territory; or
- (iv) his father was, at the date of the birth, in the service of the Crown; or
- (v) his birth was registered at the British Consulate within one year or, in special cases, two years or, in the case of a person born on or after Jan 1, 1915, who would have been a British Subject if born before that date, within 12 months after August 1, 1922.

A child of a British Subject is deemed to have been born within the allegiance if born anywhere where by treaty, &c., His Majesty exercises jurisdiction over British subjects.

A person whose British nationality depends upon his registration at a Consulate ceases to be a British Subject unless he asserts his nationality by declaration within a year after attaining 21, and abandons any other nationality he may have acquired.

7. A person born on a British ship.

LOSS OF BRITISH NATIONALITY.—A British subject loses his British nationality:—

- (*a*) if by any voluntary or formal act he becomes naturalized in a foreign country;
- (*b*) if, in certain cases, he makes a declaration of alienage. These cases are:—
  - (i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship *and* is also by birth or becomes during minority a subject of any foreign State,
  - (ii) where a person is a British subject, but was born out of His Majesty's Dominions, and
  - (iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that State who has been naturalized as a British subject may divest himself of that status;
- (*c*) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality;
- (*d*) in the case of a woman, if she marries an alien;
  (N.B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization.)
- (*e*) in the case of a person to whom a Certificate of Naturalization is granted after January 1, 1915, if the Secretary of State revokes the Certificate;
- (*f*) if the territory of which he is an inhabitant is severed from the Crown; *cf.*, *e.g.*, the cases of the inhabitants of Hanover and Heligoland.

ACQUISITION OF BRITISH NATIONALITY.—An alien may acquire British nationality:—

- (*a*) by special Act of Parliament;
- (*b*) by the conquest, annexation, or cession of the territory of which he is an inhabitant;
- (*c*) in the case of a woman, by marriage with a British subject, and
- (*d*) by naturalization.

Naturalization.—All Certificates of Naturalization granted in the United Kingdon between May 13, 1870, and December 31, 1914, were granted in accordance with the provisions of the Naturalization Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after Jan. 1, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must:—

- (*a*) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year *immediately preceding* the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;
- (*b*) be of good character and have an adequate knowledge of the English language; and
- (*c*) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization may be obtained free on application to the Home Office, Whitehall, London, S.W.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day, and is at present £10, of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on submission of the application *is not returnable*, whether or not a Certificate is granted.

N.B —In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate linguæ*, but are triable in the same manner as if they were natural-born subjects.

UNDESIRABLE ALIENS.—An undesirable alien—*e.g.*, one who is without means, or who is a lunatic, or an idiot, or who has been guilty in another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he prove to be "undesirable" within the meaning of the Aliens Act, 1905. His Majesty may by Order in Council impose further restrictions on aliens (*see* Aliens Restriction Act, 1914 as extended and amended 1919).

ALIEN IMMIGRATION.

During the year 1922 a total of 316,159 alien passengers landed at United Kingdom ports, and 315,765 embarked for destinations overseas. The arrivals in 1921 were 294,569, and the departures 305,886; 1,997 were refused leave to land in 1922, as against 1,712 in 1921. The arrivals consisted of the following:—

Residents returning from abroad	61,117
Passengers in transit to other countries	33,206
Visitors on holiday	127,380
Visitors on business	68,554
Members of foreign diplomatic and other missions	5,492

BUSINESS NAMES REGISTRATION.

REGISTRATION OF BUSINESS NAMES ACT, 1916.

This Act received the Royal Assent on 22 Dec., 1916, and its provisions were explained on pp. 414-415 of the 1921 "WHITAKER."

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS.

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 3*s.* 7*d.*, viz., 1*s.* for search, 2*s.* 6*d.* for the certificate, and 1*d.* for the stamp affixed thereto. (When application is made by *post* the charges are 5*s.* 1*d.*) They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act, 1896, Birth or Death, 1*s.*; Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth, 6*d.*; Savings Banks Act, 1887, Birth, Death, or Marriage, 1*s.*; National Insurance Acts, 1911 and 1913, Birth, 6*d.*, Marriage, 1*s.*; Industrial Assurance Companies Act, 1896, and Trade Unions Amendment Act, 1876, death of child under 10 years of age, 1*s.*, but only from the local Registrar.

English Registers—Birth registration exists at Somerset House from 1837. An index to 2,000,000 earlier entries can be consulted at the *Society of Genealogists* at 5 Bloomsbury Square, London, W.C. 1.

Scottish Registers of Births, Marriages, and Deaths.—Parish registers were instituted for these in 1551, but until the Registration of Births, &c. (Scotland), Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of 2*s.* 1*d.* for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar-General, H.M. General Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar-General, and since 1854 local registers have been transmitted to him at stated periods. Registers up to the end of 1919 are now in his possession. There is a general index to the registers which may be searched on payment of 2*s.* A search of the index of a particular parish is 1*s.* A fee of 20*s.* is payable for a search of all the Scottish registers, and 1*s.* is payable for a search of a particular parish. An extract of an entry may be obtained on payment of 2*s.* 1*d.* The office of the Registrar-General is open on weekdays between 10 a.m. and 4 p.m.

COPYRIGHT.

The law of copyright is contained in the Copyright Act, 1911, which repeals all the earlier acts. It should be stated that no registration of copyright at Stationers' Hall is now necessary; copyright arises from mere authorship. The provisions of the Copyright Act, 1911, were explained on pp. 415-416 of the 1921 "WHITAKER."

DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have *three days of grace* allowed; thus, a bill dated 1 Jan. at two months' date is not due until March 4. If a bill or note is payable by instalments to be paid "punctually," this does not exclude the days of grace (*Schaverien* v. *Morris*, 37 T.L.R. 366). There is, however, no such extension in the case of bills drawn at sight, or on demand, and these must be paid on presentation. In the United Kingdom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holidays are payable the day after.

DEATHS.

In England and Wales.—When a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the abovenamed fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. Failure to obtain this certificate need not, however, delay the funeral, as it is the duty of the clergyman, if the certificate is not produced to him at the burial, to notify the Registrar thereof within seven days. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended during his last illness by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees amounting to ten shillings.

In *Scotland*, the rules of registration are similar, but (1) the death must be registered within 8 days; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

Coroners' Inquests.—Sudden deaths are supposed by the law to demand inquiry, and Coroners' inquests are held in cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a *witness* is bound to attend, or renders himself liable to be fined in any sum not exceeding 40s., the fine for defaulting *jurymen* being £5.

In *Scotland* there is no Coroner. In ordinary cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County, *see* p. 547). The result of such inquiry is reported to the Lord Advocate. In the case of a death occuring in the course of an industrial employment, and in every case in which the Lord Advocate may so order, a public enquiry is held before the Sheriff and a jury.

DIVORCE.

Preliminary.—Matrimonial suits may be conveniently divided into three classes, viz. (1) those in which a declaration against marriage is sought; (2) those in which the marriage is sought to be upheld; and (3) those in which, the marriage being admitted, partial or complete divorce is sought.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no consent, or if one of the parties was insane; but it is only voidable if one of the parties was under the age of consent (14 in the case of males and 12 in the case of females). Inability to consummate a marriage may also be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion (as to the significance of which see paragraph (6) *infra*); and such desertion, if coupled with the husband's adultery, whether committed before or after the decree of restitution, is a ground for granting to the wife a decree of dissolution of marriage.

(3) *Judicial Separation and Divorce.*—The third class of suit mentioned in paragraph (1) *supra* includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if successful) dissolves the marriage contract altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the ground of adultery, or cruelty, or of desertion without cause for two years or upwards. In such a petition a husband may claim damages from the co-respondent. A decree of judicial separation is often made the ground of a petition for divorce. A petitioner who has committed adultery which has not been condoned cannot obtain a judicial separation or a decree of restitution of conjugal rights unless there has been condonation. The fact that a petitioner has been guilty of cruelty or

desertion does not, however, debar him from a decree of judicial separation on the ground of adultery unless his conduct has conduced to the adultery.

Divorce.—Where partial or complete divorce is sought, relief can only be obtained upon proof of certain offences which fall under two heads, namely (1) those which are offences under ecclesiastical law, *e.g.*, cruelty, adultery, and unnatural offences; (2) those which are offences by statute, *e.g.*, incestuous adultery, bigamy with adultery, rape, and desertion.

If a husband seeks divorce, it is sufficient for him to prove the wife's adultery, in which case he may obtain damages from the adulterer. If a wife seeks divorce it was formerly not sufficient that she prove mere adultery. But now, by an Act which came into force on July 18, 1923, a wife may petition for divorce on the ground that, since the marriage and the passing of the Act, her husband has been guilty of adultery. A wife can also obtain divorce if the husband has been guilty of bigamy with adultery, of rape or certain other criminal offences, or of adultery coupled with such cruelty as without adultery would have entitled her to a divorce *a mensa et thoro* or of adultery coupled with desertion. "Cruelty" is conduct of such a character as to have caused damage to life, limb, or health (bodily or mental), or as to give rise to a reasonable apprehension of such danger. It is cruelty to wilfully and recklessly communicate a venereal disease; and a course of conduct calculated to break the spirit of the sufferer (generally the wife), continued until health breaks down or is likely to break down under the strain, is also a ground for relief.

If a wife gives birth to a child of which her husband could not possibly be the father, that is sufficient proof of adultery.

It is desertion in the legal sense if one party to a marriage, without the consent or against the will of the other, wilfully without cause or reasonable excuse makes the other live apart for two years or more. It is, however, a question of intention. *Powell* v. *Powell* (1922) P. 278. Formerly the only remedy for desertion was a suit for the restitution of conjugal rights; but now desertion without cause may enable the deserted spouse to obtain a degree of judicial separation. If coupled with adultery, it enables a wife to obtain a divorce.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. There is no such thing in the Divorce Court as judgment by default. Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation, *i.e.* complete forgiveness which restores the *status quo*. Forgiveness, without restoration of the wife to her former position, cannot amount to condonation. (*Crocker* v. *Crocker* (1921), P. 15. There are also certain discretionary bars, as, *e.g.* where the petitioner has been guilty of unreasonable delay, or has been guilty of such wilful neglect or misconduct as has conduced to the adultery.

Intervention by King's Proctor.—At any time during the progress of a suit for dissolution or nullity of marriage, and before the decree *nisi* is made absolute, the King's Proctor may intervene to show cause against making a decree absolute.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree *nisi*, and is not made absolute until the expiration of six calendar months. The marriage subsists until the decree is made absolute. After that date either spouse may marry again; but a man may not marry the sister of his divorced wife whilst the divorced wife is alive. A divorced wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

Children.—When a suit has been commenced, the children should not be removed from the person in whose custody they are *de facto*. Until a suit for judicial separation, nullity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, maintenance, and education of children. Either spouse may make applications for access to the children.

Alimony.—A wife may in any cause file a petition for alimony (*i.e.*, means of support) pending suit, provided *primâ facie* evidence of the marriage is adduced. The right to alimony continues until there is a decision against the wife in the court of first instance. The amount may be agreed between the parties, otherwise one-fifth of the joint incomes is generally allowed. An order for *permanent* alimony may be obtained by a wife who has obtained a final decree of judicial separation.

Protection Orders.—A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining the property liable to restore it and to pay twice the value thereof.

Costs.—Where a suit is about to be set down for hearing, the wife, if she has not sufficient separate estate, may obtain payment from her husband of a sum sufficient to cover her costs to date; and where a decree has been obtained against her for judicial separation on the ground of adultery, she may defend herself at his expense should he afterwards bring a suit for dissolution of marriage. If a suit be decided against a wife who has separate estate, she may be condemned in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

SEPARATION BY AGREEMENT.

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. Although usually made by deed, a mere oral agreement is binding. If made, however, with a view to facilitating divorce proceedings it is void. A wife is not bound by a separation agreement if she was forced to make it by threats of violence. A clause which binds the husband to give up the custody of the children will be enforced, unless the Court is of opinion that it is not for their benefit. The agreement usually contains mutual covenants not to sue for the restitution of conjugal rights—a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnify the husband against debts contracted by her during the separation. The remedy for a breach of the agreement is specific performance.

SUMMARY JURISDICTION.

When a husband has been guilty of assault or has deserted his wife, or has been guilty of persistent cruelty, or of wilful neglect to maintain her or her infant children, and by such cruelty or neglect has caused her to leave him, or where he is an habitual drunkard, the wife may obtain relief from a Court of Summary Jurisdiction. Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £2. Where the husband applies, the custody of all the children of the marriage may be given to him, and the wife may be committed to an inebriates home. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation; and if, having obtained an order, she commits adultery, the order may be discharged. An order may be altered, varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

DIVORCE FOR THE POOR.

England and Wales.—A special department in the High Court of Justice for the assistance of poor persons in litigation, including divorce, was established in 1914. The official name of the department is "London Prescribed Officers (Poor Persons)."

Under the procedure of this department, Solicitor and Counsel are provided for a litigant who is not possessed of the means to employ legal assistance.

Although no fees are payable for the help given by the department, the applicants must find the solicitor's out-of-pocket expenses, and those incidental to witnesses—a point which has been criticised by the adherents of divorce law reform. However, if witnesses are not brought from a long distance, the whole proceedings need not cost more than £10, and can in some cases be completed for less, compared with from £50 to £60 necessitated by the normal procedure. Before a case is taken up, the applicant has to satisfy the department that he or she is really poor—not possessed of more than £50, exclusive of wearing apparel and trade tools. She must also show that her own income does not exceed £2 a week, or in special cases, £4. If this condition is fulfilled, and if he has reasonable grounds for bringing or defending a suit in the Divorce Court, he may apply to the Court for leave to do so. An application for leave is submitted to and is reported on by counsel and solicitor, who give their services voluntarily. If the report is favourable the Court may give the necessary leave, and thereupon another solicitor and counsel are assigned to the poor person to act for him. Such a litigant is not liable for Court fees, nor (generally) is he liable to pay costs to any other party. Counsel acting for him must charge him no fee, while the solicitor assigned to him generally gets nothing but his out-of-pocket expenses. Where, however, property of value is recovered for such litigant, the solicitor may (under the rules) get his usual costs. Numbers of persons take advantage of this procedure *in forma pauperis.* This explains the very large number of cases in the Divorce Court.

Scotland.—In every town there are Solicitors for the Poor, and in the Court of Session there are Counsel for the Poor, all of whom act gratuitously. Any class of litigation may be undertaken for poor persons, but the operation of the "Poor's Roll" is chiefly important in matrimonial and bastardy cases. Legal services are rendered free of charge, and no Court dues are payable. In cases of divorce application must be made to the Court of Session. In cases of separation simply, application may be made to the Sheriff Court. The means that preclude a person from the benefit of the Poor's Roll are not fixed, and each application depends on its own circumstances. The Poor's Roll was established in 1424.

THE FRANCHISE.

The Representation of the People Act, 1918, abolishes the voting qualifications of property owners, freemen, and lodgers, but extends the franchise to women, subject to certain limitations. To be entitled to be registered as Parliamentary or as Local Government electors, the following conditions are now required:—

PARLIAMENTARY.

MEN.—21 years of age. Residence only, for the qualifying six months in any one constituency or in any contiguous constituency or county. The occupation of land or premises of £10 annual value, for business purposes, for the same period.

A man of full age who has received a degree at any university forming, or part of, a constituency, is entitled to be registered as a voter for that constituency. Honorary degrees do no qualify.

WOMEN.—30 years of age, must be entitled to be registered as a Local Government elector for the occupation of land or premises of £5 yearly value, or of a dwelling house, or is the wife of a husband who is entitled to be so registered.

A woman is entitled to be registered as a parliamentary voter for a university constituency if she is of the required age, and has been admitted to a degree, or has passed the final examination and followed the conditions required of a woman by such university which did not at the time the examination was passed admit women to degrees.

ABSENT VOTERS AT GENERAL ELECTION.

In the lists which came into force on Oct. 15, 1922, the absent voters for Great Britain and Northern Ireland totalled 184,570, and for the contested constituencies in the General Election of 1922 172,451. Excluding three constituencies (in the Borough of Stoke-on-Trent) for which particulars are not available, 97,530 ballot papers were issued to absent voters whose recorded addresses where in the United Kingdom, and 40,295 of them were returned in time for the counting of the votes at the General Election of 1922. The number of absent voters who had appointed proxies in the contested constituencies was 4,173.

LOCAL GOVERNMENT.

MEN.—21 years of age. Must have occupied for the qualifying six months, as owner or tenant, any land or premises in a local government electoral area. A person who occupies rooms as a lodger is entitled, provided the rooms are let unfurnished.

WOMEN.—21 years of age. Is entitled to be registered as a local government elector where the conditions of her occupation of property would entitle her if she were a man.

Thirty years of age where she is the wife of a man who is entitled to be so registered in respect of premises in which they both reside.

REGISTRATION.

The qualifying periods (at present fixed by Order in Council) are for six months ending 15 Dec. for the Spring Register, and 15 June for the Autumn Register. It is the duty of the Registration Officer (in counties, the clerk to the county council; in boroughs, the town clerk) to compile the Spring and Autumn Registers containing the names of all persons entitled to vote. For this purpose instructions may be issued to the overseers of parishes, who cause house-to-house enquiries to be made to ascertain the names of all qualified voters. A householder's return may be issued, and the failure of the householder to give the required information renders such person liable to a penalty of £20. The prepared lists are publicly exhibited by the Registration Officer, together with a notice specifying the mode in which, and the time within which, claim and objections are to be made. Subsequently the Registration Officer shall make all necessary corrections of the electors' lists, and carry out all that is required to form those lists into a register, with a separate index letter and a separate series of numbers for each polling district.

ILLEGITIMACY.

England and Wales.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5*s.* a week. By an Act which came into force on Sept. 30, 1923, the putative father may be ordered to pay 20*s.* a week, instead of 10*s.* as hitherto. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A domestic servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

In 1922 the Home Secretary introduced a Bill for legitimating illegitimate children on the marriage of their parents, but the Bill had not passed both Houses of Parliament at the time of going to press.

Scotland.—The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court, but usually is in the Sheriff Court. The father pays half of the inlying expenses, the amount usually decreed being £2 2*s.* The rate of aliment varies, but in 1919 it was settled by a decision of the Court of Session that £11 14*s.* per annum was a proper amount. The mother has the custody of the child until the age of 7 if a male and 10 if a female.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognised by International Law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer, or causes or permits such sufferer to be so exposed; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance is liable to a fine of 40*s.*; and if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, &c., in which any person has been suffering from any dangerous infectious disorder without having the same disinfected to the satisfaction of a medical practitioner, as testified by a certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. By the Public Health Act, 1907, the Local Government Board (*i.e.* the *Ministry of Health*), since the passage of the Ministry of Health Act, 1919 has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infectious disease must not engage in any trade unless he can do so without spreading the disease; nor may he take any book from a public or circulating library, or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Dairymen must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle which has conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease. Where the Infectious Disease (Prevention) Act, 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hospital. Similar provisions apply to the Metropolis. The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. Where it appears to any District Council that any house is in such a condition that the health of any person is affected or endangered thereby, or that whitewashing, &c., would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, &c., the same.

NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the January 1, 1899. Every case of infectious disease, as defined by the Act, is to be notified to the Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40*s.* fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets 2*s.* 6*d.* for every case in his private practice and 1*s.* for every case in a public institution of which he is officer.

The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the following fevers: typhus, typhoid, enteric, relapsing, continued, or puerperal. Plague must also be notified, in consequence of an Order issued in 1900. The local authority may order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Government Board. In some districts the following have been declared infectious: measles, rötheln or German measles, whooping cough, chickenpox, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act, 1891, are similar to those now extended to the rest of the country.

JURY SERVICE.

Preliminary.—The juries with which the public are most concerned are, first and foremost, the grand juries; secondly, those which are summoned to try causes in the High Court, at assizes and county courts; and thirdly, those summoned to try criminal cases at assizes, the Old Bailey, and courts of Quarter Sessions, and to assist at coroners' inquests.

Qualifications.—All natural-born subjects of the King and aliens domiciled for ten years or more, being men or women between 21 and 65, (60 after March 1, 1923), are liable to serve as jurors.

Although women could not formerly serve, the sex disqualification was removed in 1919, and women are now liable to serve, subject to this, that a judge may make an order that the jury shall be composed of men only or of women only, or may, on an application made by a woman to be exempted from service on a jury in respect of any case by reason of the nature of the evidence to be given or of the issues to be tried, grant such exemption.

The qualification of a juror is a *property* one—that is to say, he or she must be a person who owns property or pays rates. A householder or shopkeeper in the City of London who owns personal estate worth £100; a resident in a county or borough owning £10 a year in real estate or rent charge, or £20 in leaseholds; or a householder in a county or borough assessed to the poor rate at not less than £30 a year in Middlesex and the County of London, or £20 in other counties, and occupiers of houses with not less than fifteen windows, are all compellable to serve as jurors unless exempted or disqualified.

Exemptions and Disqualifications.—Aliens (subject as above), felons, lunatics, imbeciles, deaf or blind persons are disqualified from serving on juries, while the following classes of persons (amongst others) are exempt—peers, members and officers of both Houses of Parliament, clergymen and priests, ministers of any congregation of protestant dissenters and Jews, whose meeting place is duly registered, judges, barristers, solicitors (if practising), officers of the supreme court, magistrates, clerks of the peace, sheriffs' officers and servants of such officers, justices of the peace, members of local bodies, governors of prisons and gaolers, superintendents, etc., of lunatic asylums, doctors and chemists (if actually practising), dentists, officers and men in Army, Navy, and Territorial Forces, licensed pilots, postal, custom and inland revenue servants.

Special exemption.—A judge, and, by virtue of S. 3 of the Juries Act, 1922, the sheriff, may for good reason excuse attendance on any particular jury.

Jury Lists.—Lists of juries are now prepared in accordance with the Juries Act, 1922. Persons who deem themselves to be entitled to be exempted should communicate with the registration officer, for all whose names appear on the lists are liable to serve.

Grand Juries.—The function of the grand jury is to make presentments on oath to judicial bodies or personages, mainly of accusation against persons against whom criminal proceedings are pending. The jurors have to say in effect whether there is a *primâ facie* case against the accused, against whom an indictment has been prepared, and if they are satisfied of this they find "a true bill"; if not, they "ignore the bill" and the accused is discharged.

Lunacy Juries.—A jury is sometimes summoned by the judge in lunacy to enquire whether a man is or is not of sound mind.

Juries in Criminal and Civil cases.—An accused person against whom a true bill has been found is tried by a "jury sworn." A "panel" of jurors are summoned to attend the court on a particular day, and it is from amongst them that the jury who are to try the prisoners are selected at random (an interesting note on the selection of jurors will be found in *Halsbury's Laws of England*, Vol. 18, p. 246). In a criminal case the prisoner has a right of challenge which is of two kinds—a challenge to the array—*i.e.*, the whole number of jurors summoned (which is so rare that it need not be further considered) and a challenge to the poll, *i.e.*, to individual jurors, which may be peremptory or for cause. Peremptory challenge, or challenge without cause, exists only as of right in treason and felony, and the prisoner can only challenge a limited number without reason. In the exercise of this right prisoners frequently object to the women on the jury. "Challenge for cause" sometimes takes place on the ground that the proposed juror is a peer or is alleged to have committed some crime which makes him infamous.

Except upon trials for murder, treason, and treason felony juries after being sworn may separate, *e.g.*, for lunch and at night. The verdict must be given in open court in the presence of all the jurors, and in cases of treason and felony in the presence of the defendant. It must be unanimous, except that in civil cases the parties may agree to take a majority verdict.

Special Juries.—Special Jurors are selected from persons having larger property qualifications, *e.g.*, the occupier of dwelling house in a large town rated at not less than £100. Trial is generally by Common Jury, but in any cause or matter at Assizes or in the High Court an order for a Special Jury may be obtained in certain cases.

Payment of Jurors.—A Special Juror is entitled to a fee of one guinea for each case in which he is sworn to act, whereas a Common Jury is only entitled to 1*s.* on each cause tried in the High Court or a County Court; and on Circuit, 8*d.* In Criminal Cases the jury is entitled to and, in fact, receives nothing. At Inquests, held before Coroners, the jurors are entitled to such fee as the local authority may permit the coroner to pay.

A juror is not accountable for, nor will any action lie against him, in respect of anything said or done by him in discharge of his office. If he fail to appear in the High Court or at assizes when duly summoned he may have to pay a fine of £10, while non-appearance at a county court may involve a fine of £5.

Coroners' Juries.—A coroner who has decided to hold an inquest must summon a jury to inquire into the cause of death. This absolute duty, however, was suspended during the War and for six months thereafter by an Act passed in 1918. A coroner's jury may be fined £5 for non-attendance. Broadly speaking, any "good and lawful" man or woman may be summoned on a coroner's jury. Although there is no age limit fixed by statute, the custom is to summon only persons of full age. Not less than twelve must be summoned, and at least twelve must agree on a verdict.

MARRIAGES.

BY BANNS OR LICENCE.

Banns of Marriage.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. The Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Second Lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force (see also 6 & 7 Will. IV. c. 85, and 1 Vict. c. 22). Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church, in whatever church the parties are married. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit., "Marriages in Scotland," *post*). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Midgeley* v. *Wood*, 4 Sw. & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on the superintendent registrar's certificate without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the *Ecclesiastical* parish of the church in which the marriage is to take place.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops, through their Surrogates, for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 404). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service.

Marriage with a deceased wife's sister—including a sister of half blood—was legalised in 1907. No clergyman, however, can be compelled to solemnize such a marriage, but he can allow his church to be used for the purpose by another minister.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2*s.* 6*d.*, and a stamp duty of 1*d.* Searches in the register-books may be made on payment of small fees, viz., 1*s.* for a single year, and 6*d.* additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5*s.* to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

Marriage Licences can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knightrider Street, Doctors' Commons, E.C., are available for London and all England and Wales; those procured at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays 10 to 1) are available for London and all England and Wales, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, 10*s.* 0*d.* *No previous notice is required and the licence is available as soon as it is issued.* The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15*s.* to £2 12*s.* 6*d.* By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and *collusion* in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of *such parties hath had* his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knightrider Street, Doctors' Commons, E.C. 1 (*tel.*, 6834 Central). Fees for licence stamp, &c., £25.

BEFORE A REGISTRAR AND IN NONCONFORMIST BUILDINGS.

Marriages can take place in a District Register Office or in a Nonconformist building registered for marriages, (1) by Certificate, (2) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

NOTICE OF MARRIAGE BY CERTIFICATE.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

NOTICE OF MARRIAGE BY LICENCE.

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district, one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

ISSUE OF CERTIFICATE (WITHOUT LICENCE) FOR MARRIAGE.

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice-book, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

ISSUE OF CERTIFICATE AND LICENCE FOR MARRIAGE.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice.

DOCUMENTS TO BE PRODUCED AT THE MARRIAGE.

(1) *Marriage by Certificate:—*
- *a.* If both parties live in the same district:—The certificate of the Superintendent Registrar of that district.
- *b.* If they live in different districts:—A certificate from the Superintendent Registrar of *each* district.

(2) *Marriage by Licence:*—The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

PLACE OF MARRIAGE.

The marriage must generally take place at a building within the district of residence of one of the parties, but there are exceptions, as follows:—

a. Section 14 of 19 & 20 Vict. cap. 119, provides that, if the usual place of worship of either of the parties is outside the district of his or her residence, the marriage may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given.

b. The Act 3 and 4 Vict. cap. 72, provides that, if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, the marriage may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (*Guillet* v. *Guillet*, 27 T.L.R. 416).

MARRIAGE CEREMONY.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m., with open doors. Each of the parties must declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D.*"; and each of the parties must say to the other, "I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband]." A wedding-ring may be, and is generally, used at a marriage at a register office.

MARRIAGE ACT, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an "authorised person" (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained.

The parties must at some time during the ceremony make the following declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D.*"

Also each of the parties must say to the other:—

"I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband]";

or, in lieu thereof:—

"I, *A. B.*, do take thee, *C. D.*, to be my wedded wife [*or* husband]."

Rules and Regulations relating to this Act were published in October, 1909. (See *Statutory Rules and Orders*, 1909, No. 1332.)

Naval Marriages Act, 1908.

This Act, which came into force on January 1, 1909, was framed with the object of relieving sailors of the Royal Navy of the difficulties under which they laboured as regards fulfilling the necessary residential qualification for the purpose of marriage.

It provides that any officer, seaman, or marine borne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays: he can then issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by licence can take place under this Act.

MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.

Parties should be married in the name in which they are generally known.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 23 of the Marriages and Registration Act, 1837.

If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is a member.

If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house; the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Marriage with a deceased wife's sister was rendered legal by the Deceased Wife's Sister Act, 1907; the Act forbids the marriage of a man with the sister of his *divorced* wife during the wife's lifetime. The marriage of a woman with her deceased husband's brother was rendered legal in 1921.

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND.

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns; as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed June 27, 1892; came into force Jan. 1, 1893. Order in Council dated Nov. 22, 1913, whereby previous Orders are repealed and regulations for marriages under the Act are laid down.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act, 1892. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

(*a*) That both the parties are British subjects; or,

(*b*) If only one of the parties is a British subject, that the other is not a subject or citizen of the country; or,

(*c*) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country; or,

(*d*) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

(*a*) That the marriage will be recognized by the law of the country to which the foreigner belongs; or,

(*b*) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs; or,

(*c*) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the above-named Act.

It is necessary for one of the parties to the intending marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (*a*) in the United Kingdom, or (*b*) in a Colony or India (*a*) notice must be given in like manner as if the party so resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Scotland must be given by proclamation of banns, and (*b*) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (*a*) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (*b*) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

(*a*) That he or she believes that there is no impediment

(*b*) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of August 18, 1892, and are payable to His Majesty's Government:—

	£	s.	d.
For receiving notice of an intended marriage	0	10	0
For receiving notice of a caveat	1	0	0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	0	10	0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place	0	5	0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	1	0	0

Marriages may be solemnized 8 a.m. to 3 p.m.

No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Braid* v. *Braid*, 1909, 25 T.L.R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1892," before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

Act of 1906.—Under the *Marriage with Foreigners Act*, 1906, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (*re Green Noyes* v. *Pitkin*, 1909, 25 T.L.R. 222).

MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 14 years of age and a female over 12. Marriages may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 15 days before the ceremony. Public proclamation is made by (*a*) banns or (*b*) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2*s.* 6*d.* A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act 1878 a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registrar issues a certificate: fee, 1*s.* 6*d.* Such certificate of publication is only valid for three months. Under the Naval Marriages Act 1908 banns may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to contract a marriage in Scotland. A declaration under the Marriage Notices (Scotland) Act already referred to may also be filled up and the officer commanding the ship may grant a certificate.

Irregular Marriages are survivals of modes of marriage which were general throughout Europe in mediæval times, Scotland having disregarded the decrees of the Council of Trent invalidating irregular marriages; Scotland following the ancient Canon law. These marriages may be contracted in three ways: (1) by exchange of consent before two witnesses (called in legal language *per verba de præsenti*); (2) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise, *subsequente copula*); the promise, however, can only be proved by the writing or the oath of the party when action is brought; (3) by constant living together as husband and wife (called marriage by *habit and repute*), *i.e.*, the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for 21 days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland.) "Gretna Green" marriages were abolished in 1856 by the Act 19 and 20 Victoria, Chap. 96. Marriages thus contracted may be registered if the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5*s.* 1*d.* The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Session.

Marriage with a foreigner may be solemnized regularly if one of the parties has a residential qualification and provided that if one party has resided in Scotland for 21 days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner, or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in Scotland for 21 days.

PASSPORTS.

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and must be accompanied by two copies of a photograph of the applicant, one copy being duly certified by the recommender. Applications should be enclosed in a cover addressed to "The Passport Office, 1 Queen Anne's Gate Buildings, Dartmouth Street, Westminster, S.W. 1" or to "The Branch Passport Office, 36 Dale Street, Liverpool." Applications should, if possible, reach the Passport Office not less than *four* days before that on which the Passport is to be issued. The charge for a Passport is 7*s.* 6*d.* Passports are issued in London between the hours of 10 and 4 (Saturdays, 10 to 1), and in Liverpool, 9.30 to 4 (Saturdays, 9.30 to 1), except on Sundays and Public Holidays, when the Passport Offices are closed. They may also be obtained through the post if a Postal Order for 7*s.* 6*d.*, *made payable to the Passport Office*, is forwarded with the application. Postage stamps will not be received in payment.

Foreign Office Passports are granted (1) to natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Dominions or Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

Passports are granted (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by a member or official of any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, or Notary Public*, resident in the United Kingdom; the applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers; (2) in the case of children under the age of 16 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Foreign Office; (3) in the case of persons naturalised in any of the British self-governing Dominions, upon production of a letter of recommendation from the High Commissioner or Agent-General in London of the State concerned; and in the case of natives of British India, and persons naturalised therein, upon production of a letter of recommendation from the India Office. Persons naturalised or ordinarily resident in any of the Crown Colonies must obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a naturalised British subject, his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects will be described as such in their Passports, which will be issued subject to the necessary qualifications.

British Passports are only available for travel to the countries named thereon, but may be endorsed for additional countries. The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any *Immigration Regulations* in force, or from the necessity of obtaining a *visa* where required.

Foreign Office Passports are not available beyond two years from the date of issue. They may be renewed for four further periods of two years each, after which fresh Passports must be obtained. The fee for each renewal is 2*s.*

A Passport cannot be issued on behalf of a person *already abroad*; such person should apply for one to the nearest British Mission or Consulate. Passports must not be sent out of the United Kingdom by post.

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10*s.* or less .. .. ½*d.*

On goods pledged for more than 10*s.*.......... 1*d.*

For INTEREST on pledges not exceeding 40*s.*, for every 2*s.* or part of 2*s.*, per month......½*d.*

And after the first month any time not exceeding 14 days to be charged as half a month.

Note.—In addition to the above charge, an additional charge of ½*d.* for each 5*s.* or part of 5*s.* lent is authorized (*Pawnbrokers' Act*, 1922).

On pledges exceeding 40*s.*, for every half-crown or part of half a crown, per month ½*d.*

FORFEITURE.—Pledges for 10*s.* and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10*s.*, if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—*i.e.*, the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5*s.* or under, the charge on form of declaration is one halfpenny; when the loan is above 5*s.*, one penny.

Special Contracts.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40*s.*, provided always that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10*s.*

RECEIPTS.

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

RENT RESTRICTION

AND OTHER MODIFICATIONS OF THE LAW OF LANDLORD AND TENANT.

The Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, was dealt with on pp. 427–428 of the 1921 edition of "Whitaker."

STREETS AND FOOTPATHS.

Streets and Footpaths.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

VACCINATION.

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it, have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth he makes a statutory declaration before a commissioner for oaths or one justice of the peace that he conscientiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers the statutory declaration (which requires no stamp) to the Vaccination Officer for the district. A conscientious objector can thus escape all penalties, but a person who does not obtain a certificate, or make the declaration, will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1898, issued under the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions. [See also Vaccination Order, 1907.]

WILLS.

Reasons for Making a Will.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all hers, but has to be shared with a distant cousin of her husband's. Negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.*, the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one dmaending the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (*i.e.*, the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others :—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows:—"And I hereby appoint the said —— sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this —— day of ——, 19—."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient :—

Signed by the testator [or testatrix, as the case may be], in the presence of us, both present at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses.

THOMAS SMITH
[Signature of Testator.]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed executor or trustee of a will. *See* PUBLIC TRUSTEE, *post*.

Trusts of the Will.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood], and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

Testamentary Capacity.—A minor cannot make a will. A married woman (married since January 1, 1883) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (1)). As to the powers of a woman married before that date it is advisable to consult a solicitor.

Revocation.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

Lapsed Legacies.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

To One Person Absolutely.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

To Children under Age.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1896, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

All Property to be Invested.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

Duties of Executors.—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1894, duties are charged on *all* property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

Administrators.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL.

To find a will proved before Jan. 1, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a *copy* obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Probate Registries were enumerated on p. 431 of the 1921 "WHITAKER."

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10*s.* for the deposit, of 2*s.* 6*d.* for entering a minute thereof, and 2*s.* for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar. (*See also* PUBLIC TRUSTEE, *post.*)

PROBATE OF WILLS.

OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as at present in force will be found in detail under "Estate Duty."

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the "District Probate Registries" (*q.v.*) application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

Scotland.—"Confirmation" is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory, and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

SCOTS LAW OF WILLS.

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6*s.* 8*d.* sterling). A will may be either (1) *holograph*, *i.e.*, written by the testator himself, in which case no witnesses are necessary; (2) *tested*, which means that it is signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh, for preservation. The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees.

TRUST FUNDS AND INVESTMENTS.

The Act of 1893 enacts that Trustees may invest in any Parliamentary Stocks or Government Securities of the United Kingdom: on real or heritable Securities in Great Britain or Ireland: in Bank of England Stock: Bank of Ireland Stock: India 3½ per cent. and 3 per cent. Stocks; any Stock hereafter issued by authority of Parliament charged on revenues of India: any Securities having interest guaranteed by Parliament: Metropolitan Board of Works or London County Council Stocks: Debenture Stock created by Metropolitan Police District Receiver: Debenture, Rent-charge, Guaranteed or Preference Stocks of any railway in Great Britain or Ireland that has paid not less than 3 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment: any railway or canal Stock in Great Britain or Ireland leased for 200 years or more at a fixed rental to any railway specified above: Indian Railway Debenture Stocks of companies with interest paid or guaranteed by Indian Council: "B" Annuities, Eastern Bengal, East Indian, and Scinde, Punjab, and Delhi Railway, "C" and "D" Annuities of the East Indian Railway, and any like annuities of any other railway hereafter created: any Indian railway with fixed or minimum dividend paid or guaranteed by Indian Council: any Debenture, Guaranteed or Preference Stocks of any incorporated or chartered Water Company in Great Britain or Ireland that has paid not less than 5 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment: any Corporation Stock of any borough having 50,000 inhabitants: any County Council Stock authorised by Act of Parliament or Provisional Order: any Water Stocks issued by incorporated Commissioners levying compulsory rates over areas containing 50,000 inhabitants, such rates not having exceeded 80 per cent. of authorised amount for 10 years: and in any Securities authorised by order of the High Courts of Justice of England or Ireland. Provided Stocks redeemable within 15 years are not purchased at a premium over the redemption price, or at more than 15 per cent. premium over such redemption price if redeemable after 15 years.

The Rule of the Supreme Court, 1888, authorises investment in:—Debenture, Preference, Guaranteed, or Rent-charge Stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on Ordinary Stock or Shares, and in like Stocks if guaranteed by Railway Companies of the same description and in Nominal Debentures or Nominal Debenture Stock under the Local Loans Act, 1875, or under the Isle of Man Loans Act, 1880, provided such Stocks are not liable to redemption within fifteen years from the date of investment.

The Trusts Amendment Act, 1884 (*Scotland only*), excludes Irish real or heritable Securities or Stocks, and British Railway contingent Preference and Waterworks Stocks; admits all Railway Debenture Stocks and Guaranteed Stocks of railways that have paid Ordinary Dividends for the past ten years, and all Municipal Loans, and East India Stocks, and registered Colonial Stocks if approved by Court of Session.

The Colonial Stock Act, 1900, permits Trustees, both English and Scottish, to invest in certain Colonial Stocks registered in the United Kingdom which the Treasury publishes a list of in the London and Edinburgh Gazettes, but subject to the clause as to Redeemable Stocks in the Trustee Act, 1893.

THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee is well maintained. The value of the trusts accepted up to March 31, 1922, was £186,129,083.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee, or he can be appointed by an Order of the Court. He can act solely or jointly with others.

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as Administrator with, or without, the Will annexed.

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved. His integrity is guaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office; and a wide knowledge in the work of investment.

The Public Trustee is not, as such, limited in his powers of investment to trustee securities, but, like a private trustee, he is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts. He makes a point of giving the personal attention of himself or of his senior officials to the personal details of any trust. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to produce an annual amount sufficient to discharge the salaries and other expenses of the Department and no more. A profit is not intended. An important Committee of Investigation, presided over by Sir George Murray, G.C.B., was appointed by the Lord Chancellor in April, 1919, to inquire into the organisation of the Office and any alteration which might be required in the scale of fees.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time by letter or telephone.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingsway, W.C. 2 (*tel.*, Holborn 2,400), or at any Post Office.

A branch office has been opened in Northern Assurance Buildings, Albert Square, Manchester.

Intestates' Estates, England & Wales and Ireland.

I.—PERSONAL PROPERTY, INCLUDING LEASEHOLDS.

The person entitled to administer is shown in brackets.

In each instance it is supposed there are no nearer relations than those named.

By the Intestates' Estates Act, 1890, the widow of a man dying intestate and without issue is entitled to the whole estate both real and personal if under £500 in value; if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

If the Intestate die, leaving	*His representatives take in the proportions following:—*
Widow only	Half to widow. Half to the Crown. [Widow.]
Widow and child or children	One-third to widow, two-thirds to children in equal shares. In case of deceased children who have left issue, such issue take amongst them their deceased parent's share. [Widow.]
Widow and father	Half to widow. Half to father. [Widow.]
Widow and mother, no father	Half to widow. Half to mother. [Widow.]
Widow, brothers or sisters	Half to widow. Half equally amongst brothers and sisters, whether of the whole or half blood; if a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share. [Widow.]
Widow, mother, nephews or nieces	Half to widow. One-fourth to mother. One-fourth to nephews and nieces *per stirpes.* [Widow.]
Husband, with or without children	All to husband. [Husband.]
Father, brothers, and sisters	All to father. [Father.]
Mother, brothers, and sisters	All equally. [Mother.]
Mother, but no other kin	All to mother. [Mother.]
Children, and grandchildren by deceased children	Amongst children in equal shares, the grandchildren taking amongst them their deceased parent's share. [Any number of children not exceeding three.]
Brother or sister, and nephews or nieces	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share. [Brother or sister.]
Brother or sister, and grandfather	All to brother or sister. [Brother or sister.]
Brother or sister, and uncles or aunts	All to brother or sister. [Brother or sister.]
Grandfather, no nearer relation	All to grandfather. [Grandfather.]
Father's father, and mother's mother	Equally to both. [Either or both.]
Grandmother, uncles, and aunts	All to grandmother. [Grandmother.
Great-grandfather, uncles, and aunts	Equally *per capita.* [To either or any number not exceeding three.]
Uncles and aunts	All equally. [To either or any number not exceeding three.]
Uncle, and deceased uncle's child	All to uncle. [Uncle.]
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle. [Uncle.]
Aunts, nephew, and niece	All equally. [Either not exceeding three.]
Cousins	Equally *per capita.* [Any number not exceeding three.]
Nephew by brother, and nephew by half-sister	Equally *per capita.* [Any number not exceeding three.]

NOTE A.—Taking *per capita* is taking by head individually. Taking *per stirpes* is taking by descent or representation. Thus, if A. die leaving three brothers or sisters, and no nearer kin, they each take an equal part of his personal estate in his or her own right, *i.e., per capita.* If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived, *i.e., per stirpes.*

NOTE B.—By English Law, brothers and sisters of the half blood share equally with the whole blood.

II.—REAL PROPERTY.

(N.B.—Leaseholds are Personal Property.)

Table of Descent of Real Property in England & Wales and Ireland on death of an intestate. No illegitimate child is capable of inheriting real estate. Custom of *Gavelkind* (descent to all sons alike) still exists in Kent, and custom of *Borough English* (descent to youngest son) in divers ancient boroughs. The *Dower* (viz., widow's thirds) of widows married since 1833) is in the majority of cases barred.

In each instance it is supposed there are no nearer relations than those named.

If Intestate die, leaving	*Real Property would descend to—*
Wife only, no blood relations	One-third to wife for life, rest to Crown; copyholds to lord of manor.

If Intestate die, leaving	*Real Property would descend to—*
Wife and child or children, and children of a deceased child	One-third to wife for life in any case. Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female. If no son, rest to daughters equally. If daughters and grandchildren (sons and daughters of deceased daughter), rest to daughters and eldest son of deceased daughter.
Wife and father	One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will.
Wife and mother	One-third to wife for life; rest to mother, there being no heirs on father's side.
Wife, brother, or sister, and children of a deceased brother or sister	One-third to wife for life in any case, rest to eldest brother or his issue. (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Sister and children of deceased sister, rest equally between sister and nephew (eldest). Sisters and nieces, only, children of deceased sister, rest equally between sisters and nieces, nieces taking *per stirpes*.
Wife, mother, nephews, and nieces	One-third to wife for life; rest to nephew (eldest), or nieces, if brother left no son.
Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters)	One-third to wife for life in any case; rest to eldest brother. Rest to nieces, equally, if children of elder brother deceased.
No wife or child or issue of a deceased child	Lineal ancestor paternal, males of whole blood first.
Children by one or more wives, and the issue of deceased children	All to eldest son, or his issue. (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Daughters equally.
Husband and child or children	Husband for life (provided the wife, or the husband in her right, was at some time during the coverture solely seized in possession of the legal or equitable estate); afterwards to only child or to eldest son or issue of a deceased eldest son. If all daughters, to them equally.
Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father	All to mother in default of lineal ancestors on the father's side, or issue of such ancestors.
Mother, and brothers and sisters	All to eldest brother.
Mother and sisters	All to sisters.
Father, and brothers and sisters	All to father.
Child and grandchild by deceased child	*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.
Brother and grandfather	All to brother.
Brother's grandson, and brother or sister's daughter	All to great-nephew, if eldest brother's grandson. All to brother's daughter, if child of eldest brother.
Brother and two aunts	Brother, all.
Brother and wife	One-third to wife for life; rest to brother.
Grandfather (no nearer)	All to grandfather.
Father's father & mother's mother	All to father's father.
Grandmother & uncle, or aunt on father's side (no nearer)	All to uncle or aunt.
Uncle, and deceased uncle's child	Uncle, unless deceased uncle was elder brother, when his child takes all.
Uncle by mother's side, and deceased uncle or aunt's child	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
Two aunts, nephew, and niece, children of deceased brother	Nephew.
Uncle or aunt's children, and brother's grandchildren through a son	Eldest brother's grandson, or if granddaughters between them equally.
Nephew by brother, and nephew by half-sister	Nephew by brother.
Nephew by deceased brother, and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.

NOTE A.—By the Land Transfer Act, 1897, the real estate of a deceased person devolves to the personal representative of the deceased, and probate and letters of administration may be granted in respect of real estate only, although there is no personal estate. The ultimate ownership of real estate is not affected by these provisions, which are for the convenience of administration. As to the persons entitled to administration of real estate, they are substantially the same as in the case of personal estate; but the Court shall, in granting letters of administration, have regard to the rights and interests of persons interested in the real estate, and the heir-at-law, if not one of the next-of-kin, shall be equally entitled to the grant with the next-of-kin.

Intestates' Estates, Scotland.

I.—MOVABLES.

[**In each instance it is supposed there are no nearer relations than those named.**

By the Intestate Husband's Estate (Scotland) Act, 1911, the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under £500 in value; if over that amount she takes £500 out of the heritable and movable estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

If the Intestate die, leaving	*His representatives take in the proportions following :—*

Cousins	Equally *per capita.**
Nephew by brother, and nephew by half-sister	All to nephew by brother.

NOTE A.—Illegitimate children do not succeed to their father or mother as heirs in intestacy.

NOTE B.—In Scotland, a lease on intestacy and in the absence of any destination descends to the heir-at-law.

NOTE C.—When a person dies intestate leaving heritable estate as well as movables, the heir to the heritage, if he is also one of the next-of-kin, is not entitled to any of the movables if he takes the heritage. He may, however, "collate" the heritage, *i.e.*, share it with the other next-of-kin and thus get an equal share of the mixed estate.

* *Per Capita* means by the head; *per stirpes* means inheriting through a parent deceased. Movables taken *per capita* divide into as many shares as there are children. Where representatives of a deceased parent take *per stirpes* they take equally amongst them the share that would have fallen to the deceased had he or she survived.

II.—HERITAGE.

Table of Succession to heritable property in Scotland on intestacy and in the absence of any destination in the property writs, other than "to heirs and successors."

In each instance it is supposed there are no nearer relations than those named.

If Intestate die leaving	*Heritage would descend to:—*
(1) Wife only; no blood relations.	One-third to wife for life; rest to Crown as *ultimus haeres.*
(2) Wife and child or children, and children of a deceased child...	One-third to wife for life. Fee to eldest son or his heir male. If no son then to daughters equally. The eldest son of a deceased daughter taking his mother's place.
(3) Wife and father	One-third to wife for life, rest to father.
(4) Wife and mother	One-third to wife for life. Fee to nearest heir male.
(5) Wife, brother, or sister, and children of a deceased brother or sister	One-third to wife for life. Fee to immediate younger brother and his heir male; if none, then to immediate elder brother.
(6) Wife, mother, nephews and nieces	One-third to wife for life; rest to nephew (eldest) or nieces equally if brother left no son. See No. 2.
(7) Wife, mother, brother, sisters and nieces (children of deceased brothers and sisters)...	One-third to wife for life; rest to younger brother and his heirs. If the only heirs are nieces they will take equally. If no younger brother then to immediate elder brother and his heirs in the same way. If sisters but no brothers the sisters take equally, and if the sisters have predeceased leaving only daughters they succeed equally.
(8) No wife or child or issue of a deceased child	To brother as in (5) whom failing to lineal ancestor paternal and his heirs.
(9) Children by one or more wives and the issue of deceased children	All to eldest son or his issue. If no male issue then to female issue as in (2).
(10) Husband and child or children	Liferent of whole to husband. Fee to eldest son.
(11) Mother, but no wife, child or issue of a child, father, brother, sister, nephew or niece or more distant descendants of father	Nearest paternal collateral (uncle or his heirs). If none, then to grandfather and his heirs.
(12) Mother and brothers and sisters	All to younger brother whom failing to immediate elder brother.
(13) Mother and sisters	All to sisters equally.
(14) Father and brothers and sisters	Fee as in (5).
(15) Child and grandchild by deceased child	(*See* No. 2.) "Rest to eldest son or his issue," under head, "Wife and child," etc.
(16) Brother and grandfather	All to brother.
(17) Brother's grandson, and brother or sister's daughter	All to great-nephew, if grandson of brother (conforming to Nos. 2 and 7). All to brother's daughter, if child of eldest brother.
(18) Brother and two aunts	Brother, all.
(19) Brother and wife	One-third to wife for life; rest to brother.
(20) Grandfather (no nearer).........	All to grandfather.
(21) Father's father and mother's mother	All to father's father.
(22) Grandmother and uncle, or aunt on father's side (no nearer)	All to uncle or aunt.
(23) Uncle and deceased uncle's child	If deceased uncle was younger brother, then to child. If both brothers older than intestate, then to the younger of them or his heir male.
(24) Uncle by mother's side, and deceased uncle's or aunt's child	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
(25) Two aunts, nephew and niece, children of deceased brother	Nephew.
(26) Uncle or aunt's children, and brother's grandchildren through a son	Brother's grandson, or if granddaughters between, then equally (conforming to Nos. 2 and 7).
(27) Nephew by brother, and nephew by half-sister.	Nephew by brother.
(28) Nephew by deceased brother, and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.

NOTE.—In Scotland succession to heritage on intestacy NEVER ascends to the mother and her relations. Even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor *negotiates* the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. *All charges (except scale and certain County Court matters) are now subject to an increase of 33⅓ per cent.*

Scotland.—Solicitors' fees for Conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in The "Parliament House Book" and in "The Scottish Law Directory." When a solicitor sues for payment of a professional account it is remitted to the Auditor of the Court for taxation of his charges.

MEDICAL FEES.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

General Practitioners.	Rentals.		
	£10 to £25.	£25 to £50.	£50 to £100
Ordinary Visit	5s. to 7s. 6d.	5s. to 10s. 6d.	7s. 6d. to 15s.
Night Visit	Double an ordinary visit.		
Mileage beyond two miles from Home	2s. 6d.	3s.	4s.
Detention per ½ hour	5s. to 7s. 6d.	5s. to 10s. 6d.	7s. 6d. to 15s.
Letters of Advice	Same charge as for an ordinary visit.		
Attendce. on servants	5s.	5s.	5s. to 7s. 6d.
Midwifery	1½ Gs.	1½ to 4½ Gs.	4½ to 7½ Gs.
Adminstrng. Chlfrm.	15s.	1½ Gs.	3 Gs.
Consultants.			
Advice or Visit alone	2 Gs	2 Gs.	2 Gs.
Advice or Visit with another Practitioner	1½ Gs.	1½ to 3 Gs.	1½ to 3 Gs.
Mileage beyond two miles from Home	15s.	15s.	15s.

Special visits—*i.e.*, of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in in consultation he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer or if *he* send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year.

ACCOUNTANTS' CHARGES.

Scale of fees approved by the Institute of Chartered Accountants. On Nov. 6, 1918, the Institute resolved that a substantial increase in fees is justifiable. The Incorporated Society (Jan. 15, 1920) expressed opinion that increase should be 50 per cent. on pre-war standard, and the Scottish Chartered Accountants recommended a similar increase (June, 1920):—

Audits.—Fees fixed by Shareholders in General Meeting.

Preparing Balance Sheets, Investigating Accounts, &c.—Principals' time, per day of seven hours, 5 Gs. Managing Clerks (if Chartered Accountants), 2 Gs.; (not Chartered Accountants), 1½ Gs.; other Clerks, 1 G. If at a distance: (*a*) in the U.K., Principal, 5 to 21 Gs.; Managing Clerks (C.A.), 2 to 3 Gs.; (not C.A.), 1½ to 2 Gs.; others, 1 G. (*b*) outside U.K.: Principal, 7 to 30 Gs.; Managing Clerk (C.A.), 3 to 10 Gs.; (not C.A.), 2 to 5 Gs.; others, 2 to 3 Gs. (The above rates are exclusive of travelling and hotel expenses.)

Arbitrations.—£10 10s. per day and upwards.

Liquidators and Trustees in Bankruptcy.—Usually by percentage on realisation of assets and dividends paid.

Voluntary Liquidator.—Usually fixed by the Company in General Meeting.

ARCHITECTS.

Fees on New Works.—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, a percentage on the total cost of all executed works as follows:—

(*a*) If the contract or order exceeds £2,000 the percentage is to be 6 per cent.

(*b*) If the contract or order does not exceed £2,000 the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £2,000 as the special character of such works may render appropriate.

Alterations and Additions.—A percentage not exceeding twice the amount due for new works of the same cost.

Fittings, Decorations, &c.—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

Omitted Works.—In addition to the percentage on the total cost of executed works, the Architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out.

Partial Service.—If the project or part of it be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows:—

(*a*) For making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage on the estimated cost of such works.

(*b*) For making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage on the estimated cost of such works.

Instalments.—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two-thirds of the charge calculated on the total amount of the contract or order, and no part of such payment shall be reclaimable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments from time to time as the work proceeds.

Work Executed with Old Materials, &c.—In all cases where work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed throughout by a Contractor, and with new material.

Services Not Included in Percentage.—The foregoing percentages do not cover the following services, for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved:—

Advising as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements, and plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in, or addition to the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the works. Making extra drawings for the Client's or Contractors' use, and making drawings for and negotiations with ground landlords, adjoining owners, public authorities, or others, and making applications for licences and consents

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in connection with fire, flood, or tempest during the execution of the works, and services in connection with the planning of grounds or gardens.

Housing Schemes and Laying Out Estates.—The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries, and the Scottish Board of Health.

Approval of Lessee's Plans.—For approving plans submitted by a lessee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being fulfilled, and certifying for lease when required, the charge is as follows:—

For each £100 or part of £100 of the total cost up to £500, 2½ per cent. (minimum fee, £3 3*s.*).

For each £100 or part of £100 from £500 to £5,000, 1¼ per cent.

For each £100 or part of £100 above £5,000, 1 guinea per cent.

Litigation and Arbitration.—For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendances in Court or before Arbitrators or other tribunals, and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect.

Land Surveying and Levelling.—For surveying and making a plan of a town, village, street or road, estate or grounds, or any part thereof, for taking levels, setting out streets or roads, and for other services in connection with land not otherwise specifically provided for, the charges are by time in accordance with Clause 21.

Sanitary Surveys.—For inspecting, reporting and advising on the sanitary condition of premises, the charge is by time in accordance with Clause 21, the minimum fee being £3 3*s.*, in addition to the cost of assistance and appliances.

Expenses.—The above-mentioned fees are, in all cases, exclusive of the cost of copies of documents, lithography, travelling and hotel expenses, and all other disbursements, which are to be charged in addition.

QUANTITY SURVEYORS.

A fee of 2½ per cent. upon the amount of the lowest tender received for the contemplated building, or upon its estimated cost should the work be abandoned before tenders are received, is charged by Quantity Surveyors for preparing Bills of Quantities.

FOR MEASURING AND ADJUSTING VARIATIONS the fees are 2½ per cent. on the amount of additions, and 1½ per cent. on the amount of omissions brought into account.

FOR SERVICES IN CONNEXION WITH LITIGATION OR ARBITRATION, a charge per day (dependent upon the Surveyor's professional position) is made.

The above charges are exclusive of the cost of printing, lithography, and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

CONSULTING ENGINEERS.

On *Constructional Work* the payment is usually an agreed fee or a commission (which includes the necessary drawings, &c.) of 5 per cent. on the cost of the works where the contract exceeds £5,000 and 7½ to 10 per cent. where the amount does not exceed £5,000.

For *Quantities and Accounts* (the services which in architectural work would not be covered by the Architect's fee but would be Quantity Surveyor's work) the usual charge is 1½ to 2 per cent. where the amount exceeds £5,000 and 2 to 2½ per cent. on amounts below £5,000.

AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

1. Sales by Auction.

Freehold, Leasehold, and Copyhold Properties, including the preparation of particulars, and advising as to reserves:—On the first £300, 5 per cent.; on the next £4,700, 2½ per cent.; on the residue, 1½ per cent.

In addition to the above charges:—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks,* and other *Movable Effects, Timber,* and *Tenant-right* under the conditions of sale, in addition to the purchase-money of the property:—5 per cent. on £500, and 2½ per cent. on residue, to include inventory and valuation.

Sale before Auction.

After issue of advertisements, the same scale as by auction.

Non-Sale.

Charge equivalent to one-fourth of the commission which would have been earned on a sale up to £5,000 calculated on the reserve price, to include valuation for reserves; on larger amounts by arrangement.

Sale after Auction.

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary commission then payable.

Furniture, Trade Stocks, and Chattels, on the Vendor's Premises.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Plant and Machinery.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Live and Dead Farming Stock (except Horses and Pedigree Cattle).—2½ per cent. on live stock, and 5 per cent. on dead stock, on the amount realised.

Horses and Pedigree Cattle.—5 per cent. on the amount realised.

On Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor.—One half the commission on sale, calculated on the amount of reserve or buying-in price.

2. Private Treaty Sales.

Freehold and Copyhold Estates and Houses, and Ground Leases.—On the first £300, 5 per cent.; on the next £4,700, 2½ per cent.; on the residue, 1½ per cent.; and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks,* and other *Movable Effects, Timber, and Tenant-right,* of 5 per cent up to £500, and 2½ per cent. on the residue, to include inventory and valuation.

3. Purchases.

Freehold, Copyhold, or Leasehold Property.—One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the value of the property. Minimum fee, £5 5*s.*

4. Lettings.

Business Premises, Unfurnished Houses, Flats, &c., or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise.—If the annual value be £100 or less 5 per cent. on one year's rent, where the term is for one year or less, and 7½ per cent. on one year's rent where the term is for more than one year. If the annual value be over £100 the above scale shall apply to the first £100 and on the excess rental over that amount, where the term is for three years or less, 5 per cent. on one year's rent; where the term is for more than three years, 7½ per cent. on one year's rent; in the case of *leases requiring the lessee to repair the demised premises* the commission is 10 per cent. on one year's rent, whatever the term. Upon the premium or consideration (in all cases), 5 per cent. up to £1,000, and 2½ per cent. on the residue; and the commission on any sum obtained for fixtures, furniture, or effects of any kind, of 5 per cent. up to £500, and 2½ per cent. on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to let or sell, is let by him, and the tenant afterwards purchases, the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent.—5 per cent. on the first year's rental, and 2½ per cent. for the remainder of the term.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects.—A minimum fee of two guineas per day, exclusive of expenses.

On Letting Land on Building Lease.—One year's ground rent on first £50; three quarters ditto on next £50; half ditto on next £900; quarter ditto on residue.

5. Collections or Receiverships.

10 per cent. upon gross rental of weekly property; 5 per cent. upon gross rental of other property or tithes; 7½ per cent. upon the gross rental for the management and collection of rents on agricultural estates; 2½ to 5 per cent. on ground rents, according to the amount of the rents and the number of collections.

6. Laying Out or Development of Estates.

For Road Construction, 5 per cent. upon the outlay, exclusive of expenses.

7. Valuations.

1. *Valuation of Freehold, Copyhold, or Leasehold Properties.*—A guinea per cent. on the first £1,000; half a guinea per cent. on the next £9,000; and a quarter of a guinea per cent. beyond on the value of the property, subject to a minimum fee of five guineas.

2. *Of Property taken under Compulsory Powers.*—The charge is on Ryde's Scale. The fee is exclusive of five guineas per day for attendances. Plans and disbursements extra.

3. *Valuing for Annual Rental.*—(*a*) *Agricultural Property*—7½ guineas per cent. up to £250, 5 guineas per cent. on the next £250, and 2½ guineas per cent. beyond. (*b*) *Urban and Residential Property*—5 guineas per cent. up to £100, and 2½ guineas per cent. beyond. Minimum fee 3 guineas.

4. *Valuation of Furniture, Fixtures, and Effects.*—5 per cent. up to £500, and 2½ per cent. on the residue.

5. *Valuation of Plant, Machinery, and Trade Stocks.*—5 per cent. on first £100, and 2½ per cent. on the residue.

6. *Valuation of Live and Dead Farming Stock.*—5 guineas per cent. on first £100, and 2½ guineas per cent. on the residue.

7. *Valuation of Hotel and Public House Fixture, Fittings, and Stock.*—5 guineas per cent. up to £1,000, and £3 3s. per cent. on the residue.

8. *Valuation for Probate and Estate Duty Purposes.*—(*a*) *Freehold, Copyhold, and Leasehold Property.*—One guinea per cent. on the first £1,000, half a guinea per cent. on the next £4,000, and one quarter-guinea per cent. on the remainder. Minimum fee, £5 5s. on each property.

(*b*) *Of Furniture and Effects.*—5 guineas per cent. on the first £100, and 2½ guineas per cent. on the next £400, and 1½ guineas per cent. of the remainder of the amount of valuation, to include inventory. Minimum fee, £5 5s.

9. *Valuations under the Finance* (1909–10) *Act*, 1910. *For Survey, Completion of Government Returns, Valuation, and Report.*

Country Residential Properties, Agricultural Land, and Undeveloped Land.—One half-guinea per cent. up to a "total value" of £20,000, and one quarter-guinea per cent. on the balance above that amount.

Urban Properties.—One quarter-guinea per cent. on a "total value" of £20,000, and one-eighth guinea per cent. on the balance above that amount. Minimum fee, £3 3s.

10. *Preparing Specification of Dilapidations and settling the amount if required.*—5 guineas per cent. on the amount. Minimum fee, £5 5s.

11. *Valuation or Sale of Timber.*—5 guineas per cent. on amount realised. When valuing only, 5 guineas per cent. on first £100, and 2½ guineas per cent. on the residue.

12. *Valuation of Tenant-Right.*—5 guineas per cent. on the first £100, and 2½ guineas per cent. on the next £900, and 1½ guineas per cent. on the residue.

Where one valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

THE UNION JACK CLUB, Waterloo Road, S.E. 1. Tel.: Hop. 3511.

Patron-in-Chief: His Majesty the King.

Patroness-in-Chief: Her Majesty the Queen.

Patrons:

H.R.H. The Prince of Wales, K.G., etc.;

H.R.H. The Duke of Connaught, K.G., etc.

President: Colonel Sir Edward W. D. Ward, Bt., G.B.E., K.C.B., K.C.V.O.

Vice-President: Colonel Sir Walter R. Lawrence, Bt., G.C.I.E., G.C.V.O., C.B.

Hon. Treasurer: Sir G. J. Marjoribanks, K.C.V.O.

Comptroller of Club: Brig.-General E. F. O. Gascoigne, C.M.G., D.S.O.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may deposit their kit and valuables, where they may obtain at moderate charges good meals and comfortable bedrooms to themselves, and where they find the usual amenities of a club, including Library and Writing Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use, from clothing to cigarettes, can be purchased, under their own roof and feel really at home.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 1st, 1907, by His late Majesty King Edward VII. Membership is limited to those serving on the Active List of the Regular Forces, below the rank of Officer, but during the War all mobilised men, including those from the Overseas Dominions and Allied Countries, were made Honorary Members. The Club is managed by a Council and General Committee, which includes representatives elected by the members. Already firmly established before 1914, the Union Jack Club was an inestimable boon to Service men in the Great War, during which period alone sleeping accommodation was provided for no fewer than 1,131,338 men and 3,054,809 meals were served, whilst many millions of whom no record was kept passed through its doors for rest and refreshment, many of them straight from the trenches in France. Open day and night, the capacity of the Club was taxed to the uttermost.

Work was commenced late in 1920 on a considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914–18 and to provide the increased accommodation which is so much needed. By permission of His Royal Highness, the new building will be known as "The Prince of Wales's Wing."

THE ORDER OF ST. JOHN OF JERUSALEM.

Ribbon, Black.

The Order had its origin in Jerusalem and Acre, as an international lay confraternity for the relief of crusaders, and was later sovereign in Rhodes and in Malta, where its Knights kept galleys and galleons, to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1530 till 1798. The work of the British Order is the control of the St. John's Ambulance and Brigade, and of the British Ophthalmic Hospital, Jerusalem. *Sovereign Head and Patron*, H.M. King George V; *Grand Prior*, H.R.H. Duke of Connaught and Strathearn; *Secretary-General*, Maj.-Gen. Sir Geoffrey P. T. Feilding, K.C.B, K.C.V.O, C.M.G, D.S.O. *Chapter-General*, the "Knights of Justice" and selected "Chaplains," "Knights of Grace" and "Esquires." There are also "Ladies of Justice," "Ladies of Grace," and Esquires. These distinctions are notified in the *London Gazette*, but do not confer any rank or title.

BRONZE COINS:			
Penny 1*d.*	145·83333	—	2·916
Halfpenny ½*d.*	87·50000	—	1·750
Farthing ¼*d.*	43·75000	—	0·875

Standard Gold contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy; fineness, 916·66, or 22 carats; 240 troy ounces of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 17*s.* 10½*d.*, and one ounce of pure gold, on the same basis, £4 4*s.* 11½*d.* During 1922, the market price of gold has been above these figures.

Standard Silver formerly consisted of thirty-seven-fortieths of fine silver and three-fortieths of alloy; fineness, 925. Silver for coinage, by an Amending Act (10 Geo. V. ch. 3), consists of one-half silver, one-half alloy; or in millesimal fineness, 500; 12 troy ounces of 500 fineness are coined into 66 shillings.† [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958·33), is practically obsolete. It is occasionally used, however, for high-class plate.]

On account of the high price of precious metals, the melting of British gold and silver coin is prohibited, as well as their export. The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—1912, 28$\frac{1}{16}$*d.*; 1913, 27$\frac{9}{16}$*d.*; 1914, 25$\frac{5}{16}$*d.*; 1915, 23$\frac{11}{16}$*d.*; 1916, 31$\frac{5}{16}$*d.*; 1917, 40⅞*d.*; 1918, 47$\frac{9}{16}$*d.*; 1919, 57$\frac{1}{16}$*d.*; 1920, 61$\frac{9}{16}$*d.*; 1921, 36⅞*d.* On Oct. 5, 1922, the price of silver was 35¼*d.* per oz.

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2·192; to express a United States price on the English system, multiply the cents by 0·4562.

‡**Bronze** is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part, or of copper 95½ parts, tin 3 parts and zinc 1½ parts.

The "**Remedy**" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

Light Gold.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight; but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

Treasury Notes of the value of £1 and 10*s.* are issued, and are legal tender to any amount.

Bank Post Bills can be obtained at the Bank of England for amounts of £10 and over at seven days' sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn: they may be obtained at the Chief Office of the Bank of England in London, or at any of the branches.

Legal Tender of Money.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, and Treasury notes are legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

British Coinage Statistics.—During 1921 the number of coins struck at the Royal Mint was 298,946,125, of which 287,500,151 were Imperial and 4,445,974 Colonial.

BRITISH DOMINIONS ABROAD.

Imperial Sterling Coins are the *sole legal metallic currency* in:—

NEW ZEALAND.

UNION OF SOUTH AFRICA AND SOUTH AFRICA GENERALLY. (Special coinage proposed.)

FALKLAND ISLANDS.

FIJI.

GIBRALTAR.

ST. HELENA.

WEST INDIES. *See also* JAMAICA, *below.*

Special Coins are current in addition to the Imperial series in:—

AUSTRALIAN COMMONWEALTH. — Special florins, shillings, sixpences, and threepences in silver, and pence and halfpence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs.

BRITISH GUIANA.—A special groat or fourpence.

GUERNSEY.—Eight doubles (= 1 penny), 4, 2, and 1 double.

JAMAICA.—Nickel-bronze pence, halfpence, and farthings.

JERSEY. — Special pence, halfpence, and farthings.

MALTA.—One-third of a farthing (bronze).

BRITISH WEST AFRICA.—Silver and also "alloy metal," 2*s.*, 1*s.*, 6*d.*, and 3*d.*, One penny, one halfpenny, and one-tenth penny (nickel-bronze).

---

* Issued on special occasions.

† By law a shilling weighs one sixty-sixth of 12oz. Troy; 12oz. of *pure* silver would be used in coining 72 shillings of 925 fineness and 132 of 500 fineness.

‡ The legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois; the halfpenny is one *inch* in diameter.

§ Discontinued.

In many cases silver coins are reduced in fineness, in others coins in low value metals are substituted, as a consequence of the War.

§ The par value and rate of exchange of Foreign Moneys and Sterling at certain dates in 1922–1923 are shown on p. 426.

Notes.—(*a*) "1923 *Paper Rouble.*" Until November 1, all 1922 paper money will be exchanged by the Peoples Commissariat for Finance and the State Bank for money of the 1923 issue. The par of exchange of the rouble is £1 sterling - 9·46 gold roubles.

(*b*) *Germany.*—On October 16 it was announced that the paper mark was to remain legal tender, but a secured currency called "Rentenmark" was to be issued acceptable as payment by all public offices. The Rentenmark is to be secured by first mortgages in gold marks on the entire German landed property, and by gold obligations with first priority on industry, trade, and the banks.

HALL MARKS ON PLATE.*

Assay Office Marks.—The official marks stamped on gold and silver plate at Assay Offices are distinguished as under:—

Assay Office ...	*Distinguishing Mark.*
London (Goldsmiths' Hall)	Leopard's Head (crowned, until 1823).
Birmingham...	Anchor (square frame for gold; pointed shield for silver).
Chester	City Arms (3 Garbs and a Sword).
Sheffield	Crown.
Edinburgh......	Castle.
Glasgow	Tree, Fish & Bell.
Dublin	Harp crowned.

In addition to the above, there have been Assay Offices at Bristol, Exeter, Newcastle-upon-Tyne, Norwich and York, all of which have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark.—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 26 years. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is omitted from the alphabet; at Glasgow all the letters are employed in a 26-year cycle.

The Sovereign's Mark. — The "lion passant" introduced in the reign of Edward I. (1300) for *silver* articles only.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784—1889-90. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On *gold* articles only, in lieu of the "lion passant" on silver.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697-1720; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 18 dwt. of alloy.

Sterling Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The *relative* values of the various standards is shown below:—

	£	s.	d.
Pure gold, 24 carats...............	4	4	11½
Standard, 22 carats...............	3	17	10½
2nd ditto, 18 carats...............	3	3	8½

The Collector will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be insufficient to judge by the style and period of the article itself, *e.g.:*

An article marked with the letter F 1721-2 can be distinguished from letter F 1801-2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1823); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881–2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801–2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Imported Plate.

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed, stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Boujet. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

The Periods of English Architecture.

	Date.	*Style.*
I.	Before B.C. 55	Ancient British.
II.	B.C. 55 to A.D. 420	Roman Period.
III.	A.D. 449 to Norman Conquest (1066)	Anglo-Saxon.
IV.	1066–1189 (*i.e.* to end 12th cent.)	Norman.
V.	1189–1307 (*i.e.* 13th cent.)	Early English (Lancet, or Geometrical).
VI.	1307—1377 (*i.e.* 14th cent.)	Decorated (or Curvilinear).
VII.	1377–1485 (*i.e.* 15th cent.)	Perpendicular (or Rectilinear).
VIII.	1485–1558 (*i.e.* first half 16th cent.)	Tudor.
IX.	A.D. 1558-1625. Early Renaissance	Elizabethan (A.D. 1558–1603). Jacobean (A.D. 1603–1625).
X.	A.D. 1625-1830. Late Renaissance	Anglo-Classic (A.D. 1625–1702). Queen Anne and Georgian (A.D. 1702–1830).
Modern Architecture (The Age of Revivals)	19th cent. to present time	William IV. (A.D. 1830–1837). Victoria (A.D. 1837–1901). Edward VII. (A.D. 1901-1910). George V. (A.D. 1910–).

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Note.—The first portion (I–VIII) of this table is based upon that given on p. 319, Parts IX, and X on p. 701; and "Modern" on p. 764, of "A History of Architecture on the Comparative Method" (6th ed.), by Sir Banister Fletcher, F.R.I.B.A. (Batsford.)

Weights and Measures.

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

20 grains = 1 scruple (℈1) (= 1·296 *Grammes*).
3 scruples = 1 drachm (ʒ1) (= 3·888 *Grammes*).
8 drachms = 1 ounce (= 31·1035 *Grammes*).

Measures of Capacity.

60 minims (*min.*) = 1 fluid drachm (= 3·552 *Millilitres*).
8 fluid drachms = 1 fluid ounce (= 2·84123 *Centilitres*).
20 fluid ounces = 1 pint (= 0·568 *Litre*).
8 pints = 1 GALLON (= 4·5459631 *Litres*).

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *dram*, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437·5 grains). A fluid *drachm* (54·6875 grains) is equal in weight to TWO Avoirdupois *drams*.

Approximate Equivalents:—

1 sovereign = 2 drams; 1 half-crown = 3½ drams; 1 florin = 3 drams; 1 shilling = 1½ drams; 1 3*d*. piece = ⅓ dram; 1 "table-spoon" = ½ fluid oz.; 1 "dessert-spoon" = ¼ fluid oz.; 1 "tea-spoon" = ⅛ fluid oz.

Avoirdupois Weight.

7000 grains (*gr.*) = 1 pound (*lb.*)
16 drams (*dr.*) = 1 ounce (*oz.*) (= 28·350 *Grammes*).
16 ounces = 1 POUND (= 0·45359243 *Kilogram*).
14 pounds = 1 stone* (= 6·350 *Kilograms*).
28 pounds = 1 quarter (of a *cwt.*) (= 12·70 *Kilograms*).
100 pounds = 1 cental (= 45·359243 *Kilograms*).
4 quarters (112 lb.) = 1 hundredweight (*cwt.*) (= 50·8022 *Kilograms*).
20 hundredweight (2,240 lb.) = 1 ton (= 1·0160 *Tonnes* or 1016·0 *Kilograms*).

Troy Weight.

24 grains = 1 pennyweight (*dwt.*) (= 1·5552 *Grammes*).
20 dwt. = 1 ounce (= 31·1035 *Grammes*).

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains (31·1035 *Grammes*) in weight. There is *no* Troy POUND.

Jewellers' Weight.

The metric carat of 200 *millegrammes* is the legal standard of weight for precious stones and pearls.

Measures of Capacity.

4 gills = 1 pint (= 0·568 *Litre*).
2 pints = 1 quart (= 1·136 *Litres*).
4 quarts = 1 GALLON (= 4·5459631 *Litres*).
2 gallons = 1 peck (= 9·0919 *Litres*).
8 gallons = 1 bushel (= (3·637 *Dekalitres*).
8 bushels = 1 quarter (= 2·909 *Hectolitres*).
A chaldron is 36 bushels = 4½ quarters.

Measures of Length.

12 inches (*in.*) = 1 foot (*ft.*) (= 0·30480 *Metre*).
3 feet = 1 yard (*yd.*) (= 0·914399 *Metre*).
6 feet = 1 fathom (= 1·8288 *Metres*).
5½ yards = 1 pole (= 5·0292 *Metres*).
22 yards = 1 chain (= 20·1168 *Metres*).
220 yards = 1 furlong (= 201·168 *Metres*).
8 furlongs = 1 mile (= 1·6093 *Kilometres*).
3 miles = 1 league (seldom used).
100 links = 1 chain (22 yards).
10 chains = 1 furlong
8 furlongs = 1 mile.

A *Pole* of 5½ yards is a quarter of a chain.

A *Cricket Pitch* is 22 yards (one chain) between the stumps.

A *Lawn Tennis Court* is 78 × 36 feet (double) and 78 × 27 feet (single).

A *Croquet Lawn* is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

Birmingham Gauge.

The Weights and Measures Act of 1878 made standards on and after Nov. 1, 1914, certain new divisions of an inch. The equivalent of an inch is 15/0 B.G. The numbers proceed by units down to 1/0 B.G., which = 0·3964 inch, and from 1 B.G. (·3532 inch) by units to 52 B.G. (·00095 inch).

Square or Surface Measure.

144 sq. inches = 1 sq. foot (= 9·2903 *Sq. Decimetres*).
9 sq. feet = 1 sq. yard (= 0·836126 *Sq. Metre*).
30¼ sq. yards = 1 perch, or rod, or pole (= 25·293 *Sq. Metres*).
40 perches = 1 rood (= 10·117 *Ares*).
4 roods (4840 sq. yards) = 1 acre (= 0·40468 *Hectare*).
10 square chains = 1 acre.
640 acres = 1 square mile (= 2·58995 *Sq. Kilometres*).

Note.—The Anglo-Saxon acre's-length is the furlong, and the acre's-breadth the chain.

Cubic Measure.

1,728 cubic inches = 1 cubic foot (= 0·028317 *Cubic metre*).
27 cubic feet = 1 cubic yard (= 0·764553 *Cubic metre*.

Angular or Circular Measure.

60 seconds (″) = 1 minute (′).
60 minutes = 1 degree (°).
30 degrees = 1 sign.
90 degrees = 1 right angle or quadrant.
12 signs (4 quadrants) = 1 circumference.
Diameter of circle × 3·1416 = circumference.
Diameter squared × ·7854 = area of circle.
Diameter squared × 3·1416 = surface of sphere.
Diameter cubed × ·5236 = solidity of sphere.
One degree of circumference × 57·3 = radius.

Diameter of cylinder × 3·1416; product by length or height, gives the surface.

Diameter squared × ·7854; product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

---

* The *Smithfield stone* (for dead meat) is 8 lb. only.

Miscellaneous Weights and Measures.

Ballast (Pig) = 56 lb.
Beef (Barrel) = 200 lb.

Wool (Sack) = 364 lb.

Wheat, Corn, and Flour.

Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned:—

Wheat, English, 60 lb. Foreign, 62 lb.
Barley, English, 56 lb. French, 52½ lb. Mediterranean, 50 lb.
Oats, English, 39 lb. Foreign, 38 and 40 lb.
Rye and Maize, 60 lb. Buckwheat, 52 lb.

Under the *Corn Sales Act* of 1921 the Corn Returns Act of 1882 is amended, and provision is made for the sale of cereals by weight in terms of the hundredweight of 112 imperial standard pounds.

100 lb. wheat produces 70 lb. flour.
100 lb. flour produces 130 lb. bread.

A quartern loaf = 4 lb.
A last of grain = 80 bushels.

NOTE.—A *Quarter* is a heaped measure of 8 *bushels*. A bushel of English wheat is reckoned as 60 lb. weight, and a Quarter as 480 lb.

Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb.
Load of hay or straw = 36 trusses.
Ton of hay = 36 trusses.
An acre of grass should yield 1 to 2 tons of hay.

Sizes of Barrels and Bottles.

	Gals.
Firkin or Quarter Barrel	9 = 9 × 1
Kilderkin, Rundlet, or ½ Barrel	18 = 9 × 2
Barrel	36 = 9 × 4
Hogshead (1½ barrels)	54 = 9 × 6
Puncheon (2 barrels)	72 = 9 × 8
Butt of Ale (3 barrels)	108 = 9 × 12

An *Anker* = 10 gallons; a *Tierce* = 42 gallons; a *Pipe* of Port or Masdew = 115 gals.; Teneriffe = 100 gals.; Marsala = 93 gals.; Madeira and Cape = 92 gals.; Sherry and Tent = 108 gals.; *Butt* of Lisbon and Bucellas = 117 gals.; *Aum* of Hock and Rhenish = 30 gals.; *Hogshead* of Brandy, 60 gals.; Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons; *Puncheon* of Brandy or Rum = 120 gals.

Bottles.—The customary glass bottle of wine or spirits should contain one-sixth of a gallon = 26⅔ fluid ounces.

In the drug trade two large bottles are used:—

Corbyn...	= 40 fluid oz.	(quart).
Winchester quart	= 80 ,,	(½ gallon).

Water.

The British Ton is the weight of a cubic British Metre of pure water at the temperature of melting ice, very nearly. At present, the following relations hold good:—

Cubic inch	=	252·458 grains.
Gallon (277·274 cub. in.)	=	10 lb. (distilled).
Cubic foot	=	62·321 lb.
35·943 cubic ft. (224 gals.)	=	1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lb. in addition to its own weight.

Railway Gauges.

In Great Britain = 4 ft. 8½ in.
,, Ireland = 5 ft. 3 in.
,, U.S.A. = 4 ft. 8½ in.
The 4 ft. 8½ in. gauge is also used in Canada, France, Germany, Netherlands, Belgium, Denmark, Austria, Hungary, Italy, Switzerland, Sweden and European Turkey.
,, Australia:—
N.S.W. = 3 ft. 6 in. and 4 ft. 8½ in.
Victoria and South Australia = 5 ft. 3 in.
Queensland and Western Australia = 3 ft. 6 in.
,, New Zealand = 3 ft. 6 in.
,, India = 2 ft. 6 in.; 3 ft. 3⅜ in. and 5 ft. 6 in.
,, South Africa = 3 ft. 6 in.
,, Egypt = 4 ft. 8½ and 3 ft. 6 in.
,, Ceylon = 5 ft. 6 in.
,, Japan = 3 ft. 6 in.
,, Russia = 5 ft. 0 in.
,, Spain and Portugal = 5 ft. 6 in.
,, Asia Minor = 4 ft. 8½ in. and 3 ft. 5½ in.

A single track of 4 ft. 8½ in. gauge requires 12 ft. of roadway; a double track requires 23 ft. of roadway.

Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of the units has been fixed by international agreement. The principal units are as follow :—

As a unit of resistance, the international *Ohm*, which is based upon the ohm equal to 10^9 units of resistance of the C.G.S. system of electro-magnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14·4521 grammes in mass, of a constant cross-sectional area, and of a length of 106·3 centimetres.

As a unit of current, the international *Ampère*, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of 0·001118 of a gramme per second.

As a unit of electro-motive force, the international *Volt*, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampère, and which is represented sufficiently well for practical use by $\frac{1000}{1434}$ of the E.M.F. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of 15° C., and prepared in the manner described in a certain specification.

As a unit of quantity, the international *Coulomb*, which is the quantity of electricity transferred by a current of one international ampère in one second.

As a unit of capacity, the international *Farad*, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the *Joule*, which is 10^7 units of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampère in an international ohm. In practice the watt-hour is usually employed. It represents the work done by such a current in an hour, and equals 3,600 joules.

As the unit of power, the *Watt*, which is 10^7 units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 746 watts = 1 horse-power, and the value of a Board of Trade unit (B.O.T.U.) is 1,000 watt-hours, or 3,600,000 joules, or 1⅓ horse-power hours.

As the unit of induction, the *Henry*, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampère per second.

A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11⅓ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar. The rod being 5 British metres, a rod of brickwork is 25 square metres 1½ bricks thick = very nearly 10 cubic metres.

Ordinary bricks weigh about 7 lb. each ; a load of 500 weighs about 1 ton 11 cwt. 1 qr.

A *Piece* of Wall Paper is 12 yd. long × 21 in. wide (English), and 9 yd. × 18 in. (French).

To find the weight of a cubic foot, multiply 62·321 lb. by the specific gravity. To find the number of cubic feet in one ton, divide 35·943 by the specific gravity.

Weight of Cubic Foot and Cubic Yard.

A cubic foot of fresh water = 62½ lb.: salt water 63½ lb. Timber—ash 49 lb.; beech 43 lb.; birch 49 lb.; cork 15 lb.; elm 36 lb.; pine 41 lb.; oak 59 lb. A cubic foot of clay weighs 125 lb.; of loose earth 95 lb.

A cubic yard of *anthracite* coal, solid, weighs 2,160 lb.; *bituminous* 2,025 lb.; *cannel* 1,400 lb. A cubic yard of compressed hay = 225 lb.; of hay in stack, 126 lb.; of compressed straw, 145 lb.; of straw in stack, 90 lb.; of grain, 20 bushels.

Fish.

In Scotland, and at certain places in England and Wales at which the Cran Measures Act, 1908, has been put into operation, fresh herrings must be sold by the *Cran*, containing 37½ imperial gallons, or *Quarter Cran* of 9⅓ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Maze*, which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be 26⅔ imperial gallons, or in half-barrels of 13⅓ gallons. Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force.

A *Quintal* of fish (Newfoundland, &c.) is 100 lb.; a barrel of anchovies = 30 lb.: a "box of fish" is about 90 lb.

Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England).

A *Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076·8 feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

CONVERSION.
Let F = Fahr.
„ C = Cent.
„ R = Réaum.

$$F = \frac{9C}{5} + 32 \qquad F = \frac{9R}{4} + 32 \qquad F = C + R + 32$$

$$C = \frac{5(F - 32)}{9} \qquad R = \frac{4(F - 32)}{9}$$

NOTE.—The *normal* temperature of the *human body* is 98·4° F., or 37° (36·9°) C., or 29·5° R. *Freezing* point = 32° F. = 0° C. = 0° R.; *Boiling* point = 212° F. = 100° C. = 80° R. "*Absolute*" *Temperature* is Temperature reckoned from "*Absolute Zero*," which is at 273° C. below 0° C., 459·4° below 0° F., and 218·4° below 0° R.

Nautical Measures.

6 feet = 1 fathom.
100 fathoms = 1 cable length.
10 cables = 1 nautical mile.
60 nautical miles = 1 degree.

The assumed length of the cable is 600 feet (=182·87 *metres*), but it is strictly 606·97 feet (= 185 *metres*). The conventional Nautical Mile (the *Knot* in speed measurements) is 10 cables, assumed at 6,080 feet (strictly 6,069·7 feet), but the Nautical Mile is strictly the length of a minute of the meridian and differs according to latitude.

Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the Ton-register used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

Net tonnage is the gross tonnage *less* certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

Dead-weight tonnage, or carrying capacity, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (*q.v.*).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to the load water line (*q.v.*), *i.e.*, it is the *weight* of vessel and contents in tons.

Load-water-line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light," or "in ballast."

Free Board is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

Bells and Watches on Board Ship.

Bells.—Time is kept by means of a bell, which is struck every half hour, except at certain times towards the end of a watch, when the bell is struck 10 or 15 minutes before the expiration of the regular half hour, partly as a signal to the Commanding Officer that the watch is about to be changed, and partly as a signal to the Officer of the next watch to prepare for duty.

Watches.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the *Starboard* (right side, looking forward) and the *Port* (left). The day commences at noon, and is thus divided:—

Afternoon *Watch*	noon to 4 p.m.
First Dog ,, ...	4 p.m. to 6 p.m.
Second Dog ,, ...	6 p.m. to 8 p.m.
First ,, ...	8 p.m. to midnight.
Middle ,, ...	midnight to 4 a.m.
Morning ,, ...	4 a.m. to 8 a.m.
Forenoon ,, ...	8 a.m. to noon.

This makes seven Watches, enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into *two* Watches.

For TIME AT SEA *see* p. 78.

Speed of Ships.

The *Knot* is a measure of speed of ships. The following table shows the equivalents of 1 to 42 knots in land (statute) miles per hour:—

Knots.	Miles.	Knots.	Miles.	Knots.	Miles.

Measures of Energy, &c.

In Physics the unit of force is the *dyne*, the amount that, acting for one second on one gramme mass, gives it a velocity of one centimetre per second. The British unit is the *poundal*, which in one second gives one pound a velocity of one foot per second. One *poundal* = 13,825·5 *dynes*. In Meteorology the unit of atmospheric pressure is the *Bar*, equal to the pressure of 1,000,000 dynes (1 megadyne) per sq. centimetre. The Meteorological *Bar* is thus 1,000,000 Chemical *Bars*.

Horse power is energy exerted at the rate of 550 foot-pounds per second; an alternative unit is the *kilowatt* (102 kilogram-meters per second) = 737·59 foot pounds per second.

Thermal Unit.—The British thermal unit (B.T.U.) is the amount of heat required to raise one pound of water one degree Fahrenheit. The *Gas Therm* = 100,000 B.T.U. If V = cu. ft. consumed, H=declared heat value of the Company's gas (in B.T.U. per cu. ft.), P = cost of therm in pence, B=total bill in pence—then $B = V \times H \times P \div 100{,}000$, whence equivalent cost (in pence) per 1,000 cu. ft. $= B \times 1{,}000 \div V = H \times P \div 100$.

Yarn Measures.

Cotton and Spun Silk Count.—
Thread = 1½ yards.
Lea or Skein, *skn.* = 120 yards.
Hank, *hk.* = 7 Skeins, or Leas = 840 yards.
Spindle, *spdl.* = 18 Hanks.
Counts = the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lb. or 10 lb.

Reels of cotton vary from 30 to 1,760 yards; they must be marked correctly.

Bundles of Cotton are chiefly made up for export.

Worsted Count.—Wrap, 80 yards; Hank = 560 yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linen Count.—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is 200 hanks.

West of England Count.—The Hank is 320 yards, and the number of hanks in 1 lb. is the count of the yarn.

NOTE.—Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, and a ream will provide 100 books, the odd 16 sheets being reckoned as waste. Newspapers (and books circulating in large numbers) are printed on rotary presses, for which the paper is supplied on reels (and not in cut reams). "Whitaker" is printed on a rotary press, 192 pages at a time, the paper being served to the press from a reel, and 6 sheets of 32 pages are delivered, printed and folded, at the opposite end of the press.

Sizes of Type.

All Founders cast their type to one uniform height ("type high"), which is 11/12 inch, though the letters may vary considerably in their breadth.

The type chiefly used in "Whitaker" is named *Nonpareil* (6 point). The column contains 75 lines, and is 12 Pica ems wide; on an average every column contains about 3,000 letters, or 600 words.

The Point System.—The basic unit in American (and many British) type foundries is the "point" of 0·013837 inch (72 points to the inch), and the names of the various types in the point system are added in parentheses.

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 124 lines, and about 7,500 letters.

METRIC WEIGHTS AND MEASURES.

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres (*mm.*) = 1 centimetre (*cm.*) = 0·39370113 inch.
10 centimetres = 1 decimetre (*dm.*) = 3·9370113 inches.
10 decimetres = 1 METRE (*m*) = 1·0936143 yards.
10 metres ... = 1 dekametre (*dam.*) = 10·936143 yards.
10 dekametres = 1 hectometre (*hm.*) = 109·36143 yards.
10 hectometres = 1 kilometre (*km.*) = 0·62137 mile.

A kilometre is approximately *five eighths* of a mile, so that 8 kilometres may be regarded by pedestrians as 5 miles.

2.—MEASURES OF WEIGHT.

10 milligrams (*mg.*) = 1 centigram (*cg.*) = 0·15432 grains.
10 centigrams = 1 decigram (*dg.*) = 1·5432 ,,
10 decigrams = 1 gramme (*grm.*) = 15·4323 ,,
10 grammes = 1 dekagram (*dag.*) = 5·6438 drams.
10 dekagrams = 1 hectogram (*hg.*) = 3·5274 oz.
10 hectograms = 1 KILOGRAM (*kg.*) = 2·2046223 lb.
10 kilograms = 1 myriagram = 22·046223 lb.
10 myriagrams = 1 quintal (*q.*) = 1·9684 cwt.
10 quintals ... = 1 tonne (*t.*)... = 0·9842 ton.

3.—MEASURES OF CAPACITY.

10 millilitres (*mil.*) = 1 centilitre (*cl.*) = 0·0704 gill.
10 centilitres = 1 decilitre (*dl.*) = 0·17598 pint.
10 decilitres = 1 LITRE (*lit.*) = 1·7598 pints.
10 litres ...... = 1 dekalitre (*dal.*)... = 2·1997 gals.
10 dekalitres = 1 hectolitre (*hl.*) = 2·7497 bushels.

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF LAND.

100 sq. metres = 1 are (*a.*)...... = 0·0988 rood.
100 ares ...... = 1 hectare (*ha.*) = 2·4711 acres.
100 hectares = 1 sq. kilometre = 0·38611 sq. mile.

NOTES.

1 hectolitre....................	=	2·75 bushels.
1 hectolitre per hectare	=	1·11 bushels per acre.
1 quintal.........................	=	3·67 bushels.
1 quintal per hectare ...	=	1·49 bushels per acre.
1 franc a hectolitre	=	3·6*d*. a bushel (par).
1 ,, a quintal	=	4·3*d*. a cental (par). 21·3*d*. a quarter (par).
7 francs ,, (duty)......	=	12*s*. 6*d*. a quarter (par).

THE UNITED STATES.

The weights and measures of the U.S.A. are identical with those of Great Britain, with the following exceptions:—

Weight.—In the short ton of 2,000 lb., the Cental of 100 lb. takes the place of the Cwt. in the long ton. There are TWO tons, therefore, the long ton of 2,240 lb., the short ton of 2,000 lb.

Capacity.—For grain, the old bushel of 2,150·42 cubic inches; its gallon = 268·8 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the British gallon and = 58,317·8 grains of water. It is divided into 8 pints = 7,289·7 grains of water = 16·6 Imperial ounces. In medicine the pint is divided into 16 fluid ounces = 455·6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

BRITISH DOMINIONS.

Australia and New Zealand.—*Same as* British.

Canada and Newfoundland.

Same as British but with *short* ton of 2,000 lb., as in U.S.A.

Channel Islands.

The weights and measures in use in the Channel Islands are those of Great Britain, the *cental* of 100 lb. being used as well as the *cwt.* of 112 lb. The *Old Island Measures* are as follows:—

	Jersey.	Guernsey.
Vergée (Normandy rood) .... =	·44 acre	·4 acre.
Bushel.......................... =	8·9 gallons	5·8 gallons.
Pound .... =	7,561 grains	7,623 grains.
Cwt. ....(104 lb.) =	112·3 lb.	(100 lb.) = 108·9 lb.

British India.

Ungul .... = ·75 inch.
Guz, usually 33 inches; also the yard.
Koss .... = 2,000 yards.
Bigha (Bengal) ....usually = ·625 acre.
Cawny (Madras) .... ,, = 1·33 ,,
Tola (rupee-weight)........................ = 180 grains.
Chittak .... = 2 oz. av.
Seer, 16 chittak, or 80 tolas .... = 2·204 lb.
Maund, 40 seers .... = 82·287 lb.
,, (Madras)............................ = 24·68 lb.
Seer (Liquid) .... = 1·760 pints.
Candy ,, ... = 500 lb.
Visham = 3 lb.; Dangali .... = 3 pints.
Parah .... = 15 gallons.
Catty (Singapore)............................ = 1⅓ lb.
Pikul ,, ... 100 catties = 133 lb.

Irish Free State.—*Same as* British.

Malta.

Piede .... = 11·166 inches.
Canna .... = 2·2283 yards.
Libbra .... = 12 oncia = 4886 Troy gr.
Rotolo .... = 1·745 lb.

Sudan.—*See* Egypt.

South Africa.

Money, Weights, and Measures.—The *Metric System* is compulsory in the case of chemists, and is permissible (along with British standard of weights and measures) in other cases. In addition, the following old Dutch measures are still used:—*Liquid Measure:* Leaguer = about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. *Capacity:* Muid = 3 bushels. The general surface measure is *Morgen*, equal to 2·1165402 acres; 1,000 Cape lineal feet are equal to 1,033 British feet. The short ton of 2,000 lb. is used.

FOREIGN WEIGHTS AND MEASURES.

The *Metric System* has been adopted by the whole of Europe (except *Great Britain* and *Russia*) and is *permissive* in all countries.

China.

Tael weight = 1·33 oz.
Catty ,, = 1·33 lb.
Picul ,, = 133·33 lb.
Ts'un .... = 1·41 inches.
Ch'ih .... = 1·175 feet.
Chang ...... = 11·75 feet.
Li .... = 2,115 feet.

Egypt.

The *Metric System* of *Weights and Measures* and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use, with their British equivalents, are as follows :—

Length—

Dira Baladi (used for piece goods) = 29·83 inches
Dira Mamari, or Pic (used by architects) .... = 29·53 inches
Qasaba (used for agricultural land) = 11·65 feet

Area—

1 Qirat .... = 209·3 sq. yards
1 Feddân (=24 qirats) .... = 1·038 acres

Capacity—

1 Kêla .... = ·454 bushel
1 Ardeb (=12 kélas) .... = 5·444 bushels

Weight—

1 Rotl .... = ·99 lb.
1 Oke .... = 2·75 lb.
1 Qantar (= 100 rotls) .... = 99·05 lb.

A *Qantar* of unginned cotton = 315 lb., of ginned cotton = 100 lb. ; an *Ardeb* of wheat = 150 *kilogrammes*, of barley = 120 *kilogrammes*, of beans = 155 *kilogrammes*, of maize = 140 *kilogrammes*, of whole lentils = 157 *kilogrammes*, of split lentils = 132 *kilogrammes*.

Greece.

1 oeque = 2·84 lb. 1 livre = 1·1 lb.
1 quintal = 132·2 lb. 1 drachma = 0·11 oz.

Japan and Formosa.

Cho .... = 5·423 chains.
Square cho .... = 2·4507 acres.
Tsubo .... = 3·9538 sq. yards.
Liquid koku .... = 39·7033 gallons.
Dry koku .... = 4·9629 bushels.
Koku of capacity = 0·1 ton.
Liquid sho .... = 1·5881 quarts.
Dry sho .... = 0·1985 pecks.
Kin (160 Momme) = 1·3228 lb.
Kwan (1000 Mommo) = 8·2673 lb.

Russia.

The standard of length is the Sajen, which is equal to seven British feet; the standard of weight is the Funt = 0·90282 lb.

Length.

16 vershok = 1 arshin.
3 arshin = 1 sajen.
500 sajen = 1 verst.
1 verst = 1166·66 yards (0·66288 mile).

Surface.

1 sq. vershok = 3·0625 sq. inches.
1 sq. arshin = 5·4444 sq. feet
1 sq. sajen = 5·4444 sq. yards.
1 sq. verst = 0·4394 sq. miles.

Weight.

1 zolotnik = 65·8306 grains.
3 zolotnik = 1 loth.
32 loth = 1 funt.
40 funt = 1 pood (36·1128 lb.).
10 poods = 1 berkovatz.

Capacity.

1 tcharka = 0·2164 pint.
1 shtoff (10 tcharkas) = 1·0822 quarts.
1 vedro (10 shtoffs) = 2·705 British gallons.
1 chetvert (8 chetveriks) = 5·771 British bushels.

Siam.

Niu .... = ·83 inch.
Ru'p .... = 10 inches.

Examples:—To ascertain the yield of Consols at a price of £57 10*s.* 0*d.* look in the column headed 2½ Pr. Ct. for 57½, and it will be seen that the yield (column headed Return Per Cent.) is £4 6*s.* 11*d.* Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £105, will yield £5 14*s.* 3*d.* per cent.; while 5 per cent. shares at £105 yield £4 15*s.* 3*d.* per cent.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER:—19·14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER:—Looking at the Table of Expectation of Life (*q.v.*), it will be seen that the expectation for age 54 is about 17 years; and from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 11·27 years' purchase. The present payment required would therefore be £1,127 *approximately*.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

REDEMPTION OF CAPITAL
BY ANNUAL PAYMENTS.

The following are the rates charged by certain first-class Insurance Companies for "Redemption Policies," to secure the payment of £100 in return for so many annual premiums, *e.g.*, an Insurance Company will undertake to pay £100 on Midsummer Day, 1951, in return for the payment of £2 5*s.* 2*d.* on Midsummer Day, 1923, and each year afterwards until 1950, or 28 payments in all; for £1,000 the annual premium would be £22 11*s.* 8*d.*, and so on. This table is of particular interest to purchasers of *Leasehold* property, as it enables such purchasers to see, at a glance, the amount to be paid out of the income from the property for a redemption policy to provide the sum originally expended (with a margin for dilapidations, if necessary), by the time the leasehold interest has expired.

THE RULE OF THE ROAD.

The Rule of the Road is a paradox quite,
For in driving your carriage along,
If you bear to the left you are sure to go right,
If you bear to the right you go wrong.

But in walking the streets 'tis a different case,
To the right it is right you should steer,
On the left should be left enough of clear space
For the people who wish to walk there.

THE RULE OF THE ROAD AT SEA.

1. *Two steamships meeting.*

When both side-lights you see ahead,
Port your helm, and show your Red.

2. *Two steamships passing.*

Green to Green, or Red to Red,
Perfect safety—Go a-head!

3. *Two steamships crossing.*

If to your starboad Red appear,
It is your duty to keep clear;
To act as judgment says is proper;—
To Port—or Starboard—Back, or Stop her.

But when upon your port is seen
A Steamer's starboard light of Green,
There's not so much for you to do,
For Green to Port keeps clear of you.

Both in safety and in doubt,
Always keep a good look-out;
In danger, with no room to turn,
Ease her—stop her—go astern.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36·012, and deduct £1—£35·012.

REPAYMENT OF PUBLIC LOANS.

Sums needed annually for the liquidation of a debt (principal and interest) of £100, at the stated percentage, in 10, 20, 30, 40, 50, 60 and 80 years. If the loan be for £1,000, each annual instalment must be multiplied by 10, and so on. Thus, a municipal loan of £1,000,000 at 5 per cent., repayable in 50 years, would cost the ratepayers £54,781 5s. annually for that period.

THE DERBY, 1880–1923.

For particulars of the Derby from 1780–1879 see 1921 edition.

The *Distance* of the Derby is 1 mile 4 furlongs 29 yards. Sir J. Hawley scored four successes with Teddington, Beadsman, Musjid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. Lady James Douglas was the first lady to win the Derby.

THE TURF IN 1923.

(At the close of the Newmarket Houghton Meeting.)

THOROUGHBRED racing in 1923 produced no outstanding horse, with the exception of Mumtaz Mahal, the "flying filly," a two-year-old, who won five races in effortless fashion, and broke the five-furlong record for the Rous Course at Newmarket, covering the distance in 57⅘ secs. The Aga Khan had paid 9,100 guineas for her as a yearling. She showed lack of stamina in her sixth attempt and was beaten. The five classic races were won by four different animals, Lord Derby's Tranquil taking the One Thousand Guineas and the St. Leger, Ellangowan winning the Two Thousand, Papyrus the Derby, and Brownhylda the Oaks. Papyrus only ran second in the St. Leger, in which race Ellangowan was also a failure. Brownhylda, heavily penalised, lost the Yorkshire Oaks to Splendid Jay, but afterwards won the Park Hill Stakes run over the St. Leger course, and, therefore, like Tranquil may be classed as a good stayer. Papyrus, the Derby winner, belonged to Mr. B. Irish, a Midland farmer, who in 1921 won the Ascot Gold Cup with Periosteum. These two, with a moderate animal called Bar Gold, are the only horses this lucky owner has possessed.

The King's stable had some success, for Weathervane won the Royal Hunt Cup at Ascot for His Majesty. Top Gallant (the previous year's Galante colt) beat several classic candidates in the Newmarket Stakes, but subsequently trained off. The Ascot Gold Cup was taken by Mr. Hardy's Happy Man, a fine stayer. Triumph won the Goodwood Cup, and Lord Derby's Silurian the Doncaster Cup. There was a French victory through Epinard in the Steward's Cup at Goodwood, and another in the Cesarewitch through Rose Prince.

Of the two-year-olds, Mumtaz Mahal has been mentioned. She won over £11,000 in stakes, and, like her sire, the Tetrarch, won the Champagne Stakes. Lord Derby won the old-time Gimcrack Stakes with Sansovino in a field of moderate juveniles. Other good youngsters were Druid's Orb and Straitlace.

Papyrus was sent to the U.S. to run a match with Zev, the American champion, but the Derby winner was easily beaten on the track at Belmont.

Lord Derby was an easy first in the list of winning owners, the Aga Khan and Lord Astor being next. R. C. Dawson headed the winning trainers, with Elliott and Donoghue leading in jockeys' list. Lord Rosebery and Lady Sykes were the most successful breeders.

Although there were no sensational prices at the Doncaster Sales, if we except the filly by Gay Crusader from Lady Josephine, a half-sister to Mumtaz Mahal, which fetched 6,800 guineas, and the colt by Phalaris from Waffles (6,300 guineas), the average for bloodstock was maintained. The 304 lots sold averaged 641 guineas as against 654 the previous year. At the July Sales El Cacique, 5,000 guineas, made the highest price. The most successful sires as regards the sales were the Tetrarch, Gay Crusader, Phalaris, Buchan and Swynford.

Trotting.—Fastest m., in America, 1 min. 54½ secs., by Uhlan, 1913. Fastest pacing m., 1 min. 55 secs., Dan Patch, at St. Paul, U.S.A., Sept. 8, 1906. At Lexington (Ky.) last October Peter Manning trotted a mile in 1 min. 55¼ secs., unpaced and without wind shields, which were used in Uhlan's case.

CRICKET IN 1923.

Yorkshire retained the County Championship with a truly wonderful record. They met every other county and of their 32 matches they won 25. Only one defeat was sustained, by Notts, at Leeds by 3 runs only. Four of their five unfinished matches resulted in a first innings win, the fifth resulting in a first innings loss to Hampshire, also at Leeds. Notts were again second in the table, Lancashire advanced from fifth place to third, above Surrey and Kent, and Essex dropped from eighth to thirteenth place. The bottom four were again Leicestershire, Northants, Glamorgan and Worcestershire, with Northants taking the "wooden spoon."

Middlesex scored 642 for 3 wickets against Hants, the first four batsmen all making centuries. The lowest score was Glamorgan's 35 against Surrey. Frank Woolley had the highest innings of 270 for Kent against Middlesex, and Hobbs (Surrey) completed his 100 centuries.

BILLIARDS IN 1923.

The Professional Championship of Billiards changed hands, W. Smith, of Darlington, wresting the title from T. Newman, of London. The match was 16,000 up and Smith won by 820 points. Smith held the title in 1920, but had stood down till this occasion on account of a quarrel with the ruling body. There was a representative entry for the contest, those beaten in preliminary heats being T. Reece, A. F. Peall, M. Inman, and C. Falkiner.

Apart from the championship the most interesting event during the year was a match between Smith and Newman. This consisted of a series of 7 games, each 16,000 up, the winner to receive £1,000, and the maker of the highest break £200. Smith won 4 games out of 7, and aggregated 110,266 points to Newman's 109,344. Newman won the break prize with a break of 972, Smith's highest being 731.

Amateur Championship.—W. P. McLeod (Middlesbrough) beat in the final J. Graham Symes (the holder) by 133 points in 3,000 up. This was a reversal of the previous year's result.

Breaks.—On Feb. 27, 1920, Falkiner made 870 with ivory balls. On May 6, 1920, T. Newman scored an all-round break of 1,024 with ivory balls, this being the largest apart from George Gray's (red ball) and anchor cannon "freak" efforts. T. Reece also made a break of 872. Best "spot" break (exhibition match), 3,394, by W. J. Peall, 1890; match for money, 2,031, by W. J. Peall, 1888. Best spot-barred breaks, 1,392, by John Roberts, 1894, and 1,467, by T. Taylor, 1891. With composition balls the highest breaks are 2,196 (324 and 1,620 off the red), by George Gray, 1911; 1,016, by H. W. Stevenson (under B.C.C. Rules), Oct., 1912. Other large breaks with ivory balls, under either B.A. or B.C.C. Rules, are 1,134 by G. Gray; 994 by H. W. Stevenson; 972 by T. Newman (October, 1922); and 821 by John Roberts, in 1905. By means of the now abolished cradle cannon W. Cook, in June, 1907, scored 42,746. The highest freak break was 499,135 by T. Reece with the anchor cannon in 1907. In Australia with composition balls Walter Lindrum made a break, in 1922, of 1,417.

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

It is illegal to pursue the different kinds of game between the following dates (inclusive):—

GAME.	ENGLAND.	SCOTLAND.
Black Game or Heath Fowl.	11 Dec. to 19 Aug. (31 Aug. in Somerset, Devon, and New Forest).	11 Dec. to 19 Aug.

*Partridge	2 Feb. to 31 Aug.	2 Feb. to 31 Aug.
*Pheasant	2 Feb. to 30 Sept.	2 Feb. to 30 Sept.

It is also unlawful to kill the game marked * on a Sunday or Christmas Day.

In *England and Wales*, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares, to the first four birds, and to wild duck. The close-time for all these birds is, under the Wild Birds Protection Acts, 1880 to 1908, from 2 March to 31 July, both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain. The penalty for killing any wild bird in such close-time, or for selling or having in possession between 16 March and 31 July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5*s.* and costs for each bird for every subsequent offence, or, in the case of the undermentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected—*see* next column) in respect of which the offence was committed. Offenders refusing their names and addresses are liable to a further penalty of 10*s.*, but the Acts do not apply to any person shooting on his own land, or authorising anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, or the Secretary for Scotland in Scotland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette.* They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

Penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable. The use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. The first Monday in November is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about 12 Aug. to 12 Oct. for stags, and from 10 Nov. to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound.

ANNUAL CLOSE-TIME FOR SALMON.

Salmon and Freshwater Fisheries Act, 1923.—This new Act comes into force on 1 Jan., 1924. It is "an Act to consolidate and amend the enactments relating to Salmon and Freshwater Fisheries in England and Wales" [18 July, 1923]. By this Act the numerous Acts relating to our inland fisheries have been consolidated and brought up to date with a view to meeting modern requirements.

The new Act comprises 94 sections and it should be of considerable benefit to fishery boards, riparian owners, anglers, and to the inland fisheries generally. The so-called "coarse fish" (freshwater fish in the Act) have received additional protection. The important question of pollution is dealt with in three sections:—

Section 8 enables police-court proceedings to be taken where an effluent causes water to be poisonous or injurious to fish or the spawning grounds, spawn or food of fish. The same section provides for notice being given to the fishery boards or to the Minister of Agriculture and Fisheries where the construction of new works or the alteration of existing works are contemplated.

Section 55 authorizes a fishing board to institute or aid any person or local authority in instituting proceedings under the Rivers Pollution Prevention Acts 1876 to 1893, and, subject to certain safeguards, to extend the scope of those Acts to tidal waters.

Section 59 (1) (p) enables fishery boards to regulate by bye-law the discharge of specified effluents. These sections do not interfere with the common law right of procedure by action for injunction and damages. Although the Act provides powers for dealing with pollution, procedure in the nature of peaceful persuasion on the lines adopted by the Standing Committee on Rivers Pollution is likely to have much more comprehensive results than litigation.

Power has been given fishery boards to acquire fisheries, by purchase or lease and to let the fishing rights and also to acquire obstructions to the passage of salmon and migratory trout.

Anglers who fish for trout and coarse fish are now entitled to representation on the Fishery Boards, the number of such representative members not to exceed one-third of the total number of members of the fishery board in the preceding year. These representatives will be appointed under schemes approved by the Minister and pending the constitution of schemes, by the Minister.

The Minister may by Order, on any application he may deem sufficient, require anglers to take out licences to catch freshwater fish, i.e., coarse fish, in a fishery district.

Coarse-fish, as well as salmon and trout, illegally bought, sold or exposed for sale or in the possession of any person for sale may be seized by an authorized officer.

WEEKLY CLOSE-TIME.

In England and Wales net-fishing for salmon is prohibited from noon Saturday to 6 a.m. Monday, with an extension to 48 hours in certain districts.

In Scotland, from 6 p.m. Saturday to 6 a.m. Monday, and rod-fishing on Sundays.

I. ENGLAND AND WALES (including the Esk in Dumfries). The close time for salmon (including all migratory fish of the *genus* salmon) begins, for nets, on 1 Sept., and for rods on 2 Nov.; for both nets and rods it ends on 1 Feb. For putts and putchers the annual close season is from 1 Sept. to 1 May. By an Act of 1907 the Ministry of Agriculture and Fisheries may make provisional orders varying the law on these and other points. The close-time may also be varied by bye-law by local boards of conservators, provided it begins for nets not later than 1 Nov., with a minimum of 154 days, and for rods not later than 1 Dec., with a minimum of 92 days. The statutory dates have been varied as follows:—

No fresh salmon may be sold between 31 Aug. and 1 Feb., except such as come from parts beyond the seas, or as have been taken, if in the United Kingdom, by legal netting. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1 Feb. and 31 Aug., may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1 Feb. and 31 Aug., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 31 Aug. and 30 April, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. The capture and sale of "unclean" salmon, *i.e.*, salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

CLOSE-TIME FOR TROUT AND CHAR.

In Scotland there is a close-time for trout from 15 Oct. to 28 Feb. For pollen the close-time is from 14 Nov. to 31 Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char," as the case may be.

The capture of trout and char in England and Wales is prohibited between 2 Oct. and 1 Feb., except (1) in the Thames and Lee, where the close season is from 11 Sept. to 31 March; and (2) in the cases noted below, where, under an Act of 1876, the close-time (for rods and nets, except where specified) has been varied by bye-law by local boards of conservators. In the districts marked * the close-time applies only to trout. The *sale* of trout and char is prohibited throughout England and Wales between 31 Aug and 1 March, unless for fish propagation, stocking or re-stocking of waters, or for some scientific purpose:—

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for catching, selling or buying "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15 March to 15 June, both inclusive, for England and Wales except small parts of Norfolk and Suffolk, under a penalty of £2 for a first and £5 for a subsequent conviction. The close-season, however, does not apply to eels taken otherwise than by angling; or to freshwater fish other than grayling taken in certain private waters by leave of the owner; or to angling in public waters by leave of a board of conservators, or in private waters by leave of the owner; or to taking fish in certain cases for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Ministry of Agriculture and Fisheries. The

Axe, Avon (Devon), Wye, Eden, and Towy districts have been so exempted; also the Kent and Bela and Severn as regards pike; the Usk as regards eels; and parts of the Severn as regards fish other than grayling. For eels a separate close-time exists (so far as regards fixed engines in salmon rivers) in England from 1 Jan. to 24 June; in Ireland, with one or two exceptions, from 11 Jan. to 30 June. In the Severn, elvers, or eel fry, are protected between 1 Jan. and the last day of Feb., and between 25 April and 25 June both inclusive. Certain other local close-times exist for freshwater fish, under local Acts or bye-laws.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4¼ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of the territorial seas has been increased, and in some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

CLOSE-TIME FOR OYSTERS.

There are also local regulations for the protection of oysters; and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for the capture and sale of "Deep-Sea Oysters" is fixed for England and Scotland, from 15 June to 4 Aug.; and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14 May to 4 Aug. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from 16 June to 31 Aug. in the English Channel between lines drawn (1) from North Foreland to Dunkirk, and (2) from Land's End to Ushant—the territorial seas of England and France being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1 May to 31 Aug., remains in force so far as French fishermen are concerned. But both Powers usually agree to suspend the close season till 16 June in each year.

Licences for Fishing and Shooting.

FISHING LICENCES.—In all fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welch rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In the Lune, Derwent, Severn, and Wye and in Norfolk licences for "freshwater fish" are in force. No licence is required for Thames trout or general fish. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued. The rates on salmon nets and other like instruments range from £20 downwards in England and Wales. The rate on draft nets in England and Wales varies from £5 to £2. In England and Wales different rates are charged in different districts for a salmon rod and line as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Dee, 40/-; *Eden, *Derwent, *Exe, Hampshire, *Wye, *Usk, 30/-; Taw and Torridge, 24/-; *Lune, *Ribble, Clwyd & Elwy, *Conway, *Dovey, *Teify, Avon (Devon), *Dart, *Teign, Frome, Stour (Kent), *Yorkshire, *Tees, *Tyne, 20/-; *Dwyfach, Towy, 21/-; *Seiont, Avon, Brue & Parret Axe, *Camel, *Fowey, 15/-; Cleddy, Taff & Ely, Ogmore, W. Cumberland, 10/6; *Kent & Leven, Rhymney, *Ayron, Severn, Axe, Trent, Tamar & Plym, 10/-; *Esk (Yorkshire), 7/6; Ouse (Sussex), Wear, Coquet, Cuckmere, Rother, Adur, 5/-.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, territorial soldiers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorise any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows:—

GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following.........	£3	0	0
After 31st July, to expire following 31st October	2	0	0
After 31st Oct., to expire 31st July ...	2	0	0
Licence for a continuous period of fourteen days	1	0	0
Gamekeeper's (Great Britain), to expire 31st July................................	2	0	0
Game-Dealer's Licence, to expire 1st July, annually	2	0	0
DEPUTATION or Appointment of a Gamekeeper	0	10	0
GUN LICENCES (gun or pistol)...............	0	10	0

Payment is now rigidly enforced, even to the carrying of a revolver or air gun. Persons holding game licences, soldiers and volunteers carrying a gun in the performance of duty or when engaged on target practice are exempt; but the licence cannot be transferred to a son or to a servant. Expire 31st July.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and freshwater fish is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1907, and the Ministry of Agriculture and Fisheries Act, 1903, in the hands of local boards, with the Ministry of Agriculture and Fisheries as the central authority. Districts may be formed and Boards of Conservators appointed, and the following districts have been formed, including generally all rivers running into the sea between the points named. Except in the cases marked † they also include the sea for three miles from the shore, or to the mid-channel in estuaries.

These Boards of Conservators consist mainly of three classes of members—those appointed annually by the Councils of the various counties through which the rivers flow; *ex-officio* members, qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by persons who have paid licence duty on instruments other than rod and line for salmon fishing in public waters. In certain cases there are also members representative of freshwater anglers. Districts where Provisional Orders are in force are marked thus *.

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Port of London Authority, Lee Conservancy Board, and Conservators of the Medway.

The above-mentioned Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain cases, for the regulation of other kinds of fishing which are prejudicial to such fisheries. They are also empowered to issue licences for fishing for salmon, trout, and in some cases freshwater fish generally.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 24 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Ministry of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to constitute local Fisheries Committees, either for a single county or borough, or for several jointly. These Committees have power to make bye-laws, to be confirmed by the Ministry of Agriculture and Fisheries, regulating or prohibiting the use of instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the adjoining coast and territorial seas between the points respectively mentioned:—1. Northumberland (coterminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, Donna Nook to Yarmouth. 4. Kent and Essex, Dovercourt to Dungeness, including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (coterminous with that county). 6. Southern, Western boundary of Dorset to Hayling Island. 7. Devon, and 8. Cornwall (each coterminous with the respective counties). 9. South Wales, Eastern boundary of Cardiff to Cemmaes Head. 10. Lancashire and Western, Cemmaes Head to Haverigg Point. 11. Cumberland, Haverigg Point to Sark Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

(*a*) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(*b*) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(*d*) In the close season, salmon from Holland, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(*e*) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

Principal Charitable Bequests of the Year.

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is, in a considerable proportion of the cases, approximate, owing to the bequests including a share of the residuary estate, or consisting wholly or in part of business interests, or of blocks of shares for which a definite value cannot be given. The outstanding feature of the year is furnished by the bequests of Lord Northcliffe. These bequests are reversionary and subject to life interests, and it will probably be many years before the whole sum becomes available for the charitable purposes for which it was left, principally for press and printers' charities. Hospitals and educational trusts account for the bulk of the bequests, although orphanages and the Lifeboat Institution figure somewhat more prominently than usual. The Stock Exchange Benevolent Fund receives £25,000 under the will of Col. Sir Robert Inglis, and the Grand Lodge of Scotland £5,000 for the children of necessitous Freemasons under the will of Mr. John D. Forrest. There appears to be a prospect that *bonâ fide* hospitals may, in the near future, be relieved from payment of the duty of 10 per cent. on legacies received by them in the same way as they are relieved, in certain circumstances, from the payment of income tax on their funds.

In South America	97,800	314,000
In Oceania	3,300,000	8,000,000
Total	13,909,782	460,094,000

Geographical Distribution.—The British Commonwealth occupies over one-quarter of the known surface of the globe, and its population exceeds one-quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere. The distribution of the surface over the Northern and Southern Hemispheres causes a complete alternation of the seasons, one half of the Dominions enjoying summer while the other half is under winter conditions. In spite, however, of the uneven distribution east and west, daylight and darkness are almost equally divided, on account of the position of Australasia near the limit of east and west.

Ethnology.—By far the greater portion of the Commonwealth lies within the temperate zones and is suitable for white settlement, the tropical areas being Southern India, West, East and Central Africa, parts of the West Indies, British Guiana and Honduras, Northern Australia, Borneo, and the various settlements in the Malay Peninsula. The estimated white population of the Dominions in 1911 was 60,000,000, mainly British and Irish, but partly French, Dutch, and Spanish. The remaining 370,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 "Red Indians" in Canada.

Religions.—Of the total population over 210,000,000 are Hindus, 100,000,000 Muhammadans, 80,000,000 Christians (67,000,000 Protestants, 13,000,000 Catholics), 12,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

Constitution and Government.—There is no fundamental law upon which the Constitution of the Commonwealth rests, but there are three main principles underlying its administration, viz., self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the central Government. The third principle is of modern growth, and may be said to be the outcome of the *Imperial Conference* (*post*).

Self - Government. — (1) *Great Britain.*—The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the British Government are the King; the Legislature (House of Lords and House of Commons); the Executive, appointed by the Sovereign and responsible to Parliament and the Judicature. (*See also* p. 486).

(2) *The Indian Empire.*—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible to, and represents the authority of, Parliament. Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council of State of 60 members (of whom not more than 20 are government officials), and the Legislative Assembly of 144 members (26 official and the remainder elected).

(3) *Imperial Dominions.*—All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that Dominion is specially mentioned. If the legislature of a Dominion enacts a law which is repugnant to an Imperial law affecting the Dominion, it is to the extent to which it is repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent; by a suspensory clause and the refusal of the Royal assent. Subject to such control the parliament of a self-governing Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—

(*a*) *Those having responsible government, i.e.* "Dominion Status." The executive is entrusted to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The Dominions thus governed are the Irish Free State, Northern Ireland, Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa. Malta and Southern Rhodesia have "responsible government," but certain powers are reserved.

(*b*) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritius.

(*c*) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(*d*) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(*e*) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown: The protectorates of the British Commonwealth include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(*f*) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(*g*) *Mandatory Spheres*, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by mandate from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish governments of Palestine and Mesopotamia.

SELF-SUPPORT.—With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Central Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, *e.g.*, the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons; this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF-DEFENCE.—The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Commonwealth is undertaken by the Central Government. Questions affecting the general strategical defence of the Commonwealth are considered and determined by the *Imperial Defence Committee*, which co-ordinates the work of the sea, land and air forces of the Commonwealth. In the Great War of 1914–1918 the Dominions provided Armies or Contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Premiers of the various self-governing Dominions, representing their nations at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in 1897, 1902, 1907 and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of Great Britain. In 1917 and 1918 the Conference was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the *Premiers' Conference*, under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Commonwealth as a whole. The constitution of the Conference, which met in 1923, is as follows:—*President*, The Prime Minister of Great Britain; *Chairman (in the absence of the President)*, The Secretary of State for the Colonies; *Members*, The Prime Ministers and other Ministers of Canada, Australia, New Zealand, Union of South Africa, Newfoundland, and the Irish Free State, the Secretary of State for India and other representatives of India; *Secretary*, Sir H. C. M. Lambert. K.C.M.G., C.B.; *Assistant do.*, C. T. Davis, C.M.G.; E. J. Harding, C.M.G.

THE LEGISLATURE.—The Parliament of Great Britain is the supreme legislative authority of the Commonwealth. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Commonwealth affairs. The Secretary of State for the Colonies is a Cabinet Minister, his active participation in the government of the nations of the Commonwealth varying with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State.

THE JUDICATURE.—The Supreme Judicial Authority of the Commonwealth is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (*see* p. 227) consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Commonwealth under the control of the respective governments. Universities and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the British Dominions and Colonies, the United States of America, and the German Empire. The German scholarships were abolished by Act of Parliament in 1916, and re-allocated to various parts of the British Dominions, while the trustees have from time to time created other scholarships as the funds in their hands permitted. *Rhodes Scholarships* are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony), in New Zealand, Newfoundland, Jamaica, Bermuda and Malta. They are of the annual value of £300 (with the addition in present circumstances of a bonus of £50) and are tenable at any College in Oxford. The normal number of Rhodes scholars in residence together is about 300, of whom 156 come from the British Empire and 144 from America. *Secretary to the Rhodes Trustees*, Lt.-Col. Sir E. W. M. Grigg, K.C.V.O., C.M.G., D.S.O., M.P., 17, Waterloo Place, London, S.W. 1. *Oxford Secretary*, F. J. Wylie, M.A., 9, South Parks Road, Oxford.

In 1923 the *Davison Scholarships* to enable 3 Undergraduates from Oxford and 3 from Cambridge to attend the Universities of Harvard, Yale and Princeton, U.S.A., were founded by Mrs. Henry P. Davison of New York, U.S.A. *Secretaries of the Selection Committee*, Prof. S. E. Morison, 5, Norham Gardens, Oxford; A. L. Goodhart, Corpus Christi College, Cambridge.

Statistics issued by the Universities Bureau of the British Empire show that the *total* number of students from overseas attending Universities and Colleges in the United Kingdom is 4,131, of whom 1,171 are from Africa, 764 from America, 1,401 from Asia, 542 from Europe, and 253 from Australasia. The principal figures are: India, Burma, and Ceylon, 1,094; South Africa and Rhodesia, 803; United States, 402; Egypt, 298; Australia, 160; Canada and Newfoundland, 157; West Indies and Bermuda, 120; China, 119; Russia, 91; New Zealand, 90; France, 52; Japan, 51; Switzerland, 43; Rumania, 38; Greece, 37; Netherlands, 35; Denmark, 33; Norway, 32; Spain, 32; Poland 21.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. Until the close of the War of 1914-1918 the tariff of the United Kingdom was imposed without distinction on foreign and Commonwealth merchandise, but recent legislation foreshadows a general change of fiscal policy. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Commonwealth Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. In the Civil Service Estimates for 1921-22 the following "Grants in Aid of Local Revenues" were included:—*Wei-hai-wei*, £8,000; *Somaliland*, £100,000; *St. Helena*, £3,200; *Nyasaland*, £100,000; *Tanganyika*, £914,000; *Uganda*, £250,000; and *Cyprus* £50,000; in addition, the sum of £10,000 is set aside for Scientific Research in connexion with the Development of the Economic Resources of the Colonies and Protectorates.

PRODUCTION.—In 1913 the wheat crop of the world was about 3,617,600,000 bushels, of which 690,000,000 bushels were produced in the British Commonwealth. Canada, India, Australia, and Great Britain are the principal wheat-producing units, and Mesopotamia (with irrigation) has great potentialities; in 1923 Canada produced nearly 500,000,000 bushels, a total yield surpassed by the U.S.A., but by no other country, and only one-sixth of the cultivable area of Canada has been occupied by cultivators. Barley, oats, rice and maize, and tea, coffee and rubber are largely cultivated, while 197,072 metric tons of cocoa were produced in British Dominions in 1922 out of a world production of 383,155 metric tons. In 1921 Great Britain imported 8,601,385 cwt. of frozen beef, of which about 25 per cent. came from Australasia, and 6,738,700 cwt. of frozen mutton, of which more than two-thirds came from New Zealand and Australia. Nearly 6,800,000 cwt. of bacon and hams were also received, of which only 950,000 cwt. came from British Dominions (Canada). Cane sugar is produced in India (for local consumption), West Indies, Australasia, Natal, and Mauritius, and beet sugar in Canada and elsewhere. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the U.S.A.; coal is also abundant in Australia, Canada, India and South Africa. Cotton is extensively grown in India, West Africa, East Africa, Sudan, West Indies, and in the tropical parts of Australia (value of Australia output in 1922-3, £600,000), but of the 11,725,521 centals imported in 1921 only 500,000 centals came from British Dominions. The world consumption of cotton is about 13,000,000 bales, the U.S. producing 10,000,000 bales and consuming in 1922 5,911,000 bales (Southern Mills, 3,733,000; Northern Mills, 2,178,000). In 1921 the imports of chemical and mechanical wood pulp for paper making amounted to over 590,000 tons, but Canada produced half as much again, her product being largely sent to the United States, while Newfoundland sent 26,838 tons to Great Britain. Iron ore is found in many of the Dominions, and pig iron is largely produced; tin is produced mainly within the Commonwealth (particularly in the Malay peninsula), while more than half the world's supply of gold is drawn from South and South-West Africa and Australasia; it is produced also in Borneo, British East Africa, British Guiana, Canada, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa. The output of various metals in 1921 was as under:—

Metal.	World.	Brit. Empire.
	Tons.	Tons.
Iron ore	73,000,000	5,752,000
Pig iron	36,500,000	3,957,000
Steel ingots and castings	38,700,000	4,719,000
Copper ore (metal)	537,000	46,000
Smelter copper	580,000	53,000
Lead ore (metal)	869,000	199,000
Smelter lead	849,000	136,000

Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India (293,116,834 gallons in 1920), Trinidad (72,204,947 gallons in 1920), and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf. The estimated total production of oil in the world (1921) was 759,000,000 barrels as against 695,000,000 in 1920, the output of the U.S.A. representing 61·9 per cent. (1921), and that of Mexico 19·3 per cent. (1921). Canada is the second greatest producer in the world of newsprint paper (2,150,251 tons of pulp, valued at $84.947,598; paper and paper products 1,366,815 tons, value $107,085,766).

SHIPPING.—On June 30, 1921, there were 11,433 vessels (over 100 tons) flying the British flag, of which total 9,034 were registered in Great Britain and Ireland, 615 in Australia and N.Z., 961 in Canada, 190 in India and Ceylon, and 633 in other parts of the Commonwealth. These figures include 10,324 steam vessels of 21,588,606 tons (Brit., 8,579 vessels of 19,320,053 tons); and 1,109 sailing vessels of 482,192 tons (Brit., 455 vessels of 251,501 tons). In the Great War of 1914–1918 there were lost through enemy action 2,774 merchant vessels of 9,538,918 gross tonnage; of this total 2,197 (7,638,020 tons) were *British*, 238 (696,845 tons) *French*, 230 (742,365 tons) *Italian*, 29 (120,176 tons) *Japanese*, and 80 (341,512 tons *U.S.A.*

TOWNS.—*Capital*, London (England). Population (1921), 4,483,249 (with suburbs, 7,476,168).

At the Census of 1921 there were in the British Commonwealth 2 cities with over 1,000,000 inhabitants, 9 with 500,000 to 1,000,000 (*see* p. 112), and 88 others with over 100,000 inhabitants. Of these 99 cities 49 were in Great Britain (England 42, Wales 3, Scotland 4, Irish Free State 1, Northern Ireland 1), 29 India, 4 Canada, 5 Australia, 3 New Zealand, and 1 each in South Africa, Ceylon, Hong Kong, and the Straits Settlements.

FACTS CONCERNING NEW ZEALAND.

Contributed by the Right Hon. W. F. Massey, P.C., Prime Minister of New Zealand.

THE facts concerning the national life and achievements of the Dominion of New Zealand require only to be known for due appreciation to be given to the virile, industrious, and enterprising character of the people comprising this young community, and the promise that the future holds for them. The Dominion's greatest asset, besides a wonderful climate, and a remarkable fertility of soil, has been her parent British stock and the thoroughness of their colonisation, for it is upon the foundations which they have laid, and the British traditions implanted, that the present Dominion has arisen. A number of causes contributed to the selection of the early settlers from the very best of the citizens of the United Kingdom. In the first place none but the hardiest, and most intrepid cared to face the voyage, which at that time seldom occupied less than six months. The ships were small and uncomfortable, while the country to which they were going was comparatively unknown, though there was knowledge that the aboriginal inhabitants were a particularly war-like race. But these difficulties, instead of discouraging the intending settlers, seemed to appeal to the spirit of adventure which they inherited from Viking ancestors. It is interesting to note how those first-comers settled down in respect of nationality. The Scottish chose that part of the South Island, where the great brown mountains reminded them of their own land, the climate resembled that which they had left, and the similarity was increased by giving the name of Dunedin, the ancient name of Edinburgh, to their principal city. The province of Canterbury, with its city of Christchurch, became the headquarters of settlers from England, many of whom were university and public-school men. The Wellington province was settled chiefly by English emigrants; while the Auckland district became peopled with representatives of almost every county in the United Kingdom.

Two factors make for character of race—heredity and environment. It would be difficult to discover a young nation with a finer ancestry than the present generation of New Zealanders; and as far as environment is concerned one has only to look at New Zealand's position on the map, a long, narrow country running due north and south, laved by the blue waters of the Pacific, a land of mountains and plains, hills and valleys, sunshine and plenty, a land fitted to be the home of a great race, where liberty, justice and righteousness will reach to greater heights than they have attained in any other country, where every man will "sit under his own vine and fig tree, no one daring to make him afraid." As a race the New Zealanders are virile, physically strong and active, mentally keen and alert, possessing energy and enterprise. Loyal to King, country and empire, they are building up a young British nation in the Pacific, which in years to come will play a prominent part, not only in the affairs of Empire, but in those of humanity.

It is interesting to remember that the sovereignty of New Zealand was vested in Queen Victoria and her successors by the Treaty of Waitangi, which was signed by the native chiefs in 1840, and also by the representative of the Sovereign. Even now the Maori race look to the Treaty of Waitangi as their Magna Charta, giving them practically all the privileges possessed by the European residents of New Zealand.

It is rather a remarkable achievement that New Zealand, the Dominion farthest from the heart of the Empire, should be Britain's greatest supplier of foodstuffs. Yet such is the case. This, surely, is a tribute to business enterprise and industry, particularly of those earlier settlers who in the "eighties" saw the great possibilities of refrigeration, and immediately gave practical effect to their vision. The Dominion is now the largest supplier to Britain of dairy produce, mutton and lamb, and also sends to British ports very large quantities of wool and other commodities.

The social structure of the Dominion is essentially British in every respect. To preserve this characteristic has been the aim of her legislature. The Dominion's educational facilities are the equal of any in the world, the child of the humblest citizen being able through liberal scholarships, to aspire to the highest attainments. The principle followed in regard to this and almost all her social services is that they are a direct charge upon the State revenue. Child welfare is the particular attention of the community. New Zealand's death rate is the lowest in the world. Rural settlement is encouraged to the greatest possible degree, partly by a system of financial advances from the State, and to-day there is not the same unequal preponderance of city population as in many other young countries. It is this wide distribution of settlement which sometimes induces the statement that New Zealand has no spare lands; but though very few large tracts remain untenanted, there is nevertheless ample room for many times the present population, with a commensurate return from the soil by more intensive cultivation. Another important advantage possessed by the Dominion is, that with her mild climate it is possible for the producers in certain instances to divert from any unprofitable branch of industry to another commanding better markets for the time being, and her ability to do this has, on more than one occasion in the past, tided her over threatening periods. The Dominion's resources are unbounded, and they include latent stores of minerals which will be available to manufacture when the demands of an increased population render extended enterprise in that direction profitable. Industrious people from Great Britain, prepared to throw in their lot with this young country, need have no fear of the future. The latest records show that the per capita wealth of the Dominion is the highest in the world.

In the great War New Zealand willingly accepted her responsibilities as a partner in the Empire, was the first overseas Dominion to despatch a force to seize enemy territory, and ultimately sent to the fighting fronts over 100,000 men.

The Dominion has emerged from the stress of the post-war period, and at present her financial future is very bright. Her developmental works are in vigorous progress, and the burdens of heavy taxation which war expenditures place upon the backs of the people are gradually being lightened. The trade outlook also is healthy, and a lengthened period of prosperity is anticipated. Necessarily New Zealand depends for her prosperity upon British markets for her produce, but apart from the commercial aspect of this bargain there exists among the people a deep desire that their chief business transactions should always be with their fellow citizens of Britain, and that the Mother State should remain as she was in the first instance, and is now, the chief partner in New Zealand's success.

THE GOVERNMENT AND EXPORT TRADE.

Contributed by Lt.-Col. A. Buckley, D.S.O., M.P., Secretary, Department of Overseas Trade—Development and Intelligence. (Joint Department of the Foreign Office and the Board of Trade), 38, Old Queen Street, S.W. 1.

THERE is, of course, nothing novel in the fact that the Government assists in the progress of British overseas trade. Indeed, so familiar have many of the forms of assistance become that they are apt to be overlooked when the question of Government assistance is under discussion. International commercial treaties, the safeguarding of sanctity of contracts, tariff questions, the maintenance of communications—these, and many others, are forms of assistance and protection which have for long been undertaken by the British Government and by the Governments of other commercial nations, and without which overseas trade would be a hazardous and difficult undertaking.

There are, however, many other directions in which a Government can support and foster the export trade of its country. Up to a few years ago Germany and, to a somewhat lesser extent, the U.S.A. were the two countries of which the respective Governments had gone furthest in their endeavours to extend their organisation for rendering commercial assistance, and British traders were not slow to point to these examples, and to draw comparisons between the activities of these Governments and their own.

A very satisfactory change has, however, taken place during the past few years, and from being laggards in the race, the British Government has moved up into the front rank. So pronounced, indeed, has been the progress made in building up an organisation for fostering and assisting in the development of British overseas trade, that the Governments of other countries have recently been closely and openly studying our organisation with a view to developing their own upon similar lines.

Undoubtedly the War, and the trading difficulties which it brought in its train, were largely responsible for bringing about a realisation that greater assistance to exporters was an urgent necessity, and, starting with the Commercial Intelligence Branch of the Board of Trade as a nucleus, a far-reaching commercial intelligence system has been built up, having as its headquarters the Department of Overseas Trade (Development and Intelligence), Old Queen Street, Westminster.

The work of this organisation divides itself under the following main heads, viz., securing commercial information from all parts of the world; disseminating this information to British manufacturers and exporters; undertaking such special constructive activities as may be found possible; and assisting traders in the removal of difficulties which from time to time arise.

To carry out the first of these functions a widespread and efficient overseas intelligence system is necessary. This has been attained by means of the Trade Commission Service in countries of the Empire and the Commercial Diplomatic and Consular Services in foreign countries. The first two Services are entirely concerned with commercial matters. Consular officers have many and varied functions, but under the ægis of the Department of Overseas Trade, which now directs their activities, a much greater amount of time is devoted to commercial matters than was formerly the case.

These services form a network of commercial intelligence officers covering every important market in the world. From them the Department is in constant receipt of a steady flow of valuable trade information which it brings to the attention of such portions of the British commercial community as are likely to be interested.

It is, perhaps, unnecessary to go into details as to the methods by which this is done, but a brief outline may be of interest. The Headquarters staff comprises a number of officers who have had actual business experience either in the countries, or of the trades, with which they are now dealing. By co-operation between these officers, viewing the information, the one in the light of his overseas experience, and the other his experience in the trade in this country, the value of the information to British traders is assessed, and the best method for dissemination decided.

The information may then be issued in a number of ways, the chief media being circular letters, which are issued to all British firms likely to be interested, the trade press, the "Board of Trade Journal," Chambers of Commerce Journals, &c.

The following few examples will give some idea of the nature of the information daily being received: notifications of foreign or colonial contracts open, or likely to be open, for tender, and other openings for British trade; existing and probable future demand for specific lines of British goods; the extent and nature of competition and the best methods for meeting it; usual methods of business, terms of credits, payment, &c.; Customs regulations and tariffs; regulations covering commercial travellers, certificates of origin, &c.; sources of supply and prices of trade products, &c.

In addition to supplying such information, the Department is in a position to supply information on all commercial questions in response to direct enquiries. The Department has frequently been able to solve difficulties which may have arisen in connection with contracts, and to enable traders to effect satisfactory settlements.

Further, at the request of British firms or Associations the Department undertakes special enquiries entailing extra financial outlay, with no charge other than the refunding by the firm or association of the additional expense incurred.

The Department further assists trade by placing British exporters in touch with firms or individuals in overseas markets who are considered suitable to act as agents or representatives, and advising the British firm as to the agency conditions usual in the country in question, or, in the case of an exporter desiring to introduce his goods into a given market, by supplying names of likely importers.

The difficulties caused by abnormal rates of exchange, and the financial situation in a number of European countries, led to the institution of the Export Credits Scheme, which is administered by the Department of Overseas Trade. With financial conditions still unsettled, and in view of the use made of the scheme by exporters, the period within which credits can be granted has been extended to September 8, 1924, the date of final liquidation remaining unaltered, viz., September 8, 1927. It is possible that the scheme may be further extended.

For a trader successfully to compete in an overseas market it is a necessity that he should have actual knowledge of the kind of goods with which his own must compete. To meet this requirement, the Department has formed an extensive collection of samples of foreign competitive goods and commercial products. These samples are exhibited to, and inspected by, British manufacturers, who thus gain a first-hand and valuable insight into the nature of the competition which they must expect to meet.

The Department is kept closely in touch with the requirements of the commercial community, and its activities are directed, upon those lines considered by business men to be most useful, by its Advisory Committee of business men. All the members of this Committee are men with very wide experience, ranging over almost all our industries and the countries with which we trade, and are thus well qualified to assist the Department in its endeavours to meet the needs of British traders.

The Department further works in close co-operation with Chambers of Commerce, Trade Associations and other representative bodies. There is thus obtained not only a common effort to avoid overlapping and duplication of work, but also a further guidance towards the most effective and useful activities.

A form of co-operation which has borne many good results is the visiting of industrial centres in this country by Trade Commissioners or Commercial Diplomatic Officers home on leave, or special duty. In the main, Chambers of Commerce or Trade Associations are visited, and members of these are thus enabled to obtain at first-hand valuable information concerning conditions in various overseas markets, while at the same time the officer himself refreshes his knowledge concerning home conditions and is so much the better able efficiently to perform his duties on his return. Not only are representative bodies visited, but also individual firms who are particularly interested.

The outcome of this co-operation has been measured already in the success which has attended investigations undertaken by the Department, either on its own initiative or at the request of some such body as the above, in which the Department and the Association have worked in conjunction.

A number of other similar functions are performed by the Department, but the above will serve to indicate the nature and extent of the assistance which it extends to British manufacturers and merchants.

THE IMPERIAL CONFERENCES OF 1923.

DECISIONS REACHED AT THE DISCUSSIONS.

For the first time since the statesmen of the Overseas Dominions were summoned to London to discuss Empire problems with the representatives of the Home Government, two Imperial Conferences took place in the capital in the autumn of last year. In addition to the regular Imperial Conference, which meets periodically as a result of a decision of an earlier assembly, an Imperial Economic Conference was held to consider the possibilities of developing Empire trade in view of the disorganisation of European markets. The two Conferences were held concurrently, and decisions of the greatest importance to the Empire were arrived at. The main Conference commenced its deliberations on Oct. 1 and concluded on Nov. 8, sixteen plenary meetings being held in addition to eleven meetings of committees and technical discussions on defence questions, while the Economic Conference proceeded during the same period.

The Overseas Prime Ministers who attended were Mr. W. L. Mackenzie King (Canada), Mr. S. M. Bruce (Commonwealth of Australia), Mr. W. F. Massey (New Zealand), General Smuts (Union of South Africa), and Mr. W. R. Warren (Newfoundland). India was represented by Viscount Peel, the Secretary of State, the Maharajah of Alwar and Sir Tej Bahadur Sapru, and the Irish Free State—participating for the first time and warmly welcomed by all the delegates—by the Ministers of Education and External Affairs, while Mr. Cosgrave took part in some of the meetings. Each of the Dominion Premiers was accompanied by other Ministers, and Great Britain was represented by Mr. Baldwin, the Marquess of Salisbury, Marquess Curzon and the Duke of Devonshire. Others who attended at various times included Lord Robert Cecil, Mr. Neville Chamberlain, Mr. Bridgeman, the Earl of Derby, Sir Samuel Hoare, Mr. Amery, Sir Philip Lloyd-Graeme, General Mulcahy, Earl Beatty, the Earl of Cavan, Sir Hugh Trenchard and Sir Fabian Ware.

During the progress of the Conferences a considerable amount of information regarding the deliberations was made public, although certain portions of various speeches, notably that of Marquess Curzon concerning the foreign situation were regarded as confidential. In addition, immediately the proceedings of the two bodies had been concluded, approved official summaries were issued, a notable departure from the practice followed at former Conferences. The most important decisions, as announced in these authorised reports, are outlined below. The delegates inaugurated and closed the Imperial Conference by loyal addresses to the Throne; they passed a resolution of profound regret at the death of Mr. Bonar Law at whose invitation, issued when he assumed office, they had met; and they sent a message of sympathy to Japan on learning of the terrible earthquake which wrought such havoc. Before separating they placed on record a resolution expressing their unanimous view that the consultations would do much "to facilitate the work of achieving unity of thought and action on matters of common concern to all parts of the Empire."

THE FOREIGN SITUATION.

One of the first subjects considered, and one of the most important, was the question of foreign relations. The Secretary of State for Foreign Affairs reviewed the general situation in every part of the world, and gave the most frank exposition both of the main problems which have confronted the Empire during the last two years and of those which seem most likely to arise in the near future. This was followed by a general discussion on foreign relations. Frequent and detailed examination was given not only to the main features of the international situation, but to the different aspects of that situation as they developed from day to day. "Nor did the Imperial Conference terminate its sittings," the official report declared, "until each subject had been carefully explored and a common understanding reached upon the main heads of foreign policy."

The United States and Reparations.—While the Conference was sitting the President of the United States renewed the offer of his Government to take part in an international conference or inquiry to investigate the European Reparation problem, and to report upon the capacity of Germany to make the payments to which she is pledged. The Conference cordially welcomed, and decided to take immediate advantage of, this overture; and communications were at once entered into with the other Allied Powers to obtain their co-operation. The Conference, after careful consideration of the policy which had been pursued, was of the opinion that the European situation could only be lifted on to the plane of a possible settlement by the co-operation of the United States of America, and that if the scheme of common inquiry to be followed by common action were to break down, the results would be inimical both to the peace and to the economic recovery of the world. It felt that in such an event it would be desirable for the British Government to consider very carefully the alternative of summoning a Conference itself in order to examine the financial and the economic problem in its widest aspect. The Conference regarded any policy which would result in breaking up the unity of the German State as inconsistent with the Treaty obligations entered into both by Germany and the Powers, and as incompatible with the future discharge by Germany of her necessary obligations. The strongest representations on this subject were accordingly made to the Allied Governments. The conclusion of peace between the Allies and Turkey and the advance made towards a pacific settlement of the complex problem of Egypt were noted with satisfaction, as were the results of the Washington Conference, which had added immensely to the security of the world without disturbing the intimate relations that had for so long existed between the Empire and Japan. Upon another question which arose during the deliberations, the Conference, while affirming and safeguarding the principle of the three mile limit "as a cardinal feature of British policy," arrived at the conclusion that it was both desirable and practicable to meet the request of the United States Government for an extension of the right of search beyond this limit in cases of suspected liquor smuggling, and negotiations were at once opened with the United States Government for the conclusion of an experimental agreement with this object in view.

The League of Nations.—After listening to a detailed exposition of the work of the League of Nations during the past two years, and more particularly of the recent sitting of the Council and the Assembly at Geneva, the Conference placed on record its emphatic approval of the action taken by, and the support given to, the representatives of the British Empire on the latter occasion. There was full accord that the League should be given the unabated support of all the British members of the League as a valuable instrument of international peace and as the sole available organ for the harmonious regulation of many international affairs.

THE NEGOTIATION OF TREATIES.

The principles governing the relations of the various parts of the Empire in connection with the negotiation and ratification of Treaties were regarded as of the greatest importance, and accordingly the subject was fully examined by a Committee of which Marquess Curzon was chairman. This Committee drew up a resolution which the full Conference unanimously approved. It laid down the procedure to be observed with regard to international agreements, the main provision declaring that bilateral treaties imposing obligations on one part of the Empire only should be signed by a representative of the Government of that part. The full power issued to such representative should indicate the part of the Empire in respect of which the obligations are to be undertaken, and the preamble and text of the treaty should be so worded as to make its scope clear. At the same time it was urged that no treaty should be negotiated by any of the Governments of the Empire "without due consideration of its possible effect on other parts of the Empire, or, if circumstances so demand, on the Empire as a whole," and that any government of the Empire contemplating the negotiation of a treaty should allow the other governments of the Empire to express their views.

EMPIRE DEFENCE.

The Conference gave special consideration to the question of defence and the manner in which co-operation and mutual assistance could best be effected after taking into account the political and geographical conditions of the various parts of the Empire. In addition to statements by the First Lord of the Admiralty, the Secretary of State for War, and the Secretary of State for Air, there were discussions at which naval and air defence were dealt with in detail by the Chiefs of the Naval and Air Staffs. After the whole field of defence had been surveyed, the Conference decided that it would be advisable to record its conclusions in a series of resolutions. These affirmed "that it is necessary to provide for the adequate defence of the territories and trade of the several countries comprising the British Empire," and recognised that the nature and extent of any action which should be taken was a matter for each Government to decide. The Conference suggested a number of "guiding principles," including the primary responsibility of each portion of the Empire for its own local defence, adequate provision for safeguarding the maritime communications of the several parts of the Empire, the desirability of the maintenance of naval strength within the limits of the Washington Treaty, the provision of naval bases and facilities for repair and fuel so as to ensure mobility, and the desirability of a common system of organisation and training for the Air Forces of the Empire.

The Singapore Base.—Special reference was made to "the deep interest" of Australia, New Zealand, and India in the provision of a naval base at Singapore, as essential for ensuring the mobility necessary to provide for the security of the territories and trade of the Empire in Eastern waters, while the Conference took note of "the necessity for the maintenance by Great Britain of a Home Defence Air Force of sufficient strength to give adequate protection against air attack by the strongest air force within striking distance of her shores." The Conference, while deeply concerned for the paramount importance of providing for the safety and integrity of all parts of the Empire, expressed in conclusion its earnest desire, so far as was consistent with this consideration, for the further limitations of armaments, and its hope that no opportunity might be lost to promote this object.

POSITION OF BRITISH INDIANS.

A long discussion took place on the position of British Indians in other parts of the Empire. The Indian delegates proposed that committees should be appointed by the Home and Dominion Governments to negotiate with a committee appointed by the Indian Government as to the best means of giving effect to the resolution of the Conference of 1921, to which South Africa was not a party. Agreement with the proposal was indicated by the Prime Ministers of Canada, Australia and New Zealand, but General Smuts held out no hope of any further extension of the political rights of Indians in South Africa, and could not accept the suggestion. The Secretary of State for the Colonies agreed to the Indian request and referred to the British Government's decisions as to Kenya, which Sir Tej Sapru said the people of India could not accept as final.

NATIONALITY QUESTIONS.

Certain matters connected with the law of British nationality were brought before the Conference at the instance of Australia, and were referred to a committee whose recommendations received approval by the Conference. The most interesting decision was embodied in a resolution expressing the opinion that the principle of the existing law that the nationality of a married woman depended on that of her husband should be maintained, but proposing that power should be taken to re-admit a woman to British nationality in cases where the married state, though subsisting in law, had to all practical purposes come to an end. Another recommendation was that the power of granting certificates of Imperial naturalisation should be extended so as to cover persons resident in the territories administered under Mandates in Africa and the Southern Pacific and in Protectorates. The Committee made no recommendation regarding the law relating to the validity of marriages between British subjects and foreigners, which, though validly contracted in British law, might in certain circumstances be invalid in the law of the foreign country concerned.

IMPERIAL PREFERENCE.

The official report regarding the Imperial Economic Conference consisted almost entirely of the resolutions adopted, the most important being those on the subject of Imperial Preference. The Conference, "holding that, especially in present circumstances, all possible means should be taken to develop the resources of the Empire and trade between the Empire countries," desired to reaffirm the resolution on the subject of Imperial preference passed by the Imperial War Conference of 1917. The British Government intimated that they intended to submit to Parliament a series of proposals on the subject, a decision which led to the general election at the close of the year. These suggestions may be summarised as follow:—

Dried Fruit.—Dried figs, raisins, and plums (including apricots) to be admitted free of duty from the Empire, thus enjoying a preference of 10*s.* 6*d.* per cwt., instead of 1*s.* 9*d.*; dried currants to be admitted free, instead of existing duty of 4*d.*, the Government to consider what increase in the duty on foreign currants (then 2*s.* per cwt.) would be necessary to make the preference effective; other dried fruit to be admitted free (as hitherto), a duty of 10*s.* 6*d.* per cwt. to be imposed on such foreign dried fruit (such as apples, pears and peaches) as the Dominion representatives might consider of interest to their trade; other preserved fruits, hitherto dutiable only in respect of sugar contents to be admitted free from the Empire, but with an all-round duty of 5*s.* per cwt. on the principal forms of preserved fruit from foreign countries not at present dutiable, except fruit pulp for jam manufacture, which would remain free of duty.

Sugar.—Empire sugar at present enjoys a preference of 4*s.* 3½*d.* per cwt. (nearly a halfpenny a pound on refined sugar); the British Government guaranteed that if the duty were reduced the preference should for a period of ten years not fall with it but be maintained at its present rate.

Tobacco.—The British Government proposed a similar course to stabilise the existing preference for a term of years, or alternatively, to increase the preference from one-sixth of the present duty to one-quarter. The second alternative was adopted after consultation with the oversea representatives concerned.

Wine.—The proposals were to double the existing preference of 2*s.* per gallon on the duty of 6*s.* per gallon on wines of a strength exceeding 30° and not exceeding 42°, the rate of duty on such wines coming from the Empire being thus 2*s.* per gallon; and to increase from 30 per cent. to 50 per cent. the preference on the surtax of 12*s.* 6*d.* per gallon on sparkling wines.

Raw Apples.—It was proposed to levy a duty of 5*s.* per cwt. on raw apples of foreign origin and to admit raw apples from the Empire free of duty, as at present.

Canned Salmon and Lobster, Crayfish and Crabs.—It was proposed that a duty of 10*s.* per cwt. should be imposed on these foods from foreign countries, and that they should be admitted free of duty from the Empire.

Honey.—It was proposed that a duty of 10*s.* per cwt. should be imposed on foreign honey, and that honey of Empire origin should continue to be admitted free of duty.

Lime, Lemon and other fruit juices.—It was proposed that a duty of 6*d.* per gallon should be imposed on these foods from foreign countries, other fruit juices to be considered. Same duty on fruit syrups, exclusive of the duty on sugar, content of such syrups, fruit juices from the Empire continuing to be admitted free of duty.

Public Contracts.—The Economic Conference re-affirmed the principle that in all Government contracts effective preference should be given to foods made and materials produced within the Empire, except where undertakings entered into prior to the Conference precluded such a course or special circumstances rendered it undesirable or unnecessary. So far as practicable, it was held, efforts should be made to ensure that the materials used in carrying out contracts should be of Empire production.

DEVELOPING MUTUAL TRADE.

A number of resolutions were adopted with the object of improving mutual trade. Among these were several on the subject of Imperial communications. It was suggested that the Imperial Shipping Committee should be maintained owing to the work it had accomplished. The British Government were asked to prepare a draft procedure designed on a reciprocal basis to secure more rapid and more extensive interchange of information in regard to civil aeronautics. The importance of establishing as quickly as possible an efficient Imperial Service of Wireless Communication was affirmed, and the view was expressed that the several Governments of the Empire should take immediate action to remove any difficulties which were delaying the accomplishment of this. It was urged that all possible support should be given by the Governments of the Empire to the State-owned Atlantic cable route which had now been provided, and that in any concessions given in the British Empire to private enterprise in respect of cable or wireless services (including broadcasting stations) preference should be accorded to British companies of any part of the Empire.

Navigation Laws.—In view of the vital importance to the British Empire of safeguarding its overseas carrying trade against all forms of discrimination by foreign countries, whether open or disguised, the representatives of the Governments of the Empire declared that it was their established practice to make no discrimination between the flags of shipping using their ports, and that they had no intention of departing from this practice as regarded countries which treated ocean-going shipping under the British flag on a footing of equality with their own national shipping, and that in the event of danger arising in future to the overseas shipping of the Empire, through an attempt by a foreign country to discriminate against the British flag, the Governments of the Empire would consult together as to the best means of meeting the situation.

Imperial Economic Committee.—Canada dissented from a resolution passed by the Conference expressing the opinion that it was desirable to establish an Imperial Economic Committee to consider and advise on matters of an economic or commercial character (except those dealt with by the Imperial Shipping Committee) referred to it by any of the Constituent Governments, provided that no question which had any reference to another part of the Empire should be referred to the Committee without the consent of that other part of the Empire.

Religion and Languages.

The inhabitants of Great Britain and Ireland are almost entirely Christians, the exceptions being about 300,000 Jews and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was disestablished in Ireland in 1869, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership, the *Church of England* having 2,250,000 communicants in England at Easter 1920, the *Roman Catholic Church* claiming 2,000,000 members in England and Wales, 546,000 in Scotland, and 3,242,670 in Ireland (1920). The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts have been made, under *Sinn Fein* auspices, to revive the Gaelic language in Ireland. Gaelic is still spoken in the Highlands and Islands of Scotland, there being 10,314 persons speaking Gaelic only, and 151,159 speaking Gaelic and English at the Census of 1921.

* The totals given above refer to movements to and from *Places out of Europe.* The number of Passengers from and to Great Britain and Ireland and Europe in 1913 was, *Outwards* (to the Continent), 1,184,412, and *Inwards* (from the Continent), 1,302,874. The figures for 1918-21 were *Outwards* (1018) 189,225, (1919) 569,922, (1920) 738,860, (1921) 830,558; *Inwards* (1918) 171,229, (1919) 425,183, (1920) 725,253, (1921) 855,343. For the first six months of 1922, Passengers to places outside Europe exceeded inward Passengers by 22,009. During the same period the Emigrants from the British Isles to Australia and New Zealand numbered 15,567, to Canada 14,811, and to U.S.A. 4,665.

CENSUS POPULATION OF GREAT BRITAIN AND IRELAND.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1570	4,160,221	1670	5,773.646
1600	4,811,718	1700	6,045,008
1630	5,600,517	1750	6,517,035

The first general *Census* of Great Britain and Ireland was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

1801	16,345,646	1871	31,845,379
1811	18,509,116	1881	35,241,482
1821	21,272,187	1891	38.104,975
1831	24,392,485	1901	41,976,827

1851	27,724,056	1921	42,767,530§§
1861	29,321,288		

⁂ The population of Great Britain and Ireland a month before the outbreak of the Great War was officially estimated at 46,089,249. The number of persons to the square mile was in 1921: England and Wales, 649; Scotland, 164; Ireland (1911), 135·6.

POPULATION ENUMERATED AT EACH DECENNIAL CENSUS IN ENGLAND AND WALES AND SCOTLAND, 1801-1921, IRELAND, 1831-1911, AND ISLANDS IN THE BRITISH SEAS, 1871-1921.†

CENTRAL GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), the *Habeas Corpus Act* (1679), the *Act of Settlement* (1701), the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), the *Parliament Act* (1911), the *Government of Ireland Act* (1920), and the *Irish Free State (Agreement) Act*, 1922. The first secured annual parliaments and the equal administration of justice; the second established the liberty of the person; the third provided for the Protestant succession to the throne; the fourth and fifth created the United Kingdom; the sixth enabled the Commons to pass certain Acts without the adherence of the other Chamber; the seventh created the Government of Northern Ireland, and developed into the eighth, which established the Irish Free State.

The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign.*—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right, however, will generally enable an injured subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.

2. *The Legislature.*—Parliament consists of two Houses, the Lords and the Commons.

(*a*) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (16) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(*b*) *The House of Commons.*—This body consists of 707 members, elected by the registered male and female electors in county, borough, and university constituencies. Roughly speaking, about one-third of the population are electors. The maximum duration of Parliament is five years. Members of the House of Commons receive annual salaries of £400.

3. *The Executive.*—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The *Cabinet*, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (*see* page 165). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.

4. *The Judicature.*—(*a*) *England and Wales.*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases arising in the country are tried on circuit by judges of the King's Bench (Assizes). The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, *e.g.*, the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court; those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in England are: (1) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," *see* p. 575) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) *The Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(*b*) *Scotland.*—Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (*see* p. 548) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(*c*) *Northern Ireland.*—The higher courts in Northern Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions.

LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1919). The subjects which local bodies administer are, *inter alia* the poor law; the laws relating to public health; the maintenance of the police; the control of the sale of intoxicating liquors; the provision of lunatic asylums. Local authorities also have to administer and carry into effect the laws as to elementary and other schools. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each County (under Chairmen), for each City and County Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, or Parish Councils with Chairmen.

POLICE.

The strength of the Police force was 56,908 in England and Wales (1921), and 6,124 in Scotland (1919). The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office. The LONDON POLICE consists of the City Police and of the Metropolitan Police. The *City Police* district comprises an area of 675 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (*see* p. 233). Although the area is comparatively small, the rateable value is enormous, and there are 19,657 night residents. The Force comprises 1 Assistant Commissioner, 3 Superintendents, 6 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 103 Sergeants, and 1,006 Constables; also 19 Constables on private service duty.

The *Metropolitan Police* district embraces an area of 447,626 statute acres, with a population of about seven millions. There are within this area fourteen Police Courts (*see* p. 233). The Force on Oct. 1, 1922, consisted of 39 Superintendents, 678 Inspectors, 3,035 Sergeants, and 17,267 Constables, making a total of 21,019, with 282 horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 24, 1922, was 12,576. The cost of the maintenance of the Metropolitan Police in 1921–1922 was £7,928,499 (the fines at Metropolitan Police Courts reduced the gross amount by £68,075). On March 31, 1921, there were 11,143 Police pensioners, and 324 widows.

LOSSES FROM FIRE.

The annual cost of fire defence in Great Britain may be estimated at about £25,000.000. The average annual direct loss from fire in Great Britain is about £12,000,000. In the United States it is estimated to have exceeded £100,000,000 in 1922. The number of fires attended by public fire brigades in Great Britain is about 22,500 per annum, varying from 77 per 100,000 population in London to half that figure in other large cities and urban districts. The average for England and Wales is 56 per 100,000 population, and 83 per 100,000 population in Scotland. The cost of public fire brigades in Great Britain amounts in the aggregate to about £2,000,000 per annum, and varies from the produce of a 3d rate in London to the produce of a halfpenny rate in an urban district.

CRIME.

England and Wales.

Indictable Offences.—The number of persons tried for indictable offences was slightly higher than in 1920 and was not much below the level of 1913. The figures for the principal groups of offences compare as follows:—

	1913.	1920.	1921.
Violence against the person	1,387	1,107	966
Bigamy	133	722	570
Other sexual offences	1,806	1,607	1,535
Burglary, robbery, etc. ...	3,984	4,722	4,280
Larcenies and frauds	54,356	51,679	53,022
Other offences...	1,703	780	982
Totals	63,269	60,617	61,355

Non-Indictable Offences.—Persons proceeded against for less serious offences numbered 523,718, compared with 611,821 in 1920, and 680,290 in 1913. The totals for certain groups of offences and the corresponding figures for 1920 and 1913 are:—

	1913.	1920.	1921.
Game laws	4,262	4,050	5,620
Poor law......................	6,256	2,044	3,128
Sunday trading	11,555	16,290	18,426
Vagrancy	27,523	6,209	7,246
Education Acts	44,030	42,320	26,529
Highway Acts	76,011	165,790	133,465
Drunkenness...............	204,038	98,606	81,383
Gaming	29,384	24,323	14,474

Assizes and Quarter Sessions.—Of 8,934 persons brought up for trial in Courts of Assize and Quarter Sessions, 43 were not actually tried—in 13 cases the prosecution was not proceeded with, and in 30 cases the jury found that the accused were insane and unfit to plead. There remain 8,891 persons actually tried, of whom 1,712 were acquitted, and 7,152 convicted, while 27 were found "guilty but insane."

Court of Criminal Appeal.—The Court of Criminal Appeal granted leave to appeal in 43 out of 439 applications. In addition, there were 18 appeals on grounds involving questions of law, and 16 appeals against sentences of preventive detention, making a total of 80 appeals for hearing, as against 111 in the preceding year and 157 in 1913. In 31 cases the conviction or sentence was affirmed, and in 49 cases the conviction or sentence was quashed, including 30 cases in which other sentences were substituted.

Husbands and Wives, &c.—Separation orders granted in 1921 numbered 5,952, compared with 5,173 in 1913; 9,065 orders were made for the maintenance of illegitimate children (against 6,914), and 9,469 orders for the maintenance of wives (against 7,959).

Juvenile Offenders[*].—The total number of persons brought before juvenile courts in 1921 was 32,359, namely, 15,222 children, 15,031 young persons, and 2,106 persons aged above 16. Including those dealt with by ordinary Courts of Summary Jurisdiction, there were 33,994 juvenile offenders. Of those brought before Juvenile Courts 3,764 were acquitted, orders without conviction were made against 12,680, and 13,669 were convicted. Only seven youthful offenders were sentenced to imprisonment; 608 were committed to reformatory schools, 623 males were ordered to be whipped, and 12,288 (or 20 per cent. of the number convicted) were sentenced to pay fines. In 2,446 cases the fine was ordered to be paid by the parent or guardian of the defendant. During the year probation orders were made in respect of 10,293 persons.

---

[*] Children under 14 may not be sentenced to imprisonment nor committed to prison in default of payment of fines, damages, or costs. Nor may young persons aged 14 to 16 years be so dealt with unless the Court certifies that the young person is of so unruly a character that he cannot be detained in a place of detention, or that he is of so depraved a character that he is not a fit person to be so detained. (Children Act, 1908, sec. 102.)

Homicide.—Apart from cases of infanticide and deaths from illegal operations, 85 cases of supposed murder came to the knowledge of the police in England and Wales during 1921, compared with 107 in 1920 and 100 in 1913. In 22 cases (1921) the murderer committed suicide; in 56 cases arrests were made involving 59 persons, and in the remaining 7 cases no arrests were made. In 1921, out of 13 sentences of death, 8 were commuted to penal servitude for life. The results of the proceedings taken are shown in the appended table:—

	1913.	1920.	1921.
Sentenced to death	27	28	13
Guilty, but insane	13	12	8
Ordered to be detained	—	1	2
Convicted of manslaughter	18	13	14
Accessory after fact	1	—	—
Malicious wounding	—	—	1
Discharged or acquitted	12	26	14
Found insane on remand	5	9	7
Extradited, died, &c.	3	2	—
Totals	79	91	59

Drunkenness.—The total number of convictions for drunkenness in 1922 was 76,347 (63,253 men and 13,094 women), against a total of 188,877 in 1913 and 29,075 in 1918. In 516 cases the condition is reported to have arisen from the drinking of methylated spirit.

EDUCATION.

I.—ELEMENTARY.

Statutes require parents in *England and Wales* to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age; in *Scotland*, to provide efficient education up to 15 years; in *Ireland*, to cause their children to attend school from 6 to 14 years.

In order to give effect to these requirements *Local Authorities* are empowered to make free provision for school accommodation, attendance of pupils and teaching-staffs, whilst the *State* supplies nearly one-half of the maintenance funds conditionally upon receipt of satisfactory reports from government inspectors appointed by the Board of Education for England and Wales, by the Committee of Council on Education for Scotland, and by the Commissioners for National Education in Ireland. It may be remarked—(i.) that there is no definition of "school" in the Acts; (ii.) that efficiency of instruction given is not tested except in publicly-managed schools; (iii.) that Local Authority schools increase in number though still fewer than voluntary (non-provided) schools. The latter are maintained by the Authorities whilst the responsibility for the buildings remains with the foundation-managers.

In 1921 there were 21,534 public elementary, special and certified efficient schools in England and Wales, with accommodation for over 7,150,000 pupils, and 3,113 in Scotland with accommodation for 957,000. Teachers number 200,000, women preponderating. Except in Scotland there is a considerable proportion of teachers who are not fully qualified. The War lessened the number of male teachers which was already diminishing. State grants for pensions on a more liberal scale than formerly are now offered under the Superannuation Act of 1918, by which it is hoped to render the profession more attractive.

Twenty per cent. of the population are of the pupil age. School life is over in the great majority of cases after about seven years of schooling, the minority proceeding to some other kind of day-school. Recent legislation requires Local Authorities in England, Wales and Scotland to make schemes for consideration by the Board of Education to provide suitable practical instruction, to give advanced instruction to those pupils who stay beyond 14, and to improve the facilities towards preparing pupils for higher education and the teaching profession: also nursery-schools for children under five.

Elementary school education includes teaching in practical matters—needlework, drawing, gardening, handicrafts, cookery, &c.—and the sections upon health, medical attendance, physical training, evening play centres, home study, future employment, &c., show that the schools are valuable agencies in child-welfare generally.

II.—EDUCATION BEYOND ELEMENTARY.

The Education Act, 1918, has in view powers for compulsory, and therefore free, education of a continuative kind in part-time day schools up to 16 and ultimately 18 years; and implies free secondary education of some type hereafter.

Secondary.

The aims, methods, and instructions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute, undifferentiated 4-year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial, commercial, &c., employments.

(i.) *England.*—The number of Secondary schools deemed efficient by the Board 1920-21 was 1,465, containing 386,000 pupils, of whom about one-fourth come up from elementary schools with "free places," others with scholarships. Nine-tenths of these schools receive State grants, and nearly one-third are controlled by Local Authorities. Fees are charged to most of the pupils. Of these "efficient" schools about 40 per cent. receive boarders (about 27,000) in varying proportions and drawn in many cases from distant areas. Most of them are endowed or under trusts, and their trust incomes and property form a considerable asset in secondary school finance. The Authorities aim at securing graduate teachers as far as possible. As in Elementary schools, there is a shortage of fully-qualified teachers; but the recent Act for providing Pensions for School Teachers may be expected to make the posts more attractive.

(ii.) *Wales.*—The system is much the same as in England, though the schools are under earlier statutory provisions, and are called "Intermediate" in many cases. The number of efficient schools was (in 1914) 122, and of pupils, 22,000, girls preponderating. Three per cent. of the schools do not receive government grants, and 81 per cent. were provided by the Local Authorities. In Wales there is a Central Welch Board.

(iii.) *Scotland: Intermediate and Secondary Schools.*—Three kinds of courses are provided: "Higher Grade and Intermediate with post-Intermediate." The former are taken in 196 schools by 33,000 pupils, and the latter in 56 schools by 20,000 pupils. All are under the same Commissioners and Local Authorities as are the Elementary schools.

(iv.) *Ireland.*—Intermediate Education is under a Special Board who have recently gained fresh statutory powers and a State grant analogous to those in force elsewhere in the United Kingdom. Up to 1917 their operations were chiefly examinational, though grants for inspection results had already been authorised and are made. Their report (1917) contains reference to schools in so far as their pupils (11,000) were presented for examination. It seems that 346 schools were affected, with some 12,000 pupils. There are also "Commissioners of Education in Ireland," whose powers are confined to certain endowed schools (800 pupils) mostly in Ulster.

Technical.

Technical Education in England and Wales is provided in Evening and similar schools (mostly controlled by Local Authorities), 3,143 in number, and attended by 417,148 students on whom State grants are paid, and of whom about one-half are under 17 years of age. The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses (294), Tutorial Classes (100), Technical Institution Courses (24), with 1,169 grant-earning students, Day Technical Classes (127), held in 38 Institutions, with 97,295 students on whom State grants are paid; and also 151 Schools of Art, 19 Branch Schools of Art, and 49 Art Classes.

In Scotland Technical Education is provided in like manner, but in Ireland by a Department of Agriculture and Technical Instruction.

Training.

Training is provided by the State for Elementary School Teachers, of whom 50 per cent. have been trained in Colleges having nearly 13,000 places. Slight progress has been made lately towards providing for the Training of Teachers for Secondary Schools, a small annual State grant being made for the purpose.

Universities.

Many of these institutions now receive annual State grants, mainly in the form of "block" grants paid by the Treasury on the advice of the University Grants Committee. Substantial grants are also received from local Education Authorities in England and Wales. State grants to Irish Institutions were transferred from the Treasury to the Irish Governments as from April, 1922.

In 1922-3 the Professors and Undergraduates were approximately as under :—

Universities.	Professors, etc.	Undergraduates.
England (10)	3,077	31,030
Wales (1)	294	2,530
Scotland (4)	747	11,190
Total (15)	4,118	44,750

The Geddes Report.

In 1921 a Committee was appointed by the Government (with the Rt. Hon. Sir Eric Geddes, G.C.B., M.P., as Chairman) to review the National Expenditure. The various "spending departments" of the Government had undertaken to reduce their expenditure by £75,000,000, and the task of the Committee was to enquire whether a further economy of £100,000,000 could be effected. The three Reports of the Geddes Committee recommended a total additional saving of £86,844,175, which fell short of the total aimed at by £13,155,825, but the Committee point out that the full sum can be made good (i.) in Naval Expenditure (*a*) as a result of the Washington Conference, and (*b*) under the heading of oil stocks and oil storage; and (ii.) in Military Expenditure, upon a review of the garrison abroad. The Estimates reviewed and the Reductions proposed were as under:—

The Budget, 1923–1924.

Summary of Provisions.

The Budget of Great Britain for 1923–1924 was introduced on April 16, 1923, by the Chancellor of the Exchequer (Mr. Stanley Baldwin). The financial year 1922-1923 ended with a realized surplus of £101,516,000, which was applied in reduction of the National Debt, and the estimated revenue for 1923-1924 showed an estimated surplus of £1,884,000, after allowing for certain remission of taxation.

Changes in Taxation.

The *Income Tax* is reduced from 5s. to 4s. 6d. in the £, the *Corporations Profits Tax* from 1s. to 6d.; the *Beer Duty* is reduced by £1 per barrel; the tax on *Sweetened Table Waters* is reduced from 4d. to 2d. per gallon; the *Cider Duty* of 4d. per gallon is abolished. The *Rates of Postage* are reduced for *Inland Letters* to 1½d. for 2 oz., the additional charges being ½d. for every additional 2 oz.; *Letters to British Dominions and the U.S.A.* reduced to 1½d. for 1 oz. and 1d. for each additional oz.; *Foreign Letters*, 1 oz. for 2½d. instead of 3d.; *Postcards* reduced from 1½d. to 1d.; and *Inland Printed Papers* reduced to 2 oz. ½d. *Inland Parcel Rates* have a general reducton of 3d. Certain concessions are made to *Telephone* users.

STATE EXPENDITURE, 1913–14 AND 1923–24.

THE expenditure of the various departments of the State is met from two main sources, (1) supply grants, (2) receipts appropriated in aid. Together these form the *gross* expenditure for the year, the *net* expenditure being the amount raised by taxation for the particular purpose. In order to measure the actual total expenditure of public departments the more significant figures are the *gross* estimates, that is, the supply grants and appropriations in aid combined, as these figures represent the total cash sums placed by Parliament at the disposal of departments.

The total cost of the Consolidated Fund and Supply Services in 1913–14 (the last complete year before the Great War), in 1918–19 (when expenditure reached its maximum), and in 1923–24 (Budget estimates), are given below (in *Thousands* of £):—

Services.	1913-14. (Actual.)	1918-19. (Actual.)	1923-24. (Estimated.)
Consolidated Fund Services	37,323	281,345	380,470

Total Gross..	207,818	3,146,476	875,535

CIVIL SERVICE DECREASES.

Reductions in staffs and the accelerated liquidation of war commitments have enabled further considerable savings to be effected in the expenditure of the Civil Departments. The estimates for salaries and expenses in 1923–24 amount to £10,821,749 (including £639,915 attributable to war services), giving a net reduction on the total for last year of £3,347,555. On balance only seven of the forty departments and services show increases. These together amount to £447,725, while the decreases under the other heads reach a total of £3,795,280. For the first time the Departmental votes include provision for payment to the Post Office for telephone services, which will appreciably add to the Post Office revenue. An increased charge of £3,585,500 to meet the cost of the withdrawal and redemption of silver and bronze coin, is covered by additional appropriations in aid to the extent of £3,130,800, leaving a net increase in the estimate for the Mint of £199,990. The grant-in-aid to the *Forestry Commission* is raised from £20,000 to £163,000. It is stated that legislation may shortly be introduced to transfer the Crown woods and forests to the Commission. The expenditure and revenue connected with these woods are at present debited and credited to the account of the land revenues of the Crown—the annual surplus on which is paid into the Exchequer. If the proposed legislation is carried, the land revenues will be relieved of, and the Forestry Fund will be charged with, a net sum in 1923 24 which is estimated at £10,000. Higher grants in respect of unemployment schemes, and for agricultural education and research, and the improvement of live stock, increase the *Scottish* estimates by £107,399. For the ordinary services of the *Ministry of Agriculture* £12,047 more is required, but owing to a decline of £60,200 in the vote for the agricultural training of ex-officers and men, the total expenditure of £1,764,451 shows a net reduction of £47,153. The main items compare as follows:

	Estimates 1923–24. £	Increase (+ or dec. (—) on 1922–23. £
Salaries and allowances ...	511,351	— 34,039
Education and Research ...	665,440	+ 74,560
Live stock grants, &c.	89,360	— 97,525
Land settlement and imment	923,710	+ 178,985
Kew Gardens	46,562	— 5,220
Sugar beet...	12,500	—
Fisheries Department	76,826	— 8,216
Training of ex-officers and men..........................	12,800	— 60,200

In the case of the *Board of Trade* the estimates for the ordinary services amount to £472,133 and that for war services to £560,415, these figures representing decreases of £134,068 and £702,632 respectively. Compared with last year's estimates, the war services show the following increases and reductions:—

	Estimates 1923–24. £	Increase (+) or dec. (—) on 1922–23. £
Food Department	16,500	— 54,155
Clearing Office (Enemy Debts)........................	634,000	+ 261,064
Russian Claims Dept. ...	2,350	— 2,510
Reparation Claims Dept.	22,100	— 17,660
Other war services	8,090	— 22,357
Diverted cargoes (cotton)	40,000	— 110,000
Reparation dyes	99,800	+ 50,300
Assistance to dye industry	5,625	— 1,250
Air raids compensation grants	750	— 850
Australian zinc concentrates	2,120,000	+ 701,100
Australian spelter	500	— 849,500

The cost of administration of the *Enemy Debts Clearing Office* will be covered by fees, and the vote for reparation dyes represents the costs of distribution, which will be met out of the proceeds of the sale of the 3,000 tons due from Germany in 1923–24 under the Peace Treaty. It is expected that the sales of Australian zinc concentrates which the Government may be required to take under the contract of April, 1918, will produce £2,005,000.

As regards the *Other Departments*, the decreases as a rule represent the aggregate of savings on a large number of items, but especially on salary lists. Apart from the automatic reduction of £1,283,363 on *Irish services*, the principal decrease is in stationery and printing, which at £1,644,592 is lower by £1,033,090. The main reductions on last year are: Printing, £245,000; paper, £247,000; salaries, wages and allowances, £161,875; office supplies, £112,000; and binding, 70,000.

EX-SERVICE MEN.

Statistics issued by the Treasury show that out of a total staff (permanent and temporary) in Government offices on Aug. 1, 1922, of 314,667, of whom 233,401 were men, ex-Service men numbered 142,963.

THE NATIONAL DEBT.

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,263 until the "Glorious Revolution" of 1688, which added nearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II. about £87,000,000 were added, but the first twelve years of George III. saw £10,000,000 of this paid off. The American War added £121,000,000, making the total nearly £250,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £601,500,343 were added to the debt for the purposes of the war, the following amounts being raised:—

Year.	£	Year.	£	Year.	£
1793...	4,877,956	1801...	27,305,271	1809...	12,298,375

1800...	23,030,520	1808...	12,095,044	1816...	514,059

The amount of the Debt in January, 1816, was £900,436,000 (Funded, £816,312,000; Unfunded, £44,727,000; Annuities, £39,397,000), the annual charge being nearly £33,000,000, but the following amounts were paid off from 1817-1837:—

Year.	£	Year.	£	Year.	£
1817...	1,826,814	1824...	7,456,559	1831...	2,673,858

1823...	5,261,725	1830...	1,935.465	1837...	1,985,885

At the accession of Queen Victoria the amount stood at nearly £788,000,000, with an annual charge of £29,000,000. Small sums were paid off annually from 1837-1854, when the Russian War added £33,000,000 to the Debt. Repayments were made from 1858 onwards, with slight increases in 1868, 1875, 1878, 1879 and 1886, the following being the actual amounts paid off:--

On March 31, 1899, the "Dead Weight" total was £635,070,635, being a decrease since 1837 of £153,000,000. For the South African and China wars £142,752,190 were raised, but from April 1, 1903, to March 31, 1914, the sum of £115,518,571 was paid off, and the total Debt on March 31, 1914, was £661,473,765.

The total gross liabilities of the State for the financial year 1922-23 was £7,742,526,147, as against £7,634,148,332 for 1921-22. There are increases of £265 769,829 in the Funded Debt and £17,492,396 in Other Capital Liabilities (total £283,262,225) and reductions of £1,506,924 under Terminable Annuities and £173,377,486 under Unfunded Debt (total £174.884,410). The unfunded debt was increased by additional creations under the War Loan and other Acts by £500,097, 918, Treasury bonds accounting for £429,636,031, and National Savings Certificates for £56,969,826. On the other hand, reductions were effected in War Loan, Victory Bonds, Exchequer Bonds, National War Bonds, Treasury bills, etc., to the aggregate amount of £673,475,404. Included in this sum were surrenders for death duties totalling £31,635,088.

At March 31, 1923, the aggregate National Debt consisted of the following:—

External Debt	£1,088,669,915
Internal Debt, floating ...	1,020,915,500
Other Internal Debt ...	5,566,709,694
Other capital liabilities...	66,231,038

The total of the *Floating Debt* outstanding on Nov. 10, 1923, was £811,271,500, a reduction of £102,902,000 since Nov. 11, 1922.

Paper Money.

Currency Notes (Paper Money) in circulation on Nov. 7, 1923, amounted to £259,875,735, a decrease since Dec. 1920 of £87,625,000.

The External Debt.

The External Debt consists of loans from British Dominions, the United States, and other countries, and was stated at the following totals on March 31, 1921 and 1922:—

Due to.	1921.	1922.
Canada	£53,339,000	£27,418,000

	£1,161,563,000	£1,090,184,000

In the three financial years 1920–1922 the sum of £274,666,000 was paid off the External Debt.

* See "Estimated Assets" below.

The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at $4,604,128,085, of which $4,128,085 was to be repaid at once in cash and the balance funded at 3 per cent. for 10 years and 3½ per cent. thereafter, until redeemed by the operation of an accumulative sinking fund of ½ per cent. in 62 years. Interest is payable on June 15 and Dec. 15 in each year at the rate of 3½ per cent. for the first 10 years, and 4 per cent. thereafter, to include the sinking fund.

Estimated Assets.

The estimated value of the Debts owing to Great Britain by British Dominions and Foreign Countries, and of Investments made by the British Government in various Loans and undertakings, is shown below (as on March 31, 1923):—

Included in the "Miscellaneous Assets" are *Suez Canal* Shares, valued at £19,206,335, and investments in various registered companies, the amounts paid for the shares being: Anglo-Persian Oil Company, £5,200,000; Cunard Steamship Company, £2,600,020; British Dyestuffs Corporation, £1,700,001; British Cellulose and Chemical Mfg. Co., £1,450,000; Commercial Bank of Siberia, £1,198,371; Standard Shipbuilding Co. (E. Finch, Ltd.) and Chepstow Property Co., £656,250; British America Nickel Corpn. of Canada, £629,618; British Farina Mills, £325,000; Home-Grown Sugar Ltd., £187,500; Turkish Petroleum Company, £22,105.

Reparations.

The British share of the capital obligations of the ex-enemy Powers on the existing basis as determined by Inter-Allied Agreements is twenty-nine milliard gold marks (£1,450,000,000), to which approximately 2,200,000,000 gold marks (£110,000,000) must be added in respect of reimbursement of the Belgian War Debt to Great Britain, the liability for which was transferred to Germany. These figures are subject to adjustment on the one hand on account of sums already received, and, on the other, in respect of interest in arrear, but these adjustments are not sufficiently important in amount appreciably to modify the total figures. Figures are not given separately for Austria, Hungary, and Bulgaria, which are included in the figures given above.

Debit and Credit Balances.

The figures presented to the Reparations Commission, as balanced on March 21, 1922, were stated in *milliards of gold marks* as under :—

Country.	Credits.	Debits.	Balance.	
			Credit.	Debit.
U.S.A.	48·7	*nil*	48·7	...
Gt. Britain	67·2	19·8	47·4	...

Totals	214·0	214·0	150·9	150·9

What Germany has Paid Great Britain.

The Chancellor of the Exchequer (Mr. S. Baldwin) stated, in the House of Commons, the amounts Germany has paid by way of reparations, under the *Treaty of Versailles* from Nov. 11, 1918, to April 30, 1923 :—

	Gold Marks.
Gold and paper currencies	740,000,000
Deliveries in kind	413,000,000
Total	1,153,000,000

At twenty gold marks to the pound the total would represent £57,600,000, on which the cost of the Army of Occupation was a charge prior to Reparations proper. Between May 1, 1922, and December, 1922, a further sum of approximately 100,000,000 gold marks (or about £5,000,000) was received in respect of levies under the Reparation (Recovery) Act, dye-stuffs, &c.

U.S. Loans to Foreign Governments.

The following figures show the amounts due to the United States by the different foreign Governments on May 15, 1923. The figures include interest accrued and unpaid up to the last interest period, as well as the principal amounts :—

Armenia	$13,137,456	Italy	$1,891,514,634
Austria	25,225,723	Latvia	5,582,296
Belgium	428,956,287	Liberia	28,869
Cuba	8,147,000	Lithuania	5,479,791
Czecho-Slovakia	103,106,426	Nicaragua	170, 85
Esthonia	15,694,148	Poland	148,504.423
Finland	9,005,082	Rumania	41,089.387
France	3,770,906,656	Russia	227,801.959
Gt. Britain	4,685,862,560	Yugo-Slavia	57,872,196
Greece	15,375,000		
Hungary	1,837,561	Total	$18,456,383,059

The whole amount advanced by the United States to foreign Governments, plus unpaid interest, was on May 15, 1922, $11,456,383,000, of which the share of Great Britain was $4,685,862,560. According to a statement in the House of Commons by the Financial Secretary to the Treasury in April, 1921, the actual amount advanced to Great Britain after the United States entered the War was $4,197,000,000, the difference of $488,000,000 representing added interest. When the statement was made, the Financial Secretary added that during the period in which the British Government was borrowing from the United States it was lending £897,000,000 to Allied Governments, in addition to £828,000,000 lent to them before the United States entered the War. "Had the British Government been relieved of the necessity of lending this £897,000,000 to the Allied Governments it would have been, so far as could be judged, unnecessary for the British Government to ask financial assistance from the United States Government."

The Bankers' Trust Company, of New York, has provided details of the expenditures made in the United States by the British Government during the period in which loans were made to Great Britain by the United States Government. The figures show that while the total cash advances of the United States to Great Britain amounted to $4,277,000,000. the British Government expended in the United States during the same time the sum of $7,220,000,000, or $2,943,000,000 more than the total amount lent to Great Britain. The items upon which these British expenditures were made in the United States were as follows (April, 1917 to November, 1920) :—

	$
Munitions (including horses, &c.)	1,536,000,000
Cotton, cereals (to July, 1917), and bills of exchange bought to meet expenditures in U.S.	1,683,000,000
Cereals after July, 1917	1,375,000,000
Other foods	1,169,000,000
Tobacco	99,000,000
Other supplies	215,000,000
Payments for shipping	49,000,000
Interest paid to the U.S. Treasury	388,000,000
Repayment of loans raised in the United States	353,000,000
Purchases of silver	262,000,000
Paid in miscellaneous ways	91,000,000
	7,220,000,000

A number of the above purchases, notably cereals, sugar and munitions, were made by the British Government for other Allied Governments, and those Governments subsequently repaid Great Britain $1,854,000,000 ; after deducting those repayments, the net expenditures by Great Britain in the United States for British purposes were $5,366,000,000, or over $1,000,000,000 more than was lent to the British Government by the United States.

The above expenditures were provided for as follows (April, 1917, to November 1920) :—

	$
Loans by U.S. Treasury (net, after deducting repayments)	4,197,000,000
Dollars paid by U.S. Government to British Goverment for sterling required to make payments in England	449,000,000
Dollars paid to British Government for rupees and gold from India sold to U.S. Treasury	81,000,000
Money raised by the British Government from other sources	639,000,000
	5,366,000,000

The final item includes any payments to Great Britain for services rendered, such as transportation of troops, &c., which the United States made in dollars in America, together with such sums as accrued to the British Government from interest on or sales of American securities owned by it, shipments of gold and other exports, &c.

Defaulting Debtors.

The Council of Foreign Bondholders reported in 1923 that a total of £1,782,544,291 of principal is owing by states which do not pay their debts, in addition to over £486,000,000 for interest due. The principal defaulter is Russia (£1,746,274,182), and included in the list are certain Southern States of the U.S.A. and certain cities of South America.

OTHER CAPITAL LIABILITIES.

These sums are not included in the capital on which interest is arranged for in the permanent charge. They consist of various loans contracted for Telegraph and Telephone extension, for the purchase of land for Government offices, &c. On March 31, 1922, these liabilities stood at £66,231,038, an increase of £17,492,396 over the total for the previous year, an amount of £20,574,715 having been created and £3,082,319 having been redeemed during the year.

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to creditors of bankrupt estates.

Loans Guaranteed by British Government.—The Nominal Net Liability of the State in respect of loans guaranteed by the British Government was stated on March 31, 1922, to be as follows:—Turkish Loan, £3,815,200; Egyptian Loan, £5,661,800; Greek Loan, £3,899,100; Mauritius Loan, £255,167; Transvaal Loan, £27,926,549; Sudan Loan, £6,440,000; Welch Church Loan, £2,350,000; Local Loans, £217,309,766; Irish Land Purchase Stock, £8,232,913; (do.) £56,621,017; (do.) £60,920,212; and Temporary Advances, £670,000.

The Sinking Funds.

Reductions in the Debt are made by means of (*a*) the *New Sinking Fund* (set up by Sir Stafford Northcote in 1875), which is the balance of the Annual Charge after providing for interest and cost of management (£9,094,246 in 1921–22); (*b*) the *Old Sinking Fund*, which is the application of the surplus revenue of any year for the redemption of debt; (*c*) *Terminable Annuities*, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable (£2,090,732 in 1921–22); (*d*) *Victory Bonds Sinking Fund*, by means of which Victory Bonds drawn for repayment on Sept. 1 of each year are discharged (£1,906,905 in 1921–22); (*e*) *Depreciation Fund*, under the Finance Act of 1917, by which sums are issued by the Exchequer and applied for the purchase of various Government Stocks, &c. (£2,194,727 in 1921–22). (£86,006,000 of 5% Stock and £10,000 of 4% Stock had been so purchased up to March 31, 1920); (*f*) *Payments for Death Duties*, under Section 3 of the War Loan Act, 1919 (£9,274,000 in 1921–22); (*g*) *Issues from Revenue to redeem Debt* (£45,693,247 in 1921–22). LOCAL GOVERNMENT DEBTS.

In addition to the *National* Debt there are considerable amounts outstanding as Loans of *Local Authorities* in England and Wales, Scotland and Ireland. These amounts were raised for the provision of baths, cemeteries, electricity supply, gasworks, harbours, piers, docks, canals and quays, light railways, markets, tramways, waterways and other purposes. On March 31, 1919, there were outstanding loans in England and Wales to the amount of £544,184,848, including £49,806,762 Metropolitan Water Board Stock and £28,340,459 of the Port of London Authority; against the total the sum of £55,720,756 stood at the credit of various Sinking Funds. The total amount of outstanding loans and capitalized annuities in Scotland (on March 31, 1918) was £61,887,957, and in Ireland (on March 31, 1919) £25,453,114.

LOCAL RATES.

The Gross Rental of Rateable Hereditaments in England and Wales in 1917–8 was £291,535,480, the Rateable Value being £230,746,781. The following particulars relate to the 1,154 boroughs and urban districts, and to 100 typical rural parishes out of an aggregate of some 13,000 in England and Wales. In 1921–22 the amounts levied were in most of the urban areas between 12*s.* 6*d.* and 17*s.* 6*d.* in the £, and in most of the typical rural areas between 10*s.* and 15*s.* The extreme range recorded for urban areas was from 5*s.* 11*d.* in Bromborough (Cheshire) to 34*s.* 7*d.* in Ebbw Vale, and that for rural areas was from 5*s.* 11*d.* in an Isle of Wight parish to 28*s.* 6*d.* in a parish in Carmarthen. Taking England and Wales as a whole, the average amount of the local rates rose from 13*s.* 3½*d.* in 1920–21, to 14*s.* 9½*d.* in 1921–22, an increase of 11·3 per cent. It is estimated that the average amount levied in the urban areas in 1921–22 was double the average for 1913–14, and in the rural parishes considerably more. The estimated increases per cent. were:—

	Per cent.
Metropolitan boroughs (including the City)	101
County boroughs	108
Other boroughs and urban districts	100
100 typical rural parishes	139

As a result of the quinquennial valuation in 1921 the total assessable value of all the rateable property in England and Wales rose from £223,660,000 to £234,020,000, or by 4·6 per cent. The increase in value in the several boroughs and other areas was very unevenly distributed. In London it ranged from less than 1 per cent. for some boroughs to upwards of 13 per cent. for others.

By far the larger part of the increase in recent years in the amount of the rates required by the local authorities is attributable to the increases in the cost of living, salaries and wages, and the prices of the materials required for the carrying on of the local services. Great arrears of work (especially on the roads) have been put in hand and paid for since the Armistice; and the industrial depression has been accompanied by an abnormal increase in the number of persons receiving relief at the expense of the rates. The highest point was reached in the second half of the year 1920–21 and the first half of 1921–22. In the second half of the latter year there was a marked decrease in many places. Some part of the decrease is attributable to an increase in the valuations on which the rates are levied, but in many instances there is a fall in the amount required from the ratepayers due to a reduction in the expenditure of the authorities.

In the following table are set out the total amounts of local rates collected in England and Wales from 1913–14 to 1921–22:—

Year.	Total receipts from rates.	Average amount collected.	
		Per £	Per head.
1913–14	£71,276,000	6 8¾	£1 18 11

LOCAL EXPENDITURE.

The estimated *Rate expenditure* of Local Authorities in Great Britain for 1921–22 was £192,008,000, of which England and Wales accounted for £173,000,000, and Scotland for £19,008,000. The estimated total was allocated as under:—

Service.	England & Wales.	Scotland.
Poor Relief	£35,700,000	£3,629,000
Education	35,600,000	4,697,000

Other Services	91,500,000	9,541,000
	£173,000,000	£19,008,000

PAYMENTS TO LOCAL TAXATION ACCOUNTS.

In addition to the amounts raised by Local Authorities from the Rates, the sum of £10,471,016 was paid by the Exchequer to Local Taxation Accounts in the financial year 1922–23. *England and Wales* received £1,107,260 in respect of Additional Beer and Spirit Duties; £1,804,850 in respect of Liquor and £835,222 in respect of Other Licences; £3,581,301 in relief of Rates; £418,552 in relief of Rates on Tithe Rent Charges; £1,321,726 under the Agricultural Rates Act and £60,000 for the cost of collection of Licence Duties; a total of £9,128,911.

Scotland received a total of £1,342,104.

CENTENARIANS.

In 1921 the deaths were recorded of 59 persons (21 males and 38 females) aged 100 years and upwards, in England and Wales. The ages recorded were:—

GREAT WAR PENSIONS.

THE rates of disability retired pay and pensions in respect of disablement due to service in the Great War are contained in the Royal Warrant of July 2, 1920, (*Officers and Nurses*), the Royal Warrant of December 6, 1919, (*N.C.O's and Men*), and the corresponding Orders in Council and Orders applicable to the *Royal Navy* and *Royal Marines* and the *Royal Air Force.*

DISABLEMENT.

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of injury and disease attributable to or aggravated by war service. Such temporary reward usually runs for a period of 12 months, and is from time to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act, 1921 and the Regulations made thereunder. Under that authority a system of final awards has been brought into operation, the effect of which is to stabilise pensions, gradually to eliminate recurring medical examinations, and to bring about finality as to the amount of pension to be awarded. A man, on receiving notification that a final award has has been made to him, has a right of appeal, subject to certain conditions, to an independent Assessment Appeal Tribunal, whose decision is final and binding on both the Ministry of Pensions and the appellant.

Disablement, for the purpose of pension, is assessed on a percentage scale. Total disablement is reckoned at 100 per cent., and the lowest degree entitling to pension is 20 per cent. Where the disablement is assessed at less than 100 per cent. the disablement pension and any allowances attached thereto are proportionately reduced. For instance, a man 50 per cent. disabled would receive 50 per cent. of the full rate of pension and 50 per cent. of any allowances for wife and children to which he might be entitled.

Disablement assessed at less than 20 per cent. is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks, subject in either case to a maximum payment of £200.

RATES OF PENSION.

The following are the principal rates of weekly pension for a private soldier 100 per cent. disabled, and of pensions or allowances for dependants of a private soldier: (except in the case of wife and children's allowances, the rates for other ranks are higher):—

Private—40*s.*; wife's allowance 10*s.*: children's allowances—7*s.* 6*d.* for first child and 6*s.* for each other child; (if there is no wife, 10*s.* for the first, 7*s.* 6*d.* for the second, and 6*s.* for each other child.

Widow—over 40 or with children 26*s.* 8*d.*; under forty and without children 20*s.*; allowances for children 10*s.*, 7*s.* 6*d.*, 6*s.*

Parents—need-pensions not exceeding 20*s.* Provision is also made for other dependants.

A totally disabled man who is certified to require constant attendance may receive an additional allowance not exceeding 20*s.* a week.

Alternative Pensions.

Alternative pensions are based upon the man's ascertained pre-War earnings. Application for alternative pension must be made within a year after the notification of the first award of disablement pension.

The Ministry of Pensions provide medical treatment for disabilities attributable to or aggravated by service, and if in consequence of a course of treatment a man is unable to provide for his own support and that of his family. treatment allowances may be granted in lieu of his disablement pension and allowances.

NOTE.—When the yield of wheat per acre differed from the average for the 30 years 1892–1921 by less than one-tenth of a bushel, the year has been noted as "Average." When the difference was between 0·1 and 0·5 bushel, the year has been noted as "Slightly above (or below) Average"; when between 0·5 and 1·5 bushels, as "Decidedly above Average" or "Deficient"; when between 1·5 and 2·5 bushels, as "Good" or "Bad"; when between 2·5 and 3·5 bushels, as "Very good" or "Very bad"; and when above 3·5 bushels, as "Extremely good" or "Extremely bad."

Fisheries.

The quantities and values of the sea fish of British taking landed in Great Britain and Ireland in 1922 (exclusive of river salmon) are shown in the following table. The total catch exceeded that of 1921 by 60,000 tons, but was 177,000 tons less than the 1920 quantity (by far the largest since the outbreak of the War) and 303,000 tons less than the record catch of 1913. Representing the 1913 catch by 100, the catches during 1920-2 were respectively 90, 70, and 75. Notwithstanding the larger quantity, the total value in 1922 was £3,255,000 (15 per cent.) less than in the previous year.

The selling value (at the mines and quarries) of *all* minerals won in 1920 was £427,445,000. The total number of persons employed in 1921 at the 3,428 mines in work was 1,156,938, and 924,629 (males) were employed underground, and 226,071 males and 6,238 females above ground. In the 4,362 quarries, 69,979 persons were permanently employed; of these, 44,017 (males) worked inside the quarries and 25,962 (410 females) outside the quarries.

Accidents in Mines and Quarries.

In 1922 1,073 fatal accidents, causing 1,153 deaths, occurred in the mines and quarries of Great Britain. In coal mines the number of reported fatal accidents was 1,020, while the number of deaths resulting was 1,100.

The year 1923 was marked by two serious colliery accidents. The first was on July 28 at the *Maltby Main* Colliery, near Rotherham. As a result of gob-fires the work of coal getting had been given up, but 130 men were below endeavouring to stop the fires when an explosion took place in a byway off the main haulage road. The men were in small parties working at different spots, and consequently the majority escaped; but 27 lives were lost despite the efforts of rescue parties. The second occurred in the early morning of Sept. 25. The *Redding* pit, about two miles from Falkirk, was flooded by an inrush of water from disused workings at a higher level. There were 75 men working in the pit at the time, and of these 10 escaped at the first inrush, 21 were rescued a few hours later from the shaft of another disused working, and three bodies were brought up. Strenuous efforts were made to reach the remaining men, and splendid heroism was displayed. Day after day this work was continued, and when hope had been all but abandoned, early on the morning of Oct. 4, five men were brought up alive after 214 hours' imprisonment.

Coal Exports.

Admiralty shipments of coal (34,500,000 tons in 1918) are not included in these figures. Before the Great War of 1914-1918 the value of the coal consumed by the ships of the Royal Navy was about £2,500,000 annually. Oil has taken the place of coal in most of the recently built ships.

Iron Ore.

The production and importation of iron ore are as shown below. Values are not shown, as that of iron ore produced in Great Britain is taken at the place of production, while the value of imported ore is enhanced by transport and handling to the port of entry. The value of the iron ore produced in Great Britain in 1921 is stated at £2,209,200; that of the imported ore at £3,736,000.

Joint Stock Companies.

On Dec. 31, 1920, there were registered in Great Britain and Ireland 79,541 Joint Stock Companies, with a total paid up capital of £3,508,012,486; the number of companies registered during 1920 was 11,012 with share capital £593,189,032.

Building Societies.

In 1919 there were 1,315 Incorporated Building Societies in Great Britain and Ireland, with liabilities on shares £54,900,922, to depositors, etc., £15,868,245, a total liability of £70,769,167; the assets consisted of mortgage securities, £56,323,135, and other assets, £18,835,812, showing a balance of undivided profits and reserve funds of £4,389,780; there were also 44 unincorporated societies in England and 1 in Scotland.

Municipal Trading.

Local taxation returns for England and Wales show that in 1919–20 the ratepayers contributed in public rates a total of £45,647,767 towards the expenses of the larger municipal bodies, namely, the City Corporation, the London County Council, the Metropolitan Borough Councils, the Metropolitan Police, the Metropolitan Water Board, and the 82 county borough councils. These local authorities also received in that year in aid of current expenses charged on their rate funds, Exchequer grants amounting to £22,557,074, and fees, tolls, rents, and other miscellaneous receipts amounting to £9,299,445.

In addition, their trading undertakings produced an aggregate revenue of £54,695,996, while the net income of their reserve and other special funds was £4,765,068, and their receipts on capital accounts amounted to £14,055,602. The total sums received by these 114 authorities to meet their own expenditure constituted 52·7 per cent. of the aggregate receipts of all the local authorities—some 25,000 in number—in England and Wales.

Municipal trading by the 82 county borough councils resulted in a net deficiency, over all the undertakings, of £130,597. While certain undertakings produced an aggregate surplus of £929,512, others realised a loss of £1,060,109. The account stood as follows:—

	Surplus.	Deficiency.
Water Supply	£16,319	£512,953
Gas	130,704	...
Electricity	185,306	36,990
Trams and 'buses	546,744	67,099
Markets	42,722	16,864
Harbours, Docks, &c.	2,500	201,592

Light Railways	5,000	7,407

Trade Union Membership.

The International Labour Office stated in March, 1921, that the number of Trade Unionists in the twenty leading countries of the world was 32,680,000 at the end of 1920, Germany having the largest number (9,000,000), and Great Britain and Ireland 8,024,000, the smallest number being 20,000 in Serbia.

Returns for 1920 furnished to the Registrar of Friendly Societies relating to 602 Trade Unions in Great Britain and Ireland show that at the end of the year the total membership was 7,091,721, an increase in twelve months of over 400,000. The aggregate income of the Unions was £12,962,538 (against £9,723,255 in 1919). At the end of 1920 the funds amounted to £15,989,025.

Industrial and Provident Societies.

In 1919 there were 3,119 Societies making returns to the Registrar of Friendly Societies, with 4,393,570 members, share capital, £73,307,701, liabilities, £46,919,686, and sales to the value of £348,805,920.

Co-Operators' Profits.

The half-yearly balance-sheet of the Co-operative Wholesale Society submitted to the business meetings in October, 1922, shows sales of £32,000,000. During the half-year the supplies from the various productive works were just over £10,000,000. After providing for all the expenses of production and distribution and £994,634 for interest on capital and depreciation of property, there is a net profit of £23,521.

Unemployment Statistics.

The live registers of the employment exchanges in Great Britain contained the highest figures for unemployment on June 24, 1921, subsequent figures being appended for comparison:—

	June 24, 1921.	June 26, 1922.	June 25, 1923.	Oct. 15, 1923.
Men	1,459,639	1,173,276	908,731	936,584
Boys	81,252	41,699	35,887	42,653
Women	439,541	160,985	212,142	235,937
Girls	64,223	29,333	32,299	38,968
Total	2,044,655	1,405,293	1,189,059	1,254,142

Cost of Unemployment.

Total sums paid by way of State grants to the Unemployment Funds, including the Unemployed Workers' Dependents' Fund:—

1920 21	£2,168,640
1921-22	8,123,430
1922-23 (8½ months)	8,273,350
	£18,565,420

In addition, repayable advances had been made out of the Consolidated Fund during the last eighteen months, totalling £14,580,000.

Unemployment Relief Works, 1923–4.

New expenditure amounting to not less than fifty millions had been undertaken or initiated by the Government to relieve unemployment.

Road and bridge programme	£14,000,000
Viscount St. David's Unemployment Grants Committee (additional)	10,000,000
Trade facilities	12,000,000
Railway companies (approximately only, but probably not less than £10,000,000–£15,000,000)	10,000,000

Unemployment Insurance.

The Unemployment Insurance Bill provides for a further extension of the periods of "uncovennated" benefit, and fixes the maximum rates of contribution which are to become operative at the end of the deficiency period at the following rates:—

	Employers.	Employed.
Men	6*d.*	6*d.*
Women	5*d.*	4*d.*
Boys	3*d.*	3*d.*
Girls	2½*d.*	3*d.*

When these rates come into force the State contribution is to be the same as in the Unemployment Insurance Act, 1920, namely, one-fourth of the joint contributions of employers and employed instead of the present proportion of approximately one-third. If the maximum reduced rates are adopted the State contributions will be about £6,000,000 annually, as compared with the present amount of about £12,500,000; while the combined contributions from employers and employed will be annually £24,000,000 instead of the present figure of about £35,000,000. During the interval between the end of the deficiency period and the date at which the reduced contributions come into force, the State contributions will be at a figure of about £130,000 a week in excess of that required under the maximum rates set out in the bill, and the corresponding excess in the combined contributions of employers and workers will be about £220,000 per week. The aggregate amount of benefit payable from April 19, 1923, to October, 1924, is estimated at £62,500,000, assuming that the number of persons unemployed (including an allowance for short time workers) may be, on the average, 1,250,000. It is estimated that on this basis the deficiency on the Unemployment Fund, which will be approximately £18,500,000 on April 19, will increase to the following figures: October, 1923, £20,000,000; April, 1924, £22,500,000. The maximum borrowing power, as fixed by the Act of 1922, is £30,000,000. The further grant of benefit does not involve any increase in the rates of contribution from employers, employed, or the State during the deficiency period; but as it must prolong the deficiency period, and consequently postpone the date at which the present rates of contribution can be reduced, the effect is to increase the total amount of the contributions to be paid by all three parties during the deficiency period. The total amount of Unemployment Benefit covenanted and uncovenanted (the "dole"), and of Allowances for Dependents paid from November 3, 1920, to June 30, 1923, is about £128,304,000, paid in weekly amounts ranging from 12*s.* to 22*s.* each; about 170,000,000 separate payments have been made. The total contributions from the initiation of the scheme to July 1, 1923, have been approximately as follows:—

From Employers	£48,000,000
From Employed	44,600,000
From Exchequer	33,100,000
Total	£125,700,000

Loss through Strikes and Lock-outs.

The aggregate number of working days lost through industrial disputes in Great Britain and Northern Ireland by workpeople involved in the disputes or thrown out of work at the establishments where the disputes occurred in consequence of them, were approximately as follows:—

Year.	Days Lost.
1919	34,966,000
1920	26,535,000
1921	85,872,000
1922	19,918,000
1923 (Jan. to Sept.)	8,347,000

Workmen's Compensation.

Particulars of the operation of the Workmen's Compensation Act, issued by the Home Office, show that although in recent years the number of claims has declined, the total payments, owing to the higher wages ruling, have largely increased. The high-water mark was attained in 1920, when the aggregate compensation paid in the seven principal groups of industries was £5,978,000. In 1921, when unemployment increased and wages began to fall, the total declined to £5,509,395, but the decrease was by no means commensurate with the decline in the number of cases. The figures for the three years following the Armistice compare as follows with those for 1913:—

—	Cases.		Compensation.	
	Fatal.	Non-fatal.	Fatal.	Non-fatal.
			£	£
1913	3,748	476,920	595,012	2,766,538
1919	3,293	365,176	687,477	3,929,246
1920	3,531	381,986	755,657	5,222,352
1921	2,385	283,361	518,064	4,991,331

In the seven groups of industries the aggregate number of workers employed in 1921 was 7,315 866, compared with 8,348,150 in 1920, and 7,509,353 in the pre-war year. In 1921 the average payment in case of death was £217, against £214 in 1920, and £161 in 1914. In case of disablement the average amount (including cases settled by payment of a lump sum) was £17 12*s.* against £6 7*s.* in 1914. While in the year before last the number of non-fatal cases fell by 25·8 per cent., there was a reduction of only 4·4 per cent. in the compensation. An increase occurred in the average amount of compensation paid both in lump sums and in weekly payments. In 1921 the average amount paid in lump sums was £73, as against £62 in 1920, while the average amount in the weekly payment cases rose from £11 in 1920 to £13 in 1921. This increase is attributed largely to the depression in trade and consequent lack of employment, which would have the effect of delaying the return of the disabled workmen either to full employment or light work. The figures given above represent only the actual amount paid to workmen or their dependents, and not the total charge on the industries in respect of compensation. Adding the legal, medical, administrative, and other expenses, the aggregate outlay in respect of the 285,746 cases in 1921 can hardly have been less than £8,500,000. For a total of 442,116 cases in 1914 the estimate was £5,000,000. Taking the seven groups of industries together, the annual charge for compensation averaged 15*s.* 1*d.* per person employed, compared with 9*s.* 9*d.* in 1914. Below are the figures for the various groups:—

—	Number employed.	Total paid.	Charge per employee.

Decreased Industrial Profits.

A table, compiled by the Central Council for Economic Information, of the net profits made by 555 representative industrial companies mainly engaged in production, during the years 1920, 1921, 1922, shows that the decrease in 1921, as compared with 1920, was £21,275,819; and in 1922, as compared with 1921, £21,161,062. Since 1920, therefore, the net profits of these 555 representative companies have declined by £42,436,881. It is pointed out that the table is made up from reports which were published in the years mentioned, and that the actual period dealt with probably precedes the date of publication of each report by from 3 to 6 months; and, therefore, the last quarter of 1922 at least is not covered by the figures given. The figures show that profits have borne their share with wages in the efforts to reduce prices and so regain markets. The table given below compares the net profits made during 1921 with those of 1922, as set forth in the companies' reports:—

BRITISH TRADE IN 1923.

A GENERAL INCREASE OVER 1922.

Early in January, 1923, the hardening of the money market, indicating a reduction in bank deposits and the release of additional money for commercial enterprises, pointed to an expected revival of British trade. This favourable indication was, however, followed by unsettled political conditions in Europe—the occupation of the Ruhr and internal disorder in Germany, and the Italo-Greek incident, after the Albanian murder—while the commercial possibilities of *Soviet* Russia remained unexpectedly in abeyance and a high tariff wall was maintained in the United States. It is, therefore, satisfactory to find a general increase in British Trade, as shown below and in the comparative statement of "Total Exports by Months" for the years 1921, 1922 and 1923 on the following page.

EXPORTS.

British Exports to Foreign Countries show an average monthly increase of £3,250,000, mainly to the United States, Germany and South America. A small increase is also shown in the exports to the British Dominions, but this is mainly due to the inclusion of figures for the Irish Free State; when these are excluded the increase is small, but the exports to British Dominions are at least maintained at the same rate as in 1922. The estimated total value of the Exports of 1923 is £760,000,000 against £720,500,000 in 1922.

Raw Materials.—The increase in the value of Raw Materials exported in 1923 is £23,500,000, thus accounting for the greater part of the total increase in exports. The additional weight of these Raw Materials is 14,000,000 tons, to which the chief contributor is coal.

Manufactured Articles.—An increase of about £3,000,000 is indicated, with a total of £585,000,000 in 1923. Iron and steel manufactures show an increase of 861,000 tons out of the total increase in weight of 1,750,000 tons. Textiles show an increased value of £1,950,000, with a slight decrease in weight, cotton piece goods having been taken in larger quantities, particularly by British India.

IMPORTS.

The total value of the Special Imports (*i.e.* Imports retained for Home Consumption) in 1923 will probably be £945,000,000, against £900,000,000 in 1922, the increase being Food, Drink, and Tobacco £26,000,000 and manufactured articles £19,000,000.

Raw Materials.—The total value will be approximately the same in 1923 as in 1922. American cotton has remained at a very high price, on the average about 122 per cent. higher than in 1914. The ordinary annual consumption of cotton in Great Britain is 4,500,000 bales, and efforts are being made in Australia (70,000 acres) and in Africa to supply the needs of British mills.

Manufactured Goods.—There are increases in almost all items of manufacture, the decreases being negligible. The chief increases are in textiles (£5,020,000), apparel (£1,800,000), chemicals (£1,890,000) and vehicles (£1,520,000).

TRADE OF 1913 AND 1923.

Exports.—In spite of the advance in 1923 on the figures of 1922 there is still a deficit in British Exports of £168,000,000 in comparison with 1913, if the figures for that year are advanced to 1923 values. In 1913 the value of the exports was £525,250,000 and in 1923 the value is expected to reach £760,000,000, but if the 1913 figures are advanced to 1923 values the exports of 1923 will amount only to 81·5 per cent. of the 1913 total, the principal decrease being under the heading of Food, Drink, and Tobacco, with a slight increase in Raw Materials, which weigh 5,000,000 tons more (chiefly coal). Almost every article of Manufacture shows a decrease in weight or quantity, the net decrease in value being £2,560,000, although woollen textiles show an increase in certain directions. The total value of the shortage of Manufactured Goods exported may be estimated at over £68,000,000 in comparison with 1913 (at 1923 values).

Imports.—The Special Imports of 1913 were valued at £659,000,000 and those of 1923 may be expected to reach £946,000,000, but if the 1913 values are advanced to those of 1923 there will be a deficit in 1923 of 17·5 per cent. This deficit is accounted for under the heading of Manufactured Articles (£30,000,000), Raw Materials (£27,320,000), and Food, Drink and Tobacco (£10,000,000).

EXTERNAL TRADE OF GREAT BRITAIN AND IRELAND (MERCHANDISE).

IN statistics of Trade, the term GENERAL TRADE refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term SPECIAL TRADE includes only *Imports for consumption* in the country receiving them, and *Exports of home produce or manufacture.* Imports are taken at their C.I.F. value (which includes the *Cost* of the merchandise and the charges for *Insurance* and *Freight*), whereas Exports are taken at their F.O.B. (free on board) value, which includes only the *Cost* of the merchandise delivered to the exporting ship. Exports have an added value by the time they reach their destination, having become loaded *en route* with Insurance and Freight. They leave the country of origin with an F.O.B. value and arrive with an acquired C.I.F. value.

The World's Trade, 1922.

Some improvement in world trade conditions is indicated by the official comparison of the trade of the United Kingdom and certain Dominions of Foreign Countries for the first nine months of 1920, 1921, and 1922. It will be seen that in certain cases the figures for 1922 exceed those for 1921, and having regard to the substantial fall in values, it is apparent that the total volume of trade considerably expanded during 1922 :—

International Trade Balances.

Statistics of world trade prepared by the *Index* (the organ of the New York Trust Company) show that five leading countries have now reached the pre-war stage as regards the trade balance. The value figures, with the exception of Germany, are much higher than in 1913, but the following table shows that in 1922 Great Britain, France, Denmark, Sweden, and Japan had practically achieved pre-war balance :—

Country.	Percentage of Exports to Total Trade. 1913.	1922.

The values per head of population of the importing countries have been calculated on the basis of the latest census returns, and of the best estimates available in cases where no recent census has been taken.

Imported Foodstuffs.

The value of Imported Foodstuffs in 1913 and 1922 is shown below :—

	1913.	1922.
Butter	£24.084,000	£37,316,000
Cheese	7,035,000	12,438,000
Poultry	992,000	1,243,000
Eggs, in shell	9,591,000	11,302,000
Bacon	17,429,000	35,530,000
Hams	3,068,000	8,585,000
Pork	1,665,000	3,536,000
Barley	8,077,000	6,069,000
Vegetables, raw	5,492,000	12,040,000
Fruit, raw	9,844,000	24,725,000
Total	£87,277,000	£152,784,000

In comparing the values of the imports of 1922 with those of 1913 the higher level of prices in 1922 must be taken into account. The imports in 1922 of the articles specified represent a value approximately 70 per cent. greater than if those imports had been returned at the same average values as in 1913, so that the aggregate increase in the volume of these goods imported was about 3 per cent. The increase of the population of the United Kingdom during the same period was about 4 per cent.

THE INTERNATIONAL TRADE OF THE WORLD IN 1920 AND 1921.

BY J. I. CRAIG, M.A., F.R.S.E., F. R. ECON. SOC.

THE accompanying tables exhibit, in sterling, the total value of the exports and imports that go to make up international trade, in 1920 and 1921, together with details in the case of the principal and some other specially interesting participants. In compiling them, the values of exports and imports have been treated, for some 200 Countries, States and Dependencies, whereof 69 belong to the British Empire. Whenever possible figures have been taken first from the official publications of the various places; next, from the publications of the Board of Trade; then from the publications of the League of Nations. WHITAKER'S ALMANACK for 1922 and 1923 has been in constant use for checking and interpreting figures obtained from other sources, and for filling gaps in the data. In all the principal cases, with the exception of China and the Malay States, the values of the exports and imports have been obtained in the local currency of the place. Where this differed from sterling, the average value of the rate of exchange on London was found for the year, and the local value of the trade figures converted by means of it into sterling. In a few cases (none of very great importance) figures for one or both of the years under discussion could not be obtained, and a reasoned estimate had to be made use of. In all such cases, the figure so obtained has been placed in parentheses. This does not necessarily mean, however, that the figure is unreliable, or even materially in error. Japan is a case in point. Accurate statistics are available for the country itself, and for Korea, but not for Formosa, which, for economy of space, has had to be included with the two others. But the trade of Formosa is so relatively unimportant that the total is practically correct.

Difficulties have been encountered, in some cases, in one or other of the following ways:—

(*a*) It is not always stated whether the currency unit is taken at its conventional, i.e., pre-war or par value, or at its actual value relative to sterling, as shown by the rate of exchange.

(*b*) The values adopted for imports are not always the C.I.F. (cost + insurance + freight) values, but sometimes (as in the case of the United States for example) the F.O.B. value at departure from the exporting country. To allow for the omission of the charges for freight, some 15 per cent. should be added to the import values in such cases.

(*c*) The trade recorded in the official publications is not always the "special trade," i.e., imports for home consumption and exports of produce and manufactures of the country. Hong Kong and the Malay States are the chief cases in point. An enormous *entrepôt* trade is carried on in these places, and is made to appear in the returns. To include it, however, in the

statistics of total international trade would lead to exaggeration of the figures.

(*d*) Some countries include bullion and coin amongst the goods imported and exported, others do not. It has not always been possible to allow for this difference of treatment, but in the most important countries the value of the bullion has been excluded. (See WHITAKER'S ALMANACK for 1923, p. 115, for the important values of export and import of bullion.)

(*e*) In some cases (Afghanistan, for example) the commerce is accurately recorded in some directions, but not in others. This source of error cannot be avoided, in the present state of customs statistics in such countries.

Where, as often happens, differences are found to occur between the figures given in this note and those to be found elsewhere, the explanation will generally lie in one of these causes of difficulty.

THE FOREIGN TRADE OF THE WORLD IN 1921.

In handling questions of foreign trade at a time when large price movements are in progress, several points have to be borne in mind. The volume of monetary transactions will change from one year to another (1) because the level of prices generally has changed, and (2) because the actual volume of merchandise which changes hands varies also. The second cause will be, to some extent, a consequence of the first, unless the change of price has proceeded *pari passu* with currency changes, so that it may be attributed entirely to these causes.

A second important fact is that, quite apart from the difference due to freight-charges, the monetary value of the imports from one country to another in a given year will not correspond exactly to that of the exports from the second to the first, during the same year, but will differ by an amount which depends on the lapse of time necessary to bring goods from one to the other. When, as in 1921, prices are falling rapidly, the value of merchandise arriving in, say, the United Kingdom during 1921 will exceed that of the goods recorded as having left other countries during the same year, with the United Kingdom as destination. Quantities remaining the same, there should be between 1920 and 1921 a difference of some 6 to 7 per cent. on this account.

A further caution may be given, that prices must not be compared on the basis of index numbers without taking into account the change in the purchasing price of gold. This is to be done by reducing index numbers to a gold parity through the exchange rate with some country, such as the United States, where there exists a free market for gold. In fact, the unit adopted for measuring values should strictly have been some gold unit, such as the U.S.A. dollar, instead of the pound sterling.

The year 1921 was one when the level of prices, measured in terms of gold, reached its culminating point in nearly all countries. The necessary data for the comparison may be taken from the index numbers and exchange rates of the United Kingdom and the U.S.A., which were as follow:—

Index numbers:—

	1920.	1921.
United Kingdom (average of *Economist* and Board of Trade)	295·2	189·2
United States	226	147
Rate of exchange, New York	$3·65	$3·86
British index number reduced	221	150
Average, U.K. and U.S.A.	223·5	148·5

Fall in *price level*, 1920 to 1921, 66·4 per cent., or very closely one third. This fall may be used without much error for world comparisons. A fall in *freight rates*, which will also be wanted, took place to the extent of some 55 per cent., according to index numbers of freights published by the *Economist*.

The total value of the export trade of the world was 8,201 million sterling in 1920, and 5,049 million in 1921, or 61·5 per cent. of its value in the preceding year. Had the volume remained steady, the fall would have been only to 66·4. The rest is due to a diminution of the amount of commodities exported, which works out at just over 7 per cent.

Imports cannot be treated in the same fashion, since they are affected by charges for freight and other shipping services. If 1 per cent. is allowed for these miscellaneous services, the freight charges in 1920 amounted to about 1,100 million sterling, and in 1921 to 510, which figures represent the difference of the respective export values from the import values, diminished by 1 per cent. These figures agree with the above estimated fall in freights mentioned above.

It should, however, be remarked that these estimated earnings of cargoes are subject to corrections for the practice of the U.S.A., mentioned above, and for the fact that the goods which are exported in, say, 1920 are not the same as those which arrive at their destination in the same year. A further correction should be made for such goods as are lost at sea, but this error will not be great.

Cargoes, then, earned some 1,250 million sterling (corrected value) in 1920, and 575 in 1921. Since some 34 per cent. of the tonnage of the world belongs to the British Empire, and 30 per cent. to the United Kingdom, the earnings of Empire shipping may be estimated from these figures at about 425 million sterling in 1920, and 200 million in the following year. The shares of the United Kingdom may be put at 375 million and 175 million respectively. These are, of course, the earnings from cargo traffic alone.

The values of the goods exchanged in international trade were 8,200 millions in 1920, and 5,050 millions in 1921, of which quantities 2,350 million and 1,400 million respectively were exported from the British Empire, corresponding to 29 and 28 per cent. in the two years. There was thus a slight falling-off in the trade of the Empire as a whole from 1920 to 1921 relative to other countries.

An analysis of the figures available gives approximate results, which may be summarised in the following tables:—

The tables A and B show clearly which countries have a favourable balance of trade (excess of exports), and which an unfavourable. The difference must be made good (*a*) by imports of bullion, (*b*) by loans to foreigners, (*c*) by payment of money previously borrowed abroad, or the interest on such money, and (*d*) by payment for services rendered by foreigners. The United Kingdom has always an unfavourable balance, which is accounted for by payments for services rendered by this country to foreigners in shipping, banking and insurance, and by the payment of interest on money previously lent abroad. Belgium and France have unfavourable balances which may be explained by their receipt of reparations payments. Germany's unfavourable balance is due to foreign borrowing, partly to services rendered abroad, and possibly partly to the exhaustion of foreign credit balances. In the case of Italy the unfavourable balance is explained by the large sums remitted to that country by emigrants therefrom in the United States and other countries. Norway gives foreign service with her shipping, as do the Netherlands. Poland, Spain, Portugal, Rumania and Yugo-Slavia are probably borrowers of foreign capital. In the case of Switzerland the excess is paid for partly by remittances from emigrants, but chiefly by payments made by tourists in the "playground of Europe." The enormous balance in favour of the United States is met by receipts of gold, by remittances to Italy and other emigrant countries of Europe, by payment of interest due by the States in excess of that paid to her. Normally, India and Egypt are exporting countries, like Australia, owing to payment of interest and capital on previous loans, but the two former are at present exhausting the large credit balances accumulated during the War. South Africa's unfavourable balance is liquidated by the export of gold to the amount of over 30 million sterling annually.

HEAT, COLD, RAIN AND WIND.

BRITISH ISLANDS: The *maximum temperature* of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The *lowest temperature* of the air recorded in the shade at 4 feet above the ground is —22° Fahr., or 54° below freezing point, at Blackadder, Berwickshire, on Jan. 17, 1881.

The *greatest rainfall* in a day was at Bruton, Somerset, when 9·56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 965 tons of water per acre.

The *total rainfall* for a year at Stations in the British Islands during the 20 years 1884 to 1903 ranged from 240·05 inches at the summit of Ben Nevis in 1898 to 12·01 inches at Chatteris, Cambs, in 1884.

The *maximum wind-velocity* on record in the British Islands was recorded at Quilty, west coast of Ireland, on Jan. 27, 1920, when a gust exceeded the rate of 110 miles per hour.

GENERAL: The *maximum temperature* on record of the air in shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The *wettest station* in the world is generally allowed to be Cherra Poonjee in Assam, where the total fall for the year has exceeded 551½ inches. From June 12 to 16, 1876, 114·14 inches was collected, or an average daily fall of 22·83 inches. On one of these days, June 14, 40·80 inches fell in 24 hours.

Petroleum Imports.

Whilst the imports of oil into the United Kingdom have increased during the last few years, their value has fallen. In 1920 rather more than 879,000,000 gallons were worth £66,500,000, compared with 1,161,000,000 gallons at £54,500,000 for 1921, and 1.213,000,000 at £39,000,000 for 1922. The extent to which oil is used in different services will be realised when it is noted that in 1922 fuel oil accounted for 393,618.470 gallons, motor spirit 311,190,222, crude oil 217,133.915, illuminating oil, 152 537,292, while lubricating oil and gas oil were about 70,000,000 gallons each. At Swansea the great refining plant was responsible for the importation of 200,000,000 gallons of Persian crude oil during the twelve months, and the treatment of still larger quantities is anticipated.

Imports and Exports of Bullion 1922.

During the twelve months ending Dec. 31 the aggregate value of the gold and silver exported was £58,087,186. Of the exported gold and silver bullion and coin, £26,634,408 went to the United States, £20,034,609 to India, £4,029,737 to France, and £3,381,700 to China. Of the total imports of coin and bullion (£44,644,143), £30,433,312 came from the Transvaal, £4,064,816 from the United States, £3,410,237 from West Africa, and £2,081,359 from Rhodesia. It has been stated that the cost of transporting a ton of gold from the Transvaal to London is £370, as against £25 per ton for silver, £1 7*s.* 6*d.* for wheat, £3 15*s.* for wool, and £2 7*s.* 6*d.* per ton for copper.

COMMUNICATIONS.

Roads.

The total mileage of public roads in Great Britain and Ireland is approximately 240,000 miles, of which 150,000 are in England and Wales, 26,000 in Scotland, and 60,000 in Ireland. The cost of maintenance in 1913–14 was £20,082,000, and in 1920–21, £50,000,000.

The maintenance and repair of bridges and main roads is within the jurisdiction of the County Authorities, other roads being maintained by Borough, Urban, Rural, and Parish Councils. The increase of motor traction and the consequent use of highways by other than county or district residents has led to a movement in favour of the nationalisation of the highways. The special sum set aside for the year ending March 31, 1920, for the road and bridge programme of the *Road Improvement Fund* amounted to £10,536,000, of which £8,250,000 was a grant from the Treasury, and £2,286,000 a contribution from the Road Improvement Fund. Under the Act of 1919 the functions and duties of the Road Board were transferred to the *Ministry of Transport*, which now controls all matters previously dealt with by the Road Board.

Road Taxes.

The total receipts from the taxation of road vehicles between Dec. 1, 1921, and Nov. 30, 1922, amounted to £11,523,831. The aggregate number of motor licences issued during this period was 933,308, while licences in respect of private and hackney horse-drawn carriages numbered 237,342. The details are :—

	No. of Licences.	Tax Receipts.

Motor Vehicles in the World.

The National Automobile Chamber of Commerce (New York) estimates the number of Motor Vehicles in the world as under :—

United States	10,448,632
United Kingdom	497,532
Canada	469,310
France	236,148
Australia	81,000
Argentina	70,000
Germany	60,000
Italy	53,000
India	45,983
All other Countries	366,667
Total	12,528,264

When population is taken into account, the use of automobiles in the United States is nine or ten times that of the United Kingdom, and in Canada about five times as much. The figure for the United Kingdom is, however, relatively high when compared with totals for other European nations. The use of motor vehicles is growing rapidly in all the self-governing Dominions. So far, in Latin America bad roads have handicapped the development of this traffic.

Railways.

On Jan. 1, 1923, the Railways of Great Britain were amalgamated into four groups, composed as under :—

The Southern Railway (2,129 miles), consisting of the L. & S.W., S.E. & C., and L.B. & S.C. lines.

The Great Western Railway (3,765 miles), consisting of the G.W., and the Barry, Rhymney, and Taff Vale lines.

The London, Midland & Scottish Railway (7,464 miles), consisting of the L. & N.W., Midland, Furness, Glasgow & S.W., Highland, North London, and North Staffordshire lines.

The London & North Eastern Railway (6,464 miles), consisting of the G.E., N.E., Great Central, G.N., North British, and G.N. of Scotland lines.

The combined mileage of these four groups is 19,822 miles; the total capital involved is about £1,060,000,000. Ireland had 3,442 miles of railway open on Dec. 31, 1920, with capital of £45,500,000.

At March 24 last the total number of railway workers in Great Britain was 681,778, an increase on the figure for the corresponding date in 1922 of 4,976, or 0·74 per cent. A return issued by the Minister of Transport shows that the numbers employed by the four new groups and the London railways compared as follows :—

	1922.	1923.
Southern	71,769	70,479
Great Western	108,121	109,376
L.M. & Scottish	263,082	268,835
London and North-Eastern	202,170	202,232
London Electric Lines	6,340	6,170
Metropolitan	3,895	4,001
Metropolitan District	3,306	4,080

Of the 647,021 adults employed on all railways 21,754 were women. This is a decrease on the previous year of 708.

Canals.

There are 4,673 miles of canals and canalised rivers in Great Britain and Ireland (England and Wales, 3,641 miles; Ireland, 848 miles; Scotland, 184 miles), no additions to the mileage having been made for several years. In 1905 the inland waterways carried 43,161,927 tons of merchandise, the revenue being £2,680,710 and expenditure £1,891,213. In 1921 the tonnage returns from 2,879 miles of canals were 11,893,000 tons. Of the total mileage 1,363 miles were (1905) owned or controlled by railway companies (the longest systems being the Shropshire Union, 202 miles; Grand Junction, 189 miles; Birmingham, 159 miles; and Leeds and Liverpool, 145 miles). The total paid-up capital of all the canals was (1905) £47,550,768. The existing system is at its greatest development in the midland counties of England, and in Lancashire and Yorkshire. A Royal Commission, appointed in 1906, reported, in 1909, in favour of a development scheme under an *Inland Waterway Board*, to improve the existing system. Their principal proposal was the formation of four main routes (from a centre in South Staffordshire) to the Thames (London), the Mersey (Liverpool), the Humber (Hull), and the Severn (Gloucester), the proposed routes to accommodate barges up to 100 tons. On Jan. 1, 1918, there were 1,202 miles of inland waterways in England and Wales, and 304 miles in Ireland, under the *Canal Control Committee*, appointed by the Government on March 1, 1917; there were also 1,025 miles controlled by the *Railway Executive Committee*. The *Manchester Ship Canal*, opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool; in 1913 the tonnage carried through the canal was 5,780,161 tons, and in 1922 the tonnage of toll-paying traffic was 4,273,544 tons, the tolls, dues, etc., amounting to £1,332,544.

Tramways.

The total mileage of tramways and light railways open in Great Britain and Ireland on Dec. 31, 1919, was 2,728, of which 2,647 miles were worked by electric traction; 1,754 miles were worked by Local Authorities and 974 miles by Companies. The total receipts in 1919 were £24,635,266, the working expenses £17,751,277, and the net receipts £6,883,989, the total paid-up capital being £79,049,287, showing a return of £8 *14s. 2d.* per cent. on the capital. In 1919-20, 4,987,525,659 passengers were carried. In addition there were 21 miles of "trackless trolley" routes, a system which obviates the necessity of rails.

Mercantile Shipping.

On June 30, 1922, the Mercantile Marine of Great Britain and Ireland consisted of 8,430 steam and motor vessels (19,088,638 tons) and 419 sailing vessels (206,999 tons), a total of 8,849 vessels (19,295,637 tons). In 1921 the "engagements of seamen" for service on ocean-going ships numbered 422,445, as against 604,830 in 1913, the percentage of British subjects being 94·45, of foreigners other than Asiatics 3·05, of Chinese 0·6, and of other Asiatics and Africans 1·9.

Shipbuilding.—The output of the various countries of the world in 1922 was 852 vessels of 2,467,084 tons, the principal totals being :—

	Tons.		Tons.
Great Britain	1,031,081	U.S.A.	119,138
Germany	575,264	Italy	101,177
France	184,509	Japan	83,419
Netherlands	163,132	Other countries	209,364

Vessels lost, broken up, condemned, etc., numbered 716, of a total tonnage of 887,812, of which 127,974 tons were British.

Wrecks.—In 1913 140 sailing vessels (23,082 net tons) and 108 steam vessels (103,824 net tons), a total of 248 vessels (126,906 net tons) were totally lost at sea. In 1920 the figures (exclusive of losses due to mines) were 64 sailing vessels (11,793 gross tons) and 158 steam vessels (116,321 gross tons), a total of 222 vessels (128,114 gross tons). In 1913 the passengers lost by wrecks numbered 172 and members of crews 466, a total of 638 lives; in 1920 (exclusive of losses due to mines) the passengers numbered 3 and the members of crews 173, a total of 176 lives. The years with the heaviest losses of life at sea were 1912 and 1914. In 1912 the total of 2,335 included 673 of the crew and 825 passengers on *S.S. Titanic*; in 1914 the total of 1,778 included 171 of the crew and 840 passengers on *S.S. Empress of Ireland*.

Coastwise Shipping.

The net tonnage of all vessels with cargoes and in ballast engaged in the coasting trade of Great Britain and Ireland in 1913 was 65,273,838 net tons for arrivals and 65,111,086 net tons for departures; in 1921 the net tonnage of arrivals was 41,406,000 and of departures 41,048,000.

Posts, Telegraphs and Telephones.

The carriage and custody of the mails has been maintained by the State "from time immemorial." The telegraphs were transferred to the State on Jan. 28, 1870; the telephones on Jan. 1, 1912. The submarine telegraph cables connecting the British Isles with the various Dominions and Foreign Countries are maintained and worked partly by the State and partly by private companies.

Savings Banks.—On Dec. 31, 1922, there were 11,733,564 active deposit accounts in the *Post Office Savings Banks*, with the sum of £268,143,235 due to depositors. In 1921 there were 2,340,371 accounts open in the *Trustee Savings Banks*, with £99,304,794 due to depositors. On Dec. 31, 1922, Government Stock to the amount of £206,301,968 stood to the credit of depositors in the Post Office Savings Banks, and £29,442,788 was held for depositors in Trustee Savings Banks.

Wireless Telegraphy.—In 1909–1910 the wireless telegraphy stations on the coasts of Great Britain and Ireland were acquired by the Government, except the long-distance stations at Poldhu (Cornwall) and Clifden (County Galway), which are maintained (and worked under licence), by the Marconi Company. The total expenses of the Leafield (Oxford) and Cairo stations, including interest and depreciation, are estimated at about £36,000 and £49,000 per annum respectively. In addition to the Anglo-Egyptian service, which was inaugurated in April, 1922, the Leafield station is used for the broadcasting of British official *communiqués* and for the transmission of Press telegrams to Halifax (Nova Scotia), India, and ships at sea. The revenue earned by the stations since the end of April, 1922, has been as follows:—

Station.	Total for 9 mths.
Leafield	£24,200
Cairo	4,700
	£28,900

It is estimated that about 25 per cent. of the total revenue is derived from traffic on behalf of other Government departments. If this traffic did not go *via* these stations, it would have to go by other routes at an equal or greater cost. The total expenses of the Northolt Station, including interest and depreciation, are estimated at about £8,750 per annum. The station was completed in August, 1922, but its working for some time afterwards was on a more or less experimental basis. The amount of Government traffic handled by the Northolt Station is negligible. It should be borne in mind that the services conducted through these stations have in most instances been only recently started, and as they are developed, the revenue derived from them will continue to expand.

Communication by Air.

In 1919 a *Trans-Atlantic Aerial Post* was inaugurated by the successful flight of an aeroplane from St. John's, Newfoundland, to Clifden, Ireland; and by the voyage of H.M. Airship R 34 from Scotland to New York, and from New York to England. The *Air Mail Services* now in operation are shown on pp. 377, 521.

The Air Council subsidies to *British Commercial Air Lines* for 6 months from Sept. 1, 1922, are:—Handley Page (London–Paris) £15,000; Instone (London–Brussels–Cologne) £25,000; Daimler Hire (Manchester–London–Amsterdam–Berlin) £55,000.

The largest *Airship* yet constructed was the R38, which was wrecked while over the Humber (Aug. 24, 1921) with the loss of 44 lives. The remaining British airships are as follows:—

R33	cubic feet of gas	1,958,000
R80	” ” ”	1,200,000
R36	” ” ”	2,101,000
R37	” ” ”	2,101,000
L 64*	” ” ”	1,950,000
L71*	” ” ”	2,420,000

The L64 is 642 feet long, the L71 is 743 feet long; the R38 had a capacity of 2,700,000 cubic feet and was 695 feet in length.

It is estimated that the times by airship for the following journeys would be:—

England-Egypt	2½ days.
England-Karachi (India)	5 ”
England–Johannesburg (S. Africa)	7 ”
England-Perth (W. Australia)	10½ ”

Great War's effect on Sea Routes.

The following comparison of the proportions of ships engaged in the various trades, with the corresponding figures for 1911, gives some indication of the changes brought about by the Great War and the consequent dislocation of trade:—

Route.	Percentage of Tonnage Employed. April, 1911.	Percentage of Tonnage Employed. June, 1921.
East Indies	17·22	20·49
South America, East Coast	15·53	12·55

The tonnage of all trading vessels recorded as employed on the selected dates fell by 33·7 per cent. in the ten years.

LUNACY.

ON Jan 1, 1923 the number of notified insane persons under care in England and Wales was 126,279 an increase of 2,565 since Jan 1, 1922. This increase follows one of 3,370 in 1921 and of 3,580 in 1920, and may be compared with the average annual increase of 2,251 during the decade immediately preceding the Great War. The relative percentage distribution of the sexes (males 43·8; females 56·2) shows a slight reversion towards the proportions which obtained immediately prior to the Great War (males 46·2; females 53·8). The average weekly cost of maintenance for the financial year 1921–22 (excluding the cost of repairs, additions and alterations) was:—

	s.	d.

In Borough ” ”	29	6¾

Mental Deficiency.—On Jan 1, 1923 the mentally defective patients under care numbered 15,786 males 7,283; females 8,503).

THE KINGDOM OF ENGLAND.

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between 55° 46′ and 49° 57′ 30″ N. latitude (from the mouth of the Tweed to the Lizard), and between 1° 46′ E. and 50° 43′ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cornish coast), the Principality of Wales and the Irish Sea. The total area of the kingdom is 50,851 square miles, the population numbering 35,678,530 at the Census of 1921 (an increase of 1,633,240 over the figures of the 1911 census).

Relief.—There is a natural orographic division of England into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the *Cheviot Hills* run from east to west and divide England from Scotland, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the *Pennine Chain*, running N. by W. to S. by E., with their highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the *Cumbrian Mountains*, which contain in *Scafell Pike* (3,210 feet) the highest land in England, and east of the Pennines are the *Yorkshire Moors*, their highest point being Urra Moor (1,489 feet). South of the Pennines there are heights above 2,000 feet in the *Peak of Derbyshire* (highest point 2,088 feet), and in *Dartmoor* (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Long Mynd (1,674 feet), and Brown Clee (1,805 feet); in Herefordshire the Black Mountain reaches 2,310 feet, in Worcestershire the Malvern Hills reach 1,395 feet, in western Monmouthshire are the Sugar Loaf (1,955 feet) and Coity (1,905 feet), and the Cotteswold (or Cotswold) Hills of Gloucestershire contain Cleeve Cloud (1,134 feet).

Hydrography.—The *Thames* is the longest and most important river of England, with a total length of 210 miles from its source in the Cotteswold Hills to its outflow into the North Sea. The lower river is navigable by ocean-going steamers to London Bridge, and small craft reach Lechlade, 160 miles from the mouth. The Thames is tidal to Teddington (60 miles from its mouth), and its upper stream is connected with the Severn by a canal at Lechlade; the Wilts and Bucks canal enters at Abingdon, and the Wye canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16¾ miles), which admits vessels of 350 tons to Gloucester, other canals connecting with the Thames, Trent, Dee and Mersey. The *Severn Tunnel*, which carries the Great Western Railway under the river, 14 miles below the Sharpness Bridge, was begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, &c. The tunnel is 4 miles 624 yards in length (of which 2¼ miles are under the river). Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The *English Lakes* are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ulleswater and Derwentwater.

Islands.—The *Scilly Islands* form part of the county of Cornwall, and are distant 25 miles from Land's End. The group consists of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited, the total population in 1921 being 1,749. The capital is Hugh Town, in St. Mary's. The climate of the Scilly Islands is unusually mild, and vegetation is luxuriant, semi-tropical plants flourishing in the open. The *Isle of Wight* forms an administrative county and is separated from Hampshire by the Solent and Spithead. The total area is 147 sq. miles, with a population in 1921 of 94,697. The climate is mild and healthy, and many watering places have grown up during the last century. The capital is Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay and Bembridge.

Climate.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahrenheit, varying from 52° in the Scilly Islands to 48° at the mouth of the Tweed, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the Lake district of Cumberland and the driest in the Thames estuary and the Lincolnshire Wash.

EARLY INHABITANTS.

Prehistoric Man.—A skeleton found at *Galley Hill*, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (presented by Sir C. H. E. Chubb to the Nation in 1908, and now preserved as a national monument). Stonehenge (10 miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 22½ feet in height), only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion.—In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age another Celtic race of *Brythons*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48–51 A.D. was *Caractacus* (strictly Caratăcus), who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly Boudicca), Queen of the Icĕni (Norfolk), being crushed in 61 A.D. In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first uncovered in the 18th century at *Silchester* (Calleva Atrebatum), 10 miles south of Reading, and since 1890 the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium (St. Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. *Christianity* reached the Roman Province of Britain from Gaul in the 3rd century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash to Spithead, while about 350 A.D. incursions in the north of Irish (Scoti) and Picts became most formidable, and towards the end of the century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome; officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants, whose language and customs re-emerged.

Anglo-Saxons and Normans.—The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the *English* (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall), the name of *Welch* (old English *Waelisc* = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms, of which the chief were Northumbria (Bernicia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Ti, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welch. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Hadraada of Norway) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the *Battle of Hastings* (or Sautlache) on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the *Norman Conquest* all attempts to invade England have been defeated.

ENGLISH COUNTIES.

For Administrative purposes England is divided into 50 *Administrative Counties* (under the Local Government Act of 1888). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Counties, while the areas of the 72 *County Boroughs* created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

THE PRINCIPAL ENGLISH CITIES.

LONDON.

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, 50 miles from its outflow into the North Sea. The various areas of London, with the population of each (according to the Census of 1911), are shown below.

Area	Acreage, 1911.	Population, 1921.
County of London	74,816	4,483,249
City of London	675	13,706
London Police Districts	443,424	7,476,168
Proposed "London Health Area"	3,045,120	9,610,234

The City of London (*see* pp. 561–3) administers London within its ancient boundaries, where the Saxon Port Reeve became Bailiff in 1066, Mayor in 1191, and Lord Mayor in 1354. The City is the financial and business centre of London, and includes the head offices of the principal English banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the 14th century Guildhall, to the massive spendour of St. Paul's, and the architectural beauty of Wren's spires (Bow Church, St. Bride's, St. Dunstan's in the East, etc.), for which (and for other City buildings) *see* pp. 570 *et seq.*

The *City of Westminster*, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct. 19, 1900, the Council consisting of a Mayor, 10 Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford-street to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia, the chief buildings being described on pp. 570–584. Westminster is the richest of the London areas, the rateable value of property being £8,131,854 in 1922, the product of each 1*d*. in the £ being £33,883.

Metropolitan Boroughs.—Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs (*see* p. 560), of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council.—For County purposes the affairs of London are administered by the London County Council (*see* pp 566–69), which was created by the Local Government Act of 1888.

Miscellaneous Authorities.—The Poor Law is administered in the Metropolitan area by the *Metropolitan Asylums Board* (*see* p. 206), and by 31 *Boards of Guardians*; for Police purposes the administration is invested in the City Corporation as to the *City Police* (*see* p. 233) and in the Home Office as to the *Metropolitan Police* (*see* p. 233). The authority for the supply of water is the *Metropolitan Water Board* (*see* p. 207), while the River Thames is administered as to its tidal portion by the *Port of London Authority* (*see* p. 212) and above Teddington by the *Thames Conservancy* (*see* p. 220), the lighthouse and pilotage authority being *Trinity House* (*see* p. 224). The bridges (*see* p. 574) are maintained in the City of London by the *Bridge House Estates* Committee of the Coporation of the City, and in the remaining area by the London County Council. The lighting of London is carried out by private enterprise, and in some cases by the Borough Councils, while locomotion is provided by the London County Council as the Tramway authority, and by private enterprise as to underground or other railways and motor vehicles.

BIRMINGHAM.

BIRMINGHAM (Warwickshire), the chief centre of the hardware trade of the world, is 113 miles N.W. of London. The municipal area is 43,601 acres (about 68 square miles), with a population at the census of 1921 of 919,438.

The chief industries are brass working, jewellery and precious metals, iron, machinery, small arms and ammunition, railway rolling stock, glass making, electro plating, motor engineering, cycles and chemicals.

The principal buildings are the Town Hall, built in 1832–1850 on the lines of the Temple of Jupiter Stator at Rome, with a large hall; the Council House and Corporation Art Gallery and Museum (1878); the University (Aston Webb, 1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church, built by Archer, a pupil of Wren's), the Roman Catholic Cathedral of St. Chad (Pugin), and the Wesleyan Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1921. Birmingham was incorporated as a borough in 1838, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 30 Aldermen and 90 Councillors. The city returns 12 members to Parliament. The origin of the name is obscure, as Bromwycham, "the home on the hill by the heath," is disputed. The city was a Saxon town, and William de Bermingham was Lord of the Manor in the early part of the 13th century.

Principal City Officers.

Rt. Hon. Lord Mayor (1923–24), T. O. Williams.
Recorder, Sir Ryland Dent Adkins, K.C., M.P. (1920).
Stipendiary Magistrate, The Rt. Hon. Lord Ilkeston (1910).
Town Clerk, F. H. C. Wiltshire (1918).
Clerk of the Peace, Joseph James (1905).
Coroner, Isaac Bradley (1897).

LIVERPOOL.

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and 201 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 24,102 acres (which includes 2,883 acres in the bed of the river Mersey) (about 33 square miles, excluding the bed of the river), with a population at the census of 1921 of 803,118. The total net register tonnage of vessels on which dues were paid during 1919 was 13,678,751 tons, while the value of the seaborne trade of the port was stated at £835,849,867 for 1919, and at £1,091,657,022 for 1920. The docks, on both sides of the river, have a linear quayage of about 37 miles, and the Gladstone dock will accommodate the largest vessels afloat. The dock authority is the Mersey Dock and Harbour Board. The chief import is cotton, those next in importance being grain, provisions, sugar, fruit, oil, timber and tobacco.

The principal buildings are St. George's Hall, erected 1838–1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Cathedral (in course of erection from the designs of Bodley and Gilbert Scott), which will be the largest ecclesiastical building in England; the Walker Fine Art Gallery; the University; the Royal Infirmary; the Municipal Offices; and the Custom House.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 37 Aldermen and 112 Councillors. The City returns 11 members to Parliament. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

Principal City Officers.

Rt. Hon. Lord Mayor (1923–1924), A. Rushton.
Recorder, Edward G. Hemmerde, K.C. (1909).
Police Magistrate, Stuart Deacon (1910).
President, Court of Passage, Sir Wm. F. Kyffin Taylor, K.B.E., K.C.
Coroner, A. G. Inglis
Town Clerk, Walter Moon, £3,300 (1922).
Clerk of the Peace, R. D. Cripps.
Medical Officer of Health, E.W. Hope, O.B.E., M.D.

MANCHESTER.

MANCHESTER (Lancashire), the centre of the world's cotton trade, is 189 miles N.W. of London. The municipal area is 21,690 acres (about 34 square miles), the population at the census of 1921 being 730,307.

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, indiarubber goods, chemicals, &c. The city is connected with the Mersey by the *Manchester Ship Canal* (opened in 1894), which has a total length of 35½ miles, a depth of 28 feet, and a minimum width at the bottom of 120 feet. The value of the seaborne trade of the port is stated at £146,890,745 for 1919, and at £207,756,312 for 1920, the net tonnage of ships entered and cleared in 1920 was 2,280,579 and 2,262,933 respectively.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A.; the Royal Exchange, built in 1869, enlarged at cost of £800,000 and reopened by the King, 1921; the Free Trade Hall, erected from the designs of Walters, in 1856, on the site of the "Peterloo Massacres" (Aug. 16, 1819) in St. Peter's Fields; the Art Gallery; the Whitworth Institute; the 17th century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University (Owens College); and the 15th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Manchester Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The Lord Mayor presides over a Corporation of 35 Aldermen and 105 Councillors. Manchester returns 10 members to Parliament. The Latin name of the city was *Mancunium.*

Principal City Officers.

Rt. Hon. Lord Mayor (1923-1924), W. T. Jackson.
Recorder, Arthur Jacob Ashton, K.C. (1914).
Stipendiary Magistrate, Edgar Brierley (1902).
Town Clerk, P. M. Heath (1922).
Clerk of the Peace, E. M. Redhead.

LEEDS.

LEEDS (Yorkshire, West Riding) is favourably situated in the coal and iron districts of England, 185 miles N.N.W. of London, and is the centre of the woollen industry and the wholesale clothing trade. The city has also the largest share of the leather trade of the United Kingdom, in addition to large rope works, and factories of thread, linen, glass and earthenware, with metal casting, machinery and machine tools, steam engines, railway wagons, and other engineering works. Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal, with the Humber in the east by the Aire and Calder Navigation, and is an important railway centre.

The municipal area is 28,090 acres (nearly 44 square miles), the population at the census of 1921 being 458,320.

The principal buildings are the Town Hall (1858), the Royal Exchange (1872), the Philosophical Hall, the Municipal Buildings and Art Gallery, the University and the Leeds Institute of Science, Art and Literature (1865). The Parish Church (St. Peter's) was rebuilt in 1840; the 17th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1849. Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Laci in 1152, is one of the most complete examples of Cistercian houses now existing.

Leeds was first incorporated by Charles I in 1626, made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a corporation of 17 Aldermen and 51 Councillors. The city returns 6 members to Parliament. The earliest forms of the name are *Loidis* or *Ledes*, the origin of which is obscure.

Principal City Officers.

Rt. Hon. Lord Mayor (1923–1924), Sir Edwin Airey.
Recorder, John Albert Compston, K.C. (1919).
Stipendiary Magistrate, Horace Marshall (1910).
Clerk of the Peace, Sir Arthur Copson Peake (1896).
Town Clerk, Sir Robert Fox (1904).

SHEFFIELD.

SHEFFIELD (Yorkshire, West Riding), the chief centre of the heavy steel and cutlery trade, is situated in the extreme south of Yorkshire 159 miles N.N.W. of London. at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city has an area of 31,625 acres (about 49 square miles), with a population at the census of 1921 of 519.239. The principal industries are the manufacture of heavy steel (armour plates, rails, tyres, axles, engine castings, &c.), cutlery, and instruments, in addition to engines and general machinery, tanning, confectionery, bicycles, iron and brass founding, silver refining, brush making, and many other industries. Sheffield plate (silver rolled on other metals) made during the years 1742–1840, when electroplating superseded the process, is greatly prized by collectors.

The principal buildings are the 14th century Parish Church (St. Peter's), the Town Hall (1897), the Cutlers' Hall (1832), Corn Exchange, Market Hall, Museum, Mappin Art Gallery, Ruskin Museum and the University.

The Saxon town of *Escafeld* was created a county borough in 1888 and a city in 1893, the Chief Magistrate becoming a Lord Mayor in 1897. The Corporation includes 17 Aldermen and 51 Councillors. Sheffield returns 7 members to Parliament.

Principal City Officers.

Rt. Hon. Lord Mayor (1923-1924), A. T. Blanchard.
Recorder, William James Waugh, K.C. (1915).
Master Cutler (1923–1924), James Neill.
Town Clerk, William E. Hart (1913).
Clerk of the Peace, G. E. Smith.

BRISTOL.

Bristol (Gloucester and Somerset), astride the River Avon and within 8 miles of the estuary of the River Severn (Bristol Channel), is a city and seaport 119 miles W. of London, with a municipal area of 18,445 acres (29 square miles) and a population at the census of 1921 of 376,975.

The principal industries are shipbuilding, rope making, chocolate, sugar and tobacco factories, glass and earthenware, soap, leather and chemical works, breweries, and copper, lead and iron works. The docks comprised within the Port are the City Docks, 6 miles from the entrance to the river Avon; the Royal Edward and Avonmouth Docks, at the mouth of the river; and the Portishead Docks, to the westward of the river entrance. The net tonnage of ships entered in 1922 was 2,965,014 tons, and of those cleared 2,898,138 tons, the value of the seaborne trade being stated at £41,328,272 for 1921. The principal imports are grain, fruit, oils, ore, timber, hides, cattle and general merchandise, and the chief exports are galvanised iron, tinplates, machinery, manufactured oils, chemicals, strontia, and unmanufactured clay.

The chief buildings, in addition to the 14th century Cathedral (rebuilt by Street 1868–1888), the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth as "the fairest, goodliest and most famous parish church in England"), and the 15th century Temple Church, are Canynges' House, the Merchant Venturers' Almshouses, St. Peter's Hospital, the Council House, Guildhall, Exchange (erected from the designs of John Wood in 1743), Colston Hall, the University and Clifton College. The *Clifton Suspension Bridge*, with a span of 702 feet over the Avon, was projected by I. K. Brunel (the designer of the *Great Eastern*) in 1836, but was not completed until 1860.

Bristol was a Royal Borough before the Norman Conquest, and in 1899 its Chief Magistrate (Sir Herbert Ashman) became a Lord Mayor. The Corporation includes 23 Aldermen and 69 Councillors. The city returns 5 members to Parliament. The earliest forms of the name are *Brigstowe* and *Bristow.*

Principal City Officers.

Rt. Hon. Lord Mayor (1923-1924), A. A. Sennington.
High Steward, His Grace the Duke of Beaufort, T.D.
Recorder, William Blake Odgers, K.C. (1912).
Sheriff, F. Burris.
Town Clerk, Edmund J. Taylor.

KINGSTON UPON HULL.

Hull (officially "Kingston upon Hull") is situated in the East Riding of Yorkshire, at the junction of the Hull with the Humber, 22 miles from the North Sea and 181 miles N. of London. The municipal area is 9,359 acres (about 15 square miles), with a population of 290,808 at the census of 1921.

Hull is the principal seaport for shipping the manufactures of Yorkshire and Lancashire to Northern Europe, and among its principal imports are grain from Russia and America and timber from Scandinavia, in addition to iron, fish, butter (from Denmark and Siberia), and fruit. The net tonnage of the shipping entered and cleared in 1919 was upwards of 3,000,000 tons, the value of the seaborne trade of the port being stated at £148,023,115 for 1919, and at £172,951,919 for 1920.

The chief buildings, in addition to the Docks, are the Parish Church (Holy Trinity), 272 feet in length (the longest parish church in England), the Guildhall (1915), Exchange (1866), Chamber of Commerce, Corn Exchange, Market Hall, Custom House, Dock Offices, Royal Institution (1854), Wilberforce's House and Trinity House (1753). A Municipal Art Gallery is in course of establishment under the gift of Mr. T. R. Ferens.

The name of *Wyke-upon-Hull* was changed to Kingston-upon-Hull by Edward I. in the 13th century. The town was incorporated in 1576 and made a county borough in 1888. The Corporation consists of a Lord Mayor, 16 Aldermen and 48 Councillors. Hull returns 4 members to Parliament.

Principal City Officers.

High Steward, Rt. Hon. T. R. Ferens, P.C.
Rt. Hon. Lord Mayor (1923–24), E. E. Keighley.
Recorder, Henry Thomas Kemp, K.C. (1917).
Sheriff, Benno Pearlman.
Town Clerk, H. A. Learoyd, M.A.
Coroner, Col. Alfred Thorney.

BRADFORD.

Bradford (Yorkshire, West Riding), 192 miles N.N.W. of London and 8 miles W. of Leeds, in the coal and iron district, is the centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 22,879 acres (about 36 square miles), with a population at the 1921 census of 285,979.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works, and quarries of freestone.

The chief buildings, in addition to the 15th century Cathedral (formerly the Parish Church), are the Town Hall (1873), Exchange (1867), Cartwright Memorial Hall (1904), commemorating the inventor of the power loom, Temperance Hall (1837), Grammar School, Technical College (1882), and the Mechanics' Institute (1832).

The Saxon township was created a parliamentary borough in 1832, a county borough in 1888, and a city in 1907. The Corporation consists of a Lord Mayor, 21 Aldermen and 63 Councillors. Bradford returns 4 members to Parliament.

Principal City Officers.

Rt. Hon. Lord Mayor (1923–1924), H. M. Trotter.
Recorder, Thomas Rowland Drake Wright (1905).
Stipendiary Magistrate, Beaumont Morice (1914).
Town Clerk, N. L. Fleming (1920).

NEWCASTLE-UPON-TYNE.

NEWCASTLE UPON TYNE (Northumberland), on the north bank of the Tyne estuary, 8 miles from the North Sea and 272 miles N. of London, has an area of 8,452 acres (13 square miles) and a population of 278,400 at the Census of 1921.

The city is conveniently placed on the estuary, in the neighbourhood of the Northumberland and Durham coalfields. Its exports include coal, chemicals, pig iron, iron and steel manufactures and machinery; the chief imports being wheat and grain, fruits, iron, iron ore and steel, petroleum, sulphur ore, timber and wood, and potatoes. The net tonnage of ships cleared in 1921 was 7,343,323 tons. The chief industries are shipbuilding, metal works and machinery, chemicals, glass, brick, tile and earthenware, and rope making.

The principal buildings are the (11th century) "New" Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St. Nicholas), St. Andrew's Church (11th century), St. John's (14th century), St. George Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, the Corporation Buildings, Guildhall (1658), Moot Hall (1810), Exchange (1860), Central Public Library and Laing Art Gallery, Wood Memorial Hall (1870) and the Custom House. The city is connected with the south bank of the Tyne by four bridges, of which the old High Level Bridge (1849) was designed by Robert Stephenson and carries the railway and roadway; the new High Level Bridge (1906) carries the railway only.

The pre-Norman borough of *Monkchester* was re-named Newcastle in the 11th century when the castle was erected as a defence against the Scots. In 1400 it was made a county borough, and in 1859 was incorporated. The City Corporation now includes a Lord Mayor (1906), 19 Aldermen and 57 Councillors. Newcastle-upon-Tyne returns 4 members to Parliament.

Principal City Officers.

Rt. Hon. Lord Mayor (1923–1924), S. Eastern, O.B.E.
Recorder, His Honour Llewellyn Archer Atherley Jones, K.C., (1906).
Sheriff, Arthur William Lambert.
Town Clerk and Clerk of the Peace, Arthur Maule Oliver, O.B.E. (1907).

NOTTINGHAM.

NOTTINGHAM (Nottinghamshire), the principal manufacturing centre of hosiery and lace, stands on the left bank of the Trent, where the tributary stream Leen enters the river, 125 miles N.N.W. of London. The municipal area is 10,935 acres (17 square miles), and includes an open market-place of 5½ acres in the centre of the city, with a population at the Census of 1921 of 266,400.

The city is connected with the North Sea and the Atlantic by the river Trent and canals and is an important railway centre. The principal industries are cotton, silk and merino hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, and the manufacture of tobacco, &c.

The chief buildings are the 11th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842–4), the Guildhall and Sessions Court (1887), Shire Hall, Albert Hall, Exchange, University College, Hospital and Eye Infirmary.

Snotengaham or *Notingeham*, "the home of the sons of Snod" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogobauc*, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation comprises a Mayor, 16 Aldermen and 48 Councillors. The city returns 4 members to Parliament.

Principal City Officers.

Mayor (1923–1924), John Houston.
Recorder, Hugo J. Young, K.C. (1920).
Sheriff (1923–1924), Arthur Judd.
Town Clerk (1912) *and Clerk of the Peace* (1921), William John Board, O.B.E.
City Coroner, Charles Lambert Rothera.

THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent.—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,467 sq. miles, and a population (1921) of 2,206,712. It is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, Hereford and Monmouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breadth from W. to E. (St. David's Head to the English border) is 92 miles.

Separated from the mainland of Wales by the Menai Straits is the Welch island-county of *Anglesey* or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826, and by the tubular railway bridge (1,100 ft. long) of the L. & N.W. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,571 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-fawddy 2,970 ft.); Powys (Plinlimmon 2,462 ft.. Drygan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,862 ft., Pen-y-gaver fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (*see* England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Tâf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welch rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* followed in the ensuing Iron Age. The *Roman* conquest of South Britain and Wales was for some time successfully opposed by *Caradog* (Caratăcus), King of the Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). *Christianity* was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welch (=Foreign). The West Saxons' victory of Deorham (577) isolated the Waelisc of Wales from those of Cornwall, while the battle of Chester (613) similarly cut off communication with the Waelisc of Strathclyde. In the 8th century the boundaries of the Welch were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dyke). In the 9th century *Rhodri Mawr* united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Dehenbarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last-named being Howel Dda, who codified the laws of the country, while Lewelyn ap Seissyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015–1022.

The Norman Conquest.—After the Norman conquest of England William I. created Palatine counties along the Welch frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welch rose under the leadership of *Griffith ap Rhys* and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendency over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1282 during hostilities between the Welch and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welch are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

CARDIFF.

CARDIFF (Glamorgan) at the mouth of the river Taff (Caer Taff), the port of the South Wales coal fields, has a municipal area of 13,628 acres, and a population at the census of 1921 of 219,688. The net tonnage of ships entered at the port in 1922 was 10,029,059 tons, and of those cleared 10,609,580 tons. The principal industries include ship repairing, rope making, steel, copper, lead and zinc works, iron and steel foundries, patent fuel works, engine wagon works, flour mills, chemical factories, paper mills, breweries, jam, vinegar and ice factories, tin plate and paint works. The chief imports are grain, timber, pitwood, ore, fruit, butter, cheese, frozen and chilled meat, potatoes. The exports include coal, coke, patent fuel, iron and steel manufactures, tin plates, &c.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

SWANSEA.

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tinplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal, patent fuel, ores, and the import and export of oil (National Oil Refineries). There is also a large ship-repairing industry. The net tonnage of ships entered in 1922 was 3,359,327 tons, and of those cleared 2,253,605 tons. The trade is principally with France, Italy and Belgium. The municipal area is 24,193 acres, with a population at the census of 1921 of 159,600. Included in the borough is the health resort of Mumbles.

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), and the 17th century Grammar School, founded by Hugh Gore. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns 2 members to Parliament.

City Officers.

Mayor (1923–24), G. N. Colwill.
Recorder, R. E. L. Vaughan-Williams, K.C.
Town Clerk, H. Lang-Coath

THE KINGDOM OF SCOTLAND

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between 60° 51′ 30″ and 54° 38′ N. latitude and between 1° 45′ 32″ and 6° 14′ W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 31,510 square miles (land and water), with a population (at the census of 1921) of 4,882,288, an increase of 121,394 since the census of 1911, or 2·5 per cent.

Relief.—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinns of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfries; and Whitecoomb (2,695 feet), in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and Ben Muich Dhui (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet), and Stonebyres Linn (80 feet), all occurring within a stretch of 4 miles, above and below Lanark. The *Tweed* (96 miles) forms a boundary between Scotland and England at Berwick, and has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth Bridge*, constructed 1882–9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,295 feet.)

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Ericht in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (20 miles) and Maree in the northern Highlands.

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1911) of 25,896. Kirkwall, in *Pomona* (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between Pomona and Hoy, was the war station of the Grand Fleet from 1914–9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Shetland.—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Shetland, a group of about 100 islands and islets, of which 29 are inhabited. The total area of the group is 551 square miles, with a population (1911) of 27,911. Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51′ 30″ N. lat.).

*Western Islands.**—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Invernesssbire, in 1746), which contains the *Cuillins* (Sgurr-na-Banachdich, 3,243 feet), *Red Hills* (Ben Caillich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles), containing *Ben More* (3,185 feet), *Ben Buy* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura*, Beinn-an-Oir (2,571 feet), and Beinn Chaolais (2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis-with-Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callernish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

---

* *Land's End to John o' Groats.*—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 597 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends further N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488–1513).

* *The Hebrides.*—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized at *Sodorenses*, a name that survives in the Anglican bishopric of "Sodor and Man."

Climate.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift*, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast being greater than on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 58° Fahrenheit.

EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Celtic immigrants. Celtic *Goidels* and *Brythons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about 450 A.D.

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic Brythons, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catrail*, or Picts' Work Dyke, of Roxburgh (from Torwoodle, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern Caledonia about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic Waelisc (Welch) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of Malcolm I. (943–954) the Brythons or Waelisc (Welch) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005–1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sherriffmuir, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops under Sir John Cope at Preston Pans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

EDINBURGH.

Edinburgh, the Capital of the Kingdom, has a municipal area of 32,402 acres, and a population (Census of 1921) of 420,281 (over the enlarged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midlothian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St. Giles's Church (restored 1879-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland), Parliament House (the present seat of the judicature, containing the Advocates' and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and Holyrood Palace (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1923-24), W. Lowrie Sleigh.
Town Clerk, Andrew Grierson, S.S.C., J.P.
City Chamberlain, Robert Paton.

GLASGOW.

Glasgow, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 19,183 acres, and a population of 1,034,074 at the Census of 1921 (an increase of 25,687 since 1911). The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued at £94,701,689 in 1921, the tonnage of the ships entering being 6,449,602 tons, of those cleared 6,373,593 tons. The principal industries are iron and steel works, shipbuilding chemicals, leather, woollens, muslin-weaving, distilling, inkle-making, tobacco, cotton-mills and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Mitchell Library. The City is governed by a town council of 113 members, and sends 15 members to Parliament.

Rt Hon. Lord Provost (1923-24), Matthew Walker Montgomery.
Town Clerk, Sir John Lindsay, J.P., D.L.
City Chamberlain, John A. Reid, J.P.

* The Cities of Edinburgh, Glasgow, Dundee, and Aberdeen are each a County of a City, and the Lord Provost of each is entitled, by virtue of his office, to be appointed Lord Lieutenant.

DUNDEE.

Dundee, a City, Parliamentary, Municipal and Royal Burgh, on the left bank of the River Tay, 42 miles N. of Edinburgh, has a municipal area of 6,548 acres, and a population (Census 1921) of 168,315 (an increase of 8,036 since 1911). The principal buildings are University College (St. Andrews University), the Technical Institute, High School, Albert Institute and the Caird Hall Buildings. The harbour affords dock accommodation of nearly 35 acres. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, shipbuilding, engineering, dyeing, and brewing. The City is governed by a town council of 34 members and sends 2 members to Parliament.

Rt. Hon. Lord Provost (1923–24), William High.

Town Clerk, W. H. B. Martin.
Treasurer, G. A. Johnston.

ABERDEEN.

Aberdeen, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 6,748 acres, with a population (Census 1921) of 158,969 (a decrease of 4,922 since 1911). The tonnage of the ships entered in 1922 was 634,313 tons. The chief industries are granite quarrying and working, white fish, salmon and herring fisheries, engineering, chemicals, brewing, distilling, shipbuilding, paper-making, and woollen, jute and linen manufacture. The principal buildings are the East and West Churches of St. Nicholas, Municipal Offices, Marischal College, King's College, Roman Catholic pro-Cathedral, Public Library, H.M. Theatre, Art Gallery and Museum, and the Cathedral of St. Machar (14th century). The City is governed by a Town Council of 34 Members, and sends 2 Members to Parliament.

Rt. Hon. Lord Provost (1923–24). William Meff.
Town Clerk, William Gordon, LL.D.

In Scotland the principal local court is the Sheriff Court. The Sheriff is the Appeal Judge, but the Judge Ordinary is the Sheriff-Substitute. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is unlimited in regard to the money value of the cause. On the criminal side the Court has cognizance of all serious crime with the exception of murder and three other charges, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

The Procurator-Fiscal is peculiarly a Scottish official. Criminal prosecutions are in Scotland conducted by Crown officials at the public expense; the Lord Advocate and his deputes prosecute in the High Court; the Procurators-Fiscal in the Sheriff Court.

The Address of the *Secretary of the Sheriffs-Substitute Assoc.* is County Buildings, Dunfermline.

† NORTHERN IRELAND.—Under the *Government of Ireland Act*, 1920, six of the Ulster Counties (Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone) with the Parliamentary Boroughs of Belfast and Derry, comprising a total land area of 3,351,970 acres (5,263 square miles), and a population (census 1911) of 1,250,531, form the Government of Northern Ireland, with its capital at Belfast.

§ IRISH FREE STATE.—Under the *Irish Free State (Agreement) Act*, 1922, the Provinces of Leinster, Munster and Connaught, with the Ulster Counties of Cavan, Donegal and Monaghan, comprising a total land area of 17,019,155 acres (26,592 square miles), and a population (census 1911) of 3,139,688, form the Irish Free State, with its capital at Dublin.

PHYSIOGRAPHY.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32.531 sq. miles and its geographical position between $51^\circ\ 26'$ and $55^\circ\ 21'$ N. latitude and from $5^\circ\ 25'$ to $10^\circ\ 30'$ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth from E. to W. (Dundrum Bay to Armagh Head) is 174 miles.

Relief.—The island is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2.240 ft.) of County Tyrone in the North; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.) in the North-East; the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal in the North-West; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway in the West; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland) in the South-West; and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford in the South.

Hydrography.—The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Suir*, *Nore*, and *Barrow* to Waterford Harbour.

As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough *Neagh* (150 sq. miles) in the north-east, is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower Erne* and *Erne*, in the central plain; *Melvin*, *Gill*, *Gara* and *Conn* in the north; and *Corrib* and *Mask* (joined by a hidden channel) in the south. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*.

Climate.—The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about 3° Fahrenheit, the summer extremes being 59° in the N. and 62° in the S.

HISTORICAL SKETCH.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. The Roman invaders of Britain did not penetrate to Ireland, and during the first century of their occupation of Britain the dominant tribe in Ireland was called by the Romans *Scoti*, and this tribe eventually established themselves in the north of the neighbouring island.

Legendary History. — According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster, and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Christianity.—Christianity appears to have been known to many of the people of Ireland before the 4th century A.D., although it did not become general until the advent of St. Patrick. *St. Patrick* was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

The Northmen.—The Roman conquest of Britain was not extended to Ireland and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (Land of the Irish), the Provinces of Ulster, Leinster and Munster being survivals of the Norse *Ulaid-stadr*, *Laigin-stadr* and *Muman-stadr*. The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes.

The Anglo-Norman Invasion.—In 1152 Dermod MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruadvi O'Connor (the *Ardri*, or high king, of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow.* Strongbow landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles.

Tudors and Stuarts.—In the reign of Henry VII. English rule was greatly extended, and the administration of Irish affairs was anglicised by *Robert Poyning*, Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law*, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland, and in Elizabeth's reign the conquest of the island was completed. In the time of James I. an apparently trivial incident, the introduction of the *potato* (1616), profoundly influenced the future of the nation, as it required little labour to cultivate, and "Raleigh's fatal gift" soon became so much the main food of the Irish that a potato famine caused almost universal starvation. In the same reign also many of the leading families of the north-eastern counties fled the country after participation in an abortive rebellion, and their lands were distributed amongst English and Scottish colonists, adherents of the Reformed Church, the number of Protestant settlers constantly increasing in succeeding years.

The Commonwealth.—*Cromwell's* campaign in Ireland (1649-1650) was carried on with ruthless cruelty and universal military success, terminating in the subjugation of the island and the legislative union with England, but further estrangement was caused between the Roman Catholics and the Protestant Colonists.

The House of Orange.—At the Revolution of 1688 the Irish Protestants adhered to the cause of William and Mary, and *William III.* defeated the Roman Catholic adherents of James II. at the *Battle of the Boyne* (July 1, 1690) and at the *Battle of Aughrim* (July 12, 1691).

The Act of Union.—The Jacobite risings of 1715 and 1745 found no adherents in Ireland, but various insurrections took place in the 18th century, culminating in the rebellion of 1798, after the suppression of which the *Act of Union* (Jan. 1, 1801) combined the Irish and British legislatures. Catholic Emancipation was enacted by the Parliament of the United Kingdom in 1829. and extensive relief works were carried out to mitigate the severities of famine from 1831-1847. In 1845 the population reached its highest point (8,295,061) of whom the vast majority were dependent for food on the success of the potato crop.

Home Rule.—The demand for a separate Parliament for Ireland was first advanced at Westminster by an Irish party under the leadership of *Isaac Butt* (born 1813, died 1879), who was succeeded by *Charles Stewart Parnell* (born 1846, died 1891) by whose efforts the necessity of granting a measure of Home Rule to Ireland was impressed upon one of the great political parties of Great Britain. After many failures to pass a Bill through both Houses of Parliament a Home Rule Bill was eventually placed on the Statute Book in 1914, with a suspensory clause for the duration of the War. In the later stages of the War, however, the extreme party of Irish politicians developed their organization under the name of *Sinn Fein* ("Ourselves Alone") and demanded complete severance from Great Britain and the recognition of an Irish Republic, and of its elected legislature (*Dail Eireann*). Various efforts were made by the Cabinet of the United Kingdom to arrive at a solution of the Irish problem, which was complicated by the separatist demands of the extremists (in open rebellion against the Government), and the desire of the Protestants of Ulster to remain united with Great Britain, with the additional problem of the minorities of Protestants in the Southern counties. The *Government of Ireland Act*, 1920, superseded the Act of 1914 and established two governments in Ireland, with an executive and legislature of two chambers in Southern Ireland and in Northern Ireland, and a Council of Ireland to co-ordinate the work of the two legislatures. This Act was accepted and was brought into operation in Northern Ireland, the Northern House of Commons being duly elected and the Senate formed, Sir James Craig becoming the first Prime Minister of Northern Ireland. The Republicans (*Sinn Fein*) of Southern Ireland refused to accept the Act, and lengthy negotiations took place between *Sinn Fein* representatives and the Cabinet of the United Kingdom, resulting ultimately in the signing of a "Peace Treaty," Dec. 6, 1921, which was ratified by *Dail Eireann*, Jan. 7, 1922.

The Irish Free State.—Under this Treaty there was set up in Southern Ireland the *Irish Free State* (*Saorstat Eireann*), "a co-equal member of the Community of Nations forming the British Commonwealth of Nations."

The Irish Free State—Saorstat Eireann.

THE GOVERNOR GENERAL.

His Excellency Timothy Michael Healy, K.C., *born* 1855, *appointed Governor General* Dec. 6, 1922 .... £10,000

CONSTITUTION AND GOVERNMENT.

UNDER the *Irish Free State (Agreement) Act*, 1922, the Irish Free State (*Saorstat Eireann*) is a coequal member of the Community of Nations forming the British Commonwealth of Nations. The Constitution, as issued by the Crown, June 16, 1922, contains five Sections, of which Section I is declaratory of Fundamental Rights. (1) The coequality of the Irish Free State. (2) Power of government derived from the people, in accordance with the Constitution. (3) Irish domicile for seven years, or Irish parentage on either side, conferring Irish nationality, and men and women having equal rights as citizens. (4) Irish the national language, English being recognised as an official language. (5) No titles or honours may be conferred on any citizen, except with the approval or advice of the Executive Council. (6) Liberty of the person inviolable. (7) Dwelling of each citizen inviolable. (8) Freedom of conscience and profession and practice of religion, and no law establishing or prohibiting religion may be passed. (9) Free speech and right of lawful assembly. (10) Free education for all citizens. (11) Natural resources of the State inalienable.

Section II provides for a legislature (Oireachtas) of the King and two houses, the Chamber of Deputies (*Dail Eireann*) and the Senate (*Seanad Eireann*), the former elected by secret ballot and by direct vote of all citizens above the age of 21 years who comply with the existing electoral laws and consisting of not less than one member for each 30,000 of the population and not more than one member for each 20,000 of the population. The latter, consisting of 56 Senators and of 2 Senators from each University, elected by all citizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of 21 years is eligible for the Chamber of Deputies; the Senate is composed of citizens who have reached the age of 35 years and have done honour to the nation by reason of useful public service, or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year and members are required to take the following oath:

> I........................ do solemnly swear true faith and allegiance to the Constitution of the Irish Free State as by law established, and that I will be faithful to His Majesty King George V., his heirs and successors by law in virtue of the common citizenship of Ireland with Great Britain and her adherence to and membership of the group of nations forming the British Commonwealth of Nations.

Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register; and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people.

In this Section also Article 45 declares that the Parliament (*Oireachtas*) has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State, and every such force shall be subject to the control of the Parliament. Save in the case of national invasion, the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament.

Section III. vests the Executive Authority in the King and provides that it shall be exercised in accordance with the law, practice, and constitutional usage governing the exercise of the executive authority in the case of the Dominion of Canada, by the representative of the Crown. The Executive Council (*Aireacht*) is responsible to the Chamber, and consists of not more than twelve Ministers (*Airi*) appointed by the representative of the Crown, of whom four ministers shall be members of the Chamber, and a number not exceeding eight chosen from all citizens eligible for election to the Chamber, who shall not be members of Parliament during their term of office, and who, if at the time of their appointment they are members of Parliament, shall by virtue of such appointment vacate their seats; provided that the Chamber may from time to time, on the motion of the President of the Executive Council, determine that a particular Minister or Ministers, not exceeding three, may be members of Parliament, in addition to the four members of the Chamber above mentioned.

Section IV. establishes a Judiciary, consisting of Courts of First Instance, and a Court of Final Appeal to be called the Supreme Court (*Cuirt Oachtarach*). The Courts of First instance include a High Court (*Ard Chuirt*), invested with full original jurisdiction in and power to determine all matters and questions whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court shall in all cases be final and conclusive, and shall not be reviewed or capable of being reviewed by any other Court, Tribunal or Authority whatsoever. Provided that nothing in the Constitution shall impair the right of any person to petition his Majesty for special leave to appeal from the Supreme Court to his Majesty in Council or the right of his Majesty to grant such leave.

Section V. contains certain Transitory Provisions to meet the special circumstances incidental to the establishment of the Legislature, &c.

Education.—Primary Education, with compulsory attendance in many counties, is directed by the State, which also pays the teachers and contributes to the cost of the buildings; the estimated expenditure on Primary Education in 1922–3 was £3,863,921. Secondary Education is in private hands and is largely conducted by Religious Orders, the State contribution in

1922–3 being £132,750. There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin); in 1922 the Professors, etc., at the two Universities numbered 220, and the students 3,410.

Finance,—The Budget for 1923–4 estimates the expenditure of the State at £42,000,000 (Army, £10,664,500; Compensation for property losses. £10,385,000; Old Age Pensions, £3,277,000; Secret Service, £50,000; Civil Guard, £1,147,939; Criminal Investigation Department, £47,554; General Prisons Board, £225,631; Local Government, £955,202; Agriculture, £400,982; Education, £3,954,489; Post Office, £2,831,864; Industry and Commerce, £295,445; Metropolitan Police, £327,537; Governor-General's Establishment, £11,423. The principal source of revenue is a duty of 33⅓ per cent. on Imports. The estimated revenue in 1922–3 was £27,000,000; the estimated expenditure was £37,709,000.

The transfer of administrative functions in Southern Ireland to the Irish Provisional Government did not take place until the 1st April, 1922. Southern Ireland, therefore, continued to be administered during the whole of the year 1921–22 as part of the United Kingdom for all purposes of the Inland Revenue duties.

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3′ – 54° 25′ N. and long. 4° 18′ – 4° 47′ W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population (1921) of 49,233. The cultivated area (1922) was 83,847 acres, and the live stock included 5,153 horses, 19,250 cattle, 75,507 sheep, and 4,350 pigs. In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £417,144.

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Fifty miles of railway have been constructed, and about 23 miles of electric tram road.

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches —the Governor and Council and the House of Keys. The House of Keys (possibly from the Scandinavian *keise* = chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the male and female owners and occupiers of property, 3 from each *sheading*, 3 from Douglas, and 1 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. In 1923 the Tynwald offered the Imperial Government the sum of £200,000 as the Island's contribution to the cost of the Great War.

CAPITAL, Douglas. Pop. (1921), 20,192 (Castletown is the ancient capital); the other towns are Peel and Ramsey.

THE CHANNEL ISLANDS

situated off the north-west coast of France (at distances of from ten to thirty miles) are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lithou (38), a total of 47,083 acres, or 73·4 square miles. The 1921 Census population of Jersey was 49,494, and of Guernsey, &c., 40,120, total, 89,614.

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1916 was 49,678 vergées (2¼ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes, and wheat, and of Guernsey green crops and oats, fruits and tomatoes. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St. Pierre Port, on the east coast.

THE COST OF LONDON GOVERNMENT.

The authorities comprise the Corporation of the City of London, the London County Council, the Metropolitan Water Board, the Metropolitan Asylums Board, twenty-eight Borough Councils, and twenty-eight Boards of Guardians. War bonuses account for a large part of the increases shown under "salaries and wages" in the last year of the period.

THE CORPORATION OF THE CITY OF LONDON.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (*i.e.*, possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1397, 1398, 1406, 1419); and many modern cases have occurred. The title of *Lord Mayor* was not in general use in the outer world until about 1545. The Lord Mayor is elected at Michaelmas; he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the *Lord Mayor's Show*.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life. The *Common Council* was at an early date substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. *Sheriffs* (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance *circ.* 1319. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as officers in the charter of Edward II., A.D. 1319, but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1923–1924.

Col. Sir Louis Arthur Newton, Kt., *born* Dec. 17, 1867; *Common Councilman*, 1905; *Alderman of Cordwainer Ward*, 1916; *Sheriff of London*, 1916–17; *Lord Mayor of London*, 1923; *Address*, The Mansion House, E.C. 2 .... £10,000

* The above is abstracted from the 290th "City's Cash Account" of the series extant—A.D. 1633 to 1922-23. (The Accounts earlier than A.D. 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, *temp.* Queen Elizabeth, have been discovered among the Corporation Archives, as exceptions to that belief.) The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The above extract is from the 139th Annual Printed Account of the Corporation, A.D. 1784 to 1922-23. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, and the 14th December, 1905, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 76th Standing Order of the Court of Common Council. The Accounts are made up to the end of March and are issued in the form prescribed by those Orders, and show the Income and Expenditure applicable to the year on the various Funds.

THE CITY GUILDS (LIVERY COMPANIES).

In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Loriners (bridle, bit, and spur makers), Poulters (poulterers), Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade. The order of precedence is given in parentheses after the name of each Company.

8,983 Liverymen of the Guilds are entitled to vote at elections in *Common Hall* (*see* p. 561). The actual net number is, however, smaller, as many belong to more than one Guild; and only those who have residential or other qualification in the City have the *Parliamentary* vote in that district.

The Liveries of the Haberdashers and the Loriners are the most numerous, each possessing 350 liverymen, the Fletchers' the least, comprising only twenty.

THE LONDON COUNTY COUNCIL.

Offices, The County Hall, Westminster Bridge, S.E. 1, and Old County Hall, Spring Gardens, S.W. 1.

Hours 9.30 to 5 (Monday to Thursday), 9.30 to 5.30 (Friday), 9.30 to 12.30 (Saturday).

Meets on Tuesday at 2.30 p.m.

THE London County Council was constituted under the Local Government Act of 1888. London is an *administrative* county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 20 aldermen, and 124 councillors, together 145, or, if the chairman be also an elected member or alderman, 144. The term of office for aldermen is 6 years, and half retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken.

The *Finance Committee* have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £55,180,000 (of which £21,930,000 represents debt incurred for revenue-producing undertakings), and an annual expenditure of about twenty-seven millions, of which about twelve and a half millions are expended on education. The *Mental Hospitals Committee* administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has mental hospitals with accommodation for over 20,000 patients. The *Housing Committee* perform the duties cast upon the Council by the various Housing Acts, including the clearance of insanitary areas and the building of working-class dwellings. These duties have involved expenditure under two main heads: (1) Non-Assisted Schemes (the dwellings on which are self-supporting) which were carried out prior to the passing of the Housing, Town Planning, &c., Act, 1919; and (2) the Assisted Scheme under the Act of 1919. Any financial loss on the latter scheme in excess of the produce of a penny rate is borne by the National Exchequer. The total capital expenditure by the Council up to March 31, 1923, in respect of Non-Assisted Schemes was: Clearance of insanitary areas, £2,742,000, working-class dwellings, £2,995,000, and in respect of the Assisted Scheme £8,848,000. Owing to financial stringency the Government required the Assisted Scheme to be considerably curtailed, and the number of houses to be built by the Council under the Scheme, apart from dwellings for rehousing in connection with clearance schemes, was reduced from 29,000 to about 8,810. As, however, it became increasingly evident that the supply of houses was not overtaking the demand, the position was reviewed by the Government, and the Housing, &c., Act, 1923, was passed in order to encourage the building of new houses. The Act provides, *inter alia*, for State assistance to local authorities by means of an annual contribution of £6 for 20 years in respect of each house of a specified type and size completed before October, 1925 (or June, 1926, in certain circumstances). The Council is taking steps for the rapid development of new schemes in accordance with the provisions of the Act.

The *Improvements Committee* are responsible for the carrying out of street improvements and the construction of bridges (outside the City of London) and tunnels across the river Thames. The largest improvements carried out in recent years are the new streets between Holborn and the Strand, now known as Kingsway and Aldwych; tunnels under the Thames at Rotherhithe and Woolwich; and an extensive improvement at Westminster, including a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge.

The *Metropolitan Main Drainage* system covers about 149 square miles, including certain districts outside the county, and comprises 370 miles of main, storm-relief, intercepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and six sludge vessels. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, and the sludge is taken out to sea. The Council is carrying out experimental work in connexion with other systems of sewage treatment. The total capital outlay on main drainage is nearly £14,000,000, and further expenditure, amounting to several millions, is in progress for a scheme to relieve certain districts from flooding after heavy falls of rain.

The Council is the *Tramway Authority* for London. The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 163 street miles, all of which are electric lines (mostly underground conduit). Practically the whole of this great system is worked by the Council, and through running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on March 31, 1923, to £16,084,000, and the net debt outstanding to £9,136,000. The results of working for the year 1922–23 were gross receipts £4,895,605, surplus on working £873,968, net surplus, after payment of interest on capital outlay and providing for repayment of debt, £232,327.

The *Education Committee* comprises thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. In accordance with the Education Act, 1918, the Council has submitted to the Board of Education a scheme for the development of educational facilities of all kinds, but owing to the general financial situation it is practically in abeyance for the present, with the exception of a scheme for voluntary day continuation schools.

Amongst the *Other Powers and Duties* of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs; acquisition and maintenance of parks and open spaces; the sanctioning of local sewers; controlling the building line, and the naming of streets and numbering of houses; supervising buildings and district surveyors; dangerous structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter, and electricity-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of music and dancing licences; public health, including treatment of tuberculosis and diagnosis and treatment of venereal diseases; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the Shops Act, the Children Act, and the Midwives Acts; licensing and inspection of employment agencies; registration of massage establishments; licensing of premises under the Cinematograph Act; registration of motor cars; collection of duties on motor cars, dog and establishment and certain other local taxation licences; registration of War charities; and welfare of blind persons. A *Motor Ambulance* service has been installed with seven stations spread over the county and special facilities for calls by telephone. Steps are being taken to provide three additional stations. Under the Land Settlement (Facilities) Act, 1919, the Council has acquired the Shorne estate, near Gravesend, for the settlement of ex-service men upon the land. Any loss incurred up to 31st March, 1926, will be defrayed by the Ministry of Agriculture and Fisheries.

The *Expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All borrowings by the Council are subject to the provision of a

CATHEDRALS AND CHURCHES.

ST. PAUL'S CATHEDRAL, City of London, E.C. 4.—The masterpiece of Sir Christopher Wren (1675–1710) cost £747,660. Splendid architecture; monuments to celebrated men; famous music. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. “Great Paul” in S.W. tower, weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls); fragments of rock from Mount Calvary and carved stones from the Temple at Jerusalem affixed to wall of south choir aisle. Nave and transepts free; Fees to the following parts (on week-days only): Library, whispering gallery, and stone gallery, 6*d.*; golden gallery, 1*s.*; crypt, 6*d.*; ball, 1*s.*; total, 3*s.* Service on Sundays at 8, *10.30, *3.15, and *7. Week days at 8, *10 1.15, *4. (*Services are choral.) Among the distinguished statesmen, warriors and artists buried in the crypt or commemorated in the Cathedral are Nelson, Wellington, Napier, St. Vincent, Rodney, Cornwallis, Abercrombie, Moore, Gordon, Wolseley, Roberts, Brock, Ross of Bladensburg, Pakenham, Gibbs, Dundas, Wren (“si monumentum requiris, circumspice”) Reynolds, Donne, Turner, Benjamin West, Abbey, Leighton, Sullivan, and many others. In 1921 a bust of George Washington, presented by American subscribers, was placed in the crypt. The garden contains in S. portion an ornamental device with legend varied from year to year. At the N.E. corner of the Cathedral is St. Paul's Cross, erected in 1910, on the site of a cross and open-air pulpit removed by order of the Long Parliament. To the S. of the Cathedral are remains of the Chapter House and Cloisters of “Old St. Paul's,” destroyed by the Fire of London in 1666. Cut into the paving-stones at the foot of the steps at W. entrance is an inscription commemorative of Queen Victoria's thanksgiving in 1897.

WESTMINSTER ABBEY, near the Houses of Parliament, S.W. 1 (built A.D. 1050–1760).—Open on week-days at 8 a.m. Admission to Royal Chapels by fee of 6*d.*, except on Mondays (open free); wax effigies, 6*d.* Norman undercroft, 3*d.* Open on Sundays for service only: Holy Communion at 8; Morning Prayer and Holy Communion at 10.15. Evening Prayer at 3. Litany and Sermon at 6.30. Daily—Holy Communion at 8 a.m.; School Service at 9.30; choral services at 10 and 3. Chapel of Henry VII., Chapter House, and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings (Edward I, Edward III, Henry V, Mary, Queen of Scots, Queen Elizabeth), and many other monuments and objects of interest, especially the grave of “An Unknown Warrior” at the W. end of Nave (1920), and Poets' Corner. The Coronation Chair encloses the “Stone of Scone,” brought from Scotland by Edward I. in 1297. Graves of Gladstone, Isaac Newton, Charles Darwin, Charles Dickens Lord Macaulay, Dr. Johnson, Chaucer, Tennyson, Browning, Handel; memorial to Viscount Howe (killed before Fort Ticonderoga in 1758); the memorial to Major John André, Adjutant-General of the British forces in America; the tombs of General John Burgoyne and of Colonel Enoch Markham; memorials to Wolfe (Quebec) and Col, Townshend (Ticonderoga); bust of Longfellow; memorial windows to British Airmen and British Y.M.C.A. who fell in the Great War; coloured window and tablet to Lowell and tablet to Walter Hines Page, in vestibule of Chapter House.

SOUTHWARK CATHEDRAL, south side of the Thames, S.E. 1.—Finest mediæval building in London after the Abbey, and mainly 13th century. Known as St. Mary Overie previous to 1540. Burial place of Gower, Massinger, and Bp. Andrewes, &c. Open 7.30 a.m. to 6 p.m., free. Sunday services, 7.30, 8, and 11 a.m. (choral) and 6.30 p.m. (choral). Week-days: 7.30. 8, and 5 p.m. (choral). The tomb of John Gower (1330–1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle; the altar screen (erected 1520) has been partly restored. The Early English Lady Chapel (behind the choir) is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner). Shakespeare memorial in S. aisle, with recumbent figure and window above, the gift of British and American subscribers. The chapel of St. John the Divine, in the north transept, once used as a magistrate's court, was restored at the cost of Harvard students, as a memorial of their founder, John Harvard, who was baptized in the Church Nov. 29, 1607 (part of Harvard's estate was derived from the sale of the Queen's Head Inn, Southwark, inherited from his mother).

ALL HALLOWS, Barking-by-the-Tower, E.C. 3.—15th century church, containing a very fine series of brass effigies; Jacobean pulpit with Sussex ironwork and font cover ascribed to Grinling Gibbons. William Penn, Quaker, was christened here, and a tablet has been erected by the Pennsylvania Society of New York. John Quincey Adams, sixth President of the United States, was married here in 1797.

ALL SAINTS, Margaret Street, W. 1.—Built by Butterfield in 1859. Ritualistic and noted for its music.

BOW CHURCH (ST. MARY-LE-BOW), Cheapside, E.C. 2.—Rebuilt by Wren (*see* p. 570), after the Fire, with beautiful steeple (222 ft.). 11th century crypt and church open daily (except M.) 10 A.M. to 5 P.M. Since 17th century anyone born within sound of the bells of Bow Church has been designated a “Cockney.” The 11th century church was built on stone arches or “bows.”

CHRIST CHURCH, GREYFRIARS, E.C. 1.—The church of the former Greyfriars Monastery was destroyed in the Fire, and Christ Church was rebuilt by Wren. The organ (repaired 1921) is by Renatus Harris, and the marble font is attributed to Grinling Gibbons. Until removal to Horsham (1902) the boys of Christ's Hospital (Blue Coat School), the site of which is now occupied by the G.P.O., attended services at Christ Church and the galleries contain seats with raised benches for the “Grecians.” Blue Coat School boys still attend annually on St. Matthew's Day (Sept. 21). “Spital Sermon” is preached at Christ Church at Easter.

CHRIST CHURCH, Westminster Gate, S.W. 1.—Rev. P. T. R. R. Kirk, M.A.

GUARDS' CHAPEL, Wellington Barracks (Birdcage Walk, St. James's Park, S.W. 1).—Chapel redecorated in 1878. Open to visitors Tuesdays, Wednesdays, Thursdays and Fridays, 10 to 12 and 2 to 4. Parade service on Sundays at 11 a.m. (tickets of admission can be obtained on application to the Chaplain, R.M. Chapel, Wellington Barracks); evening service (open to the public) at 6 p.m.

HOLY TRINITY, Minories, Aldgate, E. 1.—(Dismantled and now a Sunday school). Contains a mural monument with the arms of the Earls of Dartmouth and of a member of that family (Legge) in which the arms of George Washington are quartered with those of the Legges.

MARYLEBONE CHAPEL, High Street, Marylebone, W. 1.—The former Parish Church of the village of Marylebone (now replaced by St. Marylebone Church), was rebuilt in early 18th century. In the churchyard lie Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician).

ST. ALBAN, Brooke Street, Holborn, E.C. 1.—A brick building by Butterfield (1858). Ritualistic and noted for its music; organ by Willis. *Vicar*, Rev. H. Ross. Services on Sundays: Holy Eucharist at 7 and 8; choral at 9.15; solemn, with sermon, at 11; matins, 10.30; litany, baptisms, and churchings at 2.15; children's service and catechising, 3; evensong at 6.30; frequent mission services. Open daily, 6.45 a.m. to 9 p.m.

ST. ANDREW BY THE WARDROBE, Queen Victoria Street, E.C. 4 (near the site of the King's Wardrobe). Rebuilt by Wren.

ST. ANDREW UNDERSHAFT, St. Mary Axe, Leadenhall Street, E.C. 3.—An early 16th century church, contains a monument of Stow, the London antiquary, and a memorial of Holbein. The organ is by Renatus Harris, the rival of Father Smith.

ST. ANNE'S, Wardour Street, Soho, W. 1.—Built in 17th century and noted for its music. Monument of William Hazlitt in the churchyard.

ST. BARTHOLOMEW'S Priory Church, Smithfield, E.C. 1, the oldest church in London (A.D. 1123).—*Rector*, Rev. W. F. G. Sandwith, M.A. Fine old Norman building, with tomb of the first prior, Rahere. N. transept restored and reopened in June, 1893. Crypt and Lady Chapel open; cloisters opened Dec. 2, 1905. Services daily 12.30 p.m. except Sat. 11 a.m. and Thurs. 1.15 and 6.30 p.m.); Open free daily (Sundays for service only, 8.45; 11.0; 6.30.)

ST. BENET, Paul's Wharf, Upper Thames Street, E.C. 4.—Rebuilt by Wren, 1683; Inigo Jones, 1573 1652, and his father and mother, were buried in former church. St. Benet is the Metropolitan Welch Church.

ST. BRIDE'S CHURCH, Fleet Street, E.C. 4.—Rebuilt by Wren, with beautiful spire (226 ft.). Samuel Richardson, the novelist, is buried in the nave. In the old church Lovelace, Sackville and Wynkyn de Worde were buried, and Samuel Pepys was baptized.

ST. CLEMENT DANES, Strand W.C. 2.—Rebuilt by Wren on site of earlier church assigned to the Danish settlers. The traditional burial place of Harold Harefoot (King Harold I., *see* p. 98) son of Canute. The organ is by Father Smith; the bells are those celebrated in the familiar nursery rhyme "Oranges and Lemons," and the air is among those played on the chimes (since 1920). Owing to the historical association of this church with the kingdom of Denmark, Danish ceremonies are now and then performed there. Dr. Johnson's pew in gallery and monument outside E. end.

ST. CLEMENT'S, Clement's Lane, Lombard Street, E.C. 3.—Rebuilt by Wren, contains handsome carvings on pulpit and font, and some chained books.

ST. DUNSTAN'S IN THE EAST, Idol Lane, Lower Thames Street, E.C. 3.—Rebuilt by Wren with fine tower and spire; rest of church rebuilt, 1817-1821; contains many monuments.

ST. EDMUND, KING AND MARTYR, Lombard Street, E.C. 3.—Rebuilt by Wren, with altar at north end; organ by Renatus Harris. Restored and re-opened 1919, after damage by Air Raid, July 7, 1917.

ST. ETHELBURGA'S, Bishopsgate, E.C. 2. (14th and 15th century).—On April 19, 1607, Henry Hudson (the navigator who gave his name to Hudson's Bay and to the Hudson River), his son John, and his ten sailors took communion in St. Ethelburga's, "purposing to goe to sea foure days after."

ST. GEORGE'S, Hanover Square, W. 1 (18th century; famous for fashionable marriages).—"George Eliot," Mr. Asquith, and Theodore Roosevelt were among those married here.

ST. GEORGE'S, Southwark, S.E.—(Rebuilt 1736) contains the tombs of Bishop Bonner (1497-1569) and Edward Cocker (1631-1675), the author of Cocker's "Arithmetik." (The expression, "according to Cocker," refers to this book.)

ST. GILES'S, Cripplegate, E.C. 2 (14th century).—Contains the graves of John Milton, John Foxe, and Sir Martin Frobisher, the Elizabethan seaman, who attempted to discover a north-west passage to Cathay, and commanded the *Primrose* as vice-admiral to Drake in his expedition to the West Indies.

ST. HELEN'S, Bishopsgate, E.C. 2.—The "Westminster Abbey of the City" from its numerous monuments; building dates from 13th century. Contains a Shakespeare memorial window presented by Mr. William Prentice, an American. In St. Helen's Place the foundations of an earlier church were uncovered during rebuilding operations in 1222.

ST. JAMES'S GARLICKHITHE, Garlick Hill, E.C. 4, has four stained glass windows, one of which was seriously damaged by a bomb by a German air raider on June 13, 1917. It is proposed that the window should not be completely replaced, and that year by year on the anniversary of the outrage the congregation should assemble for a service of thanksgiving for merciful preservation from sudden and violent death. The "Bomb" Sermon will be a modern counterpart of the "Lion" Sermon (*see* St. Katherine Cree, *below*).

ST. JAMES'S, Piccadilly, W. 1.—Built by Wren, with font and wood carvings by Grinling Gibbons. Lord Chesterfield and Lord Chatham were baptized in St. James's.

ST. JOHN'S, St. John's Square, Clerkenwell, E.C. 1.—Built in early 18th century, includes part of the ancient priory of St. John (12th century crypt).

ST. KATHERINE CREE, Leadenhall Street, E.C. 3. Rebuilt in early 17th century and ascribed to Inigo Jones. Contains a catherine wheel E. window, an organ by Father Smith, Archbishop Laud's prayer book and bible, and a monument of Sir Nicholas Throgmorton. The "Lion" sermon is preached here annually before the Lord Mayor and Corporation of London to commemorate the escape of a Lord Mayor (Sir John Gayer) from a lion in Algeria (Oct. 16, 1630).

ST. MAGNUS THE MARTYR, Lower Thames Street, E.C. 3.—Rebuilt by Wren, with steeple (185 feet) and lantern of great beauty, contains the tomb of Miles Coverdale (1488-1568), translator of the Bible, who was rector of St. Magnus (1564-1566) and Bishop of Exeter (1551-1557).

St. Margaret, Lothbury, E.C. 2.—Rebuilt by Wren, contains Grinling Gibbons carvings (font, chancel screen, and pulpit).

St. Margaret's, Westminster, S.W. 1.—Founded 11th or 12th century; buildings date from 15th century, with frequent "restorations." The parish church of the Dominions beyond the Seas, and perhaps the most American spot in all London. The window over the western door was put up in 1882, at the cost of Americans, to the memory of Sir Walter Raleigh, who was executed in Old Palace Yard hard by, and whose headless body, and the body of his son Carew, lie in the chancel. The quatrain below is by James Russell Lowell. (*See also* Tower of London.) The Milton window, at the west end of the north aisle, was the gift of Mr. G. W. Childs, of Philadelphia, and bears an inscription by Whittier. Below the window is a tablet to Sir Peter Parker, who sailed the *Menelaus* up the Chesapeake during the war of 1812–14 and was killed while leading a landing party. On the south wall is a memorial window to Phillips Brooks, Bishop of Massachusetts; and over the vestry door is a window erected to Lady Arabella Stuart by an American lady. The church also contains the grave of Elizabeth, daughter of Robert Dinwiddie, Governor of Virginia.

St. Margaret Pattens, Rood Lane, Eastcheap, E.C. 3.—Rebuilt by Wren, with a leaden spire, contains two canopied pews and other curious survivals and relics.

St. Mary, Aldermanbury, E.C. 2.—Rebuilt by Wren, contains the tomb of Judge Jeffreys and a marble monument to Lieutenant John Smith, "drowned off Staten Island in 1782." John Heminge and Henry Condell (Shakespeare's editors) were buried in the older church.

St. Mary Woolnoth (above the City and South London Tube Station), King William Street and Lombard Street, E.C. 3.—Built by Hawksmoor early 18th century, organ by Father Smith, contains a memorial to Sir Wm. Phipps, Governor of Massachusetts, who died in London in 1695.

St. Michael Paternoster Royal, College Hill, Upper Thames Street, E.C. 4.—Rebuilt after the Fire by Strong (a pupil of Wren's), contains the tomb of "Dick Whittington (*see* p. 561) and a Grinling Gibbons altarpiece.

St. Olave, Hart Street, Mark Lane, E.C. 3.—A 15th century church, which survived the Fire of London, contains the tombs of Samuel Pepys and his wife, and a monument of John Watts, "President of the Council of New York"; also a memorial (formerly in All Hallows Staining) to Monkhouse Davison and Abram Newman, the exporters of the chests of tea which were thrown into Boston Harbour, Dec. 16, 1773. On Trinity Monday the Master and Brethren of Trinity House (*q.v.*) attend service here.

St. Paul's, Covent Garden, W.C. 2.—Built by Inigo Jones. The tombstones round the exterior of the church record the burial places of Samuel Butler (Hudibras), Sir Peter Lely (Painter), Wycherley (Dramatist), Grinling Gibbons (Wood Carver), Dr. Arne ("Rule, Britannia"), and Macklin (Actor).

St. Peter's, Cornhill, E.C. 3.—Rebuilt by Wren, contains a carved choir screen also ascribed to him. The organ is by Father Smith.

St. Sepulchre, Holborn, E.C. 1.—Part of this church escaped the Fire (*see* footnote, col. 2). The organ is by Renatus Harris, in a case attributed to Grinling Gibbons. Memorials in the church to Roger Ascham (Queen Elizabeth's tutor) and Capt. John Smith, "sometime Governour of Virginia and Admirall of New England," who would have been put to death but for the intercession of Pocohontas. (Princess Pocohontas is buried in Gravesend, *see* p. 585).

St. Stephen's, Coleman Street, E.C. 2.—The Rev. John Davenport, who, with other refugees, landed at Boston in 1637, and founded the colony of New Haven, Connecticut, in the following year, was vicar of this church from 1624 to 1633. The colony was composed in part of former residents of this parish. The tablet in the church to Davenport's memory was erected by one of his American descendants.

St. Stephen's, Walbrook, E.C. 4.—Rebuilt by Wren (and considered, with Bow Church, *q.v.*, and St. Bride's, *q.v.*, one of his greatest successes), contains the tomb of Sir John Vanbrugh (architect and dramatist), and a painting by Benjamin West.

Savoy Chapel, Savoy Street, Strand, W.C. 2 (re-built about 1505, on site of 13th century Savoy Palace, restored after disastrous fire in 1864).—A Chapel Royal since 1780. Graves of Gavin Douglas and George Wither, and memorials of D'Oyly Carte. Sunday services at 11.15 and 6.

St. Swithin's Church, St. Swithin's Lane, E.C. 4 (rebuilt by Wren after the Fire of London, but since modernised).—Contains embedded in its external (S.) wall *London Stone*, the milliarium from which in Roman times the miles (*millia passuum*) were measured. This stone is mentioned in King Henry VI., Pt. II.

The Temple Church, south side of Fleet Street, E.C. 4.—The largest of the five remaining round churches in England, the other four being the Churches of the Holy Sepulchre at Cambridge, Northampton, Little Maplestead (Essex), and Ludlow. The Norman church, restored 1840–1845, is open to the public on week-days, 10.30 a.m. to 4 p.m., Saturdays excepted. Organ by Father Smith. Church service (famous music) on Sunday afternoons at 3 without orders; orders for service on Sundays at 11 a.m. may generally be obtained by writing to the Master of the Temple or Under Treasurer, E.C. 4. Service is discontinued in Aug. and Sept. *Master of the Temple*, Rev. W. H. Draper, M.A.

Wren's Churches.—Many of the *Churches in the City of London were destroyed by the Fire of London (Sept. 2–6, 1666). Fifty of these were rebuilt by Wren during the rebuilding of St. Paul's Cathedral, and many of them contain wood carvings attributed to Grinling Gibbons. The total cost of the fifty churches was £263,786 10*s.* 4½*d.*, the most expensive being St. Mary-le-Bow, £15,460 6*s.* 8¾*d.* (£7,388 8*s.* 7¾*d.* for "Bow Tower"), and the cheapest, St. Vedast-Foster (£1,853 15*s.* 6*d.*).

Church of Scotland.

Scottish National Church, Crown Court, Russell Street, Covent Garden, W.C. 2. Sundays 11.15 and 6.30. *Minister*, Rev. J. Moffet, B.A.

St. Columba's, Pont Street, Belgrave Square, S.W. 1. Sundays 11 and 6.30.

---

* The City Churches now standing which survived the Fire of London are:—All Hallows, Barking-by-the-Tower; St. Andrew Undershaft; St. Bartholomew the Great; St. Ethelburga, Bishopsgate; St. Giles, Cripplegate: St. Helen, Bishopsgate; St. Katherine Cree; and St. Olave Hart Street. Of St. Sepulchre, Holborn, only the south porch and the tower remain; of All Hallows, Staining, only the tower; St. Andrew, Holborn, escaped the Fire, but it was in a ruinous condition at the time and was reconstructed by Wren, the old tower being refaced with Portland stone in 1704.

Congregational.

Brixton Independent Church, 364 Brixton Road, S.W. 9.—Rev. B. Snell, M.A. Sundays 11 and 6.45; Thursdays at 8 p.m.

City Temple, Holborn Viaduct, E.C. 1.—Sunday morning at 11. evening at 7; Thursday, suspended.—Rev. F. W. Norwood, D.D.

Christ Church, Westminster Bridge Road, S.E. 1.—*Pastor*, Rev. William C. Poole, D.D. (*Pastor Emeritus*, Rev. F. B. Meyer, D.D). Opened on July 4, 1876, the centenary of American Independence. The Lincoln Tower and Spire, 200 feet high, shows the Stars and Stripes wrought into the stone, and the British lion and the American eagle at the angles of the tower. The cost of the tower and spire, £7,000, was largely defrayed by Americans, in gratitude for Dr. Newman Hall's sympathy with the Union during the American Civil War. Sunday services, 11.0 and 7.0

Fellowship Guild Services, instituted by Miss Maude Royden and Dr. Percy Dearmer at Kensington Town Hall in March, 1920, and removed in June, 1921, to Eccleston Guildhouse, Eccleston Square, S.W. 1. Sundays 3.30 and 6.30.

Harecourt Congregational Church, St. Paul's Road, Canonbury, N. 1.—Founded about 1648 in Hare Court, Aldersgate, and removed in 1857 to Canonbury. John Bunyan died at the House of a Deacon of Harecourt, and the communion plate is of the Cromwellian period. *Pastor*, Rev. Hugh Parry. Sundays, 11 and 6.30; Wednesdays, 7.30 p.m.

The King's Weigh House, Duke Street, Grosvenor Square, W. 1.—Rev. W. E. Orchard, D.D. Sundays, 11 a.m. and 7 p.m. Thurs. 7.30 p.m.

Pilgrim Fathers' Memorial Church, New Kent Road, S.E. 1.—The oldest Congregational Church in London (A.D. 1616), was enlarged by American subscribers in 1856 as a memorial to the Southwark men who sailed in the *Mayflower*—Sundays at 11 and 6.45; Tuesdays at 8.

Union Chapel, Islington.—Sundays, 11 a.m. and 7 p.m.; Wed., 8 p.m.

Westminster Congregational Church, Buckingham Gate, S.W. 1. *Pastor*, Rev. J. A. Hutton, D.D.—Sundays, 11 and 7.

Whitefield's Central Mission (London Congregational Union), Tottenham Court Road, W. 1.—Founded by the Rev. George Whitefield, M.A., in 1756 (Whitefield, with the Wesleys, brought about the great Evangelical revival of the 18th century. He also established an orphanage in Georgia, U.S.A., and died at Newburyport, Mass.). Institutional Church founded by Rev. C. Silvester Horne, M.A., M.P., in 1903. *Superintendent Minister*, Rev. S. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into Horse Guards' Parade. *Horse Guards' Parade*, where the Colour is "trooped" on the King's Birthday, has been enlarged to 300,000 sq. ft. (Trafalgar Square is 168.850 sq. ft.; Parliament Square, 136,900 sq. ft.; Leicester Square, 100,000 sq. ft.).

HOUSES OF PARLIAMENT, Westminster, S.W. 1.—The "Palace of Westminster" was rebuilt in 1840–1850 from the designs of Sir Charles Barry and Augustus Pugin, at a cost of £2,198,000.—Open to visitors on Saturdays, and on Easter and Whit Mondays and Tuesdays, if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days, from 10 a.m. to 3.30 p.m. Admission to the Strangers' Gallery of the House of Commons, during session, by member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall. The Victoria Tower (House of Lords) is 336 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is 320 ft. high and contains "Big Ben" (15½ tons), named after Sir Benjamin Hall, First Commissioner of Works when it was hung in 1856. A light is displayed from this tower when Parliament is sitting.

INNS OF COURT.—The *Inner* and *Middle Temple*, S. of Fleet Street, E.C. 4, and N. of Victoria Embankment, to which the gardens extend, occupy (since early 14th century) the site of the buildings of the Order of Knights Templars, the *Temple Church* (*q.v.*) surviving. Middle Temple Hall is Elizabethan, and in Middle Temple Gardens Shakespeare (Henry VI, Pt. I) places the incident which led to the "Wars of the Roses" (1455-1485). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C. 2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the Library is 15th century, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres); the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Gray's Inn Road, W.C. 1, was founded in late 14th century. The Hall is 16th century (the "Comedy of Errors" was performed there in 1594); the Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other "Inns" are active, but *Staple Inn* is worth visiting as a relic of Elizabethan London; it has a picturesque gabled front on Holborn (opposite Gray's Inn Road), and the Hall, with hammer beam roof, is intact; in rear of the hall is a picturesque Dutch garden, restored by the present owners of Staple Inn (the Prudential Assurance Company). *Clement's Inn* (near St. Clement Dane's Church); *Clifford's Inn*, Fleet Street and *Thavies Inn*, Holborn Circus. *Serjeants' Inn*, Fleet Street, and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1899.

LAW COURTS, Strand, W.C. 2.—The Royal Courts of Justice were erected from the designs of G. E. Street (completed by Sir A. Blomfield and A. E. Street) in 1874–1882 at a cost of £1,000,000 (the site cost £1,500,000 in addition). Until they were occupied by the Supreme Court of Judicature (established in 1873 by the fusion of High Court, Chancery, Queen's Bench, Common Pleas, Exchequer, Probate, Divorce, and Admiralty) the Courts met in Westminster Hall (*q.v.*). The Central Hall is 138 ft. long.

LITTLE BRITAIN, Smithfield, E.C. 1.—Benjamin Franklin lived in Little Britain on his first coming to London. It was then a centre of the bookselling and printing trade, and Franklin is reputed to have set type in the works which extended into the Lady Chapel of St. Bartholomew's Church (*q.v.*).

LIVERY COMPANIES' HALLS.—The "Twelve Great Companies" (*see* p. 564) have magnificent halls, but admission to view them has generally to be arranged beforehand.

LONDON HOSPITAL, Whitechapel High Street and Road, E. 1.—Founded 1759. Hospital contains 930 beds.

LONDON MONUMENT (commonly called "The Monument"), Pudding Lane, Eastcheap, E.C. 3.—Built from designs of Wren, 1671–1677, to commemorate the *Great Fire of London*, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 202 feet high (the flames of fire 42 feet in addition), and is based on a square plinth, with fine carvings on W. face. Splendid views of London from gallery at top of column. Admission 3*d*., 9 to 6 (Oct.-April to 4).

LORD'S CRICKET GROUND, St. John's Wood Road, N.W. 8. The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket. Oxford and Cambridge, and Eton and Harrow matches in July. Lord's is also the Middlesex County Cricket Club headquarters, and the scene of some of the principal matches of the season. Admission to ordinary matches 1*s*., to special matches 2*s*. or 3*s*. (including tax). Tennis Court in building behind members' pavilion, where interesting games are played. The public can obtain reserved seats on payment.

MANSION HOUSE, City, E.C. 4.—The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield; *Leadenhall Market* (Meat and Poultry); *Billingsgate* (Fish), Thames Street; *Spitalfields*, E. 1 (Vegetables, Fruit, &c.); *Cattle Market* (Mon. and Th.; and Fri. for Horses) *and Abat-*

The offices were designed "on a really grand scale" by Sir Edwin Cooper; the square building of Portland stone has a façade facing the estuary and is surmounted by a "temple of Neptune." The *River Thames* has a total length of 210 miles from its source in Gloucestershire to its mouth at the Nore. The *tidal portion* below Teddington Lock (70 miles) forms the *Port of London*, where one-third of the commerce of the United Kingdom is carried on. The value of the trade of the port was stated at £1,005,276,386 for 1920, and at £606,856,886 for 1921. The Port is served by the following Docks:—*St. Katherine's Dock*, E. 1 (23 acres), handling marine shells, spices, tea, marble, etc.; *London Docks* with Eastern Dock and Shadwell Basin, Wapping, E. 1 (100 acres), ivory, spices, rubber, wine, wool, tinned goods, etc.; *Surrey Commercial Docks*, Rotherhithe, S.E. 16 (380 acres), timber, grain and Canadian produce; *West India Docks*, E. 14 (241 acres), rum, sugar, grain, timber and frozen meat; *Millwall Docks*, Poplar, E. 14 (231 acres), the principal centre of the grain trade of London; *East India Docks*, Poplar, E. 14 (68 acres), Cape and American traffic; *Royal Victoria and Albert Docks*, E. 16 (1,100 acres), frozen meat, grain and tobacco; *King George V.*, North Woolwich, E. 16, opened in 1921 (68 acres), provides accommodation for the largest steamers afloat. *Tilbury Docks* (596 acres), about 26 miles below London Bridge, for Australasian and Eastern routes.

POST OFFICE.—The "General Post Office" is in King Edward Street, E.C. 1, a handsomely-fronted, ferro-concrete building (Tanner), with marble inlaid hall, opened in 1910. The public Hall is open for usual postal business from 6.45 a.m. to 9 p.m. (Sat. 8 p.m.). In the neighbourhood are G.P.O. North and G.P.O. West (the Central Telegraph Office).

PRINCE HENRY'S ROOM, 17, Fleet Street, E.C. 4 (bought by the L.C.C. in 1900, and open free 10 to 4 or 5) is in a timbered 17th century house, and contains a Jacobean plaster ceiling and Jacobean and Georgian panelling.

PUBLIC RECORD OFFICE, Chancery Lane, W.C. 2 (built 1851–1896).—Contains a collection of the National Records since the Norman Conquest brought together from various repositories (the Tower, State Paper Office, etc.). Search rooms open daily, with certain exceptions, from 10 to 4.30; Saturdays, 10 to 2. The *Public Record Office Museum* (open Mon. to Fri., 2 to 4 p.m.) contains *Domesday Book* (2 vellum volumes) made by order of William the Conqueror in 1086, and "Domesday Chest"; letters patent of John Balliol swearing fealty to Edward I. (1292); receipt book of Henry VII.; letters of Nelson (and the log of *H.M.S. Victory*); Wellington's Waterloo dispatch; petition to George III. from Congress; letter from Washington to George III.; autographs of Chaucer, &c.; Lord Monteagle's anonymous warning concerning the Gunpowder Plot (1605); bull of Pope Clement VII. confirming Henry VIII. as "Fidei Defensor" (1524); and many other documents of permanent interest; also monuments from the old Rolls Chapel (1377), part of an arch of which is preserved.

ROMAN LONDON.—Traces of the Roman occupation of London from the 1st century B.C. to the

5th century A.D. may still be seen *in situ.* There are remains of Roman baths at No. 5 Strand Lane, Strand, W.C. 2, and at the Coal Exchange, Lower Thames Street, E.C. 3. Portions of the Roman Wall which encircled London are still visible, including a bastion below the pavement of the yard of the General Post Office (fronting Giltspur Street). Other pieces of the wall may be seen in the disused churchyard of St. Alphage, Aldermanbury, E.C. 2; in the churchyard of All Hallows on the Wall, London Wall, E.C. 2; in Roman Wall House, Jewry Street and Crutched Friars, Aldgate, E.C. 3; below Leadenhall Market; and near the S.E. corner of the White Tower of the Tower of London; a small portion of Roman brickwork was uncovered in March, 1922, on a site adjoining St. Peter's, Cornhill, E.C. 3. Many relics of Roman London may be seen in the Guildhall, British and London Museums (*q.v.*).

Royal Exchange, Cornhill, E.C. 3, founded by Sir Thomas Gresham, 1566, opened by Queen Elizabeth 1571, rebuilt 1667–9 and 1842–1844).—Admission free. Statues of Queen Elizabeth, Charles II., Queen Victoria, Sir Thomas Gresham, Wellington (Chantrey, riding without stirrups), Peabody, and others; frescoes in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie, and others. 'Change, the busy time from 3 to 4 p.m. The chimes of the Royal Exchange (re-cast 1921) play English, Scottish and Irish melodies at 9 a.m., 12 noon, and 3 and 6 p.m.

Royal Mint, Tower Hill, E.C. 1 (building erected 1810), where gold, silver, and bronze are coined. Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon. to Fri., 10 to 11 Sat.

St. Bartholomew's Hospital, Smithfield, E.C. 1.—Founded A.D. 1123 by Rahere (*see* St. Bartholomew's Priory, p. 571). Present buildings mainly 18th and 19th centuries; main entrance 1702. The Great Hall contains a series of portraits including Henry VIII., Harvey, Abernethy, Pott, Radcliffe, &c. Hospital for 760 beds. The Church of St. Bartholomew the Less (rebuilt 1823) is within the hospital precincts; Inigo Jones was baptised in former church.

St. George's Hospital, Hyde Park Corner, W. 1.—Founded in 1733. Hospital for 340 beds. Present buildings date from 1829.

St. James's Palace, in Pall Mall, S.W. 1.—(Not open to the public). Built by Henry VIII. (according to tradition, from designs by Holbein); the Gatehouse and Presence Chamber remain, and part of the Chapel Royal. A royal residence from 1698 to 1837. *Royal Levées* held here during the season. Representatives of Foreign Powers are still accredited "to the Court of St. James's," and (by the King's permission) the Conference of the Allies was held there in February, 1921.

St. John's Gate, Clerkenwell, E.C. 1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate (early 16th century) and Church (crypt 12th century) alone survive. The gatehouse may be inspected by written permission of the Secretary of the Chancery.

St. Thomas's Hospital, Albert Embankment, S.E. 1.—Founded 1213. Present buildings (7 red brick houses) by Currey, 1868–71. 1,000 beds.

Smithfield, E.C. 1.—Sir William Wallace was executed there (1305) in the reign of Edward I., and Wat Tyler was "despatched" by Lord Mayor* Walworth (1381) in the reign of Richard II. Anne Askew, a Protestant martyr (1546), was burned there in the reign of Henry VIII.; and under Mary I. (1553–1558) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bartholomew's Hospital.) The last to suffer for religion at Smithfield was Bartholomew Leggatt, Unitarian (1612), in the reign of James I. At the corner of Cock Lane (W. side of West Smithfield) is a small gilt figure commemorating the spot where the Fire of London was finally checked by the demolition of houses, Sept. 6, 1666. Smithfield Market occupies the W. side of West Smithfield.

Somerset House, Strand, W.C. 2, and Victoria Embankment, W.C. 2.—The beautiful river façade (600 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the *Board of Inland Revenue* and by the *Principal Probate Registry* and the office of the Registrar-General of *Births, Marriages and Deaths.* In the Probate Registry (Central Hall) are the wills (*inter alia*) of Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

Stock Exchange, E.C. 2. (Strangers not admitted).—Known in the City as the "House," was founded in 1773 and now consists of about 3,900 members. A "jobber" does business only with other members; a "broker" is the intermediary with the public. Speculators for a rise in prices are "bulls"; those for a fall are "bears." *Chairman of the Committee for General Purposes*, Archibald H. Campbell; *Secretary, General Purposes Committee*, Edward Satterthwaite, C.B.; *Secretary, Trustees and Managers*, R. M. Brydone; *Office*, 23, Throgmorton St., E.C. 2.

Thames Embankments.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Bazalgette for the Metropolitan Board of Works, 1860–1870 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Westminster to Vauxhall section, on the S. (Surrey) side, 1860–1869; the Chelsea Embankment, 1871–1874. The total cost exceeded £2,000,000. Sir Joseph William Bazalgette (1819–1891) also constructed the London main drainage system, 1858–1865, at a cost of £4,600,000. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall of the L.C.C. includes an embankment on the Surrey side.

Thames Tunnels.—The *Rotherhithe Tunnel* (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is 1 mile 440 yards, of which 510 yards are under the river. The cost of the tunnel and its approaches was £1,560,041. The *Blackwall Tunnel* (foot passengers and vehicles) was constructed by the L.C.C. and opened in 1897, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is nearly 1¼ miles, of which 407 yds. are under the river. The cost of the tunnel with its approaches was about £1,406,000. *Greenwich Tunnel* (foot passengers only) constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E. 16, to High Street, Woolwich, S.E. 18. The length of the subway is about 500 yards, and its cost was £85,862. The *Thames Tunnel* (1300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

* The "Sword of St. Paul" appears in the 1st quarter of the City Arms, not "Walworth's dagger" as once commonly believed.

TOWER HILL, E.C. 1 and E.C. 3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

TOWER OF LONDON, E.C. 3 (built by William the Conqueror, A.D. 1066–1087).—Admission to Jewel House, on all week days, 6*d.*; White Tower and Armouries, including Vaults, 6*d.*; to Bloody Tower, on all week days, 6*d.* Free on Saturdays (except Jewel House and Bloody Tower) by tickets issued at the office at gateway. Open from 1 May to 30 Sept., 10 a.m. to 6 p.m.; 1 Oct. to 30 April, 10 a.m. to 5 p.m. Not open on Good Friday, Christmas Day, or Sunday. *Constable*, Field-Marshal Lord Methuen, G.C.B., G.C.M.G., G.C.V.O.; *Lieutenant*, Gen. Sir F. J. Davies, K.C.B., K.C.M.G., K.C.V.O., A.D.C.; *Major and Resident Governor*, Lt.-Col. Dan Burges, V.C., D.S.O.; *Keeper of the Jewel House*, Major-Gen. Sir George J. Younghusband, K.C.M.G., K.C.I.E., C.B.; *Curator of the Armouries*, Charles Ffoulkes, F.S.A. The Yeoman Warders ("Beefeaters") retain their picturesque Tudor uniforms. During the Great War the use of the Tower as a prison was revived. Sir William Wallace, King David II. and King James I. of Scotland, the "Little Princes" (Edward V. and his brother), Anne Boleyn, Katherine Howard, Lady Jane Grey, Queen Elizabeth, Sir Walter Raleigh, William Penn, Cranmer, Ridley and Latimer and many others were imprisoned in the Tower.

TRAFALGAR SQUARE, S.W. 1.—This space was laid out in the second quarter of the 19th century In the Square are the *Nelson Monument* 142 feet high, with Landseer's lions round the base, and statues of *Havelock*, *Napier*, and *Gordon*. The plinth of the Nelson Monument was badly damaged by fire during the (unofficial) celebrations on Armistice Day (Nov. 11, 1918). In the façade of the N. Wall of Trafalgar Square are metal standard measures.

WESTMINSTER HALL, S.W. 1 (built by William Rufus, A.D. 1087–1100 and altered by Richard II., 1377–1399), adjacent to and incorporated in the Houses of Parliament.—Westminster Hall is part of the Palace of Westminster and survived the fire, which destroyed the remainder of the Palace (Oct. 16, 1834). The Hall is 290 feet long, 68 feet wide, and 90 feet high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I. was tried in the Hall. For admission, see regulations as to Houses of Parliament.

WHITEHALL, opposite Horse Guards, S.W. 1.—Erected by Inigo Jones as a banqueting-house for the projected Whitehall Palace. King Charles I. was beheaded here.

EPPING FOREST (5,560 acres, purchased by the Corporation of London for £250,000 and thrown open to the public in 1882; the present forest is 11 miles long by 1 to 2 miles wide, about one-tenth of its original area; in 1920 the deer in the forest numbered 87), LOUGHTON, BUCKHURST HILL, CHINGFORD, HIGH BEECH, on Great Eastern Railway. Beautiful forest scenery.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by Henry VI. in 1440, the scholars numbering 1,131 in May 1923. Buildings date from 1523.

GRAVESEND, a borough and river port, 22 miles from London (S.E. & C.R.). A favourite resort for Londoners. St. George's Church (1727) contains a pulpit of Virginian wood, erected in 1904, and a stained glass window (the gift of ladies of Virginia) in memory of Princess Pocohontas, who was buried in the former church in 1617. Gravesend was formerly considered to be the entrance to London (Tilbury fort and docks are on the opposite bank), and King Edward VII. received Queen Alexandra there, March 7. 1863 (three days before their wedding).

GREENWICH, S.E. 10.—A south-eastern metropolitan borough (*see* p. 560) with a frontage of 4½ miles on the Thames. *Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II., from designs by Inigo Jones, and by Queen Anne and William III., from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391–1447), son of Henry IV. Henry VIII., Queen Mary I. and Queen Elizabeth were born in the Royal Palace (which reverted to the crown in 1447) and King Edward VI. died there. The Painted Hall of Greenwich Hospital (Thornhill), Nelson Relics, &c., free on week-days (except Friday) from 10 (and on Sundays from 2) till 4 or 6, according to time of year. In the principal quadrangle is a marble statue of George II., by Rysbraeck. *Naval Museum*, interesting Collection of Models, &c., open daily, except Friday and Sunday, from 10 till 4 or 6. *Chapel* open daily except Sundays and Fridays, and after 4 p.m. on Saturdays. *Greenwich Park* (188 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II., from the designs of Le Notre. On a hill in Greenwich Park is *Greenwich Observatory* (founded 1675) the centre of longitude and of "Greenwich Time." Admission to the Observatory only by permission of the Astronomer Royal. The parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1718, and contains a pulpit and other carvings attributed to Grinling Gibbons. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII. was christened in the former church. The Ministerial *Whitebait Dinner*, held for many years at the "Ship" Hotel, was last held in 1894.

HAMPTON COURT.—Sixteenth century Palace built by Cardinal Wolsey, and enlarged by Sir Christopher Wren for William and Mary, 15 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1768). Old Royal Apartments and collection of pictures. Tennis Court, built by King Henry VIII. in 1530. JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the Old *Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn in the farm ground is believed to have been built out of the timbers of the *Mayflower* by the 17th century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665–1666).

KINGSTON-UPON-THAMES, Surrey (about 12 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings in the market place.

RICHMOND, S.W. 14, contains the red brick gateway of *Richmond Palace* (Henry VIII., 1485–1509) and many buildings of the periods of Queen Anne (1702–1714) and George II. (1727–1760), including *White Lodge* in Richmond Park, the residence of the Duke and Duchess of York, and the home of Queen Mary's mother (the Prince of Wales was born there June 23, 1894). *Richmond Park* (2,250 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained a wonderful view of the Valley of the Thames.

RUNNIMEDE.—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15–23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is the privately owned *Magna Carta Island*, which is claimed as the actual site of the sealing.

RYE HOUSE, at Hoddesdon, on the River Lee. Scene of the celebrated plot. Old castle and dungeons, pictures, oak fireplaces, chests and panels; Queen Elizabeth's bed; the Great Bed of Ware (mentioned in "Twelfth Night").

ST. ALBANS.—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1115. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI. in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. Ruins of ancient City of Verulam; St. Michael's Church, with tomb of Lord Bacon.

STOKE POGES (2 miles from Slough station on G.W. Ry.) contains the 14th century Church with the Churchyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1771. There is an eccentric "Bicycle" Window (1643) in an external cloister.

WALTHAM ABBEY (or WALTHAM HOLY CROSS), 13 miles from London (G.E.Ry.).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England, and the traditional burial place of King Harold II., 1066) and a Lady Chapel of Edward II., with crypt below. At Waltham Cross, 1 mile from the Abbey, is one of the crosses (partly restored) erected by Edward I. to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood on the spot now occupied by the statue of Charles I. at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066–1087).—22 miles from London, by Great Western and South Western Railways. When the Court is not in residence, the State Apartments of Windsor Castle are generally open to the public, during His Majesty's pleasure, on every week-day except Friday. The charges for admission are: Adults, 1*s.*; children, 6*d.*, excepting to charitable societies, when the charge for admission will be one-half in each case, the proceeds to go, by the King's command, to local charities. On Bank Holidays half the usual fees are charged. An authorised guide book can be obtained at the office, price 6*d.* The hours of admission to the State Apartments are from 1 April to 30 Sept., between 11 and 4; and from 1 Oct. to 31 March, between 11 and 3. The Albert Memorial Chapel and the Round Tower are open on the same days and at the same hours as the State Apartments, except that the Round Tower is closed during the winter. The royal stables and riding school may be viewed daily between the hours of 1 and 2.30. St. George's Chapel may be viewed on week-days (Fridays excepted), between 12.30 and 4.

WOOLWICH.—9 miles from London; S.E. & C.R. Dockyard Station for Barracks, Rotunda, &c. *Old Dockyard; Extensive Barracks for Royal Artillery, Royal Army Service Corps, &c.* Common for military evolutions. *Rotunda* daily, free, from 1 April to 30 Sept., 10 a.m. to 12.45 p.m. and from 2 p.m. to 5; 1 Oct. to 31 March, from 10 to 12.45 and from 2 to 4; Sundays, April to Sept., 2 to 5; Oct. to March, 2 to 4 p.m.

LONDON THEATRES IN 1922–23.—The most notable theatrical events of the year were the production at His Majesty's of James Elroy Flecker's *Hassan* (with incidental music by Delius), of John Drinkwater's two plays *Oliver Cromwell* and *Robert E. Lee*, and of Czecho-Slovakian "Robot" plays at St. Martin's and The Regent. Birmingham enjoyed the distinction of a G. B S. play, *Back to Methusaleh*, which endured for the greater part of a week, from the opening in the Garden of Eden to the dim and distant future. The 1430th performance of Gay's *Beggar's Opera* was given at Hammersmith on November 17, 1923.

Record Runs.—The "record run" at a London theatre, in pre-war days, was held by *Charley's Aunt* (1,466 consecutive performances). The present record is 2,238 consecutive performances of *Chu Chin Chow*, which was produced at His Majesty's on Aug. 31, 1916, reached its 1,467th performance on Oct. 17th, 1919, and was withdrawn after its 2,238th performance (having brought in over £700,000) on July 22, 1921. Other long runs are *Our Boys* (1,362), *The Maid of the Mountains* (1,352), *A Little Bit of Fluff* (1,241), *A Chinese Honeymoon* (1,075), *Romance* (1,046).

London's First Theatre.—A tablet has been affixed by the Records Committee of the London County Council on 88 Curtain Road, Shoreditch, to commemorate the site of "The Theatre" Shoreditch, the first theatre in London. In 1921 there were 45 theatres in London, with seating accommodation for 53,341 persons; 38 music halls and variety theatres, with accommodation for 56,401 persons; and 790 other places licensed for public entertainments.

CINEMATOGRAPH THEATRES.—It has been stated that there are upwards of 4,000 Picture Palaces and Cinematograph Theatres in Great Britain and Ireland. The latest tendency is for first-rate authors and artists to co-operate for the production of high-class work, and the general level of the productions shows an upward movement.

The United States is the pioneer country for film production. One consequence is the growth in population of Los Angeles from 319,198 in 1910 to 576,063 in 1920. During 1921, although the trade declined considerably, the United States exported about 40,000,000 feet of unexposed film, and about 130,000,000 feet of filmed pictures, the estimated value being approximately £3,000,000. Canada is the largest purchaser of United States film productions, importing some 8,000,000 feet of film. Great Britain's imports greatly exceed exports. From all sources, of films blank and exposed, 90,000,000 feet were imported in 1921. Re-exports amounted to 17,000,000 feet, and exports of British films to 13,000,000 feet. According to the 1922 report of his Majesty's Senior Trade Commissioner for South Africa, American films are sold in that country at an average price of 5¼*d.* per foot, whilst the British price is 3*d.* per foot. In the United States the revenue from the Cinema industry is estimated at £120,000,000, or four times the total given for Great Britain. The number of theatres is estimated at between 14,000 and 18,000 in the United States alone. During December, 1922, every one showed films selected, for propaganda purposes, by the American Legion's Americanisation Commission.

THE NOBEL PRIZES, 1905–1923.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees for distribution to those who have contributed most largely to the common good, and is divided into five shares, which are devoted to workers in the domains of (*a*) Physics, (*b*) Chemistry, (*c*) Medicine or Physiology, (*d*) Literature, and (*e*) the Preservation of Peace. The testator was the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were distributed on the fifth anniversary of Nobel's death, Dec. 10, 1901. The awarding authorities are the Swedish Academy of Science —(*a*) Physics, (*b*) Chemistry; the Stockholm Faculty of Medicine—(*c*) Medicine or Physiology; the Swedish Academy of Literature—(*d*) Literature; and a committee of five persons elected by the Norwegian Storthing—(*e*) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from Nobelstiftelsens Styrelse, Norrlandsgatan 6, Stockholm, Sweden.

LIST OF AWARDS (Value about £6,500 each).

THE WORLD'S LITERATURE.

BOOKS.—It is estimated that over 155,000 books, pamphlets and magazines are published annually in the various countries of the world, and that over 14,000,000 separate works have been published since printing was invented in the fifteenth century. The three largest libraries in the world are the *Bibliothèque Nationale*, Paris, which contains over 5,000,000 volumes, the *British Museum Library*, London, where there are 40 miles of shelves, and an estimated total of about 5,000,000 volumes, and the *Library of Congress*, Washington, D.C., which contains 2,000,000 volumes. A copy of every book published in Great Britain must be sent to the British Museum, *London*, the Bodleian, *Oxford*, the University Library, *Cambridge*, the Advocates' Library, *Edinburgh*, the National Library of *Wales*, and the Library of Trinity College, Dublin; the Copyright Act, which gives Dublin this privilege, still remains in force, and there is a reciprocal provision in the Free State Act by which Free State publishers supply the British copyright libraries with copies of the works they publish. In practice it is only the British Museum that receives a copy of *every* book published; the others, owing to restricted accommodation, limit the privilege to which they are entitled to every work they require. The "best selling" book in 1922 was *If Winter Comes* (A. S. M. Hutchinson), published in England by Hodder & Stoughton and in America by Little, Brown & Co.; upwards of 175,000 copies of this novel were sold in the British Isles between the date of publication (Aug., 1921) and October, 1922.

In the Metropolitan Police Area *Motor Cabs* are fitted with a taximeter, which records the fare by a combination of time and distance. In addition to the legal fare and charges for luggage and extra persons, the Secretary of State has authorised an additional charge of 6*d*. for every hiring of a *Horse Cab*. Notice in relation to the increased charge must be conspicuously displayed inside Horse Cabs.

If hired without Circle, 2 or 4 wheels ...	0	8

GENERAL REGULATIONS.

General Regulations.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring;* if not otherwise expressed, the fare to be paid according to distance ; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

Driver, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time ; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour ; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

Agreement to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40*s*.

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing cab number, name and address of Proprietor, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40*s*., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation ; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare ; or, fraudulently endeavours to avoid payment of a fare ; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40*s*.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner ; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

LAMPS TO BE LIGHTED.

The following regulations apply to lighting and carrying of lamps on vehicles:—

Motor Cars.—A white light placed on the extreme off-side, and visible within a reasonable distance toward which the car is proceeding or intended to proceed. This lamp should show a red light to the rear unless a red light is fixed on the rear of the vehicle. To be lighted one hour after sunset and kept till one hour before sunrise.

A lamp for the illumination of the rear number plate to be lighted *half an hour* after sunset to *half an hour* before sunrise.

Motor Cycles.—A white light to the front, but if it has a side-car attached a red light to the rear must also be shown during the period between *one hour* after sunset and *one hour* before sunrise.

The lamps need not be placed on the extreme off-side unless the side-car is attached or projects beyond the off-side of the motor bicycle.

The front or rear plate must be illuminated *half an hour* after sunset to *half an hour* before sunrise.

Horse Drawn.—If only one lamp is carried it must be on the extreme off-side to show a white light to the front visible for a reasonable distance during the period between *one hour* after sunset and *one hour* before sunrise. If a light is shown to the rear it must be red.

N.B.—In certain localities a red light or red reflex light is requisite.

If a load projects more than 6 ft. to the rear a red light must be shown to the rear.

Traction Engines must show two efficient lights to the front and a red light at the rear between the hours of one hour after sunset and one hour before sunrise from April 1 to Sept. 30, and between sunset and sunrise the remaining six months.

The lamps must be provided with shutters to enable them to be temporarily screened.

HARVESTING.—County Councils have power to make orders exempting vehicles used for the purpose of harvesting from carrying lights.

STAGE CARRIAGES licensed in the Metropolitan Police District must carry a lamp inside, properly lighted, between sunset and sunrise when plying for hire.

HACKNEY CARRIAGE STATISTICS.

During 1922 there were licensed public carriages:—Hansoms, 15; clarences—animal 375, mechanical 7,191; omnibuses—animal 8, mechanical 4,103; tramway cars—mechanical 2,795; total, 14,487. Drivers and conductors:—Cab drivers—animal 550, mechanical 9,283; stage drivers—animal 4, mechanical 11,011; composite licences (stage driver and conductor)—animal 16; mechanical 2,310; conductors, 12,019; total, 35,193.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1922, of 835 men examined, 392 were successful. The proportion of drivers to hackney carriages is approximately 13 drivers to 10 carriages.

LOST PROPERTY.

Of lost property, 102,225 articles were deposited of which 40,556 were claimed by the owners. The number of awards paid to drivers, &c., was 37,670.

STREET ACCIDENTS, GREAT BRITAIN, 1922.

IN addition to the accidents on the various railways of Great Britain, there were no fewer than 70,197 accidents caused by vehicles on streets and roads in 1922. Of this number 2,768 were fatal and 67,429 non-fatal, compared with 2,678 fatal and 59,943 non-fatal accidents in 1921.

LONDON FLAG DAYS.

Since the time when accounts were first insisted upon upwards of £1,539,000 has been collected for various charitable objects at an administrative expense of, approximately, 12½ per cent. Of the total amount available for charities a large proportion has gone to hospitals, which in 1922 benefited to the extent of £109,787, as against £53,550 in 1921. Of a total of £196,613 raised in 1922, £179.933 was collected, and donations amounted to £16,680. Expenses absorbed £25,502, leaving a balance for distribution of £171,111, or approximately 87 per cent.

TITHE RENT CHARGE.

THE Tithe Rent Charge is normally based on the septennial average price of wheat, barley, and oats, the basic price per imperial quarter being taken at 56*s.* 2*d.* for wheat, 31*s.* 8*d.* for barley, and 22*s.* for oats, but has been fixed until Jan. 1, 1926, by the Tithe Act (1918) at £109 3*s.* 11*d.*

On Jan. 1, 1922, there were 10,663 Registered Clubs in England and Wales, an increase of 460 since Jan. 1, 1921. In Wales (incl. Monmouthshire) the number on Jan. 1, 1922, was 433, which are included in the former total.

THE CHILTERN HUNDREDS.

Resignation of Members of Parliament.—No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poynings, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant (under the Place Act of 1742, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

PRIME MINISTER'S RESIDENCE.

Downing Street, Whitehall, S.W. 1.—Named after a politician of Charles II.'s reign. No. 10 is the official town residence of the Prime Minister, No. 11 of the Chancellor of the Exchequer, and No. 12 is the office of the Government Whips. *Chequers*, a country residence for Prime Ministers (from Jan. 1, 1921), was accepted by Mr. Lloyd George in 1917 (with an endowment to maintain the estate, &c.) from Lord and Lady Lee of Fareham. In 1921 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a Tudor mansion in the Chilterns, about 3 miles from Princes Risborough, Bucks, and contains a collection of Cromwellian portraits and relics.

LONDON: PRINTED BY WILLIAM CLOWES AND SONS, LIMITED, DUKE STREET, STAMFORD STREET, S.E.1.

The Indian Empire.

The Indian Empire extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries.—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povalo Schveikovski on the Taghdumbash Pamir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,803,000 square miles, with a population of nearly 319 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 78 per cent. of the population. The details are as follows:—

* Districts and Administered Territories.

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

Population.—The fifth general census of India was taken on the 18th March, 1921. The final census returns gave a population of 318,942,480, as compared with 315,156,396 in 1911 (for details *see* p. 601), an increase in the ten years of about 1·2 per cent. The census total of 1921 is divisible into 247,003,293 (or over 77 per cent.) for British India, and 71,939,187 (or over 22 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1921 33 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

Caste.—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet.

Religions.—The population by religions in 1921 includes 216,734,586 Hindus (68 per cent. of the total), 68,735,233 Muhammadans (21 per cent.), 11,571,268 Buddhists (3·6 per cent.), nearly all in Burma, leaving nearly 7 per cent. for all other religions, including 4,754,064 Christians (seven-twelfths of whom are in Madras, Travancore, and Cochin), 3,238,803 Sikhs, 1,178,596 Jains (a decline), 101,778 Parsis, and 9,774,611 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1921 dependent on pasture and agriculture. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services support over 4,825,000 persons.

Sex.—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945.

Languages.—India has 220 vernacular languages, of extraordinary variety. The languages spoken by 312,912,624 persons in 1911 are grouped in four families; and 23 languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 82,003,235 persons), Bengali (48,367,915), Telugu (23,542,861), Marathi (19,806,636), Tamil (18,128,365), Punjabi (15,876,758), Rajasthani (14,067,590), Western Hindi (14,037,882), after which come Gujarati, Kanarese, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The writers of these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads*; their epics, the *Mahabhârata* and *Râmáyana*, extol their mythical heroes; while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 350 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

of Persia at one time included part of the north-west of India. Alexander (326 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to litigation, and notes the absence of slavery. Asoka (272-231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 695 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606-648), after many years of fighting, made himself master of Northern India, and ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions; but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years; but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutb-ud-din, whose memory is perpetuated by the Kutb Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 *Babar*, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, *Humayun* (1530-56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540-1545. *Akbar the Great*, Humayun's son (1556-1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms. He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet. *Jahangir* (1605-27) received in 1616 Sir Thomas Roe, the ambassador of James I. Under *Shah Jahan* (1627-1658) the Mogul Empire reached the zenith of its glory. Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658-1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and *Bahadur Shah* (1707-12) secured the crown. After four short-lived emperors *Muhammad Shah* (1719-48), grandson of Bahadur, came to the throne. His viceroys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam). In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, *Ahmad Shah* (1748-1754) and *Alamgir II.* (1754-1759), occupied the throne, and were succeeded by *Shah Alam* (1759-1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Sivaji* (1627-1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishvanath* (1712-1720) Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, Sivaji's descendants thenceforth holding a merely nominal position. Under the Peishwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gujarat, Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Govind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780–1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the *Portuguese* enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505–1509), established numerous factories and fortresses; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under Philip II., the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to other parts of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the *Dutch* were driven to trade directly with the East. In 1602, by amalgamating existing trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were gradually captured. By 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. *French* and *Danish* East India Companies were established in 1601 and 1616 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373; and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in 1612. In 1615 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George; in 1653 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay; in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company." After a brief period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant; and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing to Clive's efforts, the Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their goverment. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule *Warren Hastings* (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue system and judicial procedure. Hastings was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of his Council. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of *Lord Cornwallis* (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore War, in which he defeated Tippoo, the son and successor of Hyder Ali. The rule of *Sir John Shore* (1793-98) was uneventful.

The administration of the *Marquess Wellesley* (1798-1805) was distinguished by many important events. Tippoo, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta confederacy, but led to the Second and Third Mahratta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India. During the brief second administration of *Lord Cornwallis* (1805), and that of *Sir G. Barlow* (1805-7), Wellesley's policy of subsidiary alliances was reversed.

Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the *Marquess of Hastings* (1814-23) a severe struggle with Nepaul ended with the Treaty of Sagouli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa enlarged Bombay Presidency to its present dimensions. Lord Hastings in the same year crushed the marauding Pindaris of Central India, who had devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. He encouraged education. *Lord Amherst* (1823-8) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, whith cost 20,000 lives and nearly £14,000,000, but gave to India the provinces of Aracan and Tenasserim, and, practically, Assam.

While *Lord William Bentinck* was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of *Lord Auckland* (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of *Lord Ellenborough* (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely contested battles, ending with Sobraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *vid* the Red Sea, and opened the Ganges Canal. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 this "doctrine of lapse" was applied to Satara, and in 1853 Jhansi similarly became British territory; while on the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord

Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India. A mutiny of sepoys broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty.

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885–6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899–1904 and 1904–5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899–1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 *Lord Ampthill* occupied the post of Viceroy. *Lord Curzon* was reappointed in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905–6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 12 December, 1911, by H.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. A Royal Commission was appointed in 1912 to inquire into the public services in India. In Dec., 1912, the Viceroy took formal possession of the new headquarters at Delhi. The State entry was marred by an attempt on the life of the Viceroy. A Royal Commission was appointed in April, 1913, to examine and report on Indian Finance and Currency The outbreak of war in Europe in August, 1914, was the signal for a great outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Several tribal risings on the North-West Frontier were promptly and rigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Chelmsford succeeded in April, 1916. A strong Commission was appointed to examine and report on the possibilities of further industrial development in India. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Public Services Commission, appointed during Lord Hardinge's administration, reported. Three leading Indians attended the Imperial War Cabinet. Action was taken against the Mahsuds and Mohmands on the North-West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced.

Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The year 1918 was marked by some symptoms of unrest; the Rowlatt Committee, appointed in 1917, reported, and revealed evidence of the association of the Bengal seditionists with German plots; anti-Moslem riots broke out in Berar, and Muhammadans organised agitation leading to disturbances in Madras and Calcutta. The operations against the Marris were closed. The Bombay Government took the first steps towards obligatory primary education; a policy of more complete local self-government was decided on by the Government of India. Reckless speculations in Broach cotton prevailed, and a certain amount of discontent due to high prices was manifested. The Home Rule League continued its activities. The influenza epidemic spread to India, and it is estimated that over 7 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916, issued a report. Two representatives of the Indian people, appointed by the Government of India, attended the Imperial War Cabinet in London. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmsford Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were undertaken. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a "passive resistance" movement, inaugurated by Mr. Ghandi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers which the Government had provided themselves during the War to deal with sedition. The movement spread to Bombay, and the local government was forced to deport Mr. Horniman, the Editor of the *Bombay Chronicle.* A Commission was appointed to enquire into the whole matter of the disturbances and the steps taken to suppress them. The murder of the Amir and the subsequent events in Afghanistan were followed by an inroad of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. A Committee was appointed to enquire into the administration and organization of the Army in India, whose conduct of the campaign on the North-West Frontier, following the troubles with Afghanistan, was much criticised; and (1) to advise in regard to the future of currency and exchange; (2) to investigate the system of prison administration. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. Noteworthy features in the progress of India during the year were the appointment of an Indian, Lord Sinha, as Under-Secretary of

State for India in the Home Government, and the representation of India at the Peace Conference by two Indians, H.H. the Maharajah of Bikanir and Lord Sinha. The policy underlying the Government of India Act, 1919, mainly based on the recommendations of the "Montagu-Chelmsford" Report, viz., the increasing association of Indians in every branch of the Administration, with a view to the progressive realisation of responsible government, was carried forward a further stage in 1920 by the Home Parliament, which, by rules, laid down the details of the constitution of the new Central and Provincial Governments (*see* p. 612). One section of the India Home Rule for India party, dissatisfied with the Act, threatened non-co-operation with the Government in the future working of the reforms, and with the assistance of some Muhammadans, Mr. Gandhi, a Hindu, commenced a movement to carry out the threat, but the support of the "Moderate" wing of the party, including that of Mrs. Besant, was given to the Government. A prominent and distinguished Indian, Lord Sinha, was designated as the first Governor of Bihar and Orissa. The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Bolshevik propaganda created an unhealthy political atmosphere in some quarters. Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber. Unrest, due in some measure to labour trouble, evidenced by an unprecedented number of strikes, and partly to unsatisfied political aspirations, was prevalent during the year. Government, in pursuance of its policy of making India commercially more self-supporting, instituted several inquiries into various trades and industries, and appointed a committee to inquire as to whether the adoption of a system of preferential tariffs would be beneficial. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. Several large works' programmes were sanctioned. A committee was appointed to inquire into the administration of the railways. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, *i.e.*, an exchange rate of Rs. 10 to the £, was adopted. With a view to increasing banking facilities steps were taken to establish a large Imperial Bank. A *High Commissioner for India* in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

In January, 1921, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, 1921. The battle between constitutionalism and revolution continued. Unrest, riots, agrarian disturbances, strikes, and movements designed to embarrass the Government were prevalent. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gandhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrests. The Moplahs, Muhammadan fanatics of Malabar, resisted the ordinary processes of law, and a widespread outbreak of violence ensued, directed against Government, civil officers, and Hindus, forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. The deficit in the Budget, due mainly to war commitments, compelled Government to impose additional taxation. Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England. The Jails Committee reported, and Government announced its intention to abolish the Andamans penal settlement. Large development and irrigation schemes were sanctioned.

In November the Prince of Wales visited India. In 1922 the battle between constitutional and unconstitutional agitation proceeded. The Government, whilst desiring to abstain from interfering with the activities of the non-co-operation party as long as it could afford to do so consistently with its responsibility for the maintenance of law and order, avoided any excessive severity *vis-à-vis* the movement, but arrested Mr. Gandhi, who was sentenced to six years' imprisonment. Attempts were made to secure greater powers for the Indian legislature, for the immediate abolition of the distinction between votable and non-votable items in the Budget, and for the submission of the whole Budget to the vote of the Assembly. A Committee was appointed with a view to making retrenchments and securing economy in the national expenditure. The Budget showed a deficit necessitating additional taxation. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press, and the Indian States (Protection against disaffection) Bill was brought forward in the Legislature, but leave to introduce it was refused. Lord Reading decided to make use of the special powers vested in the Governor-General under the Government of India Act, and, as the passage of the Bill was, in his judgment, essential for the interests of British India, certified it under section 67B of the Government of India Act.

The Fiscal Commission (Sir Ibrahim Rahimtoola, President), reported and made the following recommendations :—The adoption of a policy of protection ; the constitution of an advisory Tariff Board to investigate the claims of particular industries ; a more industrial bias to be given to primary education ; provision of opportunities for the training of Indian apprentices ; development of organisations for increasing the mobility of labour; legislation against dumping; precautions against imports from a country in which the exchange is seriously depreciated, and against any system of export bounties granted by foreign countries; measures for meeting complaints against the railway rates policy and coastal rates; and consideration of the possibility of legislation against shipping rebates. The principles recommended for the guidance of the Tariff Board, as regards an industry claiming protection, are: (1) that it possesses natural advantages; (2) that without the help of protection it is not likely to develop at all, or not so rapidly as is desirable; (3) that it will eventually be able to face competition without protection. Industries essential for national defence should be adequately protected; raw materials and industrial machinery should ordinarily be admitted free and partly manufactured goods, used in Indian industries, should be taxed as lightly as possible; the taxation of articles to which protectionist considerations do not apply should be regulated in accordance with the financial needs of the country. The existing cotton excise duty was condemned; the British Government should announce its intention of allowing the Government of India and the Indian Legislature to decide what action is necessary, in the interests of India. Export duties should be moderate and imposed only for revenue purposes, and only on articles in which India has a monopoly or semi-monopoly. The advantages of recognising the principles of Imperial Preference were pointed out, but their application should be governed by certain principles, viz.:—the approval of the Legislature, no diminution of the protection required by Indian industries, and no economic loss to India after taking into account the economic gain from preference granted by the United Kingdom. In the case of other parts of the British Empire, the principle of reciprocity should be followed. No obstacle should be raised to the free inflow of foreign capital, but Government monopolies and concessions should be granted only to companies registered and incorporated in India, with a rupee capital, having a reasonable proportion of Indian directors, and affording facilities for training Indian apprentices.

A minority of the Commission, consisting of the President and four Indian members considered that immediate steps should be taken to adopt an intense policy of industrialism, and that any discrimination necessary in the interests of the consumers must be decided by the Government of India and the Legislature. Imperial preference cannot be accepted until India has attained responsible Government, but Indian opinion might be inclined to accept the immediate application of Imperial preference provided India were placed at once on the same footing as the self-governing Dominions in the matter. Even under the present political status of India matters might be arranged to bring about in practice the position which the Dominions enjoy, by arranging that the power of initiating, granting, &c., Imperial preference should vest in the non-official members of the Legislature. Negotiations might be opened with the Dominions on the basis of reciprocity, and on condition that the right of the Indian people to a status of complete equality is recognised.

The Hon. V. Srinivasa Sastri visited the Dominions, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Dominions. In external affairs the subject uppermost in the minds of the Indian people was the revision of the Treaty of Sèvres. There was peace on the tribal frontier except in Waziristan. Some of the Wazir and Mahsud tribal sections entered into satisfactory engagements. The Government of India engaged in attempts to arrive at a better understanding with the Union of South Africa regarding the recommendations of the Asiatic Inquiry Commission. The machinery of the Legislature was extended by the appointment of advisory Standing Committees for the various departments. Twenty-three Acts and Regulations supplementing the criminal law were repealed. The Assembly agreed to the proposal to devote 150 crores of rupees (£100,000,000), to the rehabilitation of railways during the next five years. A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province. A Royal Commission, with Lord Lee of Fareham as Chairman, was appointed to consider and report on the organisation and general conditions of service, financial and otherwise, of the Indian Services; the possibility of transferring any of their present duties and functions to services constituted on a provincial basis and the recruitment of Europeans and Indians for such services. The "Inchcape" Retrenchment Committee, appointed in 1922, reported and recommended a total reduction in the Budget of Rs. 19¼ crores (£12,833,000 at 15 rupees to the £), the largest cuts being in military expenditure (Rs. 10½ crores = £7,000,000), railways (Rs. 4½ = £3,000,000), posts and telegraphs (Rs. 137 lakhs = £913,000). The Budget again disclosed a deficiency and the Government proposed to raise the salt tax. Its proposals were defeated in the Assembly, whereupon Lord Reading certified the Bill under the provisions of section 67B of the Government of India Act as essential for the interests of British India. A demand for the adoption of a policy of Protection was brought forward in the Assembly. The Government proposed an alternative motion, accepting the principle of Protection but declaring that it should be applied with discrimination and recommending the appointment of a Tariff Board for one year to investigate the question in a purely advisory capacity. This alternative, which aims at the fostering of the development of industries in India, was accepted unanimously, although strong speeches in favour of free trade in the interests of the agriculturist and labourer were made. The action of the Government implies a policy of discriminating protection: hitherto the Indian tariff has been a revenue tariff. A trade Convention was concluded with Afghanistan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy was further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border: Jandola and Razmak were held by regular troops pending the completion of this road programme. The question of the status of Indians in Kenya excited much interest and controversy. After full consideration His Majesty's Government decided on the adoption of a communal system of representation, under which Indians in Kenya will be granted a wide franchise, and provision will be made for five elected Indian unofficial members on the Council. The policy of segregation as between Europeans and Asiatics in the townships is to be abandoned and the question of immigration is to be further examined. The highlands are to be reserved for white settlers; Indians are to be compensated with the reservation of territory in the lowlands. Whilst on three points decisions favourable to Indians were pronounced the policy of the Home Government conflicts on others with the views of the Government of India and the aspirations of Indians, and demands were made in the Indian Legislature for retaliatory measures. The Secretary of State (Viscount Peel), the Maharajah of Alwar and Sir Tej Mahadur Sapru represented India at the Imperial Conference, at which a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1921 that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, has been given effect to and to what extent it can be further applied. It appears probable that all the Dominions concerned, except South Africa, will act on this resolution. Demands for the expansion of the Indian Constitution were made in the Indian Legislature, but the Secretary of State declined to submit the question to Parliament, on the ground that the experience of the working of the new Constitution had not yet been adequately tested. Under the provisions of the Government of India Act, which lays down that every Council of State shall normally continue for five years and every Legislative Assembly for three years from its first meeting, the first Legislative Assembly of the Central Government and the Provincial Legislative Assemblies (with the exception of Burma) were dissolved and new elections held towards the end of the year.

Imperial Legislation.—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act* (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act, as amended by Acts of 1889, 1907, 1915 and 1919, at least one-half of the members of Council must have served in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 12 and must not be less than 8, and is at present 8. Their term of office is now 5 years, with power of extension. There are now 3 Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. The Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915. The Government of India Act, 1919, confers on provinces a larger measure of independence of the Government of India; it distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature; it provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the major provinces shall be governed, in relation to reserved subjects by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor-General and a Public Services Commission on India. A Statutory Commission is to be appointed 10 years after the commencement of the Act for the purpose of enquiring, among other matters, as to the desirability of a further extension of the principle of self-government in India.

Indian Law.—The law administered in the Indian courts consists mainly of: (1) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

The Government of India.

EMPEROR OF INDIA—H.I.M. GEORGE V.

Secretary of State—The Rt. Hon. VISCOUNT PEEL, G.B.E.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (*e.g.*, foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (*see* pp. and).

The King-Emperor appoints the Governor-General, the Governors of the 9 major Provinces (Bengal, Madras, Bombay, the United Provinces, Bihar and Orissa, the Punjab, the Central Provinces, Assam and Burma), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 7 members including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the *Indian Legislature* consists of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (*see* p. 615 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council; of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament. The seat of the Supreme Government is at Delhi, the summer headquarters being still at Simla.

Business is conducted by 9 Departments—Finance, Foreign and Political, Home, Legislative, Public Works, Commerce, Industries and Labour, Education, Health and Lands, Army, and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Feudatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat, look after the commercial and political interests of India in those quarters. The *Home Department* deals with the internal politics, civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the *Legislative Department.* The department of *Commerce* deals with trade and shipping, ports, &c. The department of *Industries and Labour* deals with industries, stores, labour, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education, Health and Lands Department* has the control of education, local government, sanitation, land revenue and surveys, agriculture, famine, meteorology, forests, foodstuffs, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce Member of Council.

British India is divided into 15 *Local Governments and Administrations*, viz. :—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, and Burma; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Ajmer-Merwara, Coorg, and the Andaman and Nicobar Islands.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government,

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

Under the Government of India Act, 1919, and rules made thereunder, the local governments are given a large measure of independence of the Supreme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, railways, tariffs, etc. Other administrative heads, classified as "Provincial"—viz., local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, &c., are wholly or partly handed over to Provincial Governments with responsibility, subject to certain limitations, within their own areas, for administering them. In the nine major or "Governors'" Provinces—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjab, Assam and Burma—provincial subjects are further divided into "reserved" and "transferred subjects," the administration of, and responsibility for, which rests with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of the Legislative Council by, and hold office during the pleasure of, the Governor. They are directly responsible to the Legislative Council for the administration of the "transferred" subjects, but can be overruled by the Governor if he considers their policy inconsistent with the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control.

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor. The previous sanction of the Governor-General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor-General for the signification of His Majesty's pleasure, but in emergencies the Governor-General may assent to them, subject to disallowance by His Majesty in Council. Governor has powers of assenting to, of withholding assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor-General, who may reserve them for His Majesty's pleasure.

Provincial Budgets are voted on by the Legislative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote: a deadlock is thus avoided in case of irresponsible action by the Legislative Council in the matter of supply.

Of the members nominated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 (18 in the case of Burma) years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tax or municipal rates) are eligible for the franchise. Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and gives the vote to small cultivators and some wage earners. The electorate of 1921 comprised over 5,000,000 persons.

(1) MADRAS (area, 142,330 sq. miles; pop. 42,318,985) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 90 per cent. of the people are Hindus. There are 1,361,000 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil and Telugu. Madura (138,894) and Trichinopoly (120,422), famous for their Hindu temples, are the chief cities after the capital.

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including *Sind*, but not *Aden* and *Perim*, which are also attached to it) contains 122,979 square miles (about equal in size to the British Isles), with a population of 19,291,719. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 76 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. Ahmedabad (274,007), Poona (214,796), Sholapur (119,581), Surat (117,434), and Karachi (216,883), the capital and chief port of Sind, are the most important cities. For Aden and Perim, *see* p. 622.

(3) BENGAL (area of newly-constituted province, 78,699 sq. miles, with population of 46,695,536) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 53 per cent. of the population are Muhammadans and 44 per cent. Hindus. The principal languages are Bengali and Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. Important cities are Dacca (119,450), now the second capital, and Howrah (195,301), a great jute-manufacturing centre adjoining Calcutta.

(4) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 107,267 sq. miles; pop. 45,375,787), forms the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 15 per cent. Muhammadans. Hindi and Western Hindi are the chief tongues. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. Among the important cities may be named the ancient city of Agra (185,532), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (198,447), the great manufacturing centre, Cawnpore (216,436), Lucknow (240,566), Bareilly (129,459), and Allahabad (157,220).

(5) The **PUNJAB** (area, 99,222 sq. miles; pop. 20,685,024) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. More than half the population are Muhammadans, and more than a third are Hindus. The Sikhs number about 3,107,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western and Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 160,218 people.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west. It is the largest province, having a total area of 230,839 sq. miles, about equal to Spain and Portugal, with a population of 13,212,192, These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled; but, owing to remarkable prosperity, the population has increased 9 per cent. in 10 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Karen are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product

of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkyina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin.

(7) BIHAR AND ORISSA (area of new province, 83,181 sq. miles, with pop. of 34,002,189). This province, which came into existence on 1 April, 1912, comprises Bihar, Orissa, and Chota-Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota-Nagpur are ill-watered and liable to drought. Orissa has a variety of races and a considerable seaboard. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1916. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar, and tobacco are cultivated. The bulk of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North-Western, and Bengal-Nagpur.

(8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,057 sq. miles; pop. 10,837,444). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal-Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds, and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,766 sq. miles; pop. 3,075,316), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

(9) ASSAM (area, 53,015 sq. miles; pop. 7,606,230), was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1825. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. Seat of Government, Shillong.

(10) The NORTH-WEST FRONTIER PROVINCE was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu, and Dera Ismail Khan (area, 13,418 sq. miles; pop. 2,251,340, partly estimated). Attached to the Province are the five trans-border political agencies of Malakand, Khyber, Kurram, Tochi, and Wano, together with tribal areas under the control of the Deputy Commissioners of the five settled districts first above mentioned. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

(13) BRITISH BALUCHISTAN (area, 54,228 sq. ms.; pop. 420,648) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin, Thal-Chotiali, Nushki, Zhob, Chagai, Nasirabad, and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan-Baluch frontier was demarcated in 1896–7. To Chaman, on this frontier, a railway runs *viâ* Quetta and is continued to Mirjawa. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

(14) DELHI.—This province (area, 557 sq. miles; pop. 488,188) was constituted on October 1, 1912, out of the Punjab division of Delhi, in pursuance of the policy announced by H.M. the King-Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi.

Chief Commissioner, Hon. C. A. Barron, C.S.I., C.I.E., C.V.O. ....Rs. 3,000

(15) The ANDAMANS and NICOBARS (area, 3,143 sq. miles; pop. 27,086) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands. The principal products are coco-nuts.

Chief Commissioner, Lt.-Col. M. L. Ferrar, C.I.E., O.B.E. ....Rs. 3,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,600 in 1911.)

Aden and Perim.—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1857—form part of the Bombay Presidency, and have an area of 80 square miles and a population of 56,500. Aden is a free port. The traffic in arms and ammunition is subject to special regulations. The total seaborne trade in 1921–22 was £10,908,000. In 1921–22, 1,161 vessels called at Aden, and 380 at Perim. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Straits of Bab-el-Mandeb to Muscat territory at Ras Sair.

Aden: Political Resident, Maj.-Gen. T. E. Scott, C.B., C.I.E., D.S.O.…*per mensem* Rs. 3,000

The *Kuria Muria* Islands, to the S. of Omān, have been in British possession since 1854. In 1834 the East India Company occupied *Sokotra* (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

INDIAN APPOINTMENTS.

THE higher civil administration of British India is recruited from four sources—1. Open competitive examination in England. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in London July–August. Candidates at the 1924 examination must be over 21 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on or before June 2, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. 1. Examination fee, £8. Selected candidates are on probation in England for one or two years, and receive an allowance of £300 if of European domicile, or £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for their guidance. A final examination is held in Indian law, language, &c. A first-clsss passage to India will be engaged for selected candidates. In case of failure to pass the final examination, or failure to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences usually at Rs. 7,200 a year.

The Indian Army.—Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 17½ and 19 years of age (in the case of candidates already serving in the Army the upper limit of age will be 21). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India and by the Army Council, the remainder being offered to candidates in the order of their passing the entrance examination. At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's minimum initial pay is at the present moment Rs. 425 a month (equals £42 10s. at the statutory exchange of 2s. per rupee). Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Indian (Imperial) Police Force.—It has been announced that a competitive examination will be held in London and other centres on June 10, 1924, in conjunction with the Army and Air Force Examination. A fee of £4 will be required from candidates examined in London, and a fee of £5 from those examined in other centres. The regulations provide that a candidate must be a European British subject, and that if he (being a European British subject) or his father or his mother was not born within His Majesty's dominions and allegiance, then at the time of his birth his father was a British subject and still is or continued to be until his death a British subject. Indian and Burmese candidates will be eligible if they have been resident in the United Kingdom for not less than five years. Candidates must be above 19 and under 21 years of age on Aug. 1, 1924; must be unmarried, and if they marry before reaching India will be required to forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London, and must be returned not later than April 15, 1924. Successful candidates will be required to undergo a strict medical examination; will be examined as to their ability to ride, and will be required to provide themselves with uniform, towards which a contribution of £30 will be made by the India Office. Newly appointed officers may be required to provide themselves, in India, with a horse and saddlery, towards the cost of which the Government may contribute up to Rs. 600. Free passage to India will be granted to probationers. The initial pay is Rs. 325 per month, plus an overseas allowance of

Rs. 125 per month in the case of probationers with non-Indian domicile. The pay proceeds by increments to Rs. 675, and thence to Rs. 1,350 per month, subject to efficiency bars, with prospects of promotion to higher posts. Officers are subject to certain Leave, Pension, and Provident Fund Rules, details of which may be obtained from the India Office.

The patronage of the *Secretary of State for India* is small, and is now chiefly dependent on the requirements of the Government of India in the Judicial Department. Some appointments to the *Indian Educational Service*, which includes teaching and inspecting posts, are made on the recommendation of a Selection Committee, constituted by the Secretary of State for India, from among candidates who must have received a liberal education and who seem to be most suitable by the Board of Education or the Scottish Education Department. The age is usually from 23 to 30. Appointments are in the first instance for two years, the salary beginning at Rs.400 a month, rising by annual increments of Rs.50 a month to Rs.1,250, with prospects of promotion if service is extended. Officers of non-Indian domicile receive additional ("Overseas") pay of Rs.150 per month during the first few years, but the amount is increased later. Initial salary and date of increments will be ordinarily determined in future by age. Appointments of *Chaplains* of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplaincies Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains are on probation for two years and receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,300 per month.

The superior Engineer establishment of the *Indian Public Works Department* is engaged on the construction and maintenance of the various public works undertaken by the State in India. Until further notice the Secretary of State in Council will, during each year, make a number of appointments of Asst. Executive Engineers in the Public Works and State Railway Depts. of the Government of India. In making these appointments he will act with the advice of a Selection Committee. Application forms can be obtained from the Secretary, Public Works Dept., India Office, London, and should reach the India Office not later than the April 1. Every European candidate must have been born on or after Aug. 2, 1900, and on or before Aug. 1, 1903. At present 10 per cent. of the appointments made in England are reserved for Indians. Selected candidates will be required to undergo further training on works in India for a period of at least one year. During this period they will be on probation and their final appointment will be made dependent upon the result of such probation. The pay and allowances of Europeans so appointed commence at Rs. 525 a month. The pay rises by annual increments to Rs. 1,625 per month, with possibilities of promotion to higher posts. There is a prospect of pension, and there is also a Provident Fund. Appointments are usually made in June in each year. From time to time appointments to the Locomotive, Carriage, Wagon and Traffic Departments of Indian State Railways are made, full information regarding which can be obtained from the Public Works Secretary, India Office, London.

Indian Forest Service.—In making appointments, the Secretary of State for India in Council acts with the advice of a Selection Committee. Applications for appointment must be made on a printed form to be obtained from the Secretary, Commerce and Revenue Department, India Office, Whitehall, London, S.W. 1. Candidates must be not less than 19 but under 22 years of age on January 1. No person will be deemed qualified who shall not satisfy the Secretary of State that, save as provided in the Regulations, he is a British subject. A European candidate must be prepared to give an undertaking, if selected, that he will not marry before he reaches India. If he marries, after giving such an undertaking, he forfeits his appointment. Every candidate must be of good physique, and good character. Candidates must have obtained a degree *with Honours* in some branch of National Science in a University of England, Wales, or Ireland, or have passed the Final Bachelor of Science Examination in Pure Science in one of the Universities of Scotland. A degree in Applied Science will not be considered as fulfilling these conditions. Candidates are required to produce evidence that they have a fair knowledge of either German or French. Weight will be attached to the possession of a diploma or degree in Forestry. Should there in any year be more candidates considered to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination conducted by the Civil Service Commissioners, on the results of which their final selection would depend. Selected candidates are required to undergo a strict examination by a Medical Board at the India Office. Before appointment a probationer is required to undergo a special course of instruction and to pass examinations in special subjects. The period of probation is in ordinary cases two years. The probationers are required to defray all expenses of lodging, board, tuition, and excursions to forest centres in the United Kingdom while at the University. The Secretary of State for India in Council makes payments to each probationer at the rate of £300 a year, not exceeding a total of £600. In the case of probationers of Indian domicile the rate will be £350 a year, not exceeding a total of £700. The grant of the allowances is subject to certain conditions. On appointment to the Indian Forest Service a probationer's salary commences at Rs. 325 (plus an overseas pay of Rs. 150 in the case of officers in non-Indian domicile) per mensem, and rises by increments to Rs. 1,600, with prospects of promotion.

Further information regarding these and other Indian appointments, viz., to the Indian Agricultural, Civil Veterinary, Geological, Finance, Medical, Telegraph Department (Engineers), Queen Alexandra's Military Nursing, Royal Indian Marine and Bengal Pilot Services, can be obtained, on application, from the Under-Secretary of State, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, which can be consulted at the India Office.

NET REVENUE AND EXPENDITURE.

The figures of Gross Revenue just given include the net receipts of railways and other commercial undertakings without any deduction on account of interest charges, the total receipts from the sale of opium, and the receipts of certain spending departments; while the figures of Gross Expenditure include the interest charges of commercial undertakings, and the cost of cultivation and manufacture of opium. This method of compiling the figures causes the revenue available for administrative purposes and the expenditure on such purposes to appear greater than they really are. A statement of the net revenue and expenditure of the Central Government for the three years under review is therefore given in the table below, which shows the *net* revenue derived from commercial undertakings, after deducting all expenditure including interest charges, similar adjustments being made under other heads of revenue and expenditure by deducting (1) the cost of cultivation and manufacture of opium from sale receipts, and (2) the receipts of the spending departments from the gross expenditure incurred by them. The cost of the establishments maintained for the collection of revenue is not shown as a deduction from revenue, but as a separate head of expenditure.

Under the Government of India Act, 1919, provision was made for the definite assignment to each of the Provincial Governments of a part of the revenues of India. The revenues so allocated consist, in the main, of the receipts accruing from provincial loans and from those provincial subjects which are revenue producing, the principal heads of which are land revenue, irrigation, stamp duties and excise. In addition, a local government is given a share in any expansion of income tax due to an increase of the assessed incomes within the Province. This division of the sources of revenue leaves the Central Government, under present conditions, insufficiently provided. It has, therefore, been arranged that an annual contribution shall be made by eight of the nine local governments to the Central Government. The annual contributions fixed at the outset aggregate 983 lakhs of rupees (Madras 348, Bombay 56, Bengal 63, United Provinces 240, Punjab 175, Burma 64, Central Provinces 22, Assam 15, Bihar and Orissa nil), but these contributions will cease at the earliest possible moment. As a special measure the annual contribution made by Bengal has been remitted for three years with effect from 1922-23. The revised financial arrangements came into force from April 1, 1921, as from which date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government.

BURDEN OF TAXATION.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden in 1921–22 was estimated at Rs. 3·7 per head, or, if land revenue (which is akin to rent) be added, Rs. 5·0 per head. The Budget of 1919–20 introduced a duty of 50 per cent. on excess profits, but this tax was discontinued in 1920–21. The Budget for 1920–21 amended the super-tax law. The Budget for 1921–22 imposed additional taxation under the heads of postal charges, railway surcharge, import duties and taxes on income. The Budget for 1922–23 increased railway passenger fares, postage rates, the general customs *ad valorem* duty on imported goods, the income-tax, and the super-tax. The Budget for 1923-24 raised the salt tax from Rs. 1¼ to Rs. 2½ a maund.

DEBT AND ASSETS.—On March 31, 1923, the debt of India (Central and Provincial Governments) amounted to Rs. 66,730 lakhs (sterling and rupee debt having been combined at the rate of Rs. 10=£1). Miscellaneous obligations (Savings Bank balances, &c.) amounted to about Rs. 8,913 lakhs, besides a charge of Rs. 503 lakhs for various railway annuities. Its advances to Native States, corporations, agriculturists, &c., stood at Rs. 891 lakhs. Other assets were the Gold Standard Reserve of £40,044,000, and the cash balances in England and India, £9,590,000 and Rs. 2,593 lakhs respectively.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *raiyatwari* tenure prevails, and each raiyat, or peasant proprietor, holds direct from the State. In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled raiyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial Governments) in 1921–22 amounted to 3,472 lakhs (£23,148,000).

THE OPIUM REVENUE.—Poppy may now be grown only in parts of the United Provinces (Bengal opium) and in the Central Indian (Malwa) native States. Except in these States the manufacture is a Government monopoly. In 1921–22, 935 chests of Bengal opium were sold for export, in addition to 6,820 chests sold direct to Governments of Hong Kong, Straits Settlements and Netherlands (Indies), &c. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £2,048,000. The expenses of production, &c., were £1,200,000. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited.

* A lakh is 100,000 rupees.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded in recent years, and amounted to lakhs 1,718·6 (£11,457,660) gross in 1921–22 (Central and Provincial Governments).

CUSTOMS.—The net revenue was 3,441 lakhs (£22,940,000) in 1921–22. (For tariff *see* page 630.) The export duty on rice yielded 80·4 lakhs (£536,000), and the countervailing duty on Indian cotton goods 219 lakhs (£1,461,000 in 1921–22. The export duty on jute produced 272 lakhs (£1,813,000).

INCOME TAX is levied on non-agricultural incomes at the following rates:—

Annual Income.	*Rate of Tax per Rupee.**
Rs. 2,000 and over	5 pies
" 5,000 "	6 "
" 10,000 "	9 "
" 20,000 "	12 "
" 30,000 "	15 "
" 40,000 "	18 "

* 12 pies = 1 anna; 16 annas = 1 rupee; 10 rupees = £1 (statutory rate), but at present the rupee has a fluctuating value.

In the case of companies and registered firms, whatever the total income, the rate is 18 pies in the rupee.

Super-tax is leviable in addition to ordinary income tax on incomes of individuals and registered firms above Rs. 50,000, of Hindu undivided families above Rs. 75,000, at 1 to 6 annas in the rupee, and on the taxable incomes of companies above Rs. 50,000 at a flat rate of 1 anna in the rupee.

STAMPS.—Stamps yielded 1,088 lakhs gross (£7,254,000) in 1921–22. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SALT.—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (82 lb.) in 1903, to Rs. 1½ in 1905, and to R. 1 in 1907. It was increased to Rs. 1¼ on March 1, 1916, and to Rs. 2½ with effect from March 1, 1923.

FORESTS.—About 99,000 square miles of forests are reserved and scientifically worked by the State, while about 150,000 square miles besides are under State control. A third of the revenue comes from Burma.

POSTS AND TELEGRAPHS.—The Post Office in 1921-22 conveyed 1,420 millions of letters, postcards, newspapers, &c., and issued 37 millions of money orders. Inland letter rates are the lowest in the world. The length of telegraph wires in India on March 31, 1922, was 412,000 miles, and the number of messages sent in 1921–22 was nearly 20 millions. Their capital cost to the end of 1920–21 was £10,710,000. The Indian Postal and Telegraph services were amalgamated on April 1, 1914. The combined services shewed for the year 1921–22 a deficit of 8½ lakhs (£37,000) The Indo-European Telegraph Department yielded a profit of 4·5 per cent. on its capital expenditure of £1,245,000.

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for traffic on March 31, 1922, was 37,266, while the mileage under construction was 1,823. Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and about 41 per cent on the metre gauge. On March 31, 1922, the total capital at charge was 65,606 lakhs (£437,375,000). The net earnings of the railways in 1921–22 amounted to 2,208 lakhs (£14,725,000.) The number of passengers increased to 577 millions, and the goods traffic amounted to 93½ million tons. Rates are very low, third-class passengers travelling on the average over four miles for a penny. The net loss from State railways was 909 lakhs. (£6,060,000) in 1921–22. The total capital expenditure on State and other railways in 1921–22 was about 2,578 lakhs (£17,188,000).

IRRIGATION.—The total capital outlay on State irrigation works up to March 31, 1921, was £52,408,100, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,061,000. The area irrigated by Government irrigation works was nearly 28 million acres, while the annual value of the crops raised is estimated at nearly 200 per cent. on the capital outlay. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1921–22 to £26,514,000; Interest on Railway Debt and Annuities, £10,014,000; Interest on Ordinary Debt and Management of Debt, £1,641,000; other Debt Services, £1,535,000; Stores, £4,889,000, of which £3,302,000 was for Marine and Military Stores; payments for British forces, troop service, &c., £3,429,000; Army non-effective charges, £2,092,000; Civil annuities, pensions, &c., £2,038,000; Furlough payments, civil and military, £1,464,000; home administration, £304,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy. Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1916, was practically stable at 1*s.* 4*d.* The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 10 rupees in 1920. In 1907 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways; the other half of the profit, and the whole of the interest, being added to the gold standard reserve. In June, 1912, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to

£25,000,000. From April 1, 1921, the interest on investments in the Gold Standard Reserve, when that Reserve reaches £40,000,000, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve. The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 31, 1923, amounted to £45,628,000. Of this sum £1,123,655 has been used for capital expenditure on railways; the remainder has been paid to the Gold Standard Reserve, for the purpose of maintaining the rate of exchange between England and India. On March 31, 1923, the investments of this fund in sterling securities amounted to £40,044,000 (estimated value), while £3,658 was held in cash in England. India has a paper currency. The 1, 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. In 1918 a branch of the Royal Mint was established at Bombay for the minting of gold coins.

ARMY.—In peace time, the Army in India consists, first, of British troops, about 76,000; and, secondly, of Indian troops (largely Muhammadans), about 170,000, excluding followers. In addition, the Imperial Service Troops furnished by native States contribute 21,000, including cavalry, transport corps, and sappers. Further, there are 38,000 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902–9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912–13 to about 6,981 lakhs (£46,540,000) in 1921–22. The estimated net expenditure for 1923–24 is 6,200 lakhs (£41,334,000). During the war of 1914–18 the Government of India recruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about 1·3 million men. 1,215,000 officers and men were sent on service overseas from India; the total Indian casualties were 101,000. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved. India has an Auxiliary Force on a volunteer basis. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of ten sea-going vessels, and numerous smaller steamers and launches.

EDUCATION.—Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. It has appealed to the natural intellectuality of the people, and has succeeded only partially in stimulating practical application. There are 14 Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Dacca, Aligarh (Muhammadan), Lahore, Hyderabad, Mysore, Lucknow, Rangoon and Delhi. In State institutions education is secular. The institutions in 1920–21 numbered 206,000, and the scholars 8,377,000, including 1,413,000 females. Of the institutions, about 84 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1920–21, £11,182,000, £2,530,000 came from fees, and £6,711,000 from provincial revenues or local and municipal funds. The census of 1911 showed that only 106 males and 10 females per thousand can read and write.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1919–20 numbered 739, controlling a total population of nearly 17½ millions, and receiving an income of £4,968,000 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £2,639,000 from other sources (excluding loans). Out of 10,187 members of municipal bodies 9,389 were Indians, and 8,567 were non-official. In almost all districts in British India there are local district boards, partly representative. Nearly 40 per cent. of their total expenditure of about £6,629,000 in 1919–20 was devoted to civil works, 28 per cent. to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are about 11,000 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1919, 2,283,000 civil suits were instituted; 2,135,000 persons were tried, and 1,024,000 convicted, in criminal cases, of whom 584 were sentenced to death, 2,676 to transportation, and 203,396 to imprisonment. The strength of the police in 1919 was 12,924 officers and 190,844 men. There were 773 prisons, with a daily average of 127,500 prisoners. At the convict settlement of Port Blair (Andamans) there were 11,553 prisoners on March 31, 1920.

VITAL STATISTICS.—The reporting of vital occurrences is still defective, and proposals have been formulated with a view to securing more complete and accurate vital statistics. The recorded death rate for British India in the decennium ended 1913 ranged between 38·21 per 1,000 in 1908 and 28·72 in 1913; it was 35·9 per 1,000 in 1919. There were over 7 million deaths from influenza during 1918. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhœa, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1919 were about 10,540,000 in India as a whole. Over 20,000 people were killed by snakes in 1919. In 3,242 hospitals and dispensaries, maintained mostly from public funds, 35,270,000 patients were treated in 1919. The number of persons vaccinated in 1919 was 10,740,000. According to the census of 1911 there were 110,000 lepers.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical, and archæological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA.—Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. During the five years ending 1913–14 both imports and exports were, on the average, twice as great as they were 25 years ago. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure, but in 1920–21 and 1921–22 there was an excess of imports. The table below exhibits the leading figures for the last five years in thousands of pounds sterling (Rupees being converted at the rate of 15 to the £).

In 1913–14 both imports and exports of merchandise were of unprecedented magnitude, but the outbreak of war during the course of the year 1914–15 brought the figures for the year down to the level at which they stood five or six years earlier. There was, however, a recovery in 1916–17. The rise in prices was a very potent factor in the increase in values During the year 1922–23 as compared with 1921–22 thevalue of the imports decreased by Rs. 408 lakhs (£2,720,000), and the exports increased by Rs. 5,104 lakhs (£34,032,000). In imports the principal articles showing increases were:—Cotton yarns and manufactures (Rs. 1,319·2 lakhs = £8,794,800), metals, other than iron and steel and manufactures thereof (Rs. 186·7 lakhs = £1,245,000), non-metallic mining and quarry products other than coal (Rs. 147·5 lakhs = £983,400), spices (Rs. 51·9 lakhs = £346,300).

In the export trade sugar increased by Rs. 92·2 lakhs (£614,900), raw and waste cotton, Rs. 52·6 lakhs (£351,200), hides and skins, Rs. 39·3 lakhs (£261,800), fruits and vegetables, Rs. 27·3 lakhs (£182,100), and woollen yarns and manufactures, Rs. 26·4 lakhs (£176,100). There were decreases in apparel, Rs. 50·9 lakhs (£339,300), and cotton yarns and manufactures, Rs. 29·3 lakhs (£195,000), &c.

As will be seen, the bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1922–23 (converted at Rs. 15 = £1):—

CUSTOMS DUTIES.—The general import tariff, which stood at 5 per cent. *ad valorem* since 1894, was raised to 7½ per cent. in 1916, to 11 per cent. in 1921, and to 15 per cent. in 1922. The principal exceptions to the general rate are as follows:—Cotton twist, yarn and thread pay 5 per cent., but the duty on other cotton goods is 11 per cent., an Excise duty of 3½ per cent. being levied on those woven in Indian mills. Arms and ammunition, and certain "luxury" articles, including silver manufactures, pay 30 per cent., sugar 25 per cent., cigars and cigarettes 75 per cent., spirits generally Rs. 21 As. 14 a gallon, salt Rs. 2½ a maund (82 lb.), gold and silver plate 30 per cent., Kerosene As. 2 P. 6 (with an additional As. 6 per gallon on motor spirits; an excise duty of As. 6 per gallon is levied on motor spirit and an excise duty of A. 1 per gallon on kerosene produced in India), coal As. 8 a ton. Machinery, grain, tea-chests, printing materials, iron, steel, and railway material pay 10 per cent., and a few other articles pay 2½ per cent. The duty on manufactured tobacco is Rs. 2 As. 4 per lb., matches Rs. 1 As. 8 per gross, beer As. 8 per gallon, perfumed spirits Rs. 36 a gallon. Gold, metallic ores, living animals, raw hides, skins, raw cotton and wool, certain agricultural requisites, quinine, and a few other articles are free. There are export duties of As. 3 a maund on rice, Rs. 1½ per 100 lb. on tea, Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, in the case of which the rate is Rs. 1¼ per bale; Rs. 20 per ton on jute sacking, Rs. 32 per ton on hessians, and 15 per cent. *ad valorem* on raw hides and skins, with a rebate of two-thirds of the duty on hides and skins exported to countries within the British Empire.

SHIPPING.—In 1921–22 the number of vessels engaged in the foreign trade which entered and cleared at ports in British India was 8,037, with a tonnage of 15,655,000. Of this tonnage, nearly 80 per cent. was under the British flag.

PORTS.—The chief ports are Calcutta, Bombay, Karachi, Rangoon, and Madras. These ports are administered by port trusts having wide powers, but subject to Government supervision.

FOREIGN LAND TRADE OF INDIA.—The most important countries in the land trade are Nepal and the Shan States. The imports of merchandise and treasure in 1921–22 were £10,077,000, and the exports £8,387,000.

AGRICULTURE is by far the most important occupation of the people of India. In British territory in 1920–21, 239 million acres were cropped, a decrease of nearly 16 million acres as compared with 1919–20. Of the total area cropped about 9 per cent. was under wheat, 33 per cent. under rice, and 36 per cent. under other food-grains and pulses, 5 per cent. under oilseeds, and 7 per cent. under cotton, jute, and other fibres. Jute cultivation has been extraordinarily profitable. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 49 million acres. The agricultural departments (central and provincial), which have been much developed since 1906, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c., and distribute seeds. There is also a civil veterinary department.

BANKS AND CO-OPERATIVE CREDIT SOCIETIES.—Besides the three Presidency Banks, closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. Much success has been achieved in rural districts by co-operative credit societies. In 1919–20 there were in British India and Indian States 1,394 central, 36,716 agricultural and 2,662 non-agricultural societies, with a total membership of 1,521,148 and a capital of £14,270,000.

MINERALS.—The output of coal in India in 1922 was 19,011,000 tons. The production has much increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 299 millions in 1922. The production of salt is about 1,450,000 tons. The production of manganese ore in 1922 was about 474,000 tons, and of saltpetre 11,700 tons. The yield of gold (nearly all from Mysore) was about 438,000 oz. in 1922. There is a considerable output of mica and a fluctuating output of rubies and jade. Monazite and tungsten ore have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1922 was 125 tons, and of the latter 943 tons.

MANUFACTURES.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 263 cotton mills at work in British India and Native States in 1919–20, mostly in Bombay and Ahmedabad, contained 6,714,000 spindles and 118,000 looms. Up-country cotton mills have increased. The production in 1919–20 was 636 million lb. of yarn (mostly of low counts) and 384 million lb. of woven goods. There is a tendency to produce finer yarns and to pay more attention to weaving. The 76 jute mills, mostly situated in or near Calcutta, contained 840,000 spindles and 40,000 looms. There were, in 1919, 7 woollen and 9 paper mills, 16 breweries, and various other factories.

STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £581,200 (£233,000 from Mysore) were paid to the Government of India in 1921-22. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial Legislative Councils cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 709,583 square miles, and a population of 71,939,187. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Imperial Service troops. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 693, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 631–2 are the names of 73 ruling chiefs who have salutes of eleven guns or more with some particulars of their States. Some well-known Indians of title, such as H.H. the Agha Khan, G.C.S.I., G.C.I.E., the Maharaja of Darbhanga, G.C.I.E., and the Maharajah of Burdwan, K.C.S.I., K.C.I.E., are not ruling chiefs.

The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, Gwalior, Indore, and Travancore and Cochin.

The Indian States may be thus classified:— 1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 404,187—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore.* This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. The reigning Gaekwar was the adopted heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 141,735) was granted to Gholab Sing by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala.* 7. Rajputana, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 9,844,384) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur.* The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The States of *Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency *Bhopal*, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. 9. The Malayalim States of *Travancore* and *Cochin*, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur. 11. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 12. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 13. The Southern Mahratta States. 14. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 15. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

NEPAL.

Sovereign, His Majesty Maharaja Dhiraja Tribhuhana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jang; *suc.* 1911. Salute in British territory, 21 guns.

Prime Min., H.H. Maharaja General Sir Chandra Shamsher Jang, Bahadur Rana, G.C.B., G.C.S.I., G.C.M.G., G.C.V.O., D.C.L.

Nepal (area, about 54,000 sq. miles; pop. 5,639,092) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. In 1921-22 its exports to British India were £4,096,000, while its imports amounted to £1,687,000. The chief trade route is that between Kathmandu and the Bengal frontier (76 miles). Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814–6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister, who paid a most successful visit to England in 1908. The British Envoy does not interfere in internal affairs. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

Bhutan (area, about 20,000 sq. miles; pop. about 350,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, Sir Ugyen Wangchuk, K.C.S.I., K.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India in 1920-1 was £86,000. There is no British Resident.

Afghanistan lies on the N.W. frontier of India. Estimated area, 250,000 sq. miles, and pop. 7,000,000. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896–7), on the N. by Asiatic Russia (boundary fixed 1886–7 and 1893–5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan (with Qataghan, Kafiristan, and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimena, which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1880–1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. It comprises about 90,000 regulars and irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khaiber Pass route, from Kabul to Peshawar (220 miles), along which a motor service was established by the late Amir, and the road from Kandahar to Chaman (70 miles). The Sind-Pishin railway is now completed to the

Baluchistan-Persian frontier. The trade of Afghanistan with India in 1921–22 was about £1,140,000. The exports to India are mainly fruits and nuts, raw wool, and *ghi*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £1,500,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904–5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence.

His Majesty the late Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrulla Khan, by a *coup d'état* thereupon seized and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognised as, Amir. Afghan troops crossed the Indian frontier on May 2, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by the Amir and a treaty of peace was signed in August. . By this treaty Afghanistan is left officially free and independent, both internal and external.

A treaty was signed by representatives of Afghanistan and Great Britain on the Nov. 22, 1921, by which the two Governments agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government are allowed to import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted, while separate Postal and Trade Conventions are to be concluded in the future.

MESOPOTAMIA AND THE PERSIAN GULF.—For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. The British Government have been entrusted with the mandate for Mesopotamia. Municipal Councils, representative divisional councils, and a Council of State have been set up. Emir Feisal was elected King in 1921. The port of Basra has been greatly developed and a large capital expenditure has been incurred on railways during the British occupation. *High Commr., Mesopotamia*, Sir Henry Dobbs, K.C.S.I., K.C.I.E. (*See also* p. 708.)

Bahrein (capital, Manama), governed by Sheikh Sir Hamid Isa bin Alial Khalifah, K.C.I.E., C.S.I., and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Hasa). It is the headquarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export; rice, cotton goods, dates, sugar, and spices the chief imports. In 1919–20 the value of the exports was £946,000, and of the imports £1,414,000. The people (about 110,000) are Muhammadans. The Sheikh has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrein. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Omān* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court.

The independent tribes on the *Pirate* (Arab) *Coast* from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *viâ* Lingah and Bahrein.

Important caravan routes converge at *Koweit*, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

PERSIA (*q.v.*) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is conterminous with Persia and Afghanistan. The Trans-Caspian Railway runs, *viâ* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kuskh on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways.

Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. There is a British consul-general at Kashgar (Lt.-Col. P. T. Etherton). Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) *viâ* Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. The total trade in 1921-2 was about £605,000. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have so far refused to ratify it.

Yunnan is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. The direct trade was about £1,605,000 in 1921-2. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Têng-yuëh and Ssumao, near the Burma frontier, are treaty "ports." There are British consuls at Têng-yuëh and Yunnan-fu.

SIAM (*q.v.*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiengmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. In 1921-2 the value of the total trade was about £544,000. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

PHYSIOGRAPHY.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. The boundaries between the Ungava district of the Labrador peninsula (transferred to Quebec in 1912) and the Labrador coast region of Newfoundland are expected to be settled shortly by a Judicial Commission.

Relief.—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 13,068 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,539 feet, and Mount St. Elias, 18,000 feet, both in the Yukon.

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The *Senate* consists of 87 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for *Ontario*, 24 for *Quebec*, 10 for *Nova Scotia*, 10 for *New Brunswick*, 4 for *Prince Edward Island*, 3 for *British Columbia*, 6 for *Manitoba*, 6 for *Alberta*, and 6 for *Saskatchewan*; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the owner of a property qualification amounting to $4,000. The Speaker of the Senate is chosen by the Government of the day. The *House of Commons* is elected every five years at longest, and the present (Fourteenth) Parliament consists of 235 members, elected as follows: 82 for *Ontario*, 65 for *Quebec*, 16 for *Nova Scotia*, 11 for *New Brunswick*, 15 for *Manitoba*, 13 for *British Columbia*, 4 for *Prince Edward Island*, 12 for *Alberta*, 16 for *Saskatchewan*, and 1 for *Yukon*. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec. 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive $4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Feb. 6, 1916, the new buildings being started the same year; the foundation stone was laid by H.R.H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1917, and the corner stone of the main tower by H.R.H. the Prince of Wales, Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex-Speaker of the House of Commons of the United Kingdom) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons.

THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

DEFENCE.

NOTE.—At the last session (1922) of the Canadian Parliament an Act was passed creating "A Department of National Defence," combining the present Department of Militia and Defence, the Department of the Naval Service and the Air Board.

Service in the Militia is universal and compulsory on all male citizens from 18 to 60. Service in the *Active Militia* is for 3 years with 8–16 days annual training. The *Peace Effective* consists of a Permanent Force of 3,674 officers and men, and 140,834 Active Militia. The *War Effective* consists of four classes: the unmarried men 18 to 30; the unmarried men 30 to 40; the married men 18 to 45; and, finally, the remaining male citizens of 18 to 60.

Expeditionary Force.—The number enlisted up to the cessation of hostilities was 595,441, of whom 418,052 were sent overseas. Over 80% of all enlistment was voluntary. The total outlay for the War is estimated at $2,000,000,000.

EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (1920) 31,814 elementary and secondary schools (attendance at the former being compulsory except in the Province of Quebec), with over 1,804,680 pupils; and 65 universities and colleges with 51,878 students. The 23 universities had 31,792 students in 1920–21.

The live stock included 3,648,871 horses, 9,719,896 cattle, 3,263,525 sheep, 3,915,648 swine, and 43,422,991 poultry.

In dairy produce the total Dominion output of butter was 152,501,900 lb., valued at $53,453,282, and of cheese 135,821,116 lb., valued at $21,824,760.

Fur Farming.—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were 1,026 fur farms in the Dominion in 1922, 977 of which were fox farms, the remainder being divided between mink, raccoon, marten, skunk, fisher, Karakul sheep, beaver, and muskrat. The total number of animals on the farms at the end of 1922 was 30,782, valued at $5,864,153; born in captivity, 19,199; sold from farms, 4,339, value $938,918; pelts sold, 6,024, value $598,607, the total sale for live animals and pelts being $1,537,525 as compared to $1,415,231 in 1921. About 42 per cent. of the industry is situated in Prince Edward Island.

Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch in the calendar year 1921 was $34,931,935 as against $49,241,339 in 1920 and $60,250,544 in 1918, the banner year of the fishery harvest. The capital invested in vessels, &c., engaged in catching operations in 1921 was $26,353,321, and the number of men employed 55,157. The capital invested in canning and curing establishments is $19,411,990, and the number employed 14,104.

Lumbering.—The total value of production, including (*a*) logging operations and (*b*) mill operations, was in 1920 $408,831,482, and in 1921 $259,569,753, a decrease of approximately 35 per cent. The principal items of production in 1921 were sawn lumber $82,488.585, shingles $10,729,096, and laths $4,188,121. The logs cut were valued at $46,513,623, the pulpwood production at $52,900,872, and railroad ties $14,571,270.

Industrial Statistics.—Industrial establishments of all kinds in 1920 had a total capital of $3,433,276,053, the value of the products being $4,024,739,463. These industries employed 685,349 hands, the total pay roll for whom was $816,055,139.

Minerals.—The metals produced in 1922 were valued as follows: Gold, 1,263,364 oz. ($26,115,050); silver, 18,581,439 oz. ($12,576,758); copper, 42,879,818 lb. ($, ,); nickel, 17,597,123 lb. ($6,158,993); lead, 93,307,171 lb. ($5,817,702); cobalt, 569,960 lb. ($1,852,370); zinc, 56,290,000 lb. ($3,217,536); asbestos, 163,706 tons ($5,552,723); coal, 15,157,431 tons ($65,518,497); gypsum, 559,265 tons ($2,160,898); salt. 181,794 tons ($1,628,323); natural gas, 14,682,651 M. cu. ft. ($5,846,501). The total value of the mineral output, 1922, was $184,297,242.

Canals.—In 1922 the vessels passing through the canals of the Dominion numbered 29,952, of 14,224,315 tons. There are six systems under control of the Dominion Government with a total waterway of 1,594 miles (of which 117 miles are constructed canals).

Posts and Telegraphs.—There were 12,247 post-offices in 1920. The *net* postal revenue was $26,554,538 in 1921–22. In 1922 there were 3,761 rural mail delivery routes on which were erected 198,729 boxes. The length of Government telegraph lines in 1921 was 23,178 miles, and of other lines 18,864 miles. In 1922–23 there were 11,882 wireless and radio stations, 9,956 of which were private receiving stations. There are long-distance stations at Vancouver, B.C., with a range of 7,000 nautical miles, at Glace Bay, Cape Breton and at Montreal with a range of 3,000 nautical miles. Messages handled by radio-telegraph stations during 1922–23 numbered 311,732. Twenty-nine Government steamers are equipped with wireless, having a range of 100 to 1,000 miles, or an average of 172 miles.

On December 31, 1921, there were 902,090 telephones and 2,268,271 miles of telephone wire in use. The earnings amounted to $36,986,913, and the expenses to $30,080,035.

Shipping.—The sea-going and lake mercantile marine of Canada on Dec. 31, 1918, consisted of 4,204 sailing vessels and 4,366 steamers (total net tonnage, 1,016,778). The sea-going vessels entered and cleared at Canadian ports in 1920 were: Canadian 14,929 (6.861,202 tons), British 4,239 (10,471,403 tons), Foreign 17,170 (10,261,865 tons); total tonnage 27,594,470. The number of vessels employed in the coasting trade of Canada was 63,131, with a registered tonnage of 27,895,879.

Banking.—There were 17 chartered banks on Dec. 30, 1922, with 4,651 branches, with liabilities of $2,364,822,657, and assets of $2,638,776,483. The total of deposits in Canadian chartered banks at the end of 1922 was $2,120,997,030. The balance of undrawn deposits in the Post Office and Government savings banks on March 31, 1922, was $34,666,834.

Agriculture and Live Stock.—The total area is 234,163,200 acres, and in 1921 the area of cleared land was 14,961,176 acres, of which 10,075,073 acres were under crops. The total value of the agricultural production in 1921 was $441,418,000. Cheese factories produced 103,432,696 lb. of cheese valued at $18,676,380, and creameries made 42,817,304 lb. of butter valued at $16,421,778. In 1921 there were 694,237 horses, 2,890,113 cattle, 1,081,828 sheep, 1,563,807 pigs, and 11,458,206 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

The *Ordinary Receipts* of the Provincial Government for 1920 were $25,981,517, and the *Ordinary Expenditure* $25,880,843.

Log Products.—The total production of log and timber products and wood pulp amounted in 1920 to $43,147,777, or 25 per cent. of the lumber and pulp trade of the whole Dominion.

Manufactures.—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1919 was $1,737,536,546. There were, in 1919, 322,300 employees, an invested capital of $1,583,161,271, as against $715,531,839 in 1915, and an annual wage bill of $336,578,269.

Minerals.—Ontario is the leading mineral Province in the Dominion, the output in 1921 being $54,505,770. The principal metals are: silver, $6,900,000, nickel, $6,752,615, and copper, $1,780,948.

Hydro-Electric Power.—One of the greatest Government-owned public utility organisations in the world is the Ontario Hydro-Electric Commission, supplying light and power from Niagara and elsewhere. These works are now developing 400,000 horse-power, and a further development of 300,000 horse-power is now under construction.

Principal Cities.—CAPITAL, TORONTO, population (1921) 521,893, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (141,151); Ottawa, the Federal capital (107,845), with a large lumber trade and woodenware manufactories; London (60,959); Brantford (29,440); Kingston (21,753); Peterborough (20,094); Windsor (38,591); Fort William (20,541); Kitchener (21,763); Guelph (18,128); St. Catharine's (19,891); Sault Ste. Marie (21,092).

QUEBEC.

Area and Population.—The Province of Quebec contains an area estimated at 706,834 square miles, with a population (1921) of 2,361,199, an increase since the last Census of 355,423. In 1912 the Province was enlarged by 351,780 square miles by the addition of the greater part of the Labrador Peninsula, known as *Ungava* (or New Quebec).

Government.—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of

21 members appointed for life, and a Legislative Assembly of 86 members elected for five years to represent the same number of electoral districts in the Province.

Finance.—The actual revenue for the year 1923 was $21,634,641 and the actual expenditure $20,190,275. The Debt is stated at $57,196,280.

Production and Industry.—The total value of manufactured products in 1920 was $1,120,263,564 (1905, $387,900,585), the principal manufacturing centres being (1920): Montreal ($593,881,752), Quebec ($45,121,279), Sherbrooke ($22,518,034), Lachine ($15,682,251), and Hull ($16,623,648). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 130,000,000 acres, of which 45,000,000 are under licence to cut timber. The wood-pulp industry is assuming great importance; several large factories (44) have recently been built, and the value of the output, which was only $2,516,683 at the Census of 1911, was, in 1921, $85,645,067. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1922, was 7.978,030 acres. In 1922 the value of dairy industry products was cheese 39,679,901 lb. (valued at $6,307,581), and butter 52,529,344 lb. (valued at $18,110,304).

Education.—The Superintendent of Instruction, assisted by a Council of 44 members, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1912, 7,733 schools with 548,251 scholars, including the high and superior schools and 14 normal schools supported by the State. There are also Schools of Agriculture, Commercial and Classical Schools, and four Universities—two Protestant (McGill College, Montreal, and Bishop's College, Lennoxville); and two Roman Catholic (Laval University, Quebec, and Montreal University).

Principal Cities.—CAPITAL, QUEBEC (population, 95,193), historical city visited annually by thousands of tourists, and the great seaport town of Canada; and Montreal (population, 618,506), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (24,117), Sherbrooke (23,515), Trois Rivières (22,367), Verdun (25,001).

NOVA SCOTIA.

Area and Population.—NOVA SCOTIA is a peninsula between 43° 25′–47° N. lat. and 59° 40′–66° 25′ W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,428 square miles (360 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1921, of 523,837, an increase since the last census of 31,499 persons.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 43 members.

Agriculture and Live Stock.—About 10,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1922 there were 5,265,000 acres of land occupied, of about 2,093,633 acres were under crop, 3,166,822 acres in pasture and partially wooded lands, of which about 70,000 acres were in gardens and orchards. Hay is the most important crop of the Province. Fruit is extensively cultivated, and Nova Scotia apples yielded a crop of 1,600,000 barrels in 1922, the principal fruit belt being the Annapolis Valley. The products of the farms in 1922 was valued at $34,318,500. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at $80 per 100 acres, or 80 cents per acre for any additional quantity. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax.

Manufactures.—In 1920 the total value of the manufactures was $113,059,099, as against $70,860,756 in 1915. The capital invested was $148,194,530, and 28,342 hands were employed.

Fisheries.—The total value of the fish marketed in 1922 was $12,720,000, and the number of persons employed was 32,000.

Minerals.—The mineral product in 1922 was valued at $37,574,000; the coal deposits are extensive and are estimated to last for 200 years. 4,642,196 gross tons were produced in 1922. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

Principal Cities.—CAPITAL, HALIFAX (population 58,372), one of the terminals of the Intercolonial Railway Branch of the Canadian National Railways, with a magnificent harbour, is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers is one of the leading industries. Other towns are Sydney (22,545); Glace Bay (17,007).

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of 131,495, inhabitants. The chief city, Sydney (pop. 22,545), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The plate mill recently erected will supply the steel plates required by the various steel shipbuilding plants of Canada. The Canadian Government Railway connects the island with the mainland.

NEW BRUNSWICK.

Area and Population.—NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47′—69° W. long., and comprises an area of 27,985 square miles, with a population in 1921 of 387,876, an increase since the last census of 35,987 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Finance.—The ordinary receipts for 1922 were $3,117,445, and the ordinary expenditure $3,046,869.

Agriculture and Live Stock.—The total land area is 18,663,000 acres, of which 1,205,817 acres were under field crops in 1922. The total value of the field crops in 1922 was $32,000,000. The live stock (1922) included 303,115 cattle, 236,031 sheep, 85,260 pigs, and 70,958 horses. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; the capital invested in this industry is upwards of $5,000,000, giving employment to 22,000 persons. In 1922 the cheese factories in operation produced 918,496 lb., value $145,266, and the creameries 1,218,969 lb. of butter ($445,673).

Manufactures.—The value of the total output of manufactured goods in 1920 was $113,755,129 against $35,422,302 in 1910, the principal manufacturing centre being St. John ($40,263,494). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL, FREDERICTON; population (1921), 8,114. St. John (pop. 47,166) is one of the principal winter ports of Canada, and is connected by C.P.R. and Intercolonial Railways with Montreal; Moncton (17,488).

MANITOBA.

Area and Population.—Manitoba, formerly the Red River Settlement, is situated in about the centre of the continent, between 49°—60° N. lat. and 95°—101° W. long., with a total area of 251,832 square miles and a population (1921 Census) of 610,118, an increase since the last census of 148,724.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 6 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of $1,500.

Lieut.-Governor, Hon. Sir James A. M. Aikins (1 Aug., 1916)	$9,000

Agriculture and Live Stock.—The total land area in Manitoba is 148,432,640 acres of which 6,858,240 acres were cultivated in 1922. The soil is fertile and productive (wheat yield, 1922, 60,050,880 bushels from 3,091,330 acres, or 19·42 bushels per acre), immigration is invited and encouraged and liberal grants of land are made to settlers. The value of the crops in 1922 was $98,401,000. The live stock included 374,632 horses, 740,740 cattle, 112,863 sheep, 235,214 swine, 3,612,208 poultry. The cheese output was 225,000 lb., valued at $37,687, and 19,736,945 lb. of butter ($5,714,876).

Manufactures.—The total value of the manufactured products in 1920 was $168,363,914 as against $12,927,439 in 1900. The capital invested in manufacturing enterprises amounted to $118,461,724 and the hands employed 28,787. In 1922 the Province had 4,418 miles of railway.

Principal Cities.—CAPITAL, WINNIPEG; population (1921), 179,087, the third largest city in Canada. Brandon (15,397), St. Boniface (12,821), Portage La Prairie (6,766).

BRITISH COLUMBIA.

Area and Population.—British Columbia has a total area estimated at 355,855 square miles, with a population (Census of 1921) of 524,582; the Census of 1911 gave 392,480 (251,619 males and 140,861 females), an increase since the former Census of 213,823.

Government.—The Government consists of a Lieutenant-Governor and an Executive Council, together with a Legislative Assembly of 47 members.

Lieut.-Governor, Hon. W. C. Nichol	$9,000
Private Sec., H. J. S. Muskett	2,400

Finances.—The ordinary receipts of the provincial government in 1920 were $13,861,603, and the expenditure $11,568,003.

Agriculture and Live Stock.—The field crops of British Columbia were valued in 1921 at $20,448,000, which was a falling off from previous years. The fruit crop in 1921, however, was the heaviest on record, 4000 growers harvesting $35,000,000. The live stock included 44,600 horses, 261,400 cattle, 51,500 sheep, 41,500 swine and 1,447,000 poultry. The butter output totalled 2,818,500 lbs., valued at $1,277,409, and the cheese 422,000 lbs., worth $80,540.

Production and Industry.—The total value of the output of manufactures in 1921 was $243,250,000 (1917, $68,500,000), the principal manufacturing centres being Vancouver and Victoria. The yield of the other industries in 1921 was: minerals, $38,045,000; lumber, $54,394,000; fisheries (1920), $22,329,161. There are extensive coal measures, and a vast and compact area of merchantable timber; the mines have produced over $700,000,000, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are miles of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. Shipbuilding (1918) 145,000 tons, valued at $25,000,000. The principal exports are fish, coal, gold, silver, minerals, and timber.

Principal Cities.—CAPITAL, VICTORIA. Population 1921, 38,727. Other centres are Vancouver (117,217), New Westminster (14,500), Nanaimo (9,088).

PRINCE EDWARD ISLAND.

Area and Population.—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°–47° N. lat. and 62°–64° 30′ W. long. It is about 130 miles in length, and from 4 to 34 miles in breadth; its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1921) 88,615 (47,069 males and 46,659 females in 1911), a decrease since the last census of 5,113 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government.—The Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people, 15 as Councillors (with a property qualification) and 15 as Assembly-men (on manhood suffrage).

Lieut.-Governor, Hon. Murdoch MacKinnon (1919)	$7,000

Agriculture and Live Stock.—The value of the field crops in 1922 was estimated at $10,889,800. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from $20 to $60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity is an established and profitable industry. There are about 360 fox ranches, conducted by incorporated companies and private partnerships or individuals. The live stock included 32,830 horses, 143,442 cattle, 105,703 sheep, 37,351 pigs and 845,673 poultry.

Manufactures.—The total value of the manufactures in 1922 was $4,234,132, against $2,326,708 in 1900.

Principal Cities.—CAPITAL, CHARLOTTETOWN (Pop. 12,347), on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Summerside (3,230), Souris (1,100), and Georgetown (882).

ALBERTA.

Area and Population.—The Province of Alberta has an estimated area of 255,285 square miles, including about 2,500 square miles of water, with a population (1921) of 588,454, an increase since the 1911 census of 214,159.

Government.—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 61 members, elected for five years, representing 52 electoral districts into which the Province is divided. The Executive Council consists of eight members.

Lieut.-Gov., Hon. R. G. Brett, LL.D. (1915)	$9,000

Agriculture and Live Stock.—There is a succession of wheatfields, homesteads, villages, and towns, and settlers from the U.S., Eastern Canada, and the British Isles arrive in annually increasing numbers. The total area in crops, 1922, was 10,005,609 acres. The Department of Agriculture in the Provincial Government has established nine Demonstration Farms at different points, and on three of these are free schools of agriculture. Free homesteads are available for thousands of settlers in desirable localities. The value of the field crops in 1922 was estimated at $100,542,204; wheat, $50,597,868; oats, $15,620,287; hay and clover, $3,750,400; grain hay, $21,015,960; potatoes, $2,326,984; barley, $2,534,845. The live stock included 863,316 horses, 1,635,042 cattle, 410,366 sheep, and 623,188 swine. The creamery butter made totalled 15,417,070 lb., valued at $5,126,843, and cheese 931,992 lb., valued at $183,860.

Manufactures.—The total value of the output in 1920 was $98,608,556, against $1,313,375 in 1900, the principal manufacturing centres being Calgary ($37,214,562) and Edmonton ($31,939,693).

CAPITAL, EDMONTON. Population, 58,821; Calgary (63,300). Lethbridge, Medicine Hat, Red Deer, and Westaskiwin are the principal cities of the Province.

SASKATCHEWAN.

Area and Population.—The Province of Saskatchewan lies between Manitoba on the east and Alberta on the west, and has an area of 251,700 square miles, the population at the Census of 1921 being 757,510, an increase of 109,675 persons since the Census of 1911.

Government.—The Government is vested in the Lieutenant-Governor, aided and advised by an Executive Council of seven members. The Province is divided into 60 electoral districts.

PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37′-51° 37′ N. latitude and 52° 44′-59° 30′ W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.). and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy. industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses. The *Legislative Council* is appointed by the Crown and consists of 24 members; the *House of Assembly* consists of 36 members, elected by the people, every male British subject aged 21 being entitled to the franchise.

DEFENCE.

Newfoundland contributed 11,922 men to the fighting forces of the Empire during the War, in addition to 3,000 enlisted in Canadian and other forces.

EDUCATION.

Education is denominational, and is assisted by Government. Primary and Secondary schools were attended in 1922 by 55,152 pupils. The Government grants in 1922 amounted to $814,495.

RELIGION.

At the Census of 1911 and 1921 the following statistics were obtained:—

Religion.	1911.	1921.
Roman Catholics	81,177	86,478
Church of England	78,616	84,498
Methodists	68,045	74,334

1921–22	8,269,681	9,127,543	55,030,027

EXTERNAL TRADE.

The external trade of the island for the five years ending June 30, 1921, is stated as follows :—

Year.	Imports.	Exports.	Total.
	$	$	$
1913–14 ...	15,193,726	15,134,543	30,328,269
1918–19 ...	33,297,184	36,784,616	70,081,800
1919–20 ...	40,533,388	34,865,438	75,398,826
1920–21 ...	28,909,727	22,441,267	51,350,994
1921–22 ...	18,209,853	19,478,417	37,688,270

The trade was chiefly distributed in 1921–22 as under :—

Country.	Imports from.	Exports to.
United Kingdom	$2,036,218	$4,866,821
United States	6,127,958	1,911,749
Canada	9,077,168	1,260,225
Portugal	54,583	2,877,714
Spain	115,550	2,628,010

The principal imports are flour, textiles, coal, hardware, and provisions; the principal exports are codfish, cod and seal oil, pulp and paper, herrings, seal-skins, tinned lobsters, copper, copper ore, iron pyrites, and other minerals; the total value of the fishery products in 1921–22 was upwards of $14,448,736.

PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer, a large proportion of which is exported to South America—and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's.

COMMUNICATIONS.

Railways.—There were 904 miles of railway open in 1919. The trans-insular line runs to Port-aux-Basques, *viâ* Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista, Bay de Verde, Hearts Content, Trepassey, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay).

Posts and Telegraphs.—There were 847 post-offices in 1921, dealing with 4,000,000 letters and post-cards, 3,600,000 newspapers and books, and 253,655 parcels. There are 4,600 miles of telegraph line and 965 of telephone wire.

Shipping.—On Dec. 31, 1919, the Mercantile Marine of Newfoundland consisted of 3,326 sailing vessels of 149,197 tons, and 136 steam vessels of 22,205 tons. In 1918–19 the tonnage of vessels entered and cleared at Newfoundland ports was 1,711,668 tons, of which 1,315,704 tons were British.

TOWNS.

The CAPITAL, ST. JOHN'S (population 38,645), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (3,825), Bonavista (4,052), Carbonear (3,320), and Twillingate (3,217).

HIGH COMMISSIONER.

High Commissioner in London (vacant).
Secretary and Acting High Commissioner, Capt. Victor Gordon, 58 Victoria Street, S.W. 1.

LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits (or to Cape Wolstenholme), on the north; the boundaries between Quebec and Labrador being a matter of keen controversy which is expected to come up for settlement before the Judicial Committee of the Privy Council. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 850 miles of coastal America are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek. Pulp and paper mills have been founded at Sandwich Bay and Hamilton Inlet to deal with the almost inexhaustible supply of timber.

PHYSIOGRAPHY.

The Australian Commonwealth includes the Continent of Australia and the Island of Tasmania.

Australia (mainland) is probably the oldest of all land surfaces in either hemisphere, and may be regarded as the largest island or the smallest of the Continents, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between 10° 41′-39° 8′ South latitude and 113° 9′-153° ′39 East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast: on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Executive Council of nine Ministers of State and such honorary Ministers who may be appointed thereto. The Constitution rests on the fundamental law of March 16, 1898, ratified by the Imperial Parliament on July 9, 1900; and the Commonwealth was inaugurated on Jan. 1, 1901. Under the Constitution the Federal Government possesses limited and enumerated powers as surrendered by the federating States, the residuum of legislative power being in the Governments of the various States. Briefly stated, the enumerated powers include authority over commerce and navigation, finance, defence, posts and telegraphs, census and statistics, lighthouses and quarantine, and conciliation and arbitration in extra-State industrial disputes; with authority to assume the control of railways, marriage and divorce, emigration and immigration, currency and banking, and weights and measures.

THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The *Senate* contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The *House of Representatives*, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1921, is made up of 27 for New South Wales, 21 for Victoria, 10 from Queensland, 7 from South Australia, and 5 each from Tasmania and Western Australia, and consists of members of the Liberal, Labour, and Country Parties. Members of the Upper and Lower Houses receive £1,000 per annum, with travelling expenses.

President of the Senate, Hon. Thomas Givens.

Speaker, House of Representatives, Rt. Hon. Alexander Watt, P.C.

THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 6 Judges, having original and appellate jurisdiction, subordinate to the final Appeal Court of the Empire, the Judicial Committee of the Privy Council.

Chief Justice, Rt. Hon. Sir Adrian Knox, P.C., K.C.M.G.	£3,500
Judges, Hon. Isaac Alfred Isaacs; Hon. Henry Bournes Higgins; Hon. Frank Gavan Duffy; Hon. Charles Powers; Hon. George Edward Rich; Hon. Hayden Erskine Starke each	3,000
Arbitration Court, President, Hon. Charles Powers. *Deputy Presidents*, Hon. Sir John Quick; Noel Augustin Webb.	

DEFENCE.

On the 31st December, 1922, the training strength of the Military Forces was 37,156, considerable reductions having been made as the result of the Washington Conference of November, 1921. The administration of rifle clubs is now under civil control; members totalled 41,753 at December 31, 1922. The expenditure on Defence (excluding War expenditure) in 1922-23 was £4,854,141. The total expenditure on defence including war expenditure, was estimated at £47,160,475.

Navy.

Under the *Australian Defence Scheme*, Australia provides and maintains certain ships of war, which will form an Australian squadron of the Royal Navy, under the command of a Commonwealth officer in time of peace, and an integral part of the Eastern Fleet of the Royal Navy in time of war. Ships of the Royal Australian Navy are known as *H.M.A.S.* (His Majesty's Australian Ship), and served with the Royal Naval forces throughout the war. The Australian fleet consists of the *Australia*, *Melbourne* (flag-ship), *Sydney*, *Brisbane*, *Adelaide*, 3 sloops, 11 destroyers, and several auxiliaries. H.M.A.S. *Sydney* destroyed the German cruiser *Emden* at Cocos Island on Nov. 9, 1914. The *personnel* of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The sea-going forces on May 15, 1923, consisted of approximately 370 officers and 3,410 petty officers and men. There is also a R.A.N. Brigade composed of members of the Citizen Naval forces, a section of the Commonwealth Compulsory Military Training System. The Washington Conference of 1921 has had a marked effect on Naval Defence schemes, as all warship building and naval base construction has been suspended, and the ships in commission have been reduced from 25 to 13.

Army.

By a Federal Law of 1910 military training is compulsory on all male citizens between the ages of 12 and 26—in *Cadet Corps* 12–18, and *Citizen Soldiers* 20–26, with short periods of training in the field. The *Peace Effective* is about 110,000 of all ranks; the *War Establishment* about 127,000 upwards. Australia had, up to the end of the Great War, enlisted no fewer than 416,809 men, fully equipped for service in the war: New South Wales, 164,030; Victoria, 112,399; Queensland, 57,705; South Australia, 34,959; West Australia, 32,231; Tasmania, 15,485. The Australian forces, who are unrivalled as mounted infantry, behaved with the greatest gallantry whenever engaged with the enemy. To December 31, 1919, their record of Honours and Decorations was V.C. 65, G.C.M.G. 3, K.C.M.G. 9, C.M.G. 149, K.C.B. 9, C.B. 42, K.B.E. 2, C.B.E. 33, O.B.E. 125, M.B.E. 99, D.S.O. 619, R.V.O. 2, R.R.C. 147, M.C. 2,366, D.C.M. 1,753, M.M. 9,926, M.S.M. 1,176, A.M. 3, D.F.C. 58, A.F.C. 16, A.F.M. 2, and 1,032 foreign decorations. The *Total Casualties* in the A.I.F. from the outbreak of the War to July 31, 1920, were: killed, 59,342; wounded, 166,819; sick, 87,957; not specified, 218—total, 314,336.

The total cost of the War to the Commonwealth Government from August, 1914, to the end of June, 1922, was £473,390,950, of which amount upwards of £107,558,115 was charged against revenue.

Air.

In 1912 approval was given for the establishment, as part of the Army organization, of a Central Flying School for the training of aeroplane pilots. In 1920 it was resolved to establish an Australian Air Force. The permanent strength of the Air Force as at June 30, 1923, was 49 officers and 296 airmen. The sum of £413,997 was provided on the 1922-23 Estimates for Air Force and Civil Aviation purposes.

FEDERAL FINANCE.

Years.	Revenue.	*Expenditure	Balance repayable to States.
	£	£	£

The Customs and Excise Revenue is collected by the Commonwealth and partly repaid to the States at the rate of 25*s*. per head of the population.

DEBT.

The Commonwealth has now undertaken responsibility for the Northern Territory Debt and the Port Augusta-Coodnadatta Railway Debt, whose combined amounts were £3,951,746 at June 30, 1922. The other State Debts remain at the charge of the State Governments. The total of the Commonwealth Public Debt on June 30, 1922, was £416,070,509, including a War Loan from the British Government of £91,453,288. Adding the indebtedness of the States to that of the Federal Government, the total public debts of Australia amounted (June 30, 1922) to about £893,000,000, or about £160 per head of the population.

Banking.—On June 30, 1922, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £295,713,833, and the Australian assets to £302,660,361. At the close of the financial year 1921-22 there were 3,413,280 depositors in the Savings Banks, the amount of deposits being £162,273,233.

PRODUCTION AND INDUSTRY.

The estimated values of the products of Australia in 1920–21 and 1921–22 were:—

	1920–21.	1921–22.
Agricultural	£112,801,000	£81,890,000

* In addition, the following amounts were spent from loans—1916-17, £53,114,237; 1917-18, £56,898,556; 1918-19, £63,622,780; 1919-20, £47,357,381; and 1920-21, £37,166,201.

In 1922 Australia produced 631,514,435 lb. of wool (as in the grease), against 547,502,715 lb. in 1921; 267,071,340 lb. of butter in 1921; 32,653,003 lb. of cheese in 1921, and 58,614,459 lb. of bacon and hams in 1921.

Mines and Minerals.—In 1922 the value of gold produced was £3,539,860 (in 1921, £4,018,685); silver and lead, £1,539,992 (1921); copper, £803,957 (1921); tin, £418,418 (1921); coal, £11,014.831 (1921); the value of all minerals produced in 1921 being £19,977,384.

Manufactures.—In 1921–22 there were in Australia 18,023 industrial establishments, employing 395,425 hands; wages paid amounted to £68,050,861; the value of plant and machinery, lands and buildings, £145,408,138; of materials used, £190,410,265; value added by manufacture, £129,921,500; and total value of final output, £320,331,765.

Labour Statistics.—In 1922 there were 387 Trade Unions with 702,938 members, of whom 86,052 were women. The estimated total number of employed persons over 20 years of age in 1922 was 1,041,915 males and 249,388 females.

The number of unemployed members of trade unions has averaged 9·3 per cent. The average cost of food, groceries and housing combined, in the six capital towns was 5·7 per cent. less in 1922 than in 1921, and 60 per cent. more than in 1911. Wholesale prices declined during 1922 by 7·6 per cent., but were 75·8 per cent. higher than in 1911. Average nominal weekly rates of wage fell from 94*s.* 6*d.* in 1921 to 91*s.* 6*d.* in 1922, but owing to the lower cost of living effective wages were in 1922 12·6 per cent. higher than in 1911. During 1922, 445 industrial disputes occurred, involving 651,029 workers and entailing an estimated loss of £751,507 in wages.

EXTERNAL TRADE.

The Imports and Exports of Australia for the years 1915–16—1921–22 are as follows, the value of gold and silver coin and bullion being included in the totals :—

Year.	Imports.	Exports.	Total.
1916–17	£76,228,679	£97,955,482	£174,184,161

Railways.—The total length of Government (and private) railways open at June 30, 1922, is stated as follows, the private lines being included in the totals and shown in parentheses :—

State.	Miles open.	
New South Wales	5,475	(359)
Victoria	4,375	(58)
Queensland	7,064	(1,265)
South Australia	3,487	(55)

Tasmania	873	(236)
Federal Capital Territory	5	—
Northern Territory	199	—
Total	26,345	(2,848)

The gross earnings of all Government lines in 1921–22 were £38,194,630, working expenses £29,817,970, and net earnings £8,376,660, being at the rate of 2*s.* 10*d.* per train mile, and representing a return on the total cost (£244,353,233) of 3·43 per cent., as against 2·53 per cent. in 1919–20.

A scheme for the conversion of the Melbourne suburban system to electric traction has been completed. About 143 route miles was involved in this scheme.

---

* Goods transferred from one State to another for transhipment to an oversea country are counted as an export from the State whence they were finally despatched from Australia; thus, much of the produce of Queensland is credited to New South Wales and of Tasmania to Victoria.

The great trans-continental railway from West to East, linking up Kalgoorlie in Western Australia with Port Augusta in Spencer's Gulf, a distance of 1,051 miles, was completed in 1917, and the first mail train made a successful run through on 22 October of that year. A scheme is under consideration to connect north and south by a line from Katherine River (Northern Territory) to Oodnadatta (S. Aust.), a distance of 1,011 miles.

Tramways.—There are 628 miles of tramways in Australia, 456 miles of which are of electric, 98 of steam, 46 of cable and 28 of horse traction. The several Governments control 424 miles; municipal authorities, 110 miles; and the remaining 94 miles are operated by private companies and individuals. The principal gauge in use is 4 ft. 8½ inch (496 miles). 101 miles are at 3 ft. 6 inch, and the remainder, 5 ft. 3 inch and 2 ft. 0 inch gauge.

Shipping.—The entrances and clearances of vessels engaged in oversea trade at the various Australian ports in the 6 years 1917–1922 were as follows (tonnage in brackets):—

Year.	Entered.	Cleared.
1916–17	1,486 (3,851,292)	1,500 (3,843,150)
1917–18	1,079 (2,456,757)	1,118 (2,574,993)
1918–19	1,350 (3,239,060)	1,264 (2,941,426)
1919–20	1,476 (4,041,544)	1,505 (4,044,963)
1920–21	1,830 (4,758,916)	1,844 (4,744,102)
1921–22	1,567 (4,560,381)	1,544 (4,520,897)

Of the vessels entered (1921-22), 1,224 were under the British flag (Australia, 346, of 589,175 tons; U.K., 729, of 2,802,487 tons; N.Z., 80, of 103,471 tons; other British, 69, of 142,990 tons); and 343 under foreign flags (Dutch, 42, of 134,662 tons; French, 40, of 69,033 tons; Japanese, 73, of 218,564 tons; Norwegian, 54, of 123,218 tons; United States, 52, of 139,686 tons; other foreign, 82, of 237,095 tons).

Shipping entering the ports of the capital cities during 1921–22 was: Sydney 8,482 vessels of 7,541,361 tons, Melbourne 4,530 (5,608,013), Brisbane 971 (2,215,273), Adelaide (exclusive of coastwise) 898 (3,040,229), Fremantle 697 (2,528,464) and Hobart 531 (542,746).

Posts and Telegraphs.—In year ended June 30, 1922, there were 8,381 post and receiving offices, dealing with 778,057,333 letters, &c.; there were 6,641 telegraph stations, with 147,636 miles of wire, transmitting and receiving 21,077,443 cable and telegrams in 1921–22. At the end of year, 1921–22, 258,477 *Telephones* were connected with 2,703 telephone exchanges; 220,636,629 "local" and 13,968,169 "trunk line" calls were recorded for the year.

NORTHERN TERRITORY.

The Northern Territory occupies the centre of the Australian continent between 129°—138° East longitude as far as 26° South latitude, and its administration was taken over by the Commonwealth on Jan. 1, 1911.

The area is estimated at 523,620 sq. miles. The population on March 31, 1923, was 3,590 (exclusive of full-blood aboriginals).

Part of the country is desert, but large portions of land are suitable for tropical and semi-tropical agriculture, and the Federal Government grants suitable areas rent free for the original settler's lifetime or for 21 years (whichever shall be longer). The staple industry is pastoral, cattle and horses do well south of the 15th parallel. The chief grasses are Mitchell and Flinders; also pigs thrive well, but sheep-raising has not proved the success it once promised to be. Many grants have been taken up, and a considerable area has been settled and improved. Extensive meat freezing works have been erected near Darwin, which, under normal conditions, will greatly enhance the value of locally bred cattle, which hitherto have been driven to other States for disposal. Owing to adverse circumstances, the meat works have been closed since 1921. For the months of April to September the climate is delightful. From October to December it is hot and humid; from January to March is the wet season, when travelling becomes extremely difficult. There are thousands of square miles of first-class pasturage which will one day carry millions of cattle. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable from 40 to 100 miles from their entrance for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead and tin being indicated, and when communications are opened up, the industry will become important.

The only railway is from Darwin to Emungalan (200 miles). A further extension to the head of the Roper River (80 miles) will be proceeded with in the near future, the permanent survey having been completed. The policy of the present Government is to link up the Territory with the other States by means of a trans-continental railway.

Darwin, the seat of Government, occupies an evated site 80 feet above high-water mark, verlooking Port Darwin, one of the finest harours in Australia, and contains the offices of he Administrator and officials of the Territory. he cable owned by the Eastern Extension Comany lands at Darwin from Singapore. The town is ealthy and free from malaria. The Darwin Botanal Gardens are about 1½ miles from the town.

PAPUA.

The Territory of Papua was placed under the uthority of the Commonwealth of Australia 1906. The Territory of Papua comprises a art of the New Guinea mainland situated etween the meridians of 141° and 150°50′ E. ngitude, and between the 5th and 12th parallels South latitude; also the Trobriand Group of lands, Woodlark, the d'Entrecasteaux Group, e Louisiades, the Conflict Group, and the aughlan Group. The total area of Papua is ,540 sq. miles, of which 87,786 are on the mainnd. There is an Executive Council of seven embers who, with three non-official members, rm the Legislative Council. The White poption in 1922 was 1,104. It is not possible to ake a reliable estimate of the number of atives owing to the fact that much of the ountry is unexplored. The official estimate is 0,000. In 1922, 60,314 acres were under crops 6,515 coconuts, 7,465 rubber and 5,822 sisal emp).

Generally speaking, Papua is a mountainous ountry. Towards the Netherlands border the ountains subside and give place to large areas low country, which becomes swampy along e coast. The N.E. shores are mostly bold, but e great ranges are not so conspicuous. The lands are mostly mountainous. Owing to heavy infall Papua is well watered and possesses a rge number of streams. The best known rivers e Fly (650 miles long and navigable by steam unch for 500 miles) and Purari. The climate favourable to the cultivation of all tropical roducts.

CAPITAL, Port Moresby.

TERRITORY OF NEW GUINEA.

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 8° S., and in longitude between 140° E. and 156° E. It consists of Kaiser Wilhelm Land, Bismarck Archipelago, and the two northernmost Solomon Islands (Bougainville, and Buka), covering in all a total area of 92,000 square miles. Kaiser Wilhelm Land, which was the German share of the New Guinea Mainland, is 70,000 square miles in area. The principal river is the Sepik, which is navigable for 250 miles. The Bismarck Archipelago has an area of 18,000 square miles, the best known islands being New Britain, New Ireland, New Hanover, Duke of York Islands, and the Admiralty Group. The Solomon Islands are 4,300 miles in area.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1921-22 there were 173,272 acres under crops (coconuts, 168,060; rubber, 3,001). The White population in 1921 was 1,288; the Native population in 1921 was 187,517. (Natives living in areas not under complete Government influence are not included in the above total, as no reliable estimate can be made.)

Australia has full power of administration and legislation over the Territory as an integral part of the Commonwealth, and may apply to it her own laws. The mandatory must promote to the utmost the material and moral well-being and the social progress of the inhabitants. The natives must not be militarily trained, and no naval and military bases are to be established. The mandate was received in April, 1921, and civil administration was proclaimed to commence from 9th May, 1921.

Religions.

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1921, number 1,027,301; Roman Catholic 482,575, Presbyterian 219,932, Methodist 181,977, Congregational (Independent) 22,235, Baptist 24,722, Salvation Army 9,490, and Hebrew 10,150.

PHYSIOGRAPHY.

Relief.—The Eastern or coastal district is traversed by a mountain range known as the Great Dividing Range, the names distinguishing the various portions of the Range in N.S.W. being (from N. to S.), Macpherson, New England, Liverpool, Main, or Blue Mountain, Cullarin, Gourock, Monaro, and Muniong Ranges—the highest points being Mount Kosciusko, 7,328 feet, and Townsend 7,266 feet.

Rivers.—The eastern or coastal district is watered by the Tweed, Brunswick, Richmond, Clarence, Bellinger, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western portion of the country is not so well watered, but immense reservoirs are being constructed for irrigation purposes, and many artesian bores have been laid down. The Darling and the Murrumbidgee are both tributaries of the Murray, which has a total length of 1,600 miles, 1,200 miles forming part of the boundary between the States of New South Wales and Victoria.

Climate.—The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63·1°; the mean temperature in the shade for the north coast is 66° to 69°, south coast 54° to 63°, northern tableland 56° to 59°, southern tableland 45° to 57°. Western slopes, the mean annual temperature ranges from 67° in the north to 60° in the south. Western Division from 63° to 69°.

GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. Members of the *Legislative Council* (84 in August, 1923), are appointed by the Crown for life. Members are not entitled to remuneration, but travel free on the State railways and tramways. The *Legislative Assembly* consists of 90 members, representing 24 electoral districts. Each member of the Legislative Assembly receives £600 per annum, and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. Several women have since contested seats, but none has been elected. With few exceptions all natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904. The Proportional Voting System is in force. The ballot papers contain the names of candidates in alphabetical order and voters are required to mark each candidate in the order of preference. At the last State General Election in March, 1922, of 636,662 male electors enrolled and qualified to vote in contested electorates 466,949, or 73·3, voted, and similarly of 614,361 female electors 408,515, or 66·5, voted.

Crown Solicitor, J. V. Tillett £1,800

EDUCATION.

Education.—Education is compulsory between the ages of 7 and 14 years. It is non-sectarian and free at State primary schools. The total enrolment in 1922 in 3,213 State schools was 326,320, and the average daily attendance 254,382. The State expenditure on Education (exclusive of Technical Education) was £3,733,831. The University of Sydney, with which 5 colleges are affiliated, including the Women's College, was incorporated in 1851, and had 3,005 students (2,293 male and 712 female) in 1922. The total number of students at State Technical classes numbered 21,328, and 1,094 attended at the State Agricultural College and Farms. In addition to the State schools there were, in 1922, 682 private colleges and schools, with 80,125 scholars, exclusive of many business and shorthand schools and schools at Charitable Institutions, etc.

FINANCE.

The Revenue and Expenditure and Public Debt of New South Wales for the five years ended June 30, 1923, are stated as under:—

Year.	Revenue, including Advances repaid.	Expenditure, including Transfers and Advances.	Public Debt.
	£	£	£
1919	23,448,166	23,233,398	147,174,536
1920	28,650,496	30,210,013	152,776,082
1921	34,031,396	34,476,892	164,336,492
1922	35,637,820	36,966,525	176,674,387
1923	36,145,944	35,342,436	183,571,556

To the total revenue during 1921-22, Railways and Tramways contributed £19,145,082; and other Business Undertakings, £2,587,246. A sum of £2,632,036—equal to £1 4*s.* 9*d.* per head of the population—was returned to the State by the Commonwealth Government, in lieu of Customs and Excise revenue collected by the latter. Revenue from Taxation amounted to £7,249,017. Included in the total Expenditure were the following:—Interest upon Public Debt and Special Deposits, £1,604,687 (exclusive of £6,142,519 charged to Business Undertakings); Public Instruction, £4,085,177; Business Undertakings, £15,530,763. Similar details for 1922-23 are not yet available.

Banking, &c.—There were (March 31, 1923) 16 banks within N.S.W., with total assets, £137,146,842, including advances, £109,402,551; coin, bullion, and Australian Government Notes, £21,374,758; and liabilities, £113,547,716, including deposits, £111,234,853. The savings bank deposits on March 31, 1923, amounted to £61,847,306, representing 1,233,051 depositors. The amount assured in *Life Assurance* Societies in New South Wales in 1921 was £72,065,625 Ordinary, and £11,711,732 Industrial, being £30 1*s.* 3*d.* and £5 10*s.* per head of population. The membership of *Friendly Societies* was 209,133, and the funds at June 30, 1922 were £2,578,937. Members of *Trade Unions* numbered 263,487, the funds of 213 Unions at Dec. 31, 1921 being £199,715.

Shipping.—Excluding coastal trade, 3,062 vessels entered ports of N.S.W. during 1922-23, the net tonnage being 8,408,171; the clearances were 3,028 vessels of 8,282,384 net tonnage. Sydney is the chief port. In 1922-23 the shipping entries, including coastal, were 8,377 vessels of 8,813,432 net tonnage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and six patent slips.

Railways.—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 158 miles, are controlled by the State. At June 30, 1923, the mileage of the State railways open for traffic was 5,318, the capital cost amounted to £89,276,871, and the net earnings for the year 1922-23 to £4,571,359, or 4*s.* 2¾*d.* per train mile. There were also 225 miles of State tramways, the capital cost being £9,975,031, and the net earnings £505,808, or 4*d.* per tram mile.

The population to each mile of railway line open was 405, and the area 58 square miles.

Posts, Telegraphs and Telephones.—The postal, telegraphic, and telephonic services are administered by the Federal Government. In 1921-22 there were 2,588 post offices in New South Wales. The postal matter carried included 240,088,479 letters and postcards, 66,381,106 newspapers, 24,951,225 books, packets and parcels, and 8,115,582 telegrams, including 522,003 cablegrams, were received and despatched. The telephone line connections numbered 80,042.

TRADE.

The oversea imports into New South Wales during 1922-23 were valued at £55,010,160, and the oversea exports at £42,591,254.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of the State; 4,445,848 acres, excluding areas double-cropped, were under cultivation during the year ended June 30, 1922, producing 42,767,000 bushels of wheat, 3,976,300 bushels of maize, 1,169,900 bushels of oats, besides other kinds of grain, with 57,835 tons of potatoes and 3,386 cwt. of dried leaf tobacco. Sugar-cane to the extent of 149,474 tons was crushed; and 627,105 gallons of wine, and 2,135,693 bushels of citrus fruit, and 433,533 cases of bananas; almost every kind of fruit and vegetable is grown. The area sown for wheat for the year 1922–23 was 3,907,360 acres, including 336,958 acres which were fed off. The wheat yield was 28,594,000 bushels of grain and 655,500 tons of hay.

Land Alienation.—The total extent of land alienated and in process of alienation on June 30, 1922, was 64,365,346 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 112,037,110 acres.

Live Stock.—The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, which was introduced in 1797. On June 30, 1922, there were 669,800 horses, 974,087 dairy cows, 2,572,443 all other cattle, 37,177,402 sheep, 383,669 swine, 36,190 goats, and 1,384 camels. In 1921–22, 285,418,000 lb. (stated as in the grease) of wool were produced, in addition to 630,380 cwt. of tallow, 100,672,581 lb. butter, 7,367,057 lb. cheese, and 20,422,870 lb. bacon and ham. During 1921–22 there were 137,700 persons permanently employed in rural occupations, 120,900 being males, and 16,800 females.

Values of Rural Industries.—The agricultural industry was valued in 1921–22 at £20,261,000, dairying and farm-yard produce at £12,914,000, and pastoral industry at £23,657,000, a total of £56,832.

Forests, Fisheries and Trapping.—The value of these industries in 1921–22 was £3,628,000, and 6,900 persons were employed.

Mining Industry.—The goldfields were discovered in 1851. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum, alunite, wolfram, scheelite, molybdenite, cobalt, marble, and kerosene shale, diamonds, rubies, opals, and other precious stones are also found. The total value of minerals won during 1922 was £12,958,008, coal accounting for £8,507,946, silver, silver lead and ore £2,379,396, and gold £107,139. The value of machinery at all mines was £8,143,540, and tools used, £214,559. The value of land, buildings, &c., was £3,704,782. The mining industry gave employment to 26,269 miners during the year.

Manufacturing Industry.—In 1921–22 there were 6,356 manufactories and works; the employees numbered 148,876, of whom 112,362 were males and 36,514 females, the amount of £26,783,242 being paid in salaries and wages. Male workers received on an average £218 0*s.* 6*d.* and females £91 12*s.* 4*d.* The capital value of land, buildings and fixtures amounted to £32,052,303, and of machinery, tools and plant £35,229,530. The machinery in use represented 559,106 h.p., including steam, 358,799 h.p.; gas, 18,839 h.p.; electricity, 178,419 h.p.; water, 104 h.p.; oil, 2,945 h.p. The value of goods manufactured or work done was £132,820,065; materials used, £82,090,396, and fuel consumed, £3,983,730; the production, *i.e.*, value added to raw materials, was £46,745,939.

The principal products of the factories during 1921–22 were:—

The production of steel during the year 1922 was, steel, 31,183 tons; rails, 90,545 tons; bars and sections, 73,494 tons; plates, 80 tons, billets, 16,888 tons.

The control of the fisheries of the State is in the hands of the Board to supervise the industry, and a Commission administers the Forestry Act. The value of production of fisheries, forests and trapping, in 1921–22, was £3,628,000. The total value of all primary industries in 1921–22 was £71,705,000, manufacturing £46,746,000, making a total for all industries £118,451,000, which is equal to £55 13*s.* 2*d.* per head of population.

INDUSTRIAL ARBITRATION.

Matters relating to the conditions of industrial employment in New South Wales are determined by a Court of Industrial Arbitration, which is empowered to make awards fixing the lowest rates of wages, the hours and times of work, rates of payment for overtime, &c., and the proportionate number of apprentices and improvers in any industry, and granting preference of employment to members of any trade or industrial union of employees. Industrial agreements between employers and employees may be enforced as an award. Awards were formerly made by subsidiary tribunals known as Wages or Industrial Boards, constituted for each industry, but their functions are now absorbed by Judges of the Industrial Arbitration Court. At June 30, 1922, there were 326 awards and 107 industrial agreements in force. The industrial laws provide for the registration of industrial unions of employers and employees, and for mediation in industrial disputes. Under certain conditions strikes may be recognised as lawful, except strikes by Government employees, or by persons engaged in military or naval contracts, or by employees in an industry of which the conditions are regulated by award or industrial agreement; but when an award has been in operation for twelve months, the employees may decide by secret ballot to withdraw from its conditions.

When a strike occurs or is contemplated, the Minister for Labour may order a secret ballot to ascertain if the majority of the employees favour a strike.

A "Board of Trade of New South Wales" was constituted in 1918 with extensive powers regarding industrial matters, one of its functions being to declare the rate of living wage for adult employees of each sex, to be used as a standard in determining rates of wages.

A Declaration made April 10, 1923, fixed the Living Wage for adult employees as £3 19*s.* per week for males and £2 per week for females.

Industrial matters which extend beyond the limits of one State are determined by the Commonwealth Court of Arbitration and Conciliation.

LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,447 square miles in the sparsely-populated western division, the State is divided into 185 municipalities and 136 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is almost wholly on the unimproved capital value of land, which in 1921 was £117,621,672, for municipalities, including the city of Sydney, and £130,834,456, for shires.

1921	5,079,601	1,557,388

TOWNS.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 188 miles; the depth of water at the Heads is not less than 80 feet, and at the wharves from 30 to 50 feet. There are extensive plants for loading and coaling ships, and for storing and loading grain in bulk. For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The total area of water in the port is 14,284 acres, of which 3,000 acres have a depth of from 35 feet to 160 feet, the rise and fall of the tide is from three to six feet. The city extends four miles north and south by three miles east and west, and contains 135½ miles of streets, and a population of 109,970 (Dec., 1922); or, including suburbs, 2,037 miles of streets, and a population of 955,900. In addition to the Government buildings, there are the branch Royal Mint, the University, National Art Gallery, museums, zoological gardens, free public libraries, observatory, conservatorium of music, two cathedrals, and numerous churches. The parks within the metropolitan area are 4,714 acres in extent, in addition to which the National Park measures 33,747 acres and Kuring-gai Chase 35,322 acres. Kunnell, 248 acres and Parramatta Park, 25 acres. Other large towns are Newcastle (with suburbs), 87,470; Broken Hill, 22,700; Bathurst, 9,350; Bankstown, 12,460; Armidale, 5,380; Fairfield, 5,760; Dubbs, 5,700; Goulburn, 11,730; Granville, 14,370; Parramatta, 15,050; Lismore 9,220; Maitland, 12,360; Grafton and South Grafton, 6,060; Albury, 7,970; Tamworth, 7,310; Lithgow, 12,940; Wagga Wagga, 8,200; Orange, 7,570; Aubrn, 14,770; Wollongong 6,980; Katoomba, 9,670; Lidcombe, 11,040; Liverpool, 6,370.

Approximate time in transmission of mails from London to Sydney, 32 days.

DEPENDENCY.

LORD HOWE ISLAND (436 miles north-east of Sydney). Lat. 31° 33′ 4″ S., Long. 159° 4′ 26″ E. Pop., Dec., 1921, 111. The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control. Office, Chief Secretary's Department, Sydney.

II.—VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles, the entire area being 87,884 square miles.

Religion.

There has been no State aid to religion since 1875. Members of the Church of England in 1921 numbered 601,809, "Protestants" 18,636, Presbyterians 257,072, Methodists 183,829, Baptists 32,305, Church of Christ 22,250, Independents 15,893, and Roman Catholics 322,565.

PHYSIOGRAPHY.

Relief.—The *Australian Alps* and the *Great Dividing Range* pass through the centre of the state, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys.

Rivers.—The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The mean temperature over a period of 67 years was 58·4° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 136, and the average yearly rainfall was 25·65 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor appointed by the Crown, aided by an Executive Council of 12 members.

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 247,204 children on the registers in 1921, the average attendance being about 68 per cent. *Secondary Education* is principally under private control, 59,922 pupils being in attendance at the 486 schools in 1921. There is a State-aided *University* at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newman) and a School of Mines at Ballarat.

FINANCE.

The revenue and expenditure and State Debt for five years are given as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1918	12,672,787	12,631,169	78,192,361
1919	13,044,088	12,979,407	80,678,644
1920	15,866,184	15,752,459	87.647,739
1921	19,054,475	18,941,698	97,317,831
1922	20,357,733	20,297,279	109,099,199

Banking, &c.—There were (Dec. 31, 1922) 15 banks, with total assets £85,914,172, within the State, and liabilities £91,368,158. The savings bank deposits at June 30, 1923, amounted to over £50,000,000.

PRODUCTION AND INDUSTRY.

Agriculture.—Agriculture has of late years much improved, wheat and oats chiefly being cultivated; the dairy industry has also made marked progress. Of the 7,054,874 acres under cultivation in 1922–23, 2,644,314 were wheat crops and 492,356 oats, and 1,261,408 acres were cut for hay. In 1921–22, 1,335,066 gallons of wine were produced. The estimated value of production in 1921–22 was (including manufacturing values) £93,086,325.

Live Stock.—There were in 1923, 794,898 milch cows, producing 82,981,570 lb. of butter and 5,675,909 lb. of cheese; and 990,762 other cattle, 11,765,520 sheep, 294,962 pigs, and 494,947 horses.

Minerals.—The gold production in Victoria has declined very considerably, the amount produced in 1922 being 106,872 oz. (£453,962). Other minerals raised consisted principally of tin, copper, coal, and antimony.

Trade and Industry.—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (6,753 factories, &c., employing 144,876 hands in 1921–22) are mainly for home consumption. The chief exports oversea are: wool, lead, butter, wheat, flour and biscuit, leather, skins and hides, tallow, live stock, jams and jellies, milk and cream and preserved and frozen meats. The principal oversea imports of the State are iron and steel, machines and machinery, metals and metal manufactures, silks, velvets, &c., apparel and attire, bags and sacks, tea, cottons and linens, woollens and timber.

TOWNS.

MELBOURNE, the chief city and seat of federal government, is an episcopal see, and is distinguished for its university, museum, mint, public gardens, observatory, public library, hospital, its churches and other institutions. With its suburbs it contained (31st December, 1922), a population of 816,800 inhabitants. Other towns are Ballarat, 39,417; Bendigo (Sandhurst), 33,419; Geelong, 36,415; Castlemaine, 7,169; Warrnambool, 7,900; Mildura, 5,500; Ararat, 5,400; Wonthaggi, 5,430; and Hamilton, 5,100.

Transmission of mails, approximate, 30 days.

III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

POPULATION.

Year.	Males.	Females.	Total.
1917	213,691	233,139	446,830
1918	219,723	237,965	457,688
1919	240,226	241,389	481,615
1920	245.325	245,852	491,177
1921	252,170	250,433	502,603
1922	257,501	255,909	513,410

NOTE.—About 30,000 were on Active Service during War.

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1917	11,326	4,365	3,252
1918	11,357	4,390	3,190
1919	11,060	5,475	3,855
1920	12,028	5,083	4,881
1921	11,974	5,982	4,383
1922	12,001	4,608	4,143

Birth rate 23·71, death rate 9·1, marriage rate 8·18 per 1,000 of population. Infantile mortality, 47·33 per 1,000 births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows:—Church of England, 165,968; Methodists, 122,634; Congregationalists, 15,289; Baptists, 23,033; Lutherans, 24,606; Roman Catholics, 64,054; Presbyterians, 22,659; and Churches of Christ, 15,039.

PHYSIOGRAPHY.

Relief.—The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude (the northern boundary since the transfer to the Commonwealth of the Northern Territory), is also unpromising in comparison with the fertile land that surrounds the hill country of the east.

Rivers.—Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate.—The mean annual temperature at Adelaide is 63°, the winter temperature (July–August) averaging 53°, and the summer (November–March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight.

The average annual rainfall at Adelaide, derived from 84 years' record, is 21·08 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland.

In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years; and a *House of Assembly* of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 86,513 (21,401 women) in 1922, those for the Assembly numbering 277,760.

President of the Legislative Council, Hon. Sir J. L. Stirling, K.C.M.G.	£800
Speaker of the House of Assembly, Hon. Sir Richard Butler	800

THE JUDICATURE.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and three Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 50 annually, which is at the rate of 1 in every 10,000 of the population.

Chief Justice and Judge of Vice-Admiralty, Hon. Sir G. J. R. Murray, K.C.M.G., B.A., LL.B.	£2,500
Second Judge, Hon. Sir J. Hannah Gordon	2,000
Third Judge, Hon. T. S. Poole, LL.B.	2,000
Fourth Judge, Hon. H. A. Parsons, LL.B.	2,000

EDUCATION.

Public Education (*Primary, Secondary and Technical*) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free; there are 991 State schools, with 2,101 teachers and 81,079 scholars; the expenditure in 1921–22 was £491,000. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 171, with 816 teachers and 13,951 scholars. There is an endowed *University* at Adelaide, founded in 1874, with 781 undergraduates, and 1,166 other students; all classes are open to women. A State School of Mines and Industries has also been established with branches at 7 country centres, and technical education is also provided. The public library, museum, art gallery and local institutes are supported or assisted by the State.

FINANCE.

The Revenue and Expenditure and Public Debt for the five years ended June 30, 1919–1923, are stated as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1919	5,798,313	5,876,811	42,650,206
1920	6,582,788	6,457,039	43,753,146
1921	7,151,366	7,543,640	48,556,552
1922	7,771,752	7,826,241	54,388,688
1923	8,429,322	8,418,000	...

Most of the revenue is derived from inland revenue, railways, and territorial receipts, while most of the expenditure is on account of public works and railways, and interest on public debt.

Banking.—There are 10 banking institutions in Adelaide, in addition to the Commonwealth Government Bank, with 295 branches and agencies, and £36,591,527 authorised capital, having a total liability of £23,233,221 and assets £19,525,751 in June, 1922. The Savings Banks on June 30, 1922, had 414,570 depositors with £16,931,678, to their credit. Over 80 per cent. of the population have Savings Bank accounts. The total banking deposits, £37,373,764, averages nearly £75 per head of population.

PRODUCTION AND INDUSTRY.

Agriculture (1921-22).—Of the total area about one-half is farmed or grazed, and 5,300,000 acres cultivated—under wheat 2,500,000 acres, hay 600,000, oats 200,000, barley 200,000, orchards and vineyards 75,000, and potatoes 6,000 acres, with 1,700,000 acres lying fallow. Wheat produced 29,000,000 bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. There were 41,500 acres of vines, with a production of 6,370,000 gallons of wine; 76,000 cwt. of currants, and 66,000 cwt. of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to oversea countries, principally the United Kingdom and the other Australian States. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock (June 30, 1922).—There were 6,257,052 sheep, cattle 419,197, horses 267,639, pigs 87,667.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c., are found, the total mineral output being valued at £330,000 (1922). Nearly £33,000,000 of copper have been produced since the foundation of the State.

Manufactures.—In 1922 there were 1,432 factories, employing 31,171 hands, the gross value of the output being £23,854,857, and the wages paid £5,313,927. Plant, machinery, land, and buildings were valued at £9,607,286.

Value of Production, 1921–22.—Crops, total value, £11,610,373, average per head, £23 (cereals, hay, &c., £9,482,093; orchards, vineyards and gardens, £2,128,280); manufactures, £9,621,280; pastoral, £4,148,057; minerals £902,549; dairying, £1,839,178; poultry, &c., £1,027,634; fisheries and game, forestry, &c., £825,270. *Total value of production*, £29,974,341, average £60 per head.

Trade and Commerce, 1921-2.—The total value of the *Imports* was £9,047,242 (U.K. £5,733,234, or 63 per cent.); other British countries £1,176,429, or 13 per cent.; foreign countries £2,137,579, or 24 per cent.). The total value of the *Exports* was £14,747,260 (U.K. £6,727,610, or 46 per cent.; other British £3,022,889, or 20 per cent.; foreign countries £4,996,761, or 34 per cent. The main items are wheat, flour, wool, meats, skins and hides, butter, tallow, leather, minerals, wines, fruits (fresh and dried), and minerals from Broken Hill.

Communication.—There are 3,500 miles of railway in South Australia, 118 miles of electric tramways, 44,000 miles of roads and several good harbours. The River Murray is used for conveying the produce grown on the irrigation settlements along its banks. There are 805 post offices in the State, which transmit annually 50,000,000 letters, 9,000,000 newspapers, 6,000,000 packets and parcels, and also 2,100,000 telegrams.

Shipping (1921-2).—Ships entered numbered 1,087, tonnage 3,524,380; British 1,002 (3,236,140 tons), foreign 85 (288,240 tons).

TOWNS.

ADELAIDE, the chief city and capital, population (1922) 270,329, inclusive of suburbs within 10 miles radius. Other towns are Moonta (4,000), Kadina (3,500), Wallaroo (5,500), Port Pirie (10,500), on the east and Port Augusta (3,000) on the west of Spencer Gulf, and Kapunda (2,200), Gawler (4,500), and Peterborough (2,500) on the line from Adelaide to [the north, Victor Harbor (1,800) in the south, and Mt. Gambier (6,000) in the south-east.

Since 1861 no State aid has been afforded to religion. At the Census of 1921 there were 309,786 Church of England, 172,662 Roman Catholics, 91,610 Presbyterians, 77,566 Methodists, 17,891 Lutherans, 14,735 Baptists, and 44,132 other Christians, with 4,267 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY.

Relief.—The *Great Dividing Range* on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Kirby's Range* divides the land into a northern and southern watershed.

Rivers.—The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the average temperature for 1922 was 69·4°, the maximum and minimum shade temperatures being 99·3° and 38·8°; mean barometer, 29·960. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1922 was 35·740 inches, and there were 109 wet days.

1923	12,599,403	12,784,382	88,005,001

Banking.—The banking assets (1922) £28,181,372, liabilities £29,390,301. The deposits on Dec. 31, 1922, were £28,098,929. The Commonwealth Bank of Australia also has a branch in Queensland. The assets on 31st December, 1922 amounted to £21,405,552, and the liabilities to £26,195,617. These liabilities include the depositors' balances in the hands of the Commonwealth Savings Bank Branch, amounting to £19,962,094 (equal to an average of £57 13s. 9¼d. to each depositor).

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 17,244,544 acres; under a system of deferred payment, 7,833,127 acres more are in process of alienation, and an additional area of 185,348,400 acres leased out for sheep and cattle runs, 78,983,282 acres for grazing farms and homesteads, 34,610,680 acres are held under occupation licence, 511,137 acres under gold-mining and mineral lease, 258,706 for special purposes, and 3,166,134 acres perpetual lease, and scrub selections 77,283 acres, leaving 101,075,458 practically unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about 21 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pine-apples, grapes, bananas, coco-nuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1922, 287,785 tons of sugar were produced. The live stock in 1922 included 6,955,463 cattle, 17,641,071 sheep, 714,055 horses, and 160,617 pigs. Wool, meat, and butter are the principal products.

Forestry.—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 4,536,601 acres. There are three types of forest —the cabinet wood jungles, which yield the spangled silky oak wood, the valuable so-called "Maple," really Silkwood, the rich red Rose mahogany, and many other softwoods and medium hardwoods suitable for ornamental joinery; the widespread Eucalyptus type, which produces the extraordinarily strong and durable constructional hardwoods suitable for girders, sleepers, piles, flooring, &c.; and most important at the present state of development, the pine forests, the products of which are in high request for ordinary building, joinery, and ply-wood purposes. The Queensland pines are of superfine quality, consisting largely of Kauri equivalents, such as Hoop and Bunya Pine, and in small supply Kauri itself. The western Cypress pines yield an aromatic coniferous hardwood which is white ant resistant and is used for common house-building purposes. In 1922 the wealth produced by the timber industry of Queensland was between three and four million pounds, and there were 4,314 hands employed in the sawmills alone. At the end of 1922 some 7,000 acres of cut-out State forests had been subjected to reforestative treatment by the Queensland Forest Service which employs 380 men, and is engaged actively in timber farming and wood-trading operations.

Minerals.—The total mineral output in 1922 was £1,825,280. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1922 was valued at £342,300; silver, £42,959; copper, £321,535; tin, £99,758; coal, £840,472; wolfram, £98; molybdenite, £236; lead, £66,391; opals and gems, £35,862; arsenic, £21,320; cobalt, £20,332.

Commerce.—The chief articles of export oversea, the produce of the State, in 1921–2 were: Wool, £10,861,403; meat, including extract, and bacon, hams, and pork, £2,047,527; hides and skins, £249,194; tallow, £339,643; butter, cheese, and milk, £3,170,474.

TOWNS.

CAPITAL, Brisbane. Population Census, Dec. 31, 1921, 217,714. Estimated Dec. 31 1922, 230,200.

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane, Rockhampton (24,182), Maryborough (10,635), Townsville (21,348), Port Douglas, Mackay, Thursday Island, Cooktown, Cairns, Bowen, and Bundaberg (9,276). Other places of importance are Ipswich (20,526), Toowoomba (20,702), Charters Towers (9,499), Gympie (6,519), Mt. Morgan (7,214), Warwick, Roma, and Cloncurry.
